The bill reauthorizes the *Workforce Innovation and Opportunity Act of 2014* and was referred to the Committee.

On April 5, 2022, the Committee marked up H.R. 7309. An Amendment in the Nature of a Substitute (ANS) was offered by Rep. Jones that incorporated the provisions of H.R. 7309 and made the following modifications:

- clarifies that proprietary schools are not excluded from inclusion on the eligible training provider list and provides program integrity guardrails that foreclose their membership on state and local boards and their ability to operate one-stop centers;
- adds digital literacy to the list of permissible program elements for youth services;
- adds assistive technology as an allowable use of funds to accommodate those with disabilities for delivery of services;
- adds “age” as an element of professional development training for staff of the one-stop delivery system;
- adds “Institution of Higher Education” to the list of entities eligible for Workforce Innovation Funds;

- increases authorization of appropriations under the *Rehabilitation Act of 1973* (Rehabilitation Act)<sup>2</sup> for supported employment services for individuals with the most significant disabilities as well as the Architectural and Transportation Barriers Compliance Board; and
- makes other typographical and technical adjustments.

Four amendments to the ANS were offered:

- Rep. Mariannette Miller-Meeks (R-IA-2) offered a substitute amendment to reauthorize the WIOA of 2014 for six years. The substitute amendment did not significantly increase authorized funding levels but added allowable uses of funds for statewide and local workforce development activities and codifies the Reentry Employment Opportunities program, among other changes. The amendment was defeated by a vote of 20 Yeas and 29 Nays.
- Rep. Bob Good (R-VA-5) offered an amendment to require that WIOA participants comply with E-Verify. The amendment was defeated by a vote of 21 Yeas and 29 Nays.
- Rep. Good offered an amendment to strike references to “registered” for the purposes of allowing work-based learning opportunities other than the registered apprenticeship model. The amendment was defeated by a vote of 21 Yeas and 28 Nays.
- Rep. Mary Miller (R-IL-15) offered an amendment to prohibit WIOA funds from being used to reimburse health care services. The amendment was defeated by a vote of 21 Yeas and 29 Nays.
- Rep. Miller (IL) offered an amendment to strike language in the ANS that defines individuals with barriers to employment to include gender identity and sexual orientation and other similar changes throughout. The amendment was defeated by a vote of 20 Yeas and 29 Nays.

The ANS was adopted by voice vote. The Committee ordered H.R. 7909 to be reported favorably, as amended, to the House of Representatives by a vote of 29 Yeas and 21 Nays.

## COMMITTEE VIEWS

### Introduction

The nation’s public workforce development system is currently authorized by WIOA of 2014, which was enacted in 2014<sup>3</sup> as the most recent reauthorization of federal workforce development policy. The law includes five titles: (I) workforce development activities; (II) adult education and literacy; (III) amendments to the *Wagner-Peyser Act of 1933* (Wagner-Peyser); (IV) amendments to the Rehabilitation Act; and (V) general administrative provisions of WIOA.

<sup>2</sup> Rehabilitation Act of 1973, Pub. L. No. 93-112 (29 U.S.C. § 701 *et seq.*).

<sup>3</sup> Pub. L. No. 113-128, 128 Stat. 1425 (2014) (codified as amended at 29 U.S.C. §§ 3101—3361).

DOL administers Titles I and III, while the Department of Education (ED) administers Titles II and IV, and the agencies jointly administer cross-cutting provisions across the titles, including Title V.

Title I of WIOA of 2014 funds adult, dislocated worker, and youth services for training, career, and supportive services using a statutory formula. Title I funds are distributed through a state workforce board, which is comprised of businesses, public agencies, community-based organizations, and labor organizations. The state workforce board then allocates funds to local workforce boards. The majority of formula funds are distributed to the local workforce boards, making WIOA of 2014 a localized approach to federal workforce investments. Title I also authorizes Job Corps, a residential program for at-risk youth, and national programs such as Indian and Native American (INA) Programs, the National Farmworker Jobs Program (NFJP), and YouthBuild.

Title II of WIOA of 2014 funds basic education for out of school adults, such as literacy and numeracy, with the aim of earning coursework towards a secondary degree and basic foundational skills for the job market. Title II also funds English language learning and civics education for immigrants. Funds are awarded to state education agencies who then distribute those funds to local education providers, such as local education agencies or community-based organizations. Of the funds to the states, 88 percent are distributed based on the states' relative share of adults who do not have a high school diploma (or equivalent) and are not enrolled in school. The remaining funds go to states based on the number of immigrants who were admitted for permanent legal residence.

Title III of WIOA of 2014 amends Wagner-Peyser, which established the Employment Service (ES) for the purpose of assisting job seekers with career services, such as career counseling and job placement assistance. Additionally, Wagner-Peyser established the labor market information system, which job seekers rely on to learn what job openings are available in their local area. Title III amends Wagner-Peyser for the purposes of collocating the ES at one-stop centers and authorizing new funds for the labor market information system.

Title IV of WIOA of 2014 amends the Rehabilitation Act, which authorizes vocational rehabilitation (VR) services to individuals with disabilities. Funds are distributed to state VR agencies through a formula. Funding for the state grants is mandatory and is determined by using prior appropriations as a floor and then adjusting for inflation. In addition to the state grants, Title IV also authorizes discretionary funding for several other VR programs, such as the Client Assistance Program.

Despite being reauthorized several times with new levels of authorized funding, federal investment in workforce development has fallen markedly over time. While the U.S. labor force has grown by roughly half over the past four decades, federal spending on workforce development has fallen by two-thirds when adjusted for inflation.<sup>4</sup> Since 2002, the core WIOA formula programs—for adults, dislocated workers, and youth—have seen a roughly 45 percent

decline in enacted federal funding when adjusted for inflation.<sup>5</sup> As a result, essential workforce development services are frequently unavailable to the people who need them most.

The WIOA of 2022 addresses these funding shortfalls by significantly increasing authorized funding levels and makes a number of changes to update and strengthen the existing workforce development system. The bill addresses several broad issues that emerged through the Committee’s hearings and other efforts to solicit feedback from stakeholders.

### **Updating and Adding Key Definitions to the Statute**

The WIOA of 2022 improves or expands on several existing WIOA of 2014 definitions and adds new definitions to provide greater clarity for the workforce system. Below are key revisions and additions.

#### Apprenticeships and Pre-apprenticeships

Registered apprenticeships (RAs) are a proven strategy that have demonstrated high-quality training and wage progression across multiple industries. The bill adds a definition of “apprenticeship programs” to WIOA and defines them as programs registered under the *National Apprenticeship Act* (NAA). This added definition will ensure that WIOA funds will continue to be used only for apprenticeships that are RAs.

Pre-apprenticeships are an important conduit to apprenticeship programs and longer-term economic success, especially for individuals from communities that have traditionally been underrepresented in apprenticeships. The bill defines a “pre-apprenticeship program” as one that is designed to prepare participants for an apprenticeship program registered under the NAA. This definition is to ensure that pre-apprenticeships lead to high-quality RAs.

#### Career Pathways

Career pathways is an educational approach that articulates multiple steps of education or training that lead toward a career path within an industry or occupation. It is a proven strategy for employment and educational progress.<sup>6</sup> WIOA of 2014 first codified this approach by defining “career pathways.” The WIOA of 2022 amends the definition further to include supportive services, multiple entry and exit points, and a progression toward attainment of a recognized postsecondary credential.<sup>7</sup> These additions are intended to build on the existing definition of “career pathways” by allowing for more comprehensive services and flexibility of service. The addition of multiple entry and exit points are intended for students with different levels of preparedness to enter a designed career pathway at different points based on their relevant prior education. Additionally, the inclusion of supportive services is intended to ensure

that participants within a career pathway are afforded the supports needed to progress along the articulated steps.

### Competency

The bill adds a definition of “competency,” which includes the attainment of the knowledge, skills, and abilities relevant to a subject area. Additionally, the definition of “competency” is tied to an occupational skill standard and requires that it be demonstrated by an appropriate proficiency measurement.<sup>8</sup> The purpose of adding this definition is to ensure that the term “competency,” when it is used in the context of WIOA, denotes a standardized set of knowledge and skills that has been established as necessary to succeed in an occupation or industry and can be objectively assessed.

### Dislocated Worker

Dislocated workers are workers who have lost a job through no fault of their own, often due to changing economic circumstances. As new causes of economic change emerge, the WIOA of 2014 definition of “dislocated workers” must be updated accordingly to reflect new realities in the U.S. economy. The bill revises the definition of “dislocated worker” in two ways to ensure that two categories of individuals who face challenges staying connected with the traditional labor market are eligible for services.<sup>9</sup> First, the bill adds the term “long-term unemployed,” those who have been unemployed for 27 weeks or longer. These individuals have not qualified for unemployment compensation or been employed previously for a sufficient duration to demonstrate attachment to the labor force. However, the long-term unemployed—regardless of their prior earnings or duration of employment—face unique challenges with re-employment and are in need of WIOA assistance to regain a foothold in the labor market. Second, the bill adds some types of “gig workers” to the definition, including those who are underemployed and engaged in occasional work for remuneration and those who are self-employed but looking for part-time work. This definition is consistent with the definition that was used to provide pandemic relief funds to gig workers.<sup>10</sup> When WIOA of 2014 was passed, the gig economy was in its infancy. Since then, the gig economy has expanded significantly. Now, according to a study, between 25 and 35 percent of workers engage in non-standard or gig work on a supplementary or primary basis.<sup>11</sup> And many gig workers are dissatisfied with their employment situations and would prefer to have traditional employment with a more stable schedule and benefits. However, the workforce development system is not meeting their needs. For example, a GAO study found that many local workforce boards were challenged when it came to helping gig workers, in part because they lacked clear promising practices on how to serve them.<sup>12</sup> In adding “gig workers” to the definition of dislocated worker, this bill makes them explicitly eligible for WIOA services and calls attention to the imperative to serve them better.

## Eligible Youth

Under current statute, the definition of “eligible youth” is divided into two types of youth—those that are “in-school” and those that are “out-of-school.” According to numerous stakeholders this definition did not accurately describe the populations in-need of workforce development services. The bill revises the definition of “eligible youth” in two important ways.<sup>13</sup> First, it replaces the separate “in-school” and “out of school youth” definitions with a single definition. This definition includes “opportunity youth,” who are generally not enrolled in school but do not align with the existing “out of school youth” definition in the statute, and “other eligible youth,” who are generally defined in the same way as the existing “in-school youth” definition in the statute. Combining all eligible youth into a single definition is part of the bill’s effort to provide greater flexibility to local boards to target youth formula funds to the populations most in need of services. Second, the bill allows for self-attestation of eligibility as opposed to requiring documentary evidence. Finding documentation is a barrier to enrollment for youth, according to practitioners in the field. For example, it is almost impossible for homeless youth to provide documentation of their homeless status. The need to provide supporting documentation may slow down the enrollment process for youth who need assistance quickly or may even dissuade some from continuing with enrollment. In allowing for self-attestation to streamline the application process, this bill codifies existing DOL policy. DOL has issued guidance to states to clarify that self-attestation of eligibility is permitted for the WIOA youth program.<sup>14</sup> In addition, there is precedent in federal education and training programs for allowing self-attestation of eligibility. For example, the TRIO program, which is administered by ED, and which provides outreach and educational services to disadvantaged youth, allows for self-attestation of eligibility.<sup>15</sup> The use of self-attestation is an acceptable process for the enrollment of youth and the bill prohibits states and local areas from banning it. Further, self-attestation is the preferred method of enrolling eligible youth to ensure that barriers to service are minimized.

As part of its revisions to the eligible youth definition, the bill adds a definition of “opportunity youth” as individuals who are age 16 to 24, not attending school or employed, and—with limited exceptions—lacking a secondary degree or its equivalent.<sup>16</sup> The term “opportunity youth” is a term that has emerged since WIOA of 2014 was passed and is used to describe youth who are disconnected from work or school.<sup>17</sup> Youth in the 16-24 age range are considered emerging adults, and this is a critical phase in which youth have the chance to gain an education and enter the workforce, but many remain at risk or lack sufficient support. Recognizing and prioritizing this group for special attention and services makes sense as an investment in our future. Also, compared to the existing category of “out of school youth,” the category of “opportunity youth”

is simpler for practitioners to identify and for youth to establish eligibility. This new definition eliminates the need to substantiate that a youth falls into one of several specific groups, such as being homeless or justice-involved, that youth may be reluctant to disclose or may lack documentation to support. This broader concept of “opportunity youth” also gives practitioners on the ground the flexibility to serve youth in their local area who are most at risk.

