

DEPARTMENT OF DEFENSE APPROPRIATIONS BILL, 2021

XXX, 2020.—Committed to the Committee of the Whole House on the State of the
Union and ordered to be printed

Mr. VISCLOSKY of Indiana, from the Committee on Appropriations,
submitted the following

R E P O R T

[To accompany H.R.]

The Committee on Appropriations submits the following report in explanation of the accompanying bill making appropriations for the Department of Defense, and for other purposes, for the fiscal year ending September 30, 2021.

BILL TOTALS

Appropriations for most military functions of the Department of Defense are provided for in the accompanying bill for fiscal year 2021. This bill does not provide appropriations for military construction, military family housing, civil defense, and military nuclear warheads, for which requirements are considered in connection with other appropriations Acts.

The President's fiscal year 2021 budget request for activities funded in the Department of Defense Appropriations Act totals \$698,320,572,000 in new budget obligational authority.

COMPARATIVE STATEMENT OF NEW BUDGET (OBLIGATIONAL) AUTHORITY FOR 2020
AND BUDGET REQUESTS AND AMOUNTS RECOMMENDED IN THE BILL FOR 2021
(Amounts in thousands)

	FY 2020 Enacted	FY 2021 Request	Bill	Bill vs. Enacted	Bill vs. Request
RECAPITULATION					
Title I - Military Personnel.....	142,446,067	150,524,104	149,355,652	+6,909,585	-1,168,452
Title II - Operation and Maintenance.....	199,415,415	196,630,496	196,703,001	-2,712,414	+72,505
Title III - Procurement.....	133,879,995	130,866,091	133,633,757	-246,238	+2,767,666
Title IV - Research, Development, Test and Evaluation.	104,431,232	106,224,793	104,348,089	-83,143	-1,876,704
Title V - Revolving and Management Funds.....	1,564,211	1,348,910	1,348,910	-215,301	---
Title VI - Other Department of Defense Programs.....	36,316,176	34,720,940	35,321,321	-994,855	+600,381
Title VII - Related Agencies.....	1,070,000	1,177,000	1,133,728	+63,728	-43,272
Title VIII - General Provisions (net).....	-3,803,211	276,000	-3,556,766	+246,445	-3,832,766
Title IX - Global War on Terrorism (GWOT).....	70,665,000	68,650,238	68,435,000	-2,230,000	-215,238
Total, Department of Defense.....	698,341,963	690,418,572	686,722,692	-11,619,271	-3,695,880
Scorekeeping adjustments.....	7,658,815	8,416,000	8,416,000	+557,185	---
Total, mandatory and discretionary.....	706,000,778	698,834,572	695,138,692	-11,062,086	-3,695,880

COMMITTEE BUDGET REVIEW PROCESS

During its review of the fiscal year 2021 budget request and execution of appropriations for fiscal year 2020, the Subcommittee on Defense held ten hearings and one formal briefing during the period of February 2020 to March 2020. Hearings were held in open session, except when the security classification of the material to be discussed presented no alternative but to conduct those hearings in executive or closed session.

INTRODUCTION

The Committee recommendation for total fiscal year 2021 Department of Defense funding is \$694,624,692,000, which is an increase of \$1,294,992,000 above the fiscal year 2020 enacted level and a decrease of \$3,695,880,000 below the budget request. The recommendation includes \$626,189,692,000 in base funding and \$68,435,000,000 for overseas contingency operations/global war on terrorism funding in title IX.

With this bill, the Committee has carried out its constitutional responsibility to recommend the appropriations necessary to provide for the common defense of the Nation. The Committee performed its role in a collegial and bipartisan fashion consistent with long-standing traditions.

Oversight of the management and expenditure of the \$694,624,692,000 provided to the Department of Defense and the Intelligence Community is a core function of the Defense Subcommittee. The Subcommittee performed this responsibility with a detailed review of the fiscal year 2021 budget request and, prior to the ongoing public health crisis, held ten hearings with defense and intelligence community witnesses to evaluate the budget request.

While the Subcommittee was forced to truncate its hearing schedule, it has thoroughly reviewed the budget request and identified programs where reductions are possible without adversely affecting the safety and effectiveness of military personnel. Examples of such reductions include programs that have been restructured since the budget was submitted, savings from favorable contract pricing adjustments, contract or schedule delays resulting in savings, unjustified new programs and cost increases, funds requested ahead of need for the year of budget execution, projected or historical underexecution, and rescissions of unneeded prior year funds.

The fiscal year 2021 request for the Department of Defense increases funding for modernization, continuing the effort to reorient the focus of the Department from counterterrorism to preparing for a war with a technologically advanced and well-equipped peer or near-peer military. The Committee recommendation provides the resources to maintain the technological advantage which currently exists for the United States and provides funding in areas to further these efforts. However, the Committee recommendation also reflects the importance of the people who may fight these new battles and continue prosecuting existing missions.

