Subject: FW: Past-Due Compounding Assignments

Michael,

Following is the informal list that we prepared for yesterday's meeting, which identifies all pending compounding inspection assignments:

[redacted]

Ameridose------New England District -------issued 5/22/07

[redacted]

After our meeting, I asked Samia Nasr, our Compounding Team leader, to reduce the list to the inspections that are the most critical. Those inspections, and information about them, are contained in the attached document:

[redacted]

Any help that you or others can provide in breaking these assignments loose would be terrific. These are all matters for which we're prepared to take enforcement action and moving them forward will directly benefit public health. If you have questions or need more information, please contact Samia [redacted] Thanks very much for your support.

Mike [redacted] -- we're preparing a more comprehensive list of pending assignments across program areas, which I expect to have for you Friday.

-- Steve

[redacted]

List of Assignments with priority

Firm name	Date assignment issued	District	Importance
[redacted]			
Ameridose	05/22/2007	New England	Large scale production of injectables
[redacted]			

Please note that the reasons were mostly being busy, cannot get the SBOP to schedule, more important priorities.