### Evidence-Based

The bill adds a definition of “evidence-based” that includes four different tiers of quality of evidence based on the number and quality of supporting studies to substantiate the evidence, and it is consistent with the definition in the *Every Student Succeeds Act*.<sup>18</sup> Adding this definition is part of a broader effort in the bill to encourage a greater focus on using rigorously evaluated and proven strategies in the workforce development system. Along with adding this definition, the bill requires that WIOA funds be used for evidence-based approaches where practicable and authorizes a workforce development innovation fund to help build the evidence base in the field.<sup>19</sup> The evidence that currently exists on effective approaches in workforce development is not fully developed and may be inconsistent across program areas or sub-populations; therefore, this bill does not require any minimum percentage of funds to be used for evidence-based approaches. Rather, it aims to spur further development of evidence-based approaches and encourage practitioners to draw on this evidence when it is available. This focus on evidence is also part of a larger, federal government-wide effort to develop evidence and use it to inform government operations.<sup>20</sup>

### Foundational Skill Needs and Digital Literacy

WIOA of 2014 uses an antiquated term (“basic skills deficient”) that is a deficit-based way to describe the basic skills needed for education and adult life. This bill replaces the term “basic skills deficient” with “foundational skill needs,” to be consistent with trends in the fields of education and training. The bill also updates which skills are considered necessary and it sets a minimum threshold for employment in the WIOA of 2022 context.<sup>21</sup> It adds “digital literacy,” “financial literacy,” and “communication skills” to the definition of “foundational skill needs.” The world of work has evolved, and an ability to use computers is now critical to many jobs. Also, communicating with co-workers and thinking critically are increasingly important skills across the labor market. By adding these skills to the definition of “foundational skill needs,” the bill encourages the workforce system to focus more on helping job seekers develop these skills along with occupation-specific competencies.

### Individuals with Barriers to Employment

Current law defines “individuals with barriers to employment” as a means for identifying different populations who have, or face, certain barriers that make it harder than others to gain

employment or develop the needed skills to gain such employment. Under WIOA of 2014, individuals with barriers receive priority for certain services, local boards must develop strategies for serving individuals with barriers, and one-stop staff must receive technical assistance and training on how to serve individuals with barriers. This bill adds to the definition individuals who have been “historically underserved and marginalized as a result of race, color, national origin, sexual orientation, or gender identity.”<sup>22</sup> Historical discrimination in the labor market against marginalized groups—e.g., racial, ethnic, or LGBTQ minorities—has resulted in persistently lower employment and earnings rates for these groups.<sup>23</sup> The workforce system is one way to counteract and reverse these historical trends. However, the workforce system is not achieving this goal for many of these individuals. For example, while Black participants make up a disproportionate share of those served by WIOA Title I funds, the median earnings of Black participants who have exited the program are 78 percent of the earnings of white participants.<sup>24</sup> This differential echoes the Black-white earnings gap and suggests that the workforce system could be doing more to fight employment discrimination as it interacts with employers. Also, LGBTQ workers of color are among the most disadvantaged in the nation’s workforce and are at a significant risk of being unemployed. In fact, these workers have higher rates of unemployment when compared to non-LGBTQ workers of color.<sup>25</sup> By updating the definition of individuals with barriers to employment to include these marginalized groups, the bill is encouraging the workforce system to address, through WIOA services, the root cause of the disparities these groups experience in their employment and earnings.

### Justice-Involved Individual

The existing statute uses an antiquated term of “ex-offenders” to define “justice-involved individuals.” This existing definition includes individuals who received alternative sentences or were sentenced to diversion programs, in addition to those who were incarcerated in a correctional institution or juvenile detention center. Other than replacing the term “offender” with “justice-involved individual” to be consistent with trends in the field, the bill makes no substantive changes to the existing definition.<sup>26</sup>

### Low-Income Individual

Much like the definition of “individuals with barriers to employment” the definition of “low-income individual” is used to prioritize services for those most in need. The bill makes two

revisions to this definition.<sup>27</sup> First, it raises the income threshold to qualify as low-income from 100 percent to 150 percent of the federal poverty line (or 70 percent of the lower living standard income level, if higher). The federal poverty line was developed decades ago based on certain assumptions about the costs of various household needs (e.g., food and housing). Researchers have documented that, as these costs have evolved over time, the poverty line makes less sense as an indicator of those with the greatest needs.<sup>28</sup> Today, 100 percent of the federal poverty line is \$13,590 for an individual and \$18,310 for a family of two.<sup>29</sup> At 150 percent—\$20,385 for an individual and \$27,465 for a family of two—WIOA will be targeting resources towards those who are in greatest need. Raising the threshold will give local one-stops the flexibility to serve youth and to enroll adults in career and training services who are marginally attached to the labor market, need assistance to obtain in-demand skills and economic self-sufficiency, but fall just outside of an arbitrary and outdated income limit. Furthermore, there is precedent for setting the income limit for federal means-tested programs at levels above the federal poverty line, or some multiple of the poverty line. The poverty guidelines, or percentage multiples of them (such as 125 percent, 150 percent, or 185 percent), are used as an eligibility criterion by a number of federal programs.<sup>30</sup>

Second, the bill removes the requirement that the lower living standard income level be calculated based on the most recent “lower living family budget” issued by the Secretary of Labor (Secretary). The “lower living family budget” was an estimated budget for lower income families calculated by the Bureau of Labor Statistics (BLS). However, the BLS no longer does so, making it difficult for DOL to calculate an up-to-date and meaningful lower living standard income level each year. By eliminating this requirement, the bill gives DOL greater flexibility in the data sources it may use for its annual lower living standard income level updates.

### Rapid Response Activity

Rapid response activities are activities used by the states intended to mitigate job loss, dislocation, or long-term unemployment by notifying employees that are to be laid off of the workforce services available to them. The bill revises the definition of “rapid response activities” to clarify that these services should aim to help dislocated workers obtain a new job as soon as possible and in employment that offers the same wages and benefits as the dislocated worker’s prior employment, to the extent practicable.<sup>31</sup> This change is part of the bill’s broader effort to pivot the workforce system toward a focus on job quality, rather than just job placement.

## Supportive Services

Supportive services generally are critical to enabling WIOA participants to complete career and training services and move on to economic self-sufficiency. The bill expands this definition to include new services such as mental health care, substance use disorder treatment, and assistance with accessing the internet.<sup>32</sup> By expanding the definition, this bill recognizes the broad range of challenges that may hinder participants from completing their WIOA programs or maintaining employment as well as the increasingly important role that internet access plays to employment as more work has shifted fully or partly to a virtual environment.

## **Strengthening and Diversifying Workforce Governance**

The state and local workforce boards make key strategic policy decisions on how to spend WIOA funds, such as which in-demand industry sectors to engage with and in which types of training services to invest. This makes the composition and functions of the state and local workforce boards an important factor in ensuring that workforce funds are used as effectively and equitably as possible.

### State Board Composition

The bill prioritizes giving workers a stronger voice in the decision-making process of the state boards. Specifically, it makes several revisions to the existing requirements for the state boards' composition.<sup>33</sup> First, it increases the share of labor organization that make up the state boards from 20 percent to 30 percent. Additionally, the bill adds "state agency officials" for secondary and adult education programs and community colleges or other institutions of higher education to the list of required board members to encourage better integration of workforce programs with educational entities.

When the membership of the state boards is being determined under current statute,<sup>34</sup> the geographic diversity of the state's constituency must be considered. This bill specifies that "demographic diversity" also must be a factor of consideration to ensure that board membership reflects the diversity of the state's population.<sup>35</sup>

### Functions of the State Board

This bill makes several changes to the functions of the state boards with the goal of improving and modernizing the delivery of services. In particular, it requires the dissemination of evidence-based strategies—consistent with the definition of "evidence-based" that the bill also adds—to inform the one-stop centers' service delivery, including strategies for the use of digital technology. Following the COVID-19 pandemic, the one-stop center delivery system will need to adapt to new norms of remote service delivery by utilizing proven, evidence-based strategies for such delivery.

<sup>34</sup> 29 U.S.C. § 3111.

<sup>35</sup> H.R. 7309, § 201(b).

Additionally, the bill requires state boards to increase the types of professional development required for service delivery staff to ensure they are educated on different approaches to service delivery, such as human centered design and trauma-informed practices. Such professional development will be important for service delivery staff to apply when helping participants who have particular barriers to employment, such as victims of domestic violence.

### State Plans

The bill changes the content of the state plans in several ways. First, it requires states to consider in their analysis of economic conditions the industries or sectors projected to decline or face significant changes in employment opportunities. With technology and automation becoming an increasingly disruptive force in the labor market<sup>36</sup>, many industries and associated occupations considered “in-demand” in the short term may quickly become obsolete over the medium to long term, leading to further displacement. Current law does not require state boards to consider the cause of long-term disruption; it only requires the use of basic economic projections, such as the BLS occupational projections. For example, the number of long-haul truck driver jobs are projected to grow 6.6 percent over the next 10 years (similar to overall projections of 7.7 percent)<sup>37</sup>, even though the position is expected to be nearly wiped out due to automation.<sup>38</sup> This bill now requires state boards to consider such longer-term projected changes in the labor market. Further, state boards should utilize other sources of data in addition to BLS occupational or industry projections to identify long term trends that may not be captured by one source of data.

Second, states will be required to describe how they will address inequitable outcomes in their workforce systems that were identified in the state equity reports, which are newly established gap analyses under the performance reporting section. It is not enough to identify inequities in employment and training outcomes, it is also important to address those inequities through strategic planning and other activities. The intention of the cross-referencing of the state equity reports with state planning is to create a continuous improvement approach to addressing and ultimately eliminating inequities.

Third, the state plans will need to include a description of how the state will align the workforce system with other federal programs, such as the *Higher Education Act of 1965* and Medicaid, among others. These new requirements will increase coordination and leveraging of funds to avoid programmatic duplication and maximize efficiency.

Finally, states will be required to consult with stakeholders during the state plan development process. Having organizations such as eligible training providers, community-based

organizations, and industry groups involved in the development of the state plans will ensure that those with direct experience with workforce development have a means of directly informing key policy decisions that affect workforce development. Further, the state plans will now be required to have a public comment period to ensure that stakeholders and the public at large have a period to review, comment, and advise the state board before it finalizes its state plan.

### Local Areas and Boards

This bill adds the relevant state economic development agency as an entity with which local agencies must consult. The relevant state economic development agency is added to inform the local area designation process through better alignment with local economic markets. Other than this change, the bill maintains the existing process established in 2014 by which local areas are designated within each state.

The makeup of the local board membership reflects the makeup of the state boards as discussed above, with the same requirement of demographic diversity and increased labor representation.

### Functions of the Local Board

The bill adds new functions required of the local boards. Specifically, it emphasizes the role technology must play in the delivery of services—including business services, career navigation, and employment and training activities—and requires that local boards develop strategies to utilize digital technology to enhance and expand such services, both by reaching populations that may not easily access the in-person one-stop centers and by integrating different programs' intake and case management systems. The bill also adds new standing committees to the local board that will focus on adult education services, work-based learning opportunities, and matters related to workers and changes in the economy.

The COVID-19 pandemic has forced local boards to be innovative in their approach to service delivery by being less reliant on in-person contact through the one-stop system. This bill acknowledges the advances many local boards have made in the use of technology by codifying service delivery strategies already in place.

## **Incentivizing Job Quality and Equity Through WIOA's Performance Accountability System**

In part to incentivize a greater focus on placing WIOA participants in high-quality jobs and on serving all participants equitably, the bill makes several changes to the primary performance indicators for the WIOA core programs, the process for negotiating state performance goals, and how state performance results are reported.<sup>39</sup>

### Primary Performance Indicators

The bill makes two changes that would incentivize a greater focus on quality jobs. It adds a measure of median earnings of participants at the fourth quarter after program exit to the existing

---

<sup>39</sup> H.R. 7309, § 211.

measure of median earnings at the second quarter after exit. This new measure of longer-term wage progression is intended to spur local boards and one-stop centers to consider whether training programs will lead to jobs that have the potential for wage growth and career advancement. Also, the bill authorizes the Secretaries of Labor and Education to develop a new performance indicator related to the quality of participants' employment, such as the availability of benefits or a safe workplace. Too often, in part because of underinvestment, the workforce system does not support the types of longer-term training that leads to quality jobs that provide economic self-sufficiency. The average amount spent on training for WIOA Title I adult participants in program year 2020 was approximately \$2,000,<sup>40</sup> which is not adequate to cover training that leads to high-quality jobs. Not surprisingly, the median quarterly earnings for adult program participants who were placed in unsubsidized jobs, which are jobs that are not supported using government subsidies, in 2020 was only \$6,600, or about \$13 per hour if working full-time.<sup>41</sup> Along with ramping up funding to support longer-term training, it is important to also incentivize the system to focus on high-quality job placement.