The Committee recommendation includes funding for the three percent military pay raise. In the fiscal year 2020 request, the Committee was concerned by the reduction of funding in quality of life areas such as such as childcare, and ultimately increased funding for these programs in the enacted legislation. Once again, the

budget request proposes reductions in funding for childcare, as well as reductions in funding for teacher-student ratios for the Department of Defense Education Agency. The Committee is dismayed by the contradiction of the Department rhetorically supporting military families while continuing to reduce funding for the very programs on which they rely. Within the immense budget of the Department, quality of life programs must not be the bill payers for modernization.

Unfortunately, the cuts to quality of life programs are only one example of the Department's mismatch between its stated priorities and its fiscal actions. Another example is the continued use of defense funding to pay for the border wall. Two days after the Administration's release of the budget request for fiscal year 2021, the Secretary of Defense directed the reprogramming of \$3,831,000,000 of fiscal year 2020 funds for the purpose of border wall construction. Neither fiscal year 2019 nor 2020 included requests from the Department of Defense for these activities. These funds, which were explicitly appropriated by Congress for the procurement of equipment for the Department of Defense, were redirected for the construction of additional physical barriers and roads along the southern border of the United States. In 2019, the amount transferred from the original appropriated Department of Defense funding accounts to the Army Corps of Engineers was \$6,100,000,000. Due to what has become an annual occurrence for the Department to transfer funding and circumvent its use for purposes other than what the funding was appropriated for, the Committee's skepticism about the Defense budget has grown. Department leadership has claimed that three to five percent annual real growth in the defense budget is necessary to support the National Defense Strategy while transferring nearly \$10,000,000,000 for non-defense activities not enumerated within the National Defense Strategy. The Committee condemns these decisions, as well as repeated requests for more flexibility within the budget structure and reprogramming authorities to increase the ability of the Department of Defense to realign funding among different activities, with or without seeking prior congressional approval. The granting of additional budget flexibility to the Department is based on the presumption that a state of trust and comity exists between the legislative and executive branches regarding the proper use of appropriated funds. This presumption presently is false.

In a continuing effort to circumvent the budget caps in the Budget Control Act, the Overseas Contingency Operations (OCO) request for fiscal year 2021 once again includes a total of \$16,000,000,000 for base activities. The budget caps and firewall between defense and non-defense funding will cease to exist in fiscal year 2022. The Department recognizes this impending budget construct in its future years defense program with \$20,000,000,000 projected in OCO budgets for fiscal years 2022 and 2023 and \$10,000,000,000 for fiscal years 2024 and 2025. With the possibility of significantly fewer deployed American servicemembers in Afghanistan combined with more training exercises and less contingencies, activities funded in the past by OCO could very well be supported within base accounts in the future. For these reasons, the Committee believes that the Department should cease requesting funding for the OCO accounts following this fiscal year. The

traditional manner of funding contingency operations through supplementals should return. The OCO experiment has been an abject failure and has given the Department a budgetary relief valve that has allowed it to avoid making difficult decisions.

Finally, the Committee recommendation expresses concerns with various pilot programs, programs of record, the radical restructuring of military health care, and the lack of budget transparency. The lateness of reports directed by the Committee has become more common in fiscal year 2020 and reinforces the dismissive attitude toward oversight exhibited by the Department. The Department has repeatedly approached the expenditure of funding without regard to congressional intent or the purpose for which funding has been appropriated. Increasingly, the Department is moving away from a partnership with the Committee in providing for the common defense. The Department of Defense has benefitted from large budget increases since fiscal year 2017, and this budgetary growth has been accompanied by a decline in transparency and cooperation with Congress. When coupled with the Department's disturbing actions over the past two years to fund the border wall, the contravention of the constitutional authority of the United States Congress has now become habitual. The Committee finds this to be both unacceptable and unsustainable.

DEFINITION OF PROGRAM, PROJECT, AND ACTIVITY

For the purposes of the Balanced Budget and Emergency Deficit Control Act of 1985 (Public Law 99–177), as amended by the Balanced Budget and Emergency Deficit Control Reaffirmation Act of 1987 (Public Law 100–119), and by the Budget Enforcement Act of 1990 (Public Law 101–508), the terms “program, project, and activity” for appropriations contained in this Act shall be defined as the most specific level of budget items identified in the Department of Defense Appropriations Act, 2021, the related classified annexes and Committee reports, and the P–1 and R–1 budget justification documents as subsequently modified by congressional action.

The following exception to the above definition shall apply: the military personnel and the operation and maintenance accounts, for which the term “program, project, and activity” is defined as the appropriations accounts contained in the Department of Defense Appropriations Act.

At the time the President submits the budget request for fiscal year 2022, the Secretary of Defense is directed to transmit to the congressional defense committees budget justification documents to be known as the M–1 and O–1, which shall identify, at the budget activity, activity group, and sub-activity group level, the amounts requested by the President to be appropriated to the Department of Defense for military personnel and operation and maintenance in any budget request, or amended budget request, for fiscal year 2022.

