(j) LABOR-MANAGEMENT COOPERATION.—

(1) IN GENERAL.—Notwithstanding any contrary provision of law, including the National Labor Relations Act (29 U.S.C. 151 et seq.), paragraphs (2) through (7) shall apply with respect to any funding recipient who is an employer and any labor organization who represents or seeks to represent employees of a funding recipient, as those terms are defined in section 2 of the National Labor Relations Act (29 U.S.C. 152).

(2) LABOR PEACE.—Any employer receiving funds under this section shall recognize for purposes of collective bargaining a labor organization that demonstrates that a majority of the employees in a unit appropriate for bargaining who perform or will perform funded work have signed valid authorizations designating the labor organization as their bargaining representative and that no other labor organization is currently certified or recognized as the exclusive representative of any of the employees in the unit pursuant to the National Labor Relations Act (29 U.S.C. 151 et seq.). Upon such showing of majority status, the employer shall notify the labor organization and the National Labor Relations Board (the Board) that it has determined that the labor organization represents a majority of the employees and that it is recognizing the labor organization as the exclusive representative of the employees for the purposes of collective bargaining pursuant to section 9 of the National Labor Relations Act (29 U.S.C. 159).

(3) CERTIFICATION.—Should a dispute over majority status or the appropriateness of the unit arise between the employer and the labor organization, either party may request that the Board investigate and resolve the dispute. If the Board finds that a majority of the employees in a unit appropriate for bargaining has signed valid authorizations designating the labor organization as their bargaining representative and that no other individual or labor organization is currently certified or recognized as the exclusive representative of any of the employees in the unit, the Board shall not direct an election but shall certify the labor organization as the representative described in section 9(a) of the National Labor Relations Act (29 U.S.C. 159(a)).

(4) COMMENCEMENT OF BARGAINING.—Not later than 10 days after receiving a written request for collective bargaining from a recognized or certified labor organization, or within such period as the parties agree upon, the labor organization and employer shall meet and commence to bargain collectively and shall make every reasonable effort to conclude and sign a collective bargaining agreement.

(5) MEDIATION.—If after the expiration of the 90-day period beginning on the date on which bargaining is commenced, or such additional period as the parties may agree upon, the parties have failed to reach an agreement, either party may notify the Federal Mediation and Conciliation Service of the existence of a dispute and request mediation. Whenever such a request is received, it shall be the duty of the Service promptly to put itself in communication with the parties and to use its best efforts, by mediation and conciliation, to bring them to agreement.

(6) ARBITRATION.—If after the expiration of the 30-day period beginning on the date on which the request for mediation is made under paragraph (5), or such additional period as the parties may agree upon, the Service is not able to bring the parties to agreement by conciliation, the Service shall refer the dispute to a tripartite arbitration panel established in accordance with such regulations as may be prescribed by the Service, with one member selected by the labor organization, one member selected by the employer, and one neutral member mutually agreed to by the parties. The labor organization and employer must each select the members of the tripartite arbitration panel within 14 days of the Service's referral; if the labor organization or employer fail to do so, the Service shall designate any members not selected by the labor organization or the employer. A majority of the tripartite arbitration panel shall render a decision settling the dispute as soon as practicable and not later than within 120 days, absent extraordinary circumstances or by agreement or permission of the parties, and such decision shall be binding upon the parties for a period of 2 years, unless amended during such period by written consent of the parties. Such decision shall be based on—

(A) the employer's financial status and prospects;

(B) the size and type of the employer's operations and business;

(C) the employees' cost of living;

(D) the employees' ability to sustain themselves, their families, and their dependents on the wages and benefits they earn from the employer; and

(E) the wages and benefits other employers in the same business provide their employees.

(7) SUBCONTRACTORS.—Any employer receiving funds under this section shall require any subcontractor whose employees perform or will perform funded work to comply with the requirements set forth in paragraphs (1) through (6) above.

(D) expanded eligibility criteria to include all countries with unsustainable levels of sovereign debt;

(2) any implementation challenges that hinder the ability of the Common Framework to provide timely debt restructuring for any country with unsustainable debt that seeks debt relief or debt payment relief, including any refusal of any creditors to participate in equitable burden sharing, including but not limited to failure to share (or publish, as appropriate) all material information needed to assess debt sustainability and inter-creditor equity;

(3) recommendations on how to address challenges identified in paragraph (2);

## **TITLE XII—CLIMATE CHANGE EDUCATION**

**SEC. 71201. FINDINGS.**

Congress makes the following findings:

(1) The evidence for human-induced climate change is overwhelming and undeniable.