The bill also makes other changes to improve and streamline the primary performance indicators. It adjusts the metric related to "measurable skill gain" to remove the requirement that skill gains be achieved within the program year. The purpose of this change is to remove the disincentive to enrolling participants toward the end of the program year, when it will be more difficult for them to achieve a skill gain within the same program year. The intent for participants to achieve skill gains within 12 months of program enrollment remains the same; however, the bill recognizes that the 12 months may span two program years. Also, the bill eliminates the performance measure related to effectiveness in serving employers. The measure was created in the WIOA of 2014 as a means of measuring the efficacy of the workforce system in serving employers. Employers are a critical customer of the workforce development system and understands that engaging employers is vital to the system's success. In fact, this bill invests in employer engagement by authorizing funds specifically for local boards to convene and develop industry and sector partnerships.<sup>42</sup> However, this measure has proven challenging to implement. DOL and ED have piloted several measures of effectiveness in serving employers since WIOA of 2014 but have yet to finalize any measures because of the problems with all these measures. A 2021 Urban Institute report that was commissioned by DOL and ED reported several challenges with the pilot measures that limited the measures' effectiveness and even created perverse incentives.<sup>43</sup> For example, the employer penetration rate pilot measure—a measure of the proportion of employers that have had contact with the workforce system—incentivizes local areas to emphasize quantity of interactions with employers over quality, intensive services.<sup>44</sup> Also, the repeat business customer pilot measure discourages local areas from reaching out to

new employers<sup>45</sup>, and the retention with same employer pilot measure does not account for the fact that some workers may do better by moving on to better jobs with new employers.<sup>46</sup> Retaining the effectiveness in serving employers measure will cause states and local areas to continue to expend valuable time and resources on collecting data for a measure that hasn't proven effective in incentivizing high-quality services to employers.

### Negotiation Process

The bill adjusts the process by which states negotiate with DOL and ED to come to agreement on performance goals in order to minimize unnecessary work for states, so they can devote more time and resources to developing their workforce development strategies. Under existing law, states must propose in their state plans the levels of performance that the WIOA core programs will meet for the first two program years covered by the state plans. The states then reach agreement with DOL and ED on the finalized levels, based on factors including the statistical adjustment model maintained by DOL. According to stakeholders, states set their expected performance levels in the state plans in a vacuum, without knowing the levels determined by DOL's statistical adjustment model, and their efforts to predict expected performance levels are often superseded by the statistical adjustment model, according to the National Association of State Workforce Agencies. This bill eliminates the requirement for states to initially propose their expected levels of performance, instead requiring the federal agencies to initially propose expected performance levels for each state, and then giving the states a chance to provide input before agreement on finalized levels is reached.

### State Performance Reports

The bill requires states to publish state equity reports, that among other things, identify disparities in performance outcomes between participants who are individuals with barriers to employment and other participants. The state equity reports also are required to include disaggregated performance data on different categories of individuals with barriers to employment. Modeled after a similar analysis required of states under the *Strengthening Career and Technical Education for the 21st Century Act*,<sup>47</sup> the reports' purpose is to create greater transparency regarding the performance of groups that historically may not have been as effectively served by the workforce development system as other participants. The state equity reports are intended to ultimately lead to corrective actions by states or local boards that address any such performance disparities. This is to correct the inequitable outcomes for different populations utilizing WIOA services. For example, one study found that while 35 percent of WIOA participants identified as Black—a higher rate than the national population—those same participants were still earning 78 cents to the dollar compared to white WIOA participants who also completed the program.<sup>48</sup> Such analysis is not being done systematically by the states, and such reports would support the strategic planning in the state plans to ensure there is an actionable process for addressing inequities.

The bill also requires that the reports that states must annually submit to DOL on the performance of their WIOA programs under current law be made available digitally using data formats. Current state performance reports are published online in PDF format that are not easily usable for data analysis. This provision updates the requirements for publishing performance data so reports are more usable by researchers and evaluators using data software, relevant for today's internet-based world, and transparent about the workforce development system.

### **Streamlining and Clarifying One-Stop Delivery System Requirements**

The bill eliminates the requirement for one-stop system partners in each local area to negotiate their contributions to the infrastructure costs of the one-stop centers.<sup>49</sup> According to multiple stakeholders and a Mathematica Policy Research study of WIOA of 2014 implementation, this requirement is actually counterproductive.<sup>50</sup> It takes considerable staff time and resources to negotiate each partner's contribution, especially in the case of partners that are only connected to the one-stop system virtually. Altogether, the contribution amounts are often too small to the total costs to be worth the amount of staff time devoted to the negotiation process, time which could have been used more effectively on service delivery. Instead of maintaining this local negotiation process, the bill authorizes states to set aside up to 10 percent of WIOA Title I, II, and III funds to support one-stop infrastructure costs, with funds distributed to local areas through a formula developed by the state board. If this set-aside is not sufficient, then local one-stop partners must determine how to collectively cover the additional costs of their one-stop infrastructure. Additionally, the Secretaries of Labor and Education shall issue joint guidance to ensure that funds from Titles I, II, and III are paying a share of the infrastructure costs that are proportionate to their services provided.

In addition, the bill makes several other changes to streamline or clarify requirements regarding the one-stop system.<sup>51</sup> For example, it allows local boards to serve as one-stop operators if approved by the governor. Local boards were able to serve in this capacity prior to the enactment of the WIOA of 2014, when a requirement was added that local boards competitively award the one-stop operator role to another entity.<sup>52</sup> Some local boards, especially in rural areas, have reportedly faced challenges with finding qualified entities to bid on the one-stop operator role.<sup>53</sup> This bill allows flexibility for governors to approve local boards to operate one-stop centers in such cases.

Also, the bill clarifies that the responsibilities of the one-stop operator must include managing the one-stop infrastructure and facilitating coordination among one-stop system partners and may include provision of direct services. According to stakeholders and a Mathematica Policy Research study, the lack of federal guidance in current law has caused confusion among states and local areas and inconsistency in how one-stop operators' roles are operationalized.<sup>54</sup> The changes made in the bill rectify the issue of the one-stop operators' responsibilities not being explicitly defined in current law.

Additionally, the bill clarifies that one-stop infrastructure includes both the physical one-stop centers and the technological infrastructure needed to provide virtual services. The one-stop system has been moving to more of a mix of in-person and virtual services. This trend was accelerated by the COVID-19 pandemic, which forced many one-stop centers to temporarily shift entirely to virtual services. This bill recognizes the importance of supporting and further developing such virtual service delivery, while still preserving physical one-stop centers as an option for job seekers who may need or prefer in-person assistance.

### **Creating an Employer-Validated, Transparent, Eligible Training Provider List**

The eligible training provider list (ETPL) is the list of training programs approved by the state to receive Title I funds. It can be a useful tool in ensuring consumer choice is available to individuals who received a training voucher through their individual training account. Current law utilizes a model of providing individuals with training vouchers so they have the freedom to select the provider that best fits their training goals; however, revisions are needed due to inadequacies of the ETPL requirements that have emerged since WIOA of 2014 implementation. Namely, the quality of training providers varies and there are too few controls to ensure that training programs lead to high quality, high wage jobs. Additionally, the criteria for different states' ETPL are too varied, which makes it challenging for high-quality training providers to meet different sets of criteria and operate in more than one state. Also, online ETPL information is not easily navigable, limiting the efficacy of consumer choice. The bill maintains the underlying model and addresses these shortcomings through new standards in the State Criteria provisions of WIOA of 2014 and the addition of an employer validation of such standards.

#### State Criteria

The bill strengthens the consistency and quality of training standards required for inclusion on the ETPL through several means. It requires states to consider the performance levels of training providers as described in the performance accountability section. It also adds several new standards related to training and job quality to ensure that providers are offering programs that lead to good, in-demand jobs. These standards include the recognized postsecondary credentials, employment opportunities, earnings, and competencies that are expected to result from the training program.

## Employer Validation

The quality of a training provider is dependent on the industry sector or employer that is partnered with the provider. Employer engagement is an important factor in the quality of the design, development, and delivery of a training curriculum.<sup>55</sup> Program curricula must be informed by the needs and expertise of the hiring employer. In recognition of this, the bill requires that training providers validate that their programs meet certain criteria related to the quality of the training, the credentials and competencies to be earned, and the expected job opportunities through an employer partnership in a manner decided by the Secretary.

## **Allowing Greater Local Flexibility in the Youth Formula Program**

### Transferability of Youth Workforce Funds

Recognizing the need for increased funding and specific programmatic requirements for summer and year-round youth employment programs, the bill establishes a separate section for these programs. At the same time, recognizing the need for flexibility for the local boards to move funds between programs, the bill authorizes the transfer of up to 100 percent of funds between the youth section and the summer and year-round employment section in a manner consistent with WIOA's transfer authority between the adult and dislocated programs.

### Comprehensive Local Needs Assessment

With the revision of the "eligible youth" definition, and the removal of the requirement to spend seventy five percent of youth formula funds on "out-of-school youth," local boards have greater flexibility under this bill in serving the youth population of their local areas. A comprehensive local needs assessment is included to assist in local boards' efforts to determine how best to target youth formula funds based on the local youth population and ensure efficiency in the use of public funds. Modeled after the comprehensive local needs assessment created under the *Carl D. Perkins Career and Technical Education Act of 2006*,<sup>56</sup> the bill's needs assessment requirements include the local boards consulting with local stakeholders knowledgeable about youth workforce needs, such as educational agencies, training providers, community-based organizations, and businesses. Such stakeholders are well positioned to inform local boards of gaps in the public services available to the local youth population most in-need. The needs assessment is not intended to be duplicative of the existing requirements of the local plan and should assist local boards in developing their workforce strategies to serve local youth.

### Program Element Flexibility

Current law requires that local boards implement each and every listed youth program element regardless of the need of the local youth or the capacity of the board itself. In an

acknowledgement that this requirement is onerous and overly prescriptive, the bill provides local boards greater flexibility in choosing which program elements to implement in service of local youth needs.

### Summer and Year-Round Employment for Youth

This bill encourages expanded use of subsidized employment for youth, which is an existing activity in the program elements under WIOA, through increased funding and programmatic guidance. This section was drawn from the *Opening Doors for Youth Act*,<sup>57</sup> a bill introduced in the 117<sup>th</sup> Congress that attempts to maintain a connection to the education system for “in-school youth,” or reconnect “opportunity youth” to the labor market, through summer and year-round employment opportunities.

In 2018, nearly 4.4 million young people ages 16 to 24 were disconnected from both school and work, representing a steady, eight-year decline in youth disconnection rates.<sup>58</sup> The COVID-19 pandemic is expected to significantly roll back this progress. Researchers estimate that there were six million young people disconnected in 2020 and that this number could grow to nine million (one in four) young people.<sup>59</sup> Disconnected youth are three times more likely than other youth to have a disability, twice as likely to live below the federal poverty line, and significantly more likely to live in racially segregated neighborhoods, and disconnected young women and girls are four times more likely to have a child.<sup>60</sup>

The new summer programs will help “in-school youth” remain connected to the education system and avoid involvement in the criminal and juvenile justice systems, while the year-round program will provide “opportunity youth” with the extended entry-level work experiences and work-readiness skills that are vital to improved employment outcomes.

Each program shall be required to match eligible youth with an employer for placement in a high-quality summer or year-round job. Those jobs may be subsidized up to 65 percent to incentivize employers to participate in the program, with employers still required to contribute so they have some financial responsibility to the participant. This bill requires that priority be given to programs placing youth in jobs that are in high-skill, high wage, or in-demand sector or occupations, to ensure that participating youth acquire relevant skills and competencies and are prepared for a potential future career path.

Both programs also include soft skills training, coaching or mentoring services, career services, financial literacy training, follow-up services, and other supportive services to ensure that a participating youth receives comprehensive support and education along with the work experience gained from the subsidized employment. These programs are intended to bring eligible youth into the labor market with enough experience to earn unsubsidized employment in the medium to long term.