REPROGRAMMING GUIDANCE FOR BASE AND OVERSEAS CONTINGENCY OPERATIONS FUNDING

The Secretary of Defense is directed to continue to follow the reprogramming guidance for acquisition accounts as specified in the report accompanying the House version of the Department of Defense Appropriations bill for Fiscal Year 2008 (House Report 110–

279). The dollar threshold for reprogramming funds shall be \$10,000,000 for military personnel; operation and maintenance; procurement; and research, development, test and evaluation.

Additionally, the Under Secretary of Defense (Comptroller) is directed to continue to provide the congressional defense committees annual DD Form 1416 reports for titles I and II and quarterly, spreadsheet-based DD Form 1416 reports for Service and defense-wide accounts in titles III and IV of this Act. Reports for titles III and IV shall comply with guidance specified in the explanatory statement accompanying the Department of Defense Appropriations Act, 2006. The Department shall continue to follow the limitation that prior approval reprogrammings are set at either the specified dollar threshold or 20 percent of the procurement or research, development, test and evaluation line, whichever is less. These thresholds are cumulative from the base for reprogramming value as modified by any adjustments. Therefore, if the combined value of transfers into or out of a military personnel (M-1); an operation and maintenance (O-1); a procurement (P-1); or a research, development, test and evaluation (R-1) line exceeds the identified threshold, the Secretary of Defense must submit a prior approval reprogramming to the congressional defense committees. In addition, guidelines on the application of prior approval reprogramming procedures for congressional special interest items are established elsewhere in this statement.

FUNDING INCREASES

The funding increases outlined in the tables for each appropriation account shall be provided only for the specific purposes indicated in the tables.

CONGRESSIONAL SPECIAL INTEREST ITEMS

Items for which additional funds have been provided or items for which funding is specifically reduced as shown in the project level tables or in paragraphs using the phrase “only for” or “only to” in this report are congressional special interest items for the purpose of the Base for Reprogramming (DD Form 1414). Each of these items must be carried on the DD Form 1414 at the stated amount, as specifically addressed in the Committee report.

DESIGNATED CONGRESSIONAL SPECIAL INTEREST ITEMS

The Committee is concerned about the prevalence with which the Services and Defense agencies utilize congressional program increases to fund overhead costs within the Department of Defense. Increased program funding inherently requires an enhanced level of contracting, program management, and engineering costs. However, the Committee is dismayed that upwards of forty to fifty percent of certain congressional program increases have been applied towards full-time equivalents (FTE) and contracting costs to manage relatively small program increases. In some cases, the Committee has become aware of instances when FTE costs are charged to a congressional program increase when it is evident that those FTE do not work solely on that program, nor does the program require the level of FTE proposed by the Department.

It has become clear to the Committee that, in some cases, the Department is using congressional program increases to supplant budgeted overhead costs, which ultimately enables that budgeted funding to be used for Department activities not necessarily approved by the Committee. Therefore, the Committee directs the Secretary of Defense to limit Department overhead costs on congressional program increases to not more than 10 percent of the funding level provided. The Service Secretaries and the Under Secretary of Defense (Acquisition and Sustainment) may waive this requirement by submitting a prior approval request in writing to the House and Senate Appropriations Committees.

GENERAL TRANSFER AUTHORITY AND SPECIAL TRANSFER AUTHORITY

The Department of Defense, as part of the Executive Branch, has historically had a relationship with the Congress based on mutual trust, comity, professionalism, and a general desire to ensure the public good that is the defense of the United States and its interests. While the bounds of this relationship have been tested in the past, its tenets have not been blatantly forsaken until recently. Given the recent breach of trust embodied in the misuse of appropriated funds by the current Administration; the Congress, exercising its constitutional responsibility to oversee the Executive Branch, must improve its understanding of the Department's application of transfer authority and reprogramming actions as the Department executes the budget authority granted it by the Congress.

The Committee directs the Secretary of Defense to submit a report to the House and Senate Appropriations Committees not later than 60 days after the enactment of this Act which shall include the following:

- 1) The levels of General Transfer Authority (GTA)—granted in title VIII in annual defense appropriations acts—and Special Transfer Authority (STA)—granted in title IX in annual defense appropriations acts—provided to the Department of Defense by fiscal year for the last ten fiscal years. In addition to the overall levels of appropriated GTA and STA, the report shall include the portion of authorized GTA and STA that was utilized by the Department by fiscal year and specify the percentage of the total GTA and STA that was used for below threshold reprogramming actions;

- 2) The portion of GTA and STA, by fiscal year for the last ten fiscal years, used for reclassification purposes or to make technical corrections, where, via reprogramming, the Department was not proposing to change the purpose for which the funds were appropriated but was merely moving the funding to better reflect and obligate consistent with congressional intent;

- 3) The portion of GTA and STA, by fiscal year for the last ten fiscal years, appropriated to the Department of Defense, transferred to, and subsequently implemented by a Department or agency other than one funded in this Act;

- 4) The level of GTA and STA, by fiscal year for the last ten fiscal years, used for actions submitted to address urgent mission critical requirements, unforeseen circumstances of an urgent nature (such as the unanticipated mobilization and movement of military personnel to a conflict zone, or investments included in joint urgent operational needs statements), or for life safety; and

5) The portion of GTA and STA, by fiscal year for the last ten fiscal years, used to address non-mission critical contract awards, to fund initiatives or investments included in operational needs statements, to accelerate existing acquisition programs, to procure quantities of equipment and/or services originally planned for purchase in future years, and/or to augment previously planned research and development efforts.