(2) Atmospheric carbon can be significantly reduced through conservation, by shifting to renewable energy sources such as solar, wind, tidal, and geothermal, and by increasing the efficiency of buildings, including domiciles, and transportation.

(3) Providing clear information about climate change, in a variety of forms, can remove the fear and the sense of helplessness, and encourage individuals and communities to take action.

(4) Implementation of measures that promote energy efficiency, conservation, and renewable energy will greatly reduce human impact on the environment.

(5) Informing people of new technologies and programs as they become available will ensure maximum understanding and maximum effect of those measures.

(6) More than 3,000,000 students graduate from high schools and colleges in the United States each year, armed with attitudes, skills, and knowledge about the climate that inform their actions.

(7) The effect on the climate, positive or negative, of each of those 3,000,000 students lasts beyond a lifetime.

(8) Those students need to be prepared to implement changes in professional and personal practices, to support and help develop new technology and policy, and to address the coming social and economic challenges and opportunities arising from a changing climate.

(9) It has been demonstrated that the people of the United States overwhelmingly support teaching students about the causes, consequences, and potential solutions to climate change in all 50 States and more than 3,000 counties across the United States.

(10) Only 30 percent of middle school and 45 percent of high school science teachers understand the extent of the scientific consensus on climate change.

Insert after section 30219G the following:

SEC. 30219H. NATIONAL INTELLIGENCE ESTIMATE ON ESCALATION AND DE-ESCALATION OF GRAY ZONE ACTIVITIES IN GREAT POWER COMPETITION.

(a) FINDINGS.—Congress finds the following:

(1) The conventional power of the United States has driven foreign adversaries to a level of competition that does not always depend on military confrontation with the United States.

(2) Rather than challenging the United States in a manner that could provoke a kinetic military response, foreign adversaries of the United States have turned to carrying out gray zone activities to advance the interests of such adversaries, weaken the power of the United States, and erode the norms that underpin the United States-led international order.

(3) Gray zone activity falls on a spectrum of attribution and deniability that ranges from covert adversary operations, to detectible covert adversary operations, to unattributable adversary operations, to deniable adversary operations, to open adversary operations.

(4) To adequately address such a shift to gray zone activity, the United States must understand what actions tend to either escalate or de-escalate such activity by our adversaries.

(5) The laws, principles, and values of the United States are strategic advantages in great power competition with authoritarian foreign adversaries that carry out gray zone activities, because such laws, principles, and values increase the appeal of the governance model of the United States, and the United States-led international order, to states and peoples around the world.

(6) The international security environment has demonstrated numerous examples of gray zone activities carried out by foreign adversaries, including the following activities of foreign adversaries:

(A) Information operations, such as efforts by Russia to influence the 2020 United States Federal elections (as described in the March 15, 2021, intelligence community assessment of the Office of the Director of National Intelligence made publicly available on March 15, 2021).

(B) Adversary political coercion operations, such as the wielding of energy by Russia, particularly in the context of Ukrainian gas pipelines, to coerce its neighbors into compliance with its policies.

(C) Cyber operations, such as the use by China of cyber tools to conduct industrial espionage.

(D) Provision of support to proxy forces, such as the support provided by Iran to Hezbollah and Shia militia groups.

(E) Provocation by armed forces controlled by the government of the foreign adversary through measures that do not rise to the level of an armed attack, such as the use of the China Coast Guard and maritime militia by China to harass the fishing vessels of other countries in the South China Sea.

(F) Alleged uses of lethal force on foreign soil, such as the 2018 attempts by Russia to poison Sergei Skripal in London.

(G) The potential use by an adversary of technology that causes anomalous health incidents among United States Government

personnel.

(b) NATIONAL INTELLIGENCE ESTIMATE.—

(1) REQUIREMENT.—The Director of National Intelligence, acting through the National Intelligence Council, shall produce a National Intelligence Estimate on how foreign adversaries use gray zone activities to advance interests, what responses by the United States (or the allies or partners of the United States) would tend to result in the escalation or de-escalation of such gray zone activities by foreign adversaries, and any opportunities for the United States to minimize the extent to which foreign adversaries use gray zone activities in furtherance of great power competition.