## Encouraging Focus on Equity and Job Quality in Adult and Dislocated Worker Programs

The bill makes a number of changes to the adult and dislocated worker formula programs aimed at enhancing equity within these programs, encouraging a greater focus on job quality, and making it easier and faster for individuals to access the services they need.<sup>61</sup>

### Reservation of Funds for Individuals with Barriers to Employment

The bill reserves 75 percent of the adult formula funds allocated to local workforce areas for providing training, intensive career, and supportive services to individuals with barriers to employment. Current law requires that adult funds be prioritized for those with certain barriers—low-income, public assistance recipients, and basic skills deficient.<sup>62</sup> This bill strengthens the prioritization requirement by adding a specific percentage reservation but at the same time broadens the population that is prioritized. This bill also emphasizes serving individuals with barriers to employment in several ways, including by adding serving individuals with barriers to employment as one of the explicit purposes of the Act and by expanding the population to be prioritized for adult services to include basic skills deficient.<sup>63</sup> However, in practice, the proportion of individuals with barriers to employment who were served did not increase with the implementation of WIOA of 2014 between 2015 and 2020. According to a Mathematica Policy Research study, the percentage of those who exited the WIOA adult program and who fell into at least one common category of individuals with barriers to employment remained fairly flat from 2015 to 2020.<sup>64</sup> Local staff reported several common challenges to serving more individuals with barriers, including disincentives created by the performance measures and difficulty determining eligibility as an individual with a barrier.<sup>65</sup> Federal WIOA dollars should be targeted to those most in need of assistance. This bill continues and expands WIOA of 2014's emphasis on serving individuals with barriers by pushing local areas in a more concerted way to focus on this population. This requirement will encourage local areas and states to think creatively about how to enroll and serve more individuals with barriers. Furthermore, for many states and local areas, this requirement will likely not require a significant shift in how they provide services. In its guidance, DOL already requires local areas to use at least 50 percent of their adult funds for the priority groups under WIOA, with 75 percent as an aspirational goal.<sup>66</sup> According to DOL, most states are already meeting the 50 percent requirement, with many using 75 percent of funds for these populations. Only about 7

states are not meeting the 50 percent threshold. This bill codifies DOL’s existing focus on serving these populations.

### Supportive Services Requirement

This bill makes provision of supportive services a required local activity, instead of a permissible activity as under current law. This change enhances equity by making it possible for more individuals who face obstacles to program participation—ranging from lack of affordable child care to substance use disorders to unreliable internet access—to complete career and training services and achieve long-term economic self-sufficiency. Evidence shows that training services are more likely to have a positive impact when combined with supportive services.<sup>67</sup> In a review of evidence on employment and training programs, Mathematica Policy Research reported that supportive services, in combination with technical training and case management, have more positive employment and earnings outcomes compared to training services alone.<sup>68</sup> However, a separate Mathematica study found that a sample of local boards spent only 3 percent of their WIOA Title I formula funds on supportive services.<sup>69</sup> By making supportive services a required activity, combined with significantly ramping up funding for the WIOA Title I formula program,<sup>70</sup> this bill encourages local areas to see supportive services as an integral component of the array of services they can offer job seekers, along with career services and training. While local areas may still tap into other programs to provide certain supportive services—WIOA requires that supportive services be provided only if not available from other sources—this bill encourages greater use of WIOA funds for supportive services when necessary.

### Greater Focus on Older Workers and Victims of Gender-Based Violence

The bill takes steps to enhance the workforce development system’s ability to serve older workers and victims of gender-based violence. Specifically, the bill authorizes state workforce agencies to use their WIOA 15 percent set-aside funds to develop alternative approaches to serving older workers and to improve coordination with employment and training programs under the *Older Americans Act*<sup>71</sup> (such as the Senior Community Service Employment Program). For a variety of reasons, a growing proportion of older individuals is continuing to work,<sup>72</sup> but the workforce system does not always serve this population effectively. This bill encourages

states to consider how their WIOA services can better accommodate this important segment of the workforce.

With regard to victims of gender-based violence, the bill authorizes state workforce agencies to use their set-aside funds to improve coordination with state domestic violence coalitions. Victims of gender-based violence are often in need of workforce development services, as they may no longer be supported by an abusive spouse or partner. At the same time, they may not be aware of available services and may face particular challenges with completing services due to the trauma and disruptions caused by gender-based violence.<sup>73</sup> Greater coordination between state workforce agencies and domestic violence coalitions may result, for example, in more referrals of victims to one-stops and to cross-training of one-stop staff so they are more aware of the unique challenges faced by this population. The Committee recommends that, when this section is being implemented and states are coordinating with domestic violence organizations, they may coordinate with both domestic violence state coalitions as well as state and local domestic violence organizations and other victim service providers. This will ensure that survivors' needs are met as domestic violence state coalitions tend to focus more on advocacy while domestic violence service providers and organizations focus more on providing services and meeting the needs of survivors.

#### Encouraging Adult Education for WIOA Applicants

The bill revises the eligibility criteria for WIOA Title I training services. If one-stop centers find individuals ineligible for training due to a lack of foundational skills, the centers are required to either provide or refer these individuals to adult literacy services. The requirement that individuals have the foundational skills needed to successfully complete a WIOA Title I training program ensures that Title I funds are targeted appropriately to those who can benefit from them. At the same time, this requirement is an obstacle for many individuals who have not been well-served by the nation's primary and secondary school systems. This finding of ineligibility should not be a stopping point in an individual's efforts to achieve a better job; rather, it should serve as an opportunity to connect such individuals to the adult education services they need before enrolling in occupational training. Among individuals who exited the WIOA Title I adult formula program in 2020, about 2 percent were co-enrolled in adult education services,<sup>74</sup> suggesting there may be an opportunity to encourage more collaboration and co-enrollment between the programs.

#### Job Quality Indicators for On-the-Job Training

As part of its broader focus on quality jobs, the bill authorizes governors or local boards to increase the reimbursement rate for on-the-job training to as high as 90 percent, contingent on the jobs being subsidized meeting certain indicators of job quality. The goal of WIOA is to help individuals break out of the cycle of poverty and achieve long-term economic self-sufficiency.

But too often, WIOA participants are placed in jobs that do not offer competitive wages or opportunities for advancement. Encouraging a greater focus on job quality within on-the-job training is one way the bill improves the workforce system's record on job quality. The basic indicators of job quality defined in this bill—competitive wages, availability of benefits, safe workplaces—are the minimum that workers should accept. They are hallmarks of jobs that can become long-term careers and lead to economic self-sufficiency.<sup>75</sup> Employers that want higher federal subsidizes to hire and train up new staff should be willing, in return, to guarantee these basic, minimum levels of job quality. While it is not feasible at the federal level to establish more precise definitions of these basic indicators of job quality, as, for example, competitive wage levels vary across states and industries, the bill gives governors or local boards—depending on whether the on-the-job training subsidizes are administered at the state or local level—discretion to operationalize the basic indicators and develop objective standards that are a good fit for their states or labor market areas.

### Changes to Ease Program Enrollment

The bill includes several changes that streamline or eliminate obstacles to program enrollment. First, it allows one-stop centers to enroll individuals (who initially appear to meet the necessary requirements) in training services while their eligibility is being verified. If the participant's eligibility is ultimately confirmed, WIOA funds will be applied. If the participant is deemed ineligible, the training provider will be required to cover training costs incurred to that point and no WIOA funds will be expended. The current process for determining eligibility for WIOA training services can be cumbersome, with assessments of need and capacity to benefit from services, and potentially documentation of income level or other qualifying conditions. For individuals with an immediate need for training services to upgrade their skills and obtain employment, these delays can result in missed job opportunities, inability to enroll in a particular training program that may not be offered throughout the year, or even a decision not to further pursue WIOA training. This bill provides a path for such individuals to enroll in training more quickly so they can achieve their career goals.

Second, the bill includes two important changes that make it easier for dislocated workers to access the needs-related payments to complete training for another, in-demand occupation. The bill eliminates a requirement that dislocated workers enroll in training within 13 weeks after dislocation. The existing requirement for dislocated workers to enroll in training within 13 weeks of losing their jobs is onerous for many dislocated workers, who within this initial period are often coming to terms with their dislocation and trying to develop a plan for what they will do to re-skill. Many have not fully developed this plan within 13 weeks, or if they have, the selected training program may not be available within this window.

The bill also increases the level of payments for those who did not qualify for Unemployment Insurance from 100 percent to 150 percent of the federal poverty line. According to stakeholders, the federal poverty line is insufficient to sustain dislocated workers and their families through their training programs. As has been documented extensively, the federal

poverty line is based on an outdated calculation of family financial needs that has not evolved to reflect shifting costs of different household needs.<sup>76</sup> Raising the level of payments for those who did not qualify for unemployment compensation will enable more dislocated workers to complete training and obtain the skills they need for longer-term economic self-sufficiency.

Third, the bill makes diagnostic testing and other assessments of individuals an authorized component of the standard set of career services available to all one-stop customers, and not available only as an intensive career service. The purpose of this change is to make it easier for one-stop staff to conduct more in-depth assessments of individuals to determine if they lack foundational skills, which is one way that individuals may qualify as having a barrier to employment and receive prioritization for intensive career services and training services in the adult formula program. Current law only allows such in-depth assessments as part of intensive career services, which has created a challenge because one-stops may not be able to determine if an individual qualifies for the intensive career services priority without first conducting an in-depth assessment.<sup>77</sup>

### Encouraging Incumbent Worker Training and Transitional Jobs

The bill authorizes local boards to spend a higher portion of their adult and dislocated worker formula funds on incumbent worker training and transitional jobs. It increases the portion of adult and dislocated worker formula funds that may be spent on incumbent worker training from 20 percent to 25 percent, and up to 30 percent if the governor determines that such training was effective in the prior year. Incumbent worker training can be an effective strategy both to help workers advance in their careers and achieve higher wages and to avert layoffs by enabling workers to re-skill and remain relevant. Incumbent worker training is also an important tool that local boards can use to engage employers and get them involved with the workforce development system.<sup>78</sup> Raising the cap on incumbent worker training gives local boards more flexibility to meet the needs of local employers. Also, the bill increases the cap on spending on transitional jobs from 10 percent to 40 percent. Transitional jobs are a proven strategy for helping certain populations who face barriers to employment—such as individuals returning from incarceration—obtain longer-term employment. For individuals who may face challenges with obtaining unsubsidized employment, perhaps because of their minimal work experience or biases among employers, transitional jobs provide work experience for their resume, help them develop the soft skills that employers are looking for, and give them the chance to prove themselves to employers who may then hire them permanently. One rigorous evaluation of a nationwide reentry program that uses the transitional jobs model found that the program significantly increased employment and earnings for participants and resulted in net financial gains for society, in particular from reduced criminal justice system costs as program participants were less likely to experience recidivism than control group members.<sup>79</sup> Raising the cap to 40

percent gives local boards more flexibility to tailor their services to the needs of their populations.

## **Strengthening Job Corps**

### Self-Attestation

Consistent with the eligible youth definition for the youth formula program (as discussed above), the bill allows for self-attestation of eligibility by youth enrolling in the Job Corps program. Finding documentation is a barrier to enrollment and may slow down the enrollment process for youth, or even dissuade some from continuing with enrollment. Thus, the use of self-attestation is an acceptable process for the enrollment of youth, and the bill prohibits state and local areas from banning it. Further, self-attestation should be the preferred method of enrolling eligible youth to ensure that barriers to service are minimized.

### Increasing Competitive Contract Bidding

DOL uses a firm-fixed price contracting approach for Job Corps operators.<sup>80</sup> This approach was recommended by government agencies such as GAO and the DOL Office of Inspector General (OIG) for the purpose of easing administrative burden. However, the move to fixed price contracts has the unintended consequence, according to stakeholders, of reducing the flexibility of Job Corps operators to maintain prevailing wages for their staff, such as teachers and instructors, leading to increased staff turnover. The quality of education is dependent on the quality of teachers,<sup>81</sup> making the retention of good teachers critical to the success of the Job Corps program. This bill requires that Job Corps use a best value and fair and reasonable pricing contracting process to ensure that operators have the flexibility to pay and retain quality instructors, and maintain Job Corps facilities, without the restrictions of agreed upon firm-fixed prices.