CLASSIFIED ANNEX

Adjustments to the classified programs are addressed in the classified annex accompanying this report.

COMMITTEE RECOMMENDATIONS BY MAJOR CATEGORY

ACTIVE, RESERVE AND NATIONAL GUARD MILITARY PERSONNEL

In title I of the bill, the Committee recommends a total of \$157,726,652,000 for active, reserve, and National Guard military personnel, a decrease of \$1,168,452,000 below the budget request, and an increase of \$7,463,770,000 above the fiscal year 2020 enacted level. The Committee recommendation provides full funding necessary to increase basic pay for all military personnel by three percent, as authorized by current law, effective January 1, 2021.

OPERATION AND MAINTENANCE

In title II of the bill, the Committee recommends a total of \$196,703,001,000 for operation and maintenance support to the military Services and other Department of Defense entities, an increase of \$72,505,000 above the budget request, and a decrease of \$2,712,414,000 below the fiscal year 2020 enacted level. The recommended levels will fund robust operational training, readiness, and facilities needs in fiscal year 2021.

PROCUREMENT

In title III of the bill, the Committee recommends a total of \$133,633,757,000 for procurement.

Major initiatives and modifications include:

\$866,296,000 for the procurement of 42 UH/HH 60M Blackhawk helicopters, an increase of six helicopters designated for the National Guard;

\$1,164,152,000 for the Stryker combat vehicle including \$375,000,000 above the request to upgrade an additional 105 vehicles;

\$792,027,000 for the procurement of 50 remanufactured AH 64 Apache helicopters;

\$198,000,000 for the first five CH-47F Block II Chinook aircraft;

\$1,020,389,000 for the upgrade of 89 Abrams tanks to the M1A2 SEPv3 tank variant;

\$1,725,400,000 for the procurement of 24 F/A-18E/F Super Hornet aircraft;

\$510,000,000 for the procurement of three P-8A Poseidon multi-mission aircraft for the Navy Reserve; an increase of three aircraft and \$429,866,000 above the President's request;

\$791,140,000 for the procurement of five E-2D Advanced Hawkeye aircraft, an increase of one aircraft and \$165,031,000 above the President's request;

\$1,142,732,000 for the procurement of 11 V-22 aircraft, an increase of two aircraft and \$207,939,000 above the President's request;

\$1,050,634,000 for the procurement of nine CH-53K helicopters, an increase of two aircraft and \$237,310,000 above the President's request;

\$577,638,000 for the procurement of five VH-92 executive helicopters; \$9,254,291,000 for the procurement of 91 F-35 aircraft, an increase of \$1,396,100,000 and 12 aircraft above the President's request: 10 short take-off and vertical landing variants for the Marine Corps, 21 carrier variants for the Navy and Marine Corps, and 60 conventional variants for the Air Force;

\$22,157,938,000 for the procurement of nine Navy ships, including two DDG-51 guided missile destroyers, one Columbia class submarine, two SSN-774 attack submarines, one Frigate, one LPD-17 Flight II, and two Towing, Salvage, and Rescue Ships; a total increase of \$2,355,181,000 and one SSN-774 above the President's request;

\$1,242,247,000 for the procurement of 12 F-15EX aircraft;

\$965,496,000 for the procurement of 11 C/MC/KC-130J aircraft, an increase of \$184,574,000 and two C-130J aircraft above the President's request;

\$343,600,000 for the procurement of 16 MQ-9 Reaper unmanned aerial vehicles, an increase of 16 aircraft above the President's request;

\$2,707,380,000 for the procurement of 15 KC-46 tanker aircraft;

\$1,083,909,000 for the procurement of 19 combat rescue helicopters;

\$194,016,000 for the procurement of eight MH-139 helicopters;

\$933,271,000 for the procurement of three space launch services;

\$622,796,000 for the procurement of two Global Positioning System satellites; and

\$200,000,000 for the Israeli Cooperative Programs under the Missile Defense Agency.

RESEARCH, DEVELOPMENT, TEST AND EVALUATION

In title IV of the bill, the Committee recommends a total of \$104,348,089,000 for research, development, test and evaluation.