(2) MATTERS INCLUDED.—To the extent determined appropriate by the National Intelligence Council, the National Intelligence Estimate produced under paragraph (1) may include an assessment of the following topics:

(A) Any potential or actual lethal or harmful gray zone activities carried out against the United States by foreign adversaries, including against United States Government employees and United States persons, whether located within or outside of the United States.

(B) To the extent such activities have occurred, or are predicted to occur—

(i) opportunities to reduce or deter any such activities; and

(ii) any actions of the United States Government that would tend to result in the escalation or de-escalation of such activities.

(C) Any incidents in which foreign adversaries could have used, but ultimately did not use, gray zone activities to advance the interests of such adversaries, including an assessment as to why the foreign adversary ultimately did not use gray zone activities.

(D) The effect of lowering the United States Government threshold for the public attribution of detectible covert adversary operations, unattributable adversary operations, and deniable adversary operations.

(E) The effect of lowering the United States Government threshold for responding to detectible covert adversary operations, unattributable adversary operations, and deniable adversary operations.

(F) The extent to which the governments of foreign adversaries exercise control over any proxies or parastate actors used by such governments in carrying out gray zone activities.

(G) The extent to which gray zone activities carried out by foreign adversaries affect the private sector of the United States.

(H) The international norms that provide the greatest deterrence to gray zone activities carried out by foreign adversaries, and opportunities for strengthening those norms.

(I) The effect, if any, of the strengthening of democratic governance abroad on the resilience of United States allies and partners to gray zone activities.

(J) Opportunities to strengthen the resilience of United States allies and partners to gray zone activities, and associated tactics, carried out by foreign adversaries.

(K) Opportunities for the United States to improve the detection of, and early warning for, such activities and tactics.

(L) Opportunities for the United States to galvanize international support in responding to such activities and tactics.

(3) SUBMISSION TO CONGRESS.—

(A) SUBMISSION.—Not later than 1 year after the date of the enactment of this Act, the Director shall submit to the Select Committee on Intelligence of the Senate and the Permanent Select Committee on Intelligence of the House of Representatives the

National Intelligence Estimate produced under paragraph (1), including all intelligence reporting underlying the Estimate.

(B) NOTICE REGARDING SUBMISSION.—If at any time before the deadline specified in subparagraph (A), the Director determines that the National Intelligence Estimate produced under paragraph (1) cannot be submitted by such deadline, the Director shall (before such deadline) submit to the Select Committee on Intelligence of the Senate and the Permanent Select Committee on Intelligence of the House of Representatives a report setting forth the reasons why the National Intelligence Estimate cannot be submitted by such deadline and an estimated date for the submission of the National Intelligence Estimate.

(C) FORM.—Any report under subparagraph (B) shall be submitted in unclassified form.

(4) PUBLIC VERSION.—Consistent with the protection of intelligence sources and methods, at the same time as the Director submits to the Select Committee on Intelligence of the Senate and the Permanent Select Committee on Intelligence of the House of Representatives the National Intelligence Estimate under paragraph (1), the Director shall make publicly available on the internet website of the Director an unclassified version of the key findings of the National Intelligence Estimate.

adversary openly acknowledges as attributable to the adversary.

(c) REQUIREMENT TO DEVELOP LEXICON.—

(1) REQUIREMENT.—The Director of National Intelligence, acting through the National Intelligence Council, shall develop a lexicon of common terms (and corresponding definitions for such terms) for concepts associated with gray zone activities.

(2) CONSIDERATIONS.—In developing the lexicon under paragraph (1), the National Intelligence Council shall include in the lexicon each term (and the corresponding definition for each term) specified in subsection (b)(5), unless the National Intelligence Council determines that an alternative term (or alternative definition)—

(1) Since the onset of the COVID–19 pandemic, crimes and discrimination against Asians and those of Asian descent have risen dramatically worldwide. In May 2020, United Nations Secretary General Antonio Guterres said “the pandemic continues to unleash a tsunami of hate and xenophobia, scapegoating and scare-mongering” and urged governments to “act now to strengthen the immunity of our societies against the virus of hate”.

(2) Over 2 million Asian Americans and Pacific Islanders are working on the front lines of the COVID-19 pandemic in healthcare, law enforcement, first responders, transportation, supermarkets, and other service industries. AAPI workers also make up a large share—between 6 percent and 12 percent based on sector—of the bio medical field.

(3) The United States Census Bureau notes that Americans of Asian descent made up 7.2 percent of the population according to the 2020 decennial census, and that Asian Americans are the fastest-growing racial group in the United States, projected to represent 14 percent of the United States population by 2065.