Additionally, the bill requires the application of the *Service Contract Act (SCA)*.<sup>82</sup> The application of this law is further assurance that teachers and instructors are afforded prevailing wages. The law establishes a process of identifying the prevailing wage of relevant occupations within the local area. However, according to stakeholders, past instances of prevailing wage surveys conducted by DOL with the use of BLS's Occupational Employment Statistics led to misclassification of Job Corps teachers and instructors and lower prevailing wages. This bill requires that future surveys compare the wages of Job Corps educators to schoolteachers within the local area to ensure that Job Corps educators are paid an accurate prevailing wage for a similar occupation, with the intent of improving retention.

<sup>82</sup> See 41 U.S.C. §§ 6701-6707.

Lastly, the quality of programmatic service and education is enhanced through a more competitive bidding process. Under current law, the ability for new entrants to compete for a Job Corps operator contract is limited as an operator must demonstrate relevant experience as a campus operator, which includes housing and educating students. This bill minimizes that burden by encouraging the use of student outcome data as the basis for bid consideration, so that organizations that have no direct experience as a Job Corps operator but can demonstrate positive outcomes when serving at-risk youth have a reasonable chance of winning a bid. Further, the bill requires DOL to develop a mentor-protégé program, like the program created under the *Small Business Act*,<sup>83</sup> with the goal of developing sub-contractors into experienced operators through a mentor-protégé relationship with the sub contractor’s Job Corps Operator.

### Improving Zero Tolerance through Behavioral Management

The existing statute has a draconian zero-tolerance policy that allows for too many ways in which a student could be unfairly expelled from the program. The current statute states that a student could be expelled for “an act of violence, for use, sale, or possession of a controlled substance, for abuse of alcohol, or for other illegal or disruptive activity.”<sup>84</sup> The use of the term “disruptive activity” is broad and can lead to expulsion for acts conducted by a student that do not merit such a harsh disciplinary measure. The bill revises the zero-tolerance policy by appropriately limiting grounds for expulsion to only carrying out an act of violence that seriously endangers the safety of the students or engaging in illegal activity.

Further, the disciplinary measures outlined in the bill, along with the narrowed zero-tolerance policy and drug testing, fall under a behavioral management plan that each director of a Job Corps campus will have to develop. The intention of this plan is to provide a process and structure for the director to manage the safety and conduct of their respective student communities by encouraging positive behavioral interventions with a multi-tier system of supports. Positive behavioral interventions reinforce positive behavior rather than punishing students for bad behavior. Multi-tier systems of support are an evidence-based framework for applying a holistic approach to positive behavioral interventions.<sup>85</sup>

## **Enhancing Existing National Programs**

### Native American Programs

The bill makes several revisions to improve the Native American programs under WIOA.<sup>86</sup> Among other things, it removes the requirement that DOL award grants under this program on a competitive basis. The intent of this change is to give DOL greater flexibility in how it awards grants to nonprofit providers to ensure the highest quality services are provided. The competitive award process is meant to incentivize providers to compete to serve geographic areas by improving the quality of their services. However, according to DOL and representatives

of Native American tribes, providers are reluctant to compete, so the same providers continue to serve each geographic area. With this change, DOL could instead opt to bar low-performing providers and allow better-performing providers to take their place without any competition. The bill also encourages service providers to use evidence-based approaches. Additionally, the bill allows members of the Native American Council that advises DOL on employment and training issues to continue serving after their terms have expired, until their replacements have been named. This change is intended to ensure continuity on this Advisory Council so there are no gaps in its efforts to ensure high-quality services.

### Migrant and Seasonal Farmworkers Program

To better reflect the typical work period of seasonal and some migrant farm laborers, this bill revises the period of consecutive work within the 24 months prior to program application by a farmworker from 12 months to 8 months. In doing so, the expected result will be greater numbers of eligible farmworkers accessing and benefitting from program service.

The bill authorizes funds under this section to be available for federal obligation beginning April 1 of each fiscal year for expenditure by grantees beginning July 1 of each fiscal year.

### Technical Assistance

The bill adds a requirement that DOL provide technical assistance that helps inform one-stop staff on trauma-informed approaches and issues related to gender-based violence.<sup>87</sup> As discussed above, the intent of this addition is to develop the workforce system's understanding of trauma-informed approaches to employment and training services generally, and of gender-based violence issues specifically. Developing an understanding of trauma-informed approaches can help one-stop staff work more effectively with job seekers who have experienced a wide range of trauma that affects their ability to participate in employment and training services. Victims of gender-based violence are one group that has experienced a particular type of trauma and may be served more effectively because of this technical assistance.<sup>88</sup> When implementing this requirement, DOL should either contract with, hire, or fund individuals or organizations with a background in gender-based violence to provide training and technical assistance on trauma-informed practices and gender-based violence for WIOA program staff.

### Evaluations and Research

The bill updates and strengthens the evaluations and research provisions of WIOA of 2014 in two ways.<sup>89</sup> First, it removes the language in current law that authorizes research studies on several specific workforce development topics because those studies have been completed. The bill replaces those studies with an authorization for a new study about correctional institution

employment and training, which is needed to further develop the limited evidence on effective strategies in this area

Second, the bill authorizes a workforce development innovation fund. The purpose of this fund is to encourage innovation in workforce development and help build the evidence base about effective approaches. With respect to administering this fund, DOL awards grants to local and state boards, nonprofits, and institutions of higher education to conduct innovative workforce development projects. Unlike the existing multistate project authority under WIOA, this fund allows for smaller, potentially single-site projects that test an innovative concept.<sup>90</sup> The fund is authorized to provide early-phase grants to test such unproven ideas, mid-phase grants to scale up and evaluate initial projects that show promise, and expansion grants to more widely implement and replicate the most successful projects. Over the longer term, the goal is for workforce programs under WIOA to draw on the evidence from this fund and increasingly adopt evidence-based approaches into their standard practices.

### YouthBuild Programs

The bill makes several revisions to the YouthBuild program that enhance the services available through the program and make other improvements.<sup>91</sup> The bill extends the authorized period of follow-up services after job placement from 12 months to 24 months, in recognition of the ongoing challenges that at-risk youth may face with maintaining employment and the need for extended supports. It authorizes the use of YouthBuild funds for providing meals to participants, which according to YouthBuild programs is critical to enabling low-income youth to participate in the program. It also allows YouthBuild grantees to count their YouthBuild grant funds towards the matching requirement of the *National and Community Service Act of 1990*.<sup>92</sup> YouthBuild programs report that many of the grantees under the program are small, community-based organizations that lack the funds to meet the matching requirement under the *National and Community Service Act of 1990*. This change enables more of these organizations—which best understand the needs of and have connections with at-risk youth in their communities—to receive grants.

## **Authorizing New National Programs**

### Strengthening Community Colleges Training Grants

Community colleges are a critical partner in the workforce development system as a major provider of WIOA-funded training services and a repository of subject matter expertise in a wide range of fields. Strengthening community colleges' focus on workforce development will help the workforce system meet its goals. DOL's Strengthening Community Colleges Training grants, currently operated by DOL under WIOA evaluations and research authority, aim to build the capacity of community colleges to provide training for in-demand jobs and address equity gaps in the labor market, in conjunction with employers and the workforce development

system.<sup>93</sup> In 2022, DOL announced the availability of \$45 million for the second round of competitive grants.<sup>94</sup> This bill codifies this competitive grant program, including its basic purposes and design.<sup>95</sup> It authorizes grants for community colleges to work in partnership with employers and the workforce system to develop training for in-demand industry sectors and occupations. Community colleges must use the funds to develop and deliver education and training programs, which can include career pathways, work-based learning, and apprenticeships. They must also reserve 15 percent of funds for supportive services to help participants complete training, consistent with this bill's overall emphasis on supportive services. The bill also continues the existing grants' focus on addressing equity, as grants are prioritized to applicants that will serve individuals with barriers to employment or incumbent workers who need foundational skills training.

### Reentry Employment Opportunities

The bill authorizes reentry employment opportunity (REO) competitive grants, codifying the grant program currently operated by DOL under WIOA evaluations and research authority.<sup>96</sup> There is a critical need for reentry employment and training services for individuals returning from incarceration. Nearly 600,000 individuals are released from state and federal prisons each year,<sup>97</sup> and according to one study almost half of them will experience repeat contact with the criminal justice system within a year of release.<sup>98</sup> This bill takes a step toward addressing the employment challenges faced by these justice-involved individuals by making reentry services a permanent part of the workforce development system and incorporating best practices gleaned from congressional testimony and other sources. The bill authorizes DOL to award competitive grants to non-profit providers to provide employment and training services to justice-involved adults or youth. The grant period is for four years, ensuring that programs have sufficient time to provide services and continue follow-up after job placement. In awarding grants, priority is given to grantees serving individuals prior to or soon after release from incarceration, to maximize the chances for a smooth transition from incarceration to stable employment. Authorized activities include intensive career counseling; the full range of training services available under WIOA; supportive services including mental health treatment such as cognitive behavioral therapy, which has been shown to be linked to improved employment and recidivism outcomes for justice-involved individuals; employer engagement; and transitional jobs, a common approach for helping justice-involved individuals get connected to the workforce.<sup>99</sup>

### Sectoral Employment through Career Training for Occupational Readiness (SECTOR) Program

The involvement of employers and industry groups is critical to the success of the workforce development system, as it ensures that training and other workforce development activities are targeted to skills that are in demand among local employers. Industry and sector partnerships have the potential to be a valuable form of engagement between industry and the workforce system, as they bring employers and workforce professionals together to focus on building the worker pipeline for locally in-demand industry sectors. WIOA of 2014 included a new requirement for local boards to use adult and dislocated worker funds to develop and convene industry and sector partnerships.<sup>100</sup> However, according to a Mathematica Policy Research report, few local boards undertook major new sector partnership initiatives in response to this requirement, and some local staff said the definition of industry and sector partnerships was too nebulous and hard to operationalize.<sup>101</sup> This bill establishes a separate industry and sector partnership program within WIOA, which includes a funding set-aside for this purpose and more fully developed programmatic requirements.<sup>102</sup> Most of the funding (80 percent) is distributed by formula to the states and local boards, to supplement their existing formula funds and allow them to increase their investment in such partnerships. In addition, 20 percent of funding is reserved for competitive grants, so the Secretary can target funds to particular regions experiencing economic disruptions and to high-growth industries. For example, these grant funds could be used to support regional efforts to develop jobs in the creative economy, the green economy, health care, or information technology.

## **Adult Education and Literacy**

### Digital Literacy Skills

Technological advances since the last authorization of WIOA in 2014 have made digital literacy a necessary skillset to function in the labor market and adult life in much the same way as literacy and numeracy. This bill includes “digital literacy” or “digital skills” throughout the *Adult Education and Family Literacy Act* to ensure that adults receiving foundational education are gaining all the requisite skills needed in the current economy.

### Integrated Education

This bill further expands upon the definition of “Integrated Education and Training” and “Integrated English Literacy and Civics Education.” In both instances, it provides further detail on the kinds of workforce preparation activities that make up integrated education. For

<sup>102</sup> H.R. 7309, § 279.

“Integrated Education and Training,” it specifies that workforce preparation activities should lead to high wage and high demand occupations to ensure that participants in integrated adult education receive training for the same in-demand, sustainable careers as Title I WIOA participants. The definition of “Integrated English Literacy and Civics Education” builds upon the existing activities that make up that definition by further including the use of digital technology skills, application for federal student financial aid and apprenticeship programs, preparation for high school enrollment or employment, and instruction in navigating multiple support systems and financial literacy. These activities make up important components of civic life.

### Performance Accountability Demonstration

The existing statute requires that adult education activities be subject to the same performance accountability requirements as Title I programs. While the alignment of performance measures across the workforce system and varying populations is a useful evaluative tool, it does not allow for the capture of different challenges and achievements among different populations. In acknowledgment that adult education services should be measured in different ways than Title I services, this bill authorizes a new demonstration grant for the purpose of innovating new performance measures that better capture the outcomes experienced by adult learners.

An important element of the demonstration grants are the reporting requirements during and after the duration of the grants. The grants require that those receiving funding shall provide to the Secretary a report on the progress made on alternative performance measures, which shall go through a peer review process. The process of the progress report and associated peer review are intended to provide a robust feedback loop to best inform the Secretaries of Labor and Education about the efficacy of proposed alternative measures.

### Professional Development

To ensure that individuals in adult education are receiving a high-quality education, the staffing and professional development of adult educators must be given increased funding and emphasis. This bill addresses the supply of high-quality adult educators in several ways. It amends the State Leadership activities to pilot and strengthen program quality standards and credentialing of adult educators. It also increases allowable funds for program development by removing professional development activities from the local administrative cost limit cap and providing their own separate allowance of funds. It amends the National Leadership Activities to allow for improved professionalization of the adult education workforce. According to stakeholders, the adult education workforce is comprised of too many part-time educators, which limits the efficacy and supply of educators for adult education services. This bill rectifies that by providing for the creation and implementation of full-time staffing models.