Major initiatives and modifications include:

\$306,682,000 for the continued development of the Columbia class ballistic missile submarine;

\$1,052,792,000 for the continued development of the precision strike weapons development program;

\$256,970,000 for the continued development of the unmanned carrier aviation program;

\$406,406,000 for the continued development of the CH-53K helicopter;

\$1,717,223,000 for the continued development of the F-35 Lightning Joint Strike Fighter aircraft;

\$2,848,410,000 for the continued development of the B-21 bomber;

\$800,889,000 for the development of a Presidential Aircraft Replacement;

\$513,501,000 for the design, build, and test of prototypes for the Army's Future Attack Reconnaissance Aircraft;

\$811,417,000 for planning, prototype manufacturing, and testing of the Army's Long Range Hypersonic Weapon;
 \$420,963,000 for the Army's Extended Range Cannon Artillery (ERCA) modernization effort;
 \$560,978,000 for space launch services;
 \$258,496,000 for the Global Positioning System III F;
 \$481,999,000 for the Global Positioning System III Operational Control Segment;
 \$2,318,864,000 for the Next-Generation Overhead Persistent Infrared system;
 \$3,511,848,000 for the Defense Advanced Research Projects Agency; and
 \$300,000,000 for the Israeli Cooperative Programs under the Missile Defense Agency.

DEFENSE HEALTH PROGRAM

The Committee recommends a total of \$33,297,902,000 for the Defense Health Program to support worldwide medical and dental services for active forces and other eligible beneficiaries.

OVERSEAS CONTINGENCY OPERATIONS/GLOBAL WAR ON TERRORISM REQUIREMENTS

In title IX of the bill, the Committee recommends a total of \$68,435,000,000 for overseas contingency operations/global war on terrorism (OCO/GWOT) requirements.

Military Personnel: The Committee recommends a total of \$4,602,593,000 for military personnel OCO/GWOT requirements in title IX of the bill.

Operation and Maintenance: The Committee recommends a total of \$57,824,499,000 for operation and maintenance OCO/GWOT requirements in title IX of the bill.

Procurement: The Committee recommends a total of \$6,473,543,000 for procurement OCO/GWOT requirements in title IX of the bill.

Research, Development, Test and Evaluation: The Committee recommends a total of \$321,508,000 for research, development, test and evaluation OCO/GWOT requirements in title IX of the bill.

CIVILIAN CYBER WORKFORCE

The Committee recognizes that the Department of Defense has challenges hiring individuals with the necessary security clearances to work in the cyber environment and encourages the Secretary of Defense to find innovative solutions to increase the civilian cyber workforce. The Committee believes that the Department of Defense should collaborate with colleges and universities to recruit college students during their junior or senior years, with the intent that upon graduation the student will have a completed security clearance.

The Committee notes the Secretary of Defense is required to submit a report on Department-wide efforts to increase recruitment of cyber-focused individuals and to increase the throughput of security clearances to grow the number of approved requisite applicants as directed in House Report 116-84. The Committee understands the Department expects to develop an implementation plan and

provide an interim report by the end of September 2020. The Committee expects the Secretary of Defense to update the congressional defense committees with any changes to the anticipated date of completion for the implementation plan and interim report.

INITIATING OPERATIONS

The Committee is concerned about the lack of information the Department of Defense provides to the Congress prior to and after initiating new operations and has been disappointed with the timeliness and completeness of the reports the Department is required to provide about troop deployments and new named and unnamed operations. The Committee recommendation includes language in section 8131 to address this disconnect by requiring the Secretary of Defense to provide a report to the congressional defense committees within three days after such deployments. The language pertains to “significant” deployments; in this case, significant is defined as deployments of 100 personnel or more. The Committee recommendation includes language which allows for the report to include a classified annex, if necessary.

CORONAVIRUS DISEASE 2019

With the advent of the recent novel coronavirus pandemic, much has changed in the United States and across the world. The Coronavirus Disease 2019 (COVID-19) has impacted every aspect of society and the United States military and industrial base have not been immune from the pandemic. The Committee is grateful to the servicemembers and the civilians on the front lines fighting and protecting the American people against this disease.

The Committee has worked with the Department to determine the appropriate level of supplemental funding required to address unforeseen requirements facing the Department in response to COVID-19. As such, for fiscal year 2020, Congress provided the Department of Defense \$82,000,000 in the Families First Coronavirus Response Act and \$10,503,674,000 in the Coronavirus Aid, Relief, and Economic Security (CARES) Act.

The Committee appreciates the updates the Department has provided on the obligation and execution of these supplemental funds and understands there may be additional costs to address the pandemic in the future. Therefore, the Committee recommendation for fiscal year 2021 includes \$758,000,000 in procurement for COVID-19 recovery for second, third, and fourth tier suppliers; \$450,000,000 in operation and maintenance for COVID-19 recovery and resupply; and \$150,000,000 in the Defense Health Program for COVID-19 response. The Committee directs the Secretary of Defense and the Service Secretaries to provide quarterly updates to the congressional defense committees, beginning October 20, 2020, on COVID-19-related expenses incurred in the previous quarter. The report shall include a breakout of obligations by account, budget activity, and sub-activity; and the number of personnel deployed to assist in mitigation efforts. The Committee also understands COVID-19 has caused schedule delays in several programs and in some cases has adversely impacted the Department’s ability to execute funding. Therefore, due to the lack of historical data or metrics to accurately project when funds may obligate or when schedules may resume, the report shall include any savings the De-

partment and Services may attain through delayed or cancelled events or activities, such as training, exercises, or deployments.