(4) Since January 2020, there has been a dramatic increase in reports of hate crimes and incidents against those of Asian descent;

(5) According to reports, there are over 10,000 reported cases of anti-Asian American hate incidents and discrimination related to COVID-19 between March 19, 2020 and September 30, 2021;

(6) Local police departments are reporting an exponential increase in anti-Asian hate incidents and crimes. The New York Police Department reported a 343 percent spike in anti-Asian crime in 2021 from 2020, and the San Francisco Police Department reported anti-AAPI hate crimes increased by 567 percent from 2020 to 2021;

(7) Multiple incidents of anti-Asian violence occurred since March 2020, including a woman wearing a mask who was kicked and punched at a New York City subway station, two children and two adults were stabbed at a wholesale grocery store in Midland, Texas, a couple was assaulted and robbed by a group of attackers in Philadelphia, and a 16-year-old boy was sent to the hospital after being attacked by bullies in Los Angeles, California;

(8) Anti-Asian discrimination and hate since the start of the COVID–19 outbreak has continued throughout the pandemic;

(9) Since the start of 2021, there has been a surge in anti-Asian attacks targeting predominately elderly Asian Americans;

(10) On January 30, 2021, an 84-year-old Thai man, Vicha Ratanapakdee, died from injuries sustained from an unprovoked assault while on his routine morning walk in San Francisco, California;

(11) In January 2021, a series of attacks occurred in Oakland’s Chinatown targeting Asian American seniors, the victims included a 91-year-old man, a 60-year-old man, and a 55-year-old woman, who were all violently shoved to the ground in three separate incidents;

(12) In February 2021, victims of anti-Asian violence included a 61-year-old Filipino man who was attacked and slashed across his face on a New York City subway, a Filipino woman in her 80s who was punched in an unprovoked attack while riding a trolley in San Diego, and a 52-year-old Asian woman who was attacked and forcefully shoved while waiting in line outside of a bakery in Flushing, New York;

(13) In December 2021, a 61-year-old Chinese man, Yao Pan Ma, died from injuries sustained from an unprovoked assault in April of 2021 in New York City;

(14) Anti-Asian racism has also resulted in Asian American businesses being targeted for vandalism;

(15) There are approximately 2 million Asian American-owned businesses that generate over \$700 billion in annual revenue and employ millions of workers;

(16) More than 1,900,000 Asian American and Pacific Islander older adults, particularly those older adults who are recent immigrants or have limited English proficiency, may face even greater challenges in dealing with the COVID-19 pandemic, including discrimination, economic insecurity, and language isolation;

(17) The World Health Organization (WHO) and the Centers for Disease Control and Prevention (CDC) recognize that naming COVID-19 by its geographic location or linking it to a specific ethnicity perpetuates stigma;

(18) In 2015, the WHO issued guidance calling on media outlets, scientists, and national authorities to avoid naming infectious diseases for locations to avoid stigmatizing groups of people;

(19) On February 27, 2020, the Secretary of Health and Human Services stated, “ethnicity is not what causes the novel coronavirus” and that it is inappropriate and inaccurate to call COVID-19 the “Chinese virus”;

(20) On February 28, 2020, Dr. Mitch Wolfe, the Chief Medical Officer of the CDC, said, “Stigma is the enemy of public health”;

(21) On March 10, 2020, Dr. Robert Redfield, the Director of the CDC, testified that use of the term “Chinese coronavirus” is wrong and inappropriate;

(22) On January 26, 2021, President Biden issued a Presidential Memorandum “Condemning and Combating Racism, Xenophobia, and Intolerance Against Asian Americans and Pacific Islanders in the United States”.

(b) SENSE OF CONGRESS.—It is the sense of Congress as follows:

(1) The use of anti-Asian terminology and rhetoric related to COVID-19, such as the “Chinese Virus”, “Wuhan Virus”, and “Kung-flu”, has perpetuated anti-Asian stigma.

(2) The use of anti-Asian rhetoric has resulted in Asian Americans being harassed, assaulted, and scapegoated for the COVID-19 pandemic.

(3) The reprehensible attacks on people of Asian descent and the concerning increase in anti-Asian sentiment and racism in the United States and around the world have no place in a peaceful, civilized, and tolerant world.

(4) The United States is a diverse country with a proud tradition of immigration, and the strength and vibrancy of the United States is enhanced by the diverse ethnic backgrounds and tolerance of its citizens, including Asian Americans and Pacific Islanders.