## **Authorizing Funds to Meet the Nation’s Workforce Development Needs**

Overall, H.R. 7309 authorizes \$78 billion in spending for workforce development programs over six years, Fiscal Year (FY) 2023 to FY 2028. This historic investment corrects for decades of erosion of federal spending on these programs, which has left a weakened workforce system that

cannot provide the needed level of services—training programs leading to high-quality jobs and supportive services to help participants complete training—and cannot serve enough people in need of services.

With regard to the core Title I formula programs for adults, dislocated workers, and youth, the bill authorizes \$6 billion for FY 2023. This level of funding more than matches the inflation-adjusted previous highest level of funding for these programs in FY 2002 and is nearly double the amount appropriated for FY 2022. The bill then authorizes a 10 percent increase each year for these formula programs, so funding levels will at least keep up with inflation and the federal investment will not continue to erode. Ultimately, by FY 2028, the authorized funding levels for the formula programs is estimated to support training for one million participants.

The bill authorizes a significant increase in the investment in reentry services, with \$250 million authorized for FY 2023—compared to about \$100 million appropriated in FY 2022—followed by \$50 million increases each year and a funding level of \$500 million in FY 2028. The current level of spending for REO programs does not meet the needs of the entire reentry population; this bill recognizes the need to invest more while also providing time for reentry service providers to build up their capacity to serve more participants.

Lastly, the bill authorizes FY 2023 funding levels above the FY 2022 enacted levels for all other WIOA programs as well, with subsequent annual increases to keep pace with inflation.

It also provides more direction regarding the process for obtaining public input on the draft plan. The section also requires the state plan to describe the state's strategy for joint planning, alignment, coordination, and leveraging funds, including with federal partners.

### **Section 203. Combined State Plan**

## **Chapter 2—Local Provisions**

### **Section 206. Workforce Development Areas**

This section amends the process that Governors use when designating local workforce development areas—geographic areas that correspond to local labor markets and receive allocations of Title I funds by formula—including by requiring consultation with state economic development agencies and a consideration of how such designations will improve efficiency in service delivery and ensure access to comprehensive one-stop centers.

### **Section 207. Local Workforce Development Boards**

This section amends the membership requirements for local boards that establish workforce development strategies and priorities for local areas by, among other things, increasing the potential share of labor organizations on the boards to 30 percent, requiring standing committees focused on adult education and other issues, and requiring the demographic composition of the boards to reflect the demographic diversity of the local area. It amends the functions of the local

board in several ways, including by ensuring that technology is leveraged to ensure individuals with barriers to employment have access to workforce services.

## **Section 208. Local Plans**

This section amends the required elements of local plans—documents outlining workforce development strategies and priorities for local areas—by, among other things, requiring descriptions of how the local board will help job seekers assess their options for entering training programs that lead to high quality jobs and how the local board will leverage technology to improve coordination and co-enrollment among one-stop partners. This section also requires the local board to conduct a comprehensive needs assessment for better coordination and availability of youth workforce activities.

- providing authority to the Secretary to develop new performance measures to indicate the quality of jobs earned after participants receive training, such as paid time off and workplace safety, among others;
- amending the process for states and federal agencies to come to an agreement on state performance levels, including by requiring the federal agencies to initially propose expected performance levels based on their statistical adjustment model and by expanding the requirement for continuous improvement to include adoption of new service strategies or serving new populations; and
- requiring states to develop and publish state equity reports that identify and quantify any disparities in performance outcomes across demographic groups, such as race, ethnicity, and gender.

- authorizing public libraries to serve as affiliated one-stop sites, creating another option for bringing workforce services into communities;
- providing greater clarity on the role of one-stop operators, which includes managing infrastructure, facilitating coordination among partners, and providing direct services;

- emphasizing that one-stop infrastructure includes both the physical footprint of the one-stop centers and the technology needed to provide virtual services;
- allowing local workforce development boards to serve as one-stop operators under certain conditions; and
- providing a set-aside of funding to cover one-stop infrastructure costs from Title I formula, Wagner-Peyser, and Adult Education programs, and eliminating the Infrastructure Funding Agreement requirements.

## **Section 222. Identification of Eligible Providers of Training Services**

This section amends the requirements governing the state eligible training provider list (ETPL)—the list of training programs approved by the state to be funded with Title I funds—in several ways, including by:

- authorizing online education and training programs to qualify for the ETPL;
- expanding the criteria that states can develop for inclusion on the ETPL, through guidance from the Secretary, to include a certification by employers or an industry and sector partnership that the training will lead to recognized post-secondary credentials, in-demand competencies, and opportunities for jobs paying competitive wages;
- strengthening the accountability measures that bar training providers whose performance does not meet established criteria from inclusion on the ETPL for a period of time; and
- requiring the Governor to review the training providers on the ETPL annually to ensure they still satisfy the criteria for inclusion.

## **Chapter 2—Youth Workforce Investment Activities**

### **Section 233. Use of Funds for Youth Workforce Investment Activities**

This section amends the required and allowable youth workforce development activities that the one-stop delivery system provides to eligible youth in several ways, including by:

- requiring local areas to conduct a comprehensive youth needs assessment, which must, among other things, address the performance outcomes for youth in the local area, the particular workforce development needs of local youth, the workforce services available, and effective strategies that will be employed for meeting youths' needs; and

- removing the requirement that all program elements must be provided as a part of authorized youth workforce activities.

### **Section 234. Summer and Year-Round Employment for Youth**

This section directs local areas to provide summer and year-round employment opportunities that may include subsidized and unsubsidized employment. The summer or year-round employment program must include elements such as mentoring, work-readiness training, career exploration, coaching, and financial literacy training.

This section amends the required and allowable uses of funds for adult and dislocated worker employment and training activities provided by the one-stop delivery system in several ways, including by:

- enhancing workforce development services for older workers, by allowing States to use their reserve funds to develop alternative strategies for meeting the needs of older workers—such as self-employment—and to coordinate with other programs serving this population;
- enhancing the workforce system’s ability to effectively serve individuals who have been victims of gender-based violence by allowing states to use their reserve funds to coordinate with other programs serving victims;
- requiring one-stops to connect individuals to adult education services before finding them ineligible for training services because of a lack of foundational skills;
- requiring that at least 75 percent of adult funds allocated to local areas for career, training, or supportive services be spent on individuals who have the highest needs, including those who are low-income, are public assistance recipients, and have other barriers to employment;
- providing further clarity on the types of requirements employers should meet to receive reimbursements for on-the-job training costs, such as basic indicators of job quality, including competitive wages, availability of benefits, and a safe workplace;
- making supportive services a required activity, available to adults and dislocated workers who are in career or training services or in their first 12 months of a placement in unsubsidized employment; and
- raising the cap on the proportion of local funds that can be spent on incumbent worker training (to 25 percent) and transitional jobs (to 40 percent).

## STATEMENT OF PERFORMANCE GOALS AND OBJECTIVES

Pursuant to clause (3)(c) of Rule XIII of the Rules of the House of Representatives, the goals of H.R. 7309 are to modernize our nation's workforce development system through increased funding and a new focus on equity and job quality.

## DUPLICATION OF FEDERAL PROGRAMS

Pursuant to clause 3(c)(5) of Rule XIII of the Rules of the House of Representatives, the Committee states that no provision of H.R. 7309 is known to be duplicative of another federal program, including any program that was included in a report to Congress pursuant to section 21 of Pub. L. No. 111-139 or the most recent Catalog of Federal Domestic Assistance.

## HEARINGS

Pursuant to clause 3(c)(6) of Rule XIII of the Rules of the House of Representatives, the Committee held a bipartisan roundtable and three bipartisan hearings that were used to develop H.R. 7309.

On April 21, 2021, the Education and Labor (Committee) held a bipartisan Member roundtable on the reauthorization of the *Workforce Innovation and Opportunity Act*. During the roundtable, Members and panelists discussed challenges facing the existing workforce system and how the reauthorization of WIOA of 2014 could address those challenges. The panelists were: Mr. David Bradley, Analyst in Labor Economics, Congressional Research Service (CRS), Washington, DC; Ms. Dawn Locke, Acting Director, Education, Workforce, and Income Security, Government Accountability Office (GAO), Washington, DC; Mr. Ron Painter, President and CEO, National Association of Workforce Boards, Washington, DC; and Ms. Maria Flynn, President and CEO, Jobs for the Future, Boston, MA.

On May 13, 2021, the Committee held a bipartisan hearing entitled "*Workforce Innovation and Opportunity Act Reauthorization: Creating Opportunities for Youth Employment.*" The Committee heard testimony on the challenges facing the youth activities authorized under WIOA of 2014. The witnesses were: Ms. Chekemma Fullmore-Townsend, President and CEO, Philadelphia Youth Network, Philadelphia, PA; Mr. Thomas Showalter, Senior Advisor, National Youth Employment Coalition, Washington, DC; Ms. Deb Lindner, Human Resources Manager, Precor, Whitsett, NC; and Mr. Byron Garret, President & CEO, National Job Corps Association, Washington, DC.

On May 27, 2021, the Committee held a bipartisan hearing entitled "*Workforce Innovation and Opportunity Act Reauthorization: Creating Employment Pathways for Dislocated Workers.*" The Committee heard testimony on how to use the reauthorization of WIOA of 2014 to mitigate worker displacement and promote lifelong learning. The witnesses were: Mr. Joe Barela, Executive Director, Colorado Department of Labor and Employment, Denver, CO; Mr. P.J. McGrew, Executive Director, Indiana Governor's Workforce Cabinet, Indianapolis, IN; Mr. Matt Sigelman, Chief Executive Officer, Burning Glass Technologies, Boston, MA; and Ms.

Portia Wu, Managing Director, U.S. Public Policy, U.S. Government Affairs, Microsoft Corporation, Washington, DC.

On June 15, 2021, the Committee held a bipartisan hearing entitled “*Workforce Innovation and Opportunity Act Reauthorization: Examining Successful Models of Employment for Justice-Involved Individuals.*” The Committee heard testimony on the need for a codified reentry grant that provides comprehensive services to justice-involved individuals. The witnesses were: Ms. Traci Scott, Vice President of Workforce Development, National Urban League, New York, NY; Mr. Gregg Keesling, President, Recycle Force, Indianapolis, IN; Ms. Pamela Lattimore, Senior Director for Research Development, Division for Applied Justice Research, RTI International, Research, Triangle Park, NC; and Ms. Wendi Safstrom, Executive Director, SHRM Foundation, Alexandria, VA.

### **STATEMENT OF OVERSIGHT FINDINGS AND RECOMMENDATIONS OF THE COMMITTEE**

In compliance with clause 3(c)(1) of Rule XIII and clause 2(b)(1) of Rule X of the Rules of the House of Representatives, the Committee’s oversight findings and recommendations are reflected in the descriptive portions of this report.

### **NEW BUDGET AUTHORITY AND CBO COST ESTIMATE**

Pursuant to clause 3(c)(2) of Rule XIII of the Rules of the House of Representatives and section 308(a) of the *Congressional Budget and Impoundment Control Act of 1974*, and pursuant to clause 3(c)(3) of Rule XIII of the Rules of the House of Representatives and section 402 of the *Congressional Budget and Impoundment Control Act of 1974*, the Committee has requested but not received a cost estimate for the bill from the Director of the Congressional Budget Office.

### **COMMITTEE COST ESTIMATE**

Clause 3(d)(1) of Rule XIII of the Rules of the House of Representatives requires an estimate and a comparison of the costs that would be incurred in carrying out H.R. 7309. However, clause 3(d)(2)(B) of that rule provides that this requirement does not apply when the committee has included in its report a timely submitted cost estimate of the bill prepared by the Director of the Congressional Budget Office under section 402 of the *Congressional Budget and Impoundment Control Act of 1974*. The Committee reports that because this cost estimate was not timely submitted to the Committee before the filing of this report, the Committee is not in a position to make a cost estimate for H.R. 7309, as amended.