Related to the defense industrial base (DIB), the CARES Act included funding for the Defense Production Act (DPA) of 1950, which provides a broad set of authorities to ensure that domestic industry can meet national defense requirements. Of the amounts appropriated to the Department of Defense, \$1,000,000,000 was provided for DPA to prevent, prepare for, and respond to coronavirus, domestically or internationally. While the Department plans to execute a portion of that funding for personal protective equipment (PPE) as intended by Congress, most of the funds will be used to address the impact of COVID-19 on the DIB, which was not the original intent of the funds. The Department's own estimates indicate that the total domestic consumption of N95 masks is as high as 3,300,000,000. The Committee's expectation was that the Department would address the need for PPE industrial capacity rather than execute the funding for the DIB. Furthermore, the Department plans to execute \$100,000,000 of CARES Act DPA funding to make loans to private companies which has not been done for several decades under the DPA. The Committee is concerned that this funding will not support increased medical supply production, as intended by the additional CARES Act funding. The Committee recommends \$191,931,000 in this Act to support DPA activities to expand production capacity and supply and to incentivize the domestic industrial base to grow the production and supply of critical materials and goods. The recommendation does not include additional DPA funding to support COVID-19 efforts.

Beyond the obligation and expenditure reports, leaders across the Department of Defense have made an effort to keep the Committee informed on the impacts of COVID-19. While the Committee appreciates the level of engagement on the Department's efforts to respond to COVID-19, the Department's planning and preparation for such a health emergency is of concern. Despite having long-standing policies and plans for pandemic response, it is unclear if these have been effective. For example, the Department of Defense Instruction on the National Disaster Medical System (NDMS) is in place to guide the Department in responding to or providing assistance during other disasters, but little mention of the NDMS has been made in responding to COVID-19, and it is unclear what role, if any, the NDMS has had. The Secretary of Defense must capture lessons learned from this pandemic and update policy and planning documents to ensure that the most relevant and actionable instructions are published and updated for future health emergencies.

It is also concerning that the Department continues to move forward with the most significant medical restructuring of the Military Health System in decades. Prior to the pandemic, the Committee expressed concerns about the Department's plans to shed medical military billets and descope military treatment facilities (MTFs), and those concerns are more acute now. The Committee recommendation denies the Department's fiscal year 2021 request of \$334,613,000 to replace uniformed medical providers with civilians or contractors, and restores \$36,260,000 for the Department to continue supporting MTFs that had been proposed to be descope.

Lastly, the COVID-19 global pandemic has exposed vulnerabilities in America's ability to prevent, prepare for, and re-

spond to future pandemics. For example, the Committee is aware of vulnerabilities in America's reliance on foreign-sourced supplies of active pharmaceutical ingredients and their chemical components, and more generally, the nation's reliance on off-shore drug production. The Committee encourages the Secretary of Defense, the Director of the Defense Advanced Research Projects Agency, and the Director of the Biomedical Advanced Research and Development Authority to cooperatively research areas of mutual interest to address public health vulnerabilities, secure a national stockpile of life-saving drugs, and address vulnerability points for the military.

As the Committee's fiscal year 2021 recommendation is written in the pandemic's midst, the Committee notes that, in just a few months, COVID-19 has claimed more American lives than were lost during World War I. The economic destruction is stark enough to draw comparisons to the Great Depression of the 1930s. Only time will tell what ultimate damage will be done, but the Committee will not waiver in its support for the men and women in uniform as well as civilians working to protect the United States from this or any other enemy.

DOMESTIC MANUFACTURING REQUIREMENTS FOR NAVY SHIPBUILDING

The Committee consistently has expressed its concern with the Department of the Navy sourcing surface ship components from foreign industry partners rather than promoting a robust domestic industrial base. To address these concerns, the Committee retains several provisions from fiscal year 2020 and a new provision that expands the domestic manufacturing requirement for several classes of ships under development. Absent stringent contract requirements in these future surface ship classes, the Committee lacks confidence that the Navy will make the necessary decisions and provide the required resources to support a robust domestic industrial base.

LITTORAL COMBAT SHIP DECOMMISSIONS

The Committee is concerned with the Navy's proposal to decommission the first four Littoral Combat Ships well before the end of their service lives. The Navy continues to assert a goal of 355 ships, even though annual budget requests do not support this position. Additionally, the Committee believes it is shortsighted for the Navy to always procure new ships, rather than effectively maintaining and upgrading the ships currently in the Navy's inventory. Therefore, the Committee recommendation includes a provision which prohibits the use of funds for the purpose of decommissioning any Littoral Combat Ships.

The Committee is also concerned with the lack of a United States naval ship presence in Central and South America and believes that Littoral Combat Ships could be effective for the missions required in the Southern Command area of responsibility. The Committee directs the Secretary of the Navy to submit a report to the congressional defense committees not later than 30 days after the enactment of this Act on what upgrades would be required for these ships to effectively conduct operations in the Southern Command area of responsibility.