(5) The United States Government should encourage foreign governments to use the official and scientific names for the COVID-19 pandemic, as recommended by the World Health Organization and the Centers for Disease Control and Prevention.

(6) The United States Government and other governments around the world must actively oppose racism and intolerance, and use all available and appropriate tools to combat the spread of anti-Asian racism and discrimination.

“(e) PUBLIC ACCESS REQUIREMENT.—A working waterfront project funded by grants made under this section must provide for expansion, improvement, or preservation of reasonable and appropriate public access to coastal waters at or in the vicinity of a working waterfront, except for commercial fishing or other industrial access points where the coastal State determines that public access would be unsafe.

“(f) LIMITATIONS.—

“(1) Except as provided in paragraph (2), a grant awarded under this section may be used to purchase working waterfront or an interest in working waterfront, including an easement, only from a willing seller and at fair market value.

“(2) A grant awarded under this section may be used to acquire working waterfront or an interest in working waterfront at less than fair market value only if the owner certifies to the Secretary that the sale is being entered into willingly and without coercion.

“(3) No Federal, State, or local entity may exercise the power of eminent domain to secure title to any property or facilities in connection with a project carried out under this section.

“(g) ALLOCATION OF GRANTS TO LOCAL GOVERNMENTS AND OTHER ENTITIES.—

“(2) Subject to the approval of the Secretary, a coastal State may, as part of an approved working waterfront plan, designate as a qualified holder any unit of State or local government or nongovernmental organization, if the coastal State is ultimately responsible for ensuring that the property will be managed in a manner that is consistent with the purposes for which the land entered into the program.

“(3) A coastal State or a qualified holder designated by a coastal State may allocate to a unit of local government, nongovernmental organization, fishing cooperative, or other entity, a portion of any grant made under this section for the purpose of carrying out this section,

except that such an allocation shall not relieve the coastal State of the responsibility for ensuring that any funds so allocated are applied in furtherance of the coastal State's approved working waterfront plan.

“(4) A qualified holder may hold title to or interest in property acquired under this section, except that—

“(A) all persons holding title to or interest in working waterfront affected by a grant under this section, including a qualified holder, private citizen, private business, nonprofit organization, fishing cooperative, or other entity, shall enter into a working waterfront covenant;

“(ii) the coastal State shall have the right of immediate entry onto the working waterfront;

“(2) The Secretary may waive the application of paragraph (1) for any qualified holder that is an underserved community, a community that has an inability to draw on other sources of funding because of the small population or low income of the community, or for other reasons the Secretary considers appropriate.

“(3) A local community designated as a qualified holder under subsection (g) may utilize funds or other in-kind contributions donated by a nongovernmental partner to satisfy the matching funds requirement under this subsection.

“(4) As a condition of receipt of a grant under this section, the Secretary shall require that a coastal State provide to the Secretary such assurances as the Secretary determines are sufficient to demonstrate that the share of the cost of each eligible project that is not funded by the grant awarded under this section has been secured.

“(5) If financial assistance under this section represents only a portion of the total cost of a project, funding from other Federal sources may be applied to the cost of the project. Each portion shall be subject to match requirements under the applicable provision of law.

“(6) The Secretary shall treat as non-Federal match the value of a working waterfront or interest in a working waterfront, including conservation and other easements, that is held in perpetuity by a qualified holder, if the working waterfront or interest is identified in the application for the grant and acquired by the qualified holder within 3 years of the grant award date, or within 3 years after the submission of the application and before the end of the grant award period. Such value shall be determined by an appraisal performed at such time before the award of the grant as the Secretary considers appropriate.

“(7) The Secretary shall treat as non-Federal match the costs associated with acquisition of a working waterfront or an interest in a

working waterfront, and the costs of restoration, enhancement, or other improvement to a working waterfront, if the activities are identified in the project application and the costs are incurred within the period of the grant award, or, for working waterfront described in paragraph (6), within the same time limits described in that paragraph. These costs may include either cash or in-kind contributions.

“(i) LIMIT ON ADMINISTRATIVE COSTS.—No more than 5 percent of the funds made available to the Secretary under this section may be used by the Secretary for planning or administration of the program under this section.

“(j) OTHER TECHNICAL AND FINANCIAL ASSISTANCE.—

“(1) Up to 5 percent of the funds appropriated under this section may be used by the Secretary for purposes of providing technical assistance as described in this subsection.