### **CHANGES IN EXISTING LAW MADE BY THE BILL, AS REPORTED**

SEC. 112. (a) From funds appropriated under subsection (h), the Secretary shall, in accordance with this section, make grants

to States to establish and carry out client assistance programs to provide assistance in informing and advising all clients and client applicants of all available benefits under this Act, including under sections 113 and 511, and, upon request of such clients or client applicants, to assist and advocate for such clients or applicants in their relationships with projects, programs, and services provided under this Act, including assistance and advocacy in pursuing legal, administrative, or other appropriate remedies to ensure the protection of the rights of such individuals under this Act and to facilitate access to the services funded under this Act through individual and systemic advocacy. The client assistance program shall provide information on the available services and benefits under this Act and title I of the Americans with Disabilities Act of 1990 (42 U.S.C. 12111 et seq.) to individuals with disabilities in the State, especially with regard to individuals with disabilities who have traditionally been unserved or underserved by vocational rehabilitation programs. In providing assistance and advocacy under this subsection with respect to services under this title, a client assistance program may provide the assistance and advocacy with respect to services that are directly related to facilitating the employment of the individual.

(b) No State may receive payments from its allotment under this Act in any fiscal year unless the State has in effect a client assistance program which—

(1) has the authority to pursue legal, administrative, and other appropriate remedies to ensure the protection of rights of individuals with disabilities who are receiving treatments, services, or rehabilitation under this Act within the State; and

(2) meets the requirements of designation under subsection

(c).

(c)(1)(A) The Governor shall designate a public or private agency to conduct the client assistance program under this section. Except as provided in the last sentence of this subparagraph, the Governor shall designate an agency which is independent of any agency which provides treatment, services, or rehabilitation to individuals under this Act. If there is an agency in the State which has, or had, prior to the date of enactment of the Rehabilitation Amendments of 1984, served as a client assistance agency under this section and which received Federal financial assistance under this Act, the Governor may, in the initial designation, designate an agency which provides treatment, services, or rehabilitation to individuals with disabilities under this Act.

(B)(i) The Governor may not redesignate the agency designated under subparagraph (A) without good cause and unless—

(I) the Governor has given the agency 30 days notice of the intention to make such redesignation, including specification of the good cause for such redesignation and an opportunity to respond to the assertion that good cause has been shown;

(II) individuals with disabilities or the individuals' representatives have timely notice of the redesignation and opportunity for public comment; and

(III) the agency has the opportunity to appeal to the Commissioner on the basis that the redesignation was not for good cause.

(ii) If, after the date of enactment of the Rehabilitation Act Amendments of 1998—

(I) a designated State agency undergoes any change in the organizational structure of the agency that results in the creation of one or more new State agencies or departments or results in the merger of the designated State agency with one or more other State agencies or departments; and

(II) an agency (including an office or other unit) within the designated State agency was conducting a client assistance program before the change under the last sentence of subparagraph (A),

the Governor shall redesignate the agency conducting the program. In conducting the redesignation, the Governor shall designate to conduct the program an agency that is independent of any agency that provides treatment, services, or rehabilitation to individuals with disabilities under this Act.

(2) In carrying out the provisions of this section, the Governor shall consult with the director of the State vocational rehabilitation agency, the head of the developmental disability protection and advocacy agency, and with representatives of professional and consumer organizations serving individuals with disabilities in the State.

(3) The agency designated under this subsection shall be accountable for the proper use of funds made available to the agency.

(d) The agency designated under subsection (c) of this section may not bring any class action in carrying out its responsibilities under this section.

(e)(1)(A) After reserving funds under subparagraphs (E) and (F), the Secretary shall allot the remainder of the sums appropriated for each fiscal year under this section among the States on the basis of relative population of each State, except that no State shall receive less than \$50,000.

(B) The Secretary shall allot \$30,000 each to American Samoa, Guam, the Virgin Islands, and the Commonwealth of the Northern Mariana Islands.

(C) For the purpose of this paragraph, the term “State” does not include American Samoa, Guam, the Virgin Islands, and the Commonwealth of the Northern Mariana Islands.

(D)(i) In any fiscal year that the funds appropriated for such fiscal year exceed \$7,500,000, the minimum allotment shall be \$100,000 for States and \$45,000 for territories.

(ii) For any fiscal year in which the total amount appropriated under subsection (h) exceeds the total amount appropriated under such subsection for the preceding fiscal year, the Secretary shall increase each of the minimum allotments under clause (i) by a percentage that shall not exceed the percentage increase in the total amount appropriated under such subsection between the preceding fiscal year and the fiscal year involved.

(E)(i) The Secretary shall reserve funds appropriated under subsection (h) to make a grant to the protection and advocacy sys-

tem serving the American Indian Consortium to provide services in accordance with this section. The amount of such a grant shall be the same amount as is provided to a territory under this subsection.

(ii) In this subparagraph:

(I) The term “American Indian Consortium” has the meaning given the term in section 102 of the Developmental Disabilities Assistance and Bill of Rights Act of 2000 (42 U.S.C. 15002).

(II) The term “protection and advocacy system” means a protection and advocacy system established under subtitle C of title I of the Developmental Disabilities Assistance and Bill of Rights Act of 2000 (42 U.S.C. 15041 et seq.).

Such training and technical assistance shall be coordinated with activities provided under section 509(c)(1)(A).

(2) The amount of an allotment to a State for a fiscal year which the Secretary determines will not be required by the State during the period for which it is available for the purpose for which allotted shall be available for reallocation by the Secretary at appropriate times to other States with respect to which such a determination has not been made, in proportion to the original allotments of such States for such fiscal year, but with such proportionate amount for any of such other States being reduced to the extent it exceeds the sum the Secretary estimates such State needs and will be able to use during such period, and the total of such reduction shall be similarly reallocated among the States whose proportionate amounts were not so reduced. Any such amount so reallocated to a State for a fiscal year shall be deemed to be a part of its allotment for such fiscal year.

(3) Except as specifically prohibited by or as otherwise provided in State law, the Secretary shall pay to the agency designated under subsection (c) the amount specified in the application approved under subsection (f).

(f) No grant may be made under this section unless the State submits an application to the Secretary at such time, in such manner, and containing or accompanied by such information as the Secretary deems necessary to meet the requirements of this section.

(g) The Secretary shall prescribe regulations applicable to the client assistance program which shall include the following requirements:

(1) No employees of such programs shall, while so employed, serve as staff or consultants of any rehabilitation project, program, or facility receiving assistance under this Act in the State.

(2) Each program shall be afforded reasonable access to policymaking and administrative personnel in the State and local rehabilitation programs, projects, or facilities.

(3)(A) Each program shall contain provisions designed to assure that to the maximum extent possible alternative means of dispute resolution are available for use at the discretion of an applicant or client of the program prior to resorting to litigation or formal adjudication to resolve a dispute arising under this section.

(B) In subparagraph (A), the term “alternative means of dispute resolution” means any procedure, including good faith negotiation, conciliation, facilitation, mediation, factfinding, and arbitration, and any combination of procedures, that is used in lieu of litigation in a court or formal adjudication in an administrative forum, to resolve a dispute arising under this section.

(4) For purposes of any periodic audit, report, or evaluation of the performance of a client assistance program under this section, the Secretary shall not require such a program to disclose the identity of, or any other personally identifiable information related to, any individual requesting assistance under such program.

(f)(1) There shall be appointed by the Access Board an executive director and such other professional and clerical personnel as are necessary to carry out its functions under this Act. Special advisory and technical experts and consultants appointed pursuant to this paragraph shall, while performing their functions under this section, be entitled to receive compensation at rates fixed by the Chairperson, but not exceeding the daily equivalent of the rate of pay for level 4 of the Senior Executive Service Schedule under section 5382 of title 5, United States Code, including travel time, and while serving away from their homes or regular places of business they may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of such title 5 for persons in the Government service employed intermittently.

For purposes of Federal income, estate, or gift taxes, property accepted under this section shall be considered as a gift, devise, or bequest to the United States.

(B) The Access Board shall publish regulations setting forth the criteria the Board will use in determining whether the acceptance of gifts, devises, and bequests of property, both real and personal, would reflect unfavorably upon the ability of the Board or any employee to carry out the responsibilities or official duties of the Board in a fair and objective manner, or would compromise the integrity of or the appearance of the integrity of a Government program or any official involved in that program.

**SEC. 509. PROTECTION AND ADVOCACY OF INDIVIDUAL RIGHTS.**

(a) PURPOSE AND CONSTRUCTION.—

(1) PURPOSE.—The purpose of this section is to support a system in each State to protect the legal and human rights of individuals with disabilities who—

(A) need services that are beyond the scope of services authorized to be provided by the client assistance program under section 112; and

(B)(i) are ineligible for protection and advocacy programs under subtitle C of the Developmental Disabilities Assistance and Bill of Rights Act of 2000 because the individuals do not have a developmental disability, as defined in section 102 of such Act (42 U.S.C. 6002); and

(ii) are ineligible for services under the Protection and Advocacy for Mentally Ill Individuals Act of 1986 (42 U.S.C. 10801 et seq.) because the individuals are not individuals with mental illness, as defined in section 102 of such Act (42 U.S.C. 10802).

(2) CONSTRUCTION.—This section shall not be construed to require the provision of protection and advocacy services that can be provided under the Assistive Technology Act of 1998.

(b) APPROPRIATIONS LESS THAN \$5,500,000.—For any fiscal year in which the amount appropriated to carry out this section is less than \$5,500,000, the Commissioner may make grants from such amount to eligible systems within States to plan for, develop outreach strategies for, and carry out protection and advocacy programs authorized under this section for individuals with disabilities who meet the requirements of subparagraphs (A) and (B) of subsection (a)(1).

(c) APPROPRIATIONS OF \$5,500,000 OR MORE.—

(1) RESERVATIONS.—

(A) TECHNICAL ASSISTANCE.—For any fiscal year in which the amount appropriated to carry out this section equals or exceeds \$5,500,000, the Commissioner shall set aside not less than 1.8 percent and not more than 2.2 percent of the amount to provide a grant, contract, or cooperative agreement for training and technical assistance to the systems established under this section.

(B) GRANT FOR THE ELIGIBLE SYSTEM SERVING THE AMERICAN INDIAN CONSORTIUM.—For any fiscal year in which the amount appropriated to carry out this section equals or exceeds \$10,500,000, the Commissioner shall reserve a portion, and use the portion to make a grant for the eligible system serving the American Indian consortium. The Commission shall make the grant in an amount of not less than \$50,000 for the fiscal year.

(2) ALLOTMENTS.—For any such fiscal year, after the reservations required by paragraph (1) have been made, the Commissioner shall make allotments from the remainder of such amount in accordance with paragraph (3) to eligible systems within States to enable such systems to carry out protection and advocacy programs authorized under this section for individuals referred to in subsection (b).

(3) SYSTEMS WITHIN STATES.—

(A) POPULATION BASIS.—Except as provided in subparagraph (B), from such remainder for each such fiscal year, the Commissioner shall make an allotment to the eligible system within a State of an amount bearing the same ratio to such remainder as the population of the State bears to the population of all States.

(B) MINIMUMS.—Subject to the availability of appropriations to carry out this section, and except as provided in paragraph (4), the allotment to any system under subparagraph (A) shall be not less than \$100,000 or  $\frac{1}{3}$  of 1 percent of the remainder for the fiscal year for which the allotment is made, whichever is greater, and the allotment to any system under this section for any fiscal year that is less than \$100,000 or  $\frac{1}{3}$  of 1 percent of such remainder shall be increased to the greater of the two amounts.

(4) SYSTEMS WITHIN OTHER JURISDICTIONS.—

(A) IN GENERAL.—For the purposes of paragraph (3)(B), Guam, American Samoa, the United States Virgin Islands, and the Commonwealth of the Northern Mariana Islands shall not be considered to be States.

(B) ALLOTMENT.—The eligible system within a jurisdiction described in subparagraph (A) shall be allotted under paragraph (3)(A) not less than \$50,000 for the fiscal year for which the allotment is made.

(5) ADJUSTMENT FOR INFLATION.—For any fiscal year, beginning in fiscal year 1999, in which the total amount appropriated to carry out this section exceeds the total amount appropriated to carry out this section for the preceding fiscal year, the Commissioner shall increase each of the minimum grants or allotments under paragraphs (1)(B), (3)(B), and (4)(B) by a percentage that shall not exceed the percentage increase in the total amount appropriated to carry out this section between the preceding fiscal year and the fiscal year involved.

