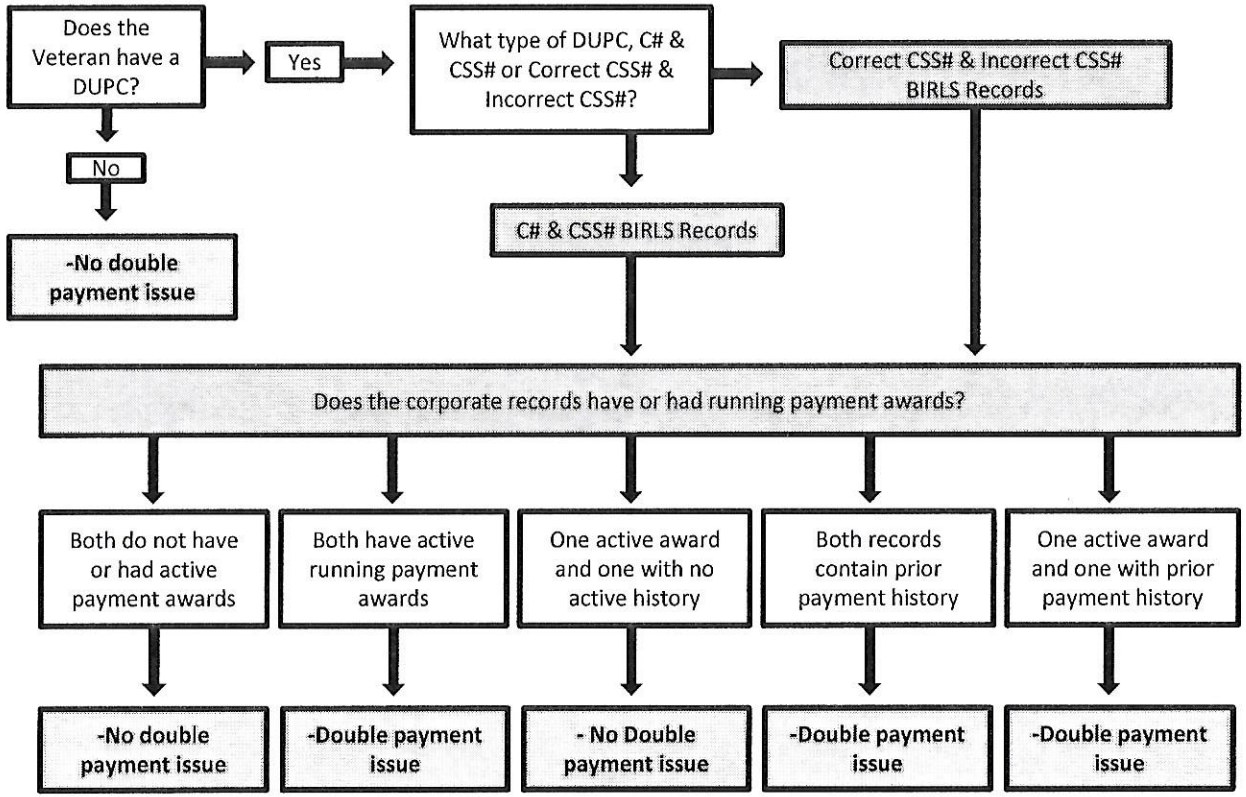
Basic Flow Chart to Identify Duplicate Payments Based Off Duplicate Records



Please Note:

- This flow chart represents a basic guide to identify if double payments are present when a DUPC (Duplicate BIRLS Record) is verified prior to merge.
- Double payments can also be present if a Veteran is associated with two corporate records which can sometimes only be viewed using the corporate inquiry or PID inquiry tab in SHARE.
- Double payments can also occur within Veterans' records for multiple dependents.
- Double payments can be narrowed down easier based off PID numbers since it is the core on how payments are routed.

Flow chart created June 24, 2014 – Ryan Cease RO310