“(2) The Secretary shall—

“(A) provide technical assistance to coastal States and local governments in identifying and obtaining other sources of available Federal technical and financial assistance for the development and revision of a working waterfront plan and the implementation of an approved working waterfront plan;

The study shall evaluate

(1) the impact of physical proximity to and the role of human use of terrestrial wildlife for food or medicine on the emergence or reemergence of pathogens, including novel pathogens;

(c) **UPDATES.**—The list of countries required by subsection (a), the corresponding Global Health Security Zoonosis plans established pursuant to subsection (b), and any actions taken under such plans to end the commercial trade in live wildlife and associated wildlife markets for human consumption immediately, during a transitional period, or aspirationally, shall be reviewed, updated, and publicly released annually by the Secretary and Administrator, following review of the most recent scientific data.

**SEC. 30705. SENSE OF CONGRESS.**

It is the sense of Congress that global institutions, including the Food and Agriculture Organization of the United Nations, the World Organisation for Animal Health, the World Health Organization, and the United Nations Environment Programme, together with leading intergovernmental and nongovernmental organizations, veterinary and medical colleges, the Department of State, and the United States Agency for International Development, should—

- (1) promote the paradigm of One Health as an effective and integrated way to address the complexity of emerging disease threats; and
- (2) support improved community health, biodiversity conservation, forest conservation and management, sustainable agriculture, and the safety of livestock, domestic animals, and wildlife in developing countries, particularly in tropical landscapes where there is an elevated risk of zoonotic disease spill over.

**SEC. 30706. STATEMENT OF POLICY.**

It is the policy of the United States to—

- (1) support the availability of scalable and sustainable alternative sources of protein and nutrition for local communities, where appropriate, in order to minimize human reliance on the commercial trade in live wildlife for human consumption;
- (2) support foreign governments to—
  - (A) reduce commercial trade in live wildlife for human consumption;
  - (B) transition from the commercial trade in live wildlife for human consumption to sustainably produced alternate protein and nutritional sources;
  - (C) establish and effectively manage and protect natural habitat, including protected and conserved areas and the lands of Indigenous peoples and local communities, particularly in countries with tropical forest hotspots for emerging diseases; and

- (4) facilitate international cooperation by working with international partners through intergovernmental, international, and nongovernmental organizations such as the United Nations to—

(A) lead a resolution at the United Nations Security Council or General Assembly and World Health Assembly outlining the danger to human and animal health from emerging zoonotic infectious diseases, with recommendations for implementing the closure of wildlife markets and prevention of the commercial trade in live wildlife for human consumption, except where the consumption of wildlife is necessary for local food security or where such actions would significantly disrupt a readily available and irreplaceable food supply;

(B) raise awareness and build stakeholder engagement networks, including civil society, the private sector, and local and regional governments on the dangerous potential of wildlife markets as a source of zoonotic diseases and reduce demand for the consumption of wildlife through evidence-based behavior change programs, while ensuring that existing wildlife habitat is not encroached upon or destroyed as part of this process;

(C) encourage and support alternative forms of sustainable food production, farming, and shifts to sustainable sources of protein and nutrition instead of terrestrial wildlife, where able and appropriate, and reduce consumer demand for terrestrial and freshwater wildlife through enhanced local and national food systems, especially in areas where wildlife markets play a significant role in meeting subsistence needs while ensuring that existing wildlife habitat is not encroached upon or destroyed as part of this process; and

(D) strive to increase biosecurity and hygienic standards implemented in farms, gathering centers, transport, and market systems around the globe, especially those specializing in the provision of products intended for human consumption.

(7) prevent the degradation and fragmentation of forests and other intact ecosystems to minimize interactions between wildlife and human and livestock populations that could contribute to spillover events and zoonotic disease transmission, including by providing assistance or supporting policies to, for example—

(A) conserve, protect, and restore the integrity of such ecosystems;

(B) support the rights and needs of Indigenous People and local communities and their ability to continue their effective stewardship of their traditional lands and territories;

(C) support the establishment and effective management of protected areas, prioritizing highly intact areas; and

(D) prevent activities that result in the destruction, degradation, fragmentation, or conversion of intact forests and other intact ecosystems and biodiversity strongholds, including by governments, private sector entities, and multilateral development financial institutions;

(8) offer appropriate alternative livelihood and worker training programs and enterprise development to wildlife traders, wildlife breeders, and local communities whose members are engaged in the commercial trade in live wildlife for human consumption;