COMPLIANCE WITH CONGRESSIONALLY DIRECTED REPORTS

The Committee is concerned the Department of Defense consistently does not comply with many of the reporting requirements contained in prior Department of Defense Appropriations Acts. Such reports are often submitted beyond the deadline or, in some cases, not at all. These reports are essential to the Committee's ability to carry out its legislative and oversight responsibilities. The Committee encourages the Secretary of Defense to review the Department's processes with respect to such requirements and make management changes necessary for the Department to submit these reports in a complete and timely manner.

BUY AMERICA AND THE BERRY AMENDMENT

The Committee supports the Berry Amendment which promotes the purchase of goods that are produced in the United States and requires the Department of Defense to purchase items such as fabrics, textiles, clothing, food, and hand tools from domestic sources. The importance of this requirement is underscored by the COVID-19 pandemic and the need to ensure domestic production of personal protective equipment. The purchase of noncompliant items may result in a violation of the Antideficiency Act. The Berry Amendment applies unless acquisitions are at or below the simplified acquisition threshold, there is a domestic non-availability determination, or an exception of compliance applies. Requests for a waiver to the Berry Amendment based on national security interests may be submitted to the Under Secretary of Defense (Acquisition and Sustainment). However, a listing of the waivers received, and the determination decisions of those waivers has not been shared with the Committee, and a reporting mechanism has not been established. Therefore, the Committee directs the Under Secretary of Defense (Acquisition and Sustainment) to submit a report to the House and Senate Appropriations Committees, not later than 90 days after the enactment of this Act and quarterly thereafter, which includes all Berry amendment waiver requests submitted during the previous quarter and the determination of each waiver request. The report shall include, at a minimum, the Service or defense-wide account impacted, the date of the decision, and the reasons for approval or denial of the waiver request.

RENAMING INSTITUTIONS

The Committee directs the Secretary of Defense, in conjunction with the Service Secretaries, not later than one year after the enactment of this Act to:

- 1) complete the renaming process of any military installation (as defined in section 2801(c) of title 10, United States Code) or real property, that is currently named after any person who served in the political or military leadership of any armed rebellion against the United States;
- 2) commence the renaming of each covered military installation and covered defense property; and
- 3) provide a report to the congressional defense committees that includes a detailed description of the process to be used by the respective Service Secretary to develop a list of potential names for renaming covered military installations and covered

defense property; and an explanation regarding whether or not the respective Service Secretary established, or will establish, an advisory panel to support the review process to make recommendations to the respective Secretary. If the respective Secretary has established, or will establish, an advisory panel, the report shall include the names and positions of the individuals who will serve on the advisory panel.

If the Secretary of Defense, in conjunction with the relevant Service Secretaries, creates advisory panels to assist in the renaming process, the advisory panels shall consist of military leadership from covered military installations; military leadership from military installations containing covered defense property; state leaders and leaders of the locality in which a covered military installation or covered defense property is located; representatives from military museums, military historians, or relevant historians from the impacted states and localities with relevant expertise; and community civil rights leaders.

The Committee is certain the necessary funds exist in the budget to effect these changes with sufficient haste.

LAW ENFORCEMENT TRAINING

The Committee notes that the Commerce, Justice, Science, and Related Agencies Appropriations Act, 2021 directs the Attorney General to establish a training program to cover the use of force and de-escalation, racial profiling, implicit bias, and procedural justice, to include training on the duty of federal law enforcement officers to intervene in cases where another law enforcement officer is using excessive force, and make such training a requirement for federal law enforcement officers. The Committee further notes that each of the Services, the civilian entities that provide security, and the Pentagon Force Protection Agency (PFPA) funded by this Act are considered federal law enforcement officers and Federal Law Enforcement Training Centers partner organizations. The Committee directs the Secretary of Defense, the Service Secretaries, the civilian entities, and the PFPA to adopt and follow the training program established by the Attorney General, and to make such training a requirement for its federal law enforcement officers and any contractors providing security. The Committee further directs the Secretary of Defense, the Service Secretaries, and the PFPA to brief the House and the Senate Appropriations Committees on their efforts relating to training not later than 90 days after the Attorney General has established such a training program.

In addition, the Committee directs the Service Secretaries, the civilian entities, and the PFPA, to the extent that each have not already done so, to develop policies and procedures to submit their use of force data to the Federal Bureau of Investigation (FBI)'s National Use of Force Data Collection database. The Committee further directs the Secretary of Defense and the Service Secretaries to brief the House and the Senate Appropriations Committees not later than 90 days after the enactment of this Act on their current efforts to tabulate and submit its use of force data to the FBI.