(d) PROPORTIONAL REDUCTION.—To provide minimum allotments to systems within States (as increased under subsection (c)(5)) under subsection (c)(3)(B), or to provide minimum allotments to systems within States (as increased under subsection (c)(5))

under subsection (c)(4)(B), the Commissioner shall proportionately reduce the allotments of the remaining systems within States under subsection (c)(3), with such adjustments as may be necessary to prevent the allotment of any such remaining system within a State from being reduced to less than the minimum allotment for a system within a State (as increased under subsection (c)(5)) under subsection (c)(3)(B), or the minimum allotment for a State (as increased under subsection (c)(5)) under subsection (c)(4)(B), as appropriate.

(e) REALLOTMENT.—Whenever the Commissioner determines that any amount of an allotment to a system within a State for any fiscal year described in subsection (c)(1) will not be expended by such system in carrying out the provisions of this section, the Commissioner shall make such amount available for carrying out the provisions of this section to one or more of the systems that the Commissioner determines will be able to use additional amounts during such year for carrying out such provisions. Any amount made available to a system for any fiscal year pursuant to the preceding sentence shall, for the purposes of this section, be regarded as an increase in the allotment of the system (as determined under the preceding provisions of this section) for such year.

(f) APPLICATION.—In order to receive assistance under this section, an eligible system shall submit an application to the Commissioner, at such time, in such form and manner, and containing such information and assurances as the Commissioner determines necessary to meet the requirements of this section, including assurances that the eligible system will—

(1) have in effect a system to protect and advocate the rights of individuals with disabilities;

(2) have the same general authorities, including the authority to access records and program income, as are set forth in subtitle C of title I of the Developmental Disabilities Assistance and Bill of Rights Act of 2000;

(3) have the authority to pursue legal, administrative, and other appropriate remedies or approaches to ensure the protection of, and advocacy for, the rights of such individuals within the State or the American Indian consortium who are individuals described in subsection (a)(1);

(4) provide information on and make referrals to programs and services addressing the needs of individuals with disabilities in the State or the American Indian consortium;

(5) develop a statement of objectives and priorities on an annual basis, and provide to the public, including individuals with disabilities and, as appropriate, the individuals' representatives, an opportunity to comment on the objectives and priorities established by, and activities of, the system including—

(A) the objectives and priorities for the activities of the system for each year and the rationale for the establishment of such objectives and priorities; and

(B) the coordination of programs provided through the system under this section with the advocacy programs of the client assistance program under section 112, the State

long-term care ombudsman program established under the Older Americans Act of 1965 (42 U.S.C. 3001 et seq.), the Developmental Disabilities Assistance and Bill of Rights Act of 2000, and the Protection and Advocacy for Mentally Ill Individuals Act of 1986 (42 U.S.C. 10801 et seq.);

(6) establish a grievance procedure for clients or prospective clients of the system to ensure that individuals with disabilities are afforded equal opportunity to access the services of the system; and

(7) provide assurances to the Commissioner that funds made available under this section will be used to supplement and not supplant the non-Federal funds that would otherwise be made available for the purpose for which Federal funds are provided.

(g) CARRYOVER AND DIRECT PAYMENT.—

(1) DIRECT PAYMENT.—Notwithstanding any other provision of law, the Commissioner shall pay directly to any system that complies with the provisions of this section, the amount of the allotment of the State or the grant for the eligible system that serves the American Indian consortium involved under this section, unless the State or American Indian consortium provides otherwise.

(2) CARRYOVER.—Any amount paid to an eligible system that serves a State or American Indian consortium for a fiscal year that remains unobligated at the end of such year shall remain available to such system that serves the State or American Indian consortium for obligation during the next fiscal year for the purposes for which such amount was paid.

(h) LIMITATION ON DISCLOSURE REQUIREMENTS.—For purposes of any audit, report, or evaluation of the performance of the program established under this section, the Commissioner shall not require such a program to disclose the identity of, or any other personally identifiable information related to, any individual requesting assistance under such program.

(i) ADMINISTRATIVE COST.—In any State in which an eligible system is located within a State agency, a State may use a portion of any allotment under subsection (c) for the cost of the administration of the system required by this section. Such portion may not exceed 5 percent of the allotment.

(j) DELEGATION.—The Commissioner may delegate the administration of this program to the Commissioner of the Administration on Developmental Disabilities within the Department of Health and Human Services.

(k) REPORT.—The Commissioner shall annually prepare and submit to the Committee on Education and the Workforce of the House of Representatives and the Committee on Labor and Human Resources of the Senate a report describing the types of services and activities being undertaken by programs funded under this section, the total number of individuals served under this section, the types of disabilities represented by such individuals, and the types of issues being addressed on behalf of such individuals.

## Minority Views on H.R. 7309, the *Workforce Innovation and Opportunity Act of 2022*

### Introduction

As the nation's primary workforce development law, the *Workforce Innovation and Opportunity Act* (WIOA) is intended to help job seekers obtain the skills they need for successful careers and help employers access the talent they need to grow their businesses. While the 2014 WIOA reauthorization took significant steps to inject positive reform into the workforce development system, more is required to modernize the system so that it achieves these goals. Following the pandemic, the needs of the nation's workforce have drastically changed, and the nation needs a workforce development system that prepares American workers for the job opportunities of today and tomorrow—not those of the past.

Unfortunately, H.R. 7309, the *Workforce Innovation and Opportunity Act of 2022*, lacks the necessary reforms to help America's workers, and even backpedals in several areas. First, the bill expands federal control over the workforce system and diminishes the role of employer; for example, the bill increases the size of the state and local workforce boards to expand the role of organized labor. In the last reauthorization, Congress recognized the need to streamline these boards and give employers more say in how the workforce system operates. Unfortunately, this bill undoes those reforms. The bill also increases costs to taxpayers by requiring Job Corps contractors to comply with onerous local prevailing wage requirements, while doing nothing to increase the program's effectiveness. Additionally, the bill's proposed spending would make the country's inflation crisis even worse.

Second, this legislation takes unprecedented steps to assert federal control over workers' individual employment decisions by introducing federal definitions of job quality throughout the legislation. Job seekers do not need the federal government to increase barriers to employment. They need a workforce development system that can respond quickly to the market and help prepare them for local, in-demand jobs. Decisions about the kind of jobs that meet the needs of job seekers across the country should be left to individuals—not Washington.

Third, the bill reveals Democrats' interest in pursuing a radical progressive agenda at the expense of commonsense reforms. Rather than ensuring the system is upskilling more workers, the legislation adds new bureaucratic hurdles that bog states down in equity reports and unequal outcomes metrics. Every eligible individual should have the opportunity to access services under WIOA to help them obtain the skills they need. Unfortunately, the Democrats' bill will bog down the workforce development system in more layers of bureaucracy and will not help close the skills gap.

Fourth, H.R. 7309 freezes the Job Corps program in time and reduces performance expectations. This is a lose-lose situation for youth and taxpayers. By saying that the only pilot or demonstration model possible is a center-based and operator-run program, the Democrats' bill strangles current and future innovations. Maintaining the existing model of Job Corps service delivery as the only foreseeable model is wrong and tone-deaf to the changing needs of Job Corps-eligible youth. This is particularly true for residential models, which are always expensive (even when no students are in them). Although it may not be in the best interest of Job Corps

operators to have additional innovations in the program, it is in the best interest of Job Corps-eligible youth and taxpayers.

Finally, the Democrats' bill reinforces the status quo at the expense of innovation. The bill makes it harder for workers to find education providers they need when the system should work to make it easier, and it doubles down on the Depression-era registered apprenticeship system instead of embracing new models of work-based learning. The bill also rejects proposals to expand employer-driven reskilling and upskilling activities, while failing to make any reforms to the system's decades-old governance model.

### **Republican substitute amendment**

Republicans offered a substitute amendment that would reauthorize WIOA for fiscal years 2023 through 2028 and bring needed innovation and flexibility to the workforce development system. The Republican substitute would make the workforce system employer-driven, which will help strengthen America's economy for decades to come and would empower states and localities to address their unique situations.

The Republican substitute would put taxpayer dollars to work where they are needed most: helping job seekers obtain the skills they need to close the skills gap and get back to work. It does this in several ways. First, it ensures that at least 70 percent of WIOA dollars are dedicated to upskilling workers. Second, it brings more competition into the provider marketplace, which expands the pool of skills development providers that meet employer needs and gives more choices to American workers. Third, it ensures states and localities can use WIOA funds to survey employers to better understand the skills that are most in-demand and respond accordingly. Fourth, it empowers states and localities to address their unique situations by increasing the funds that governors can reserve for innovative ideas within their states. This offers a flexible option for addressing economic changes and the current workforce shortage. Fifth, it allows eligible youth to receive individually tailored skills development opportunities so they will be better prepared to enter the workforce. Finally, the Republican substitute expands the ability of localities to use funds to help current workers get new skills so they can meet the demands of today's rapidly changing economy.

The nation's workforce development system needs more innovation, flexibility, and efficiency. Given the current labor shortage, the workforce system needs to be streamlined to focus funds more effectively on upskilling job seekers rather than on wasteful government bureaucracy. By allowing localities to further pool funding in the delivery of skills development services, the Republican substitute encourages regional collaboration. This cuts down on bureaucracy and focuses funds on the program's priority: educating American workers.

The Republican substitute adapts WIOA to the changing economic landscape. America just came through a pandemic, and during that time businesses, employers, and workers shifted to remote work and learned to accommodate changing circumstances. Skills development and education programs should adapt to changing circumstances as well. That is why the substitute encourages workforce boards to provide services virtually, which streamlines WIOA and eliminates administrative costs and overhead. Republicans also ensure online skills development providers

can be included as providers of skills development services, expanding the number of providers who can address the needs that American workers face.

Additionally, the Republican alternative levels the playing field and encourages innovation by ensuring that WIOA does not favor registered apprenticeships over more innovative apprenticeship models that can address the needs of more employers. This will keep America's labor force at the cutting edge of global competition.

Since competition drives better results, the Republican substitute also encourages programs with a proven track record of successfully helping American workers succeed through pay-for-performance funding. The Republican proposal measures programs based on real outcomes and gives states and localities more flexibility in how they can improve those outcomes. Additionally, the substitute amendment increases transparency by making the process for creating performance metrics available to the American public.

The Republican substitute recognizes a simple reality that decades of bloated government has made abundantly clear: excess bureaucracy can slow progress. That is why the amendment would require the Department of Labor to review federal laws and find the legislative and regulatory bottlenecks that drive excess occupational licensing requirements, so that Congress can correct these problems.

Finally, the Republican alternative brings greater accountability to the Department of Labor's Job Corps program and Reentry Opportunities Program. The substitute amendment injects key reforms into the failed Job Corps program to make it more accountable and safer for participants. To accomplish this, the substitute would help Job Corps-eligible students get technical and career education from community colleges, which would give this program much-needed innovation and better outcomes.

Centers would be required to report whenever any concerning incidents occurred, ensuring proper oversight of the program, and centers would be required to offer productive services – such as tutoring – for students during idle times when they are not in class to cut down on the number of behavioral problems that arise throughout the week at Job Corps centers. The Republican substitute would also improve the security at Job Corps centers by requiring all centers to state clearly their policy on outreach to local law enforcement so they can be better prepared to handle illegal activities on campus when they arise.

The Republican substitute also builds on President Donald Trump's historic criminal justice reform by bringing greater accountability to the Reentry Employment Opportunities program, ensuring that this program will help formerly incarcerated Americans establish a firm economic foundation for their new life.

Together, these reforms will modernize the workforce system so that it works for both job seekers and employers.

**Additional rejected amendments that would have improved the bill**

During consideration of H.R. 7309, Committee Democrats also rejected the following four amendments that would have brought greater accountability and protections for taxpayers:

- Rep. Bob Good (R-VA) offered two amendments.
  - An amendment to require skills development providers and employers that receive funding under WIOA to participate in the E-verify program.
  - An amendment to ensure a broad range of work-based learning opportunities are encouraged in WIOA rather than the law overemphasizing the registered apprenticeship model.
- Rep. Mary Miller (R-IL) offered two amendments.
  - An amendment to strike language from the bill that encourages identity politics in the workforce development system.
  - An amendment to prohibit WIOA funds from being used to reimburse health care services, ensuring that no funding could be used to pay for abortions.

## **Conclusion**

It is critical that the Committee take steps to modernize the workforce development system, but the Democrats' decision to advance this legislation on a partisan basis does not improve the status quo. Committee Republicans believe Congress must inject new ideas into the workforce development system to correct its weaknesses. The reforms put forward in the Republican substitute provide the forward-looking changes that the workforce development system needs if it is going to serve job seekers and employers and help grow the American economy.