TITLE I

MILITARY PERSONNEL

The fiscal year 2021 Department of Defense military personnel budget request totals \$158,895,104,000. The Committee recommendation provides \$157,726,652,000 for the military personnel accounts. The table below summarizes the Committee recommendations:

(DOLLARS IN THOUSANDS)

	BUDGET REQUEST	COMMITTEE RECOMMENDED	CHANGE FROM REQUEST

RECAPITULATION			
MILITARY PERSONNEL, ARMY.....	45,087,813	44,936,603	-151,210

GRAND TOTAL, MILITARY PERSONNEL.....	158,896,845	157,726,652	-1,170,193
	=====	=====	=====

MILITARY PERSONNEL OVERVIEW

The Committee recommendation provides \$157,726,652,000 for the military personnel accounts, which funds military pay and allowances, recruitment and retention initiatives, and overall quality of life programs for active duty, National Guard, and reserve personnel. The recommendation provides increased basic pay for all military personnel by 3 percent as authorized by current law, effective January 1, 2021. The Committee continues to encourage constructive evaluations of recruitment and retention programs, bonus and special pay incentives, and personnel benefit programs for fiscal year 2021. The Committee remains supportive of programs intended to enhance the morale and quality of life of military personnel and their families.

SUMMARY OF END STRENGTH

The fiscal year 2021 budget request includes an increase of 12,000 in total end strength for the active forces and an increase of 1,200 in total end strength for the Selected Reserve as compared to the fiscal year 2020 authorized levels. The following tables summarize the Committee recommendations for end strength levels, both in the aggregate and for each active and Selected Reserve component.

OVERALL ACTIVE END STRENGTH

Fiscal year 2020 authorized	1,339,500
Fiscal year 2021 budget request	1,351,500
Fiscal year 2021 recommendation	1,351,500
Compared with fiscal year 2020	12,000
Compared with fiscal year 2021 budget request	--

OVERALL SELECTED RESERVE END STRENGTH

Fiscal year 2020 authorized	800,800
Fiscal year 2021 budget request	802,000
Fiscal year 2021 recommendation	802,000
Compared with fiscal year 2020	1,200
Compared with fiscal year 2021 budget request	--

SUMMARY OF MILITARY PERSONNEL END STRENGTH

	Fiscal year 2020 authorized	Fiscal year 2021			Change from fiscal year 2020
		Budget Request	Committee Recommended	Change from request	
Active Forces (End Strength)

Total, Military Personnel	2,140,300	2,153,500	2,153,500	0	13,200

**REPROGRAMMING GUIDANCE FOR MILITARY PERSONNEL ACCOUNTS
(INCLUDING BASE AND OVERSEAS CONTINGENCY OPERATIONS
FUNDING)**

The Secretary of Defense is directed to submit the Base for Re-programming (DD Form 1414) for each of the fiscal year 2021 appropriations accounts not later than 60 days after the enactment of this Act. The Secretary of Defense is prohibited from executing any reprogramming or transfer of funds for any purpose other than originally appropriated until the aforementioned report is submitted to the House and Senate Defense Appropriations Subcommittees.

The Secretary of Defense is directed to use the normal prior approval reprogramming procedures to transfer funds in the Services' military personnel accounts between budget activities in excess of \$10,000,000.

MILITARY PERSONNEL SPECIAL INTEREST ITEMS

Items for which additional funds have been provided or have been specifically reduced as shown in the project level tables or in paragraphs using the phrase "only for" or "only to" in this report are congressional special interest items for the purpose of the Base for Reprogramming (DD Form 1414). Each of these items must be carried on the DD Form 1414 at the stated amount as specifically addressed in the Committee report. Below threshold reprogrammings may not be used to either restore or reduce funding from congressional special interest items as identified on the DD Form 1414.

MINORITY OUTREACH AND OFFICER ACCESSIONS

Minorities remain underrepresented in the general officer ranks across the Services. To build a more diverse organization, the Committee supports efforts to conduct effective outreach and recruiting

programs focused on increasing officer accessions in minority communities and encourages the Secretary of Defense and the Service Secretaries to support efforts, with both personnel and resources, to improve diversity in the military.

RECOGNIZING DIVERSITY IN THE MILITARY

The Committee believes that the Department of Defense should recognize diversity in the military and ensure that the entertainment and publishing industries accurately depict this reality. The Committee encourages the Secretary of Defense to work with the production and publishing companies to which the Department provides consultation services to ensure an accurate portrayal of diversity in the military. The Committee directs the Secretary of Defense to submit a report to the congressional defense committees not later than 120 days after the enactment of this Act that details the production and publishing companies the Department worked with in fiscal year 2020, with an accounting of the diversity of the film set for all workers broken down by “above-the-line” workers including but not limited to the directors, producers, and actors, as well as the “below-the-line” workers like set designers, camera operators, and sound engineers. This data shall be presented in a disaggregated manner by race, ethnicity, and gender to provide a clear depiction of diversity on set.

CULTURAL SENSITIVITY TRAINING

The Committee recognizes that the Department of Defense and the military Services have multiple cultural sensitivity training programs for military personnel and is concerned that the fiscal year 2021 budget request reduces funding for some of these important programs. The Committee also believes in the importance of protecting servicemembers’ rights regarding exercise of religion and ethnic heritage. As such, the Committee supports efforts to identify resource and personnel gaps that may exist in the Office for Diversity, Equity, and Inclusion of the Department of Defense as well as efforts to identify existing gaps in protections for new and prospective servicemembers.

TRAUMA TRAINING PROGRAM

The Committee recognizes the valuable support that universities, hospitals, and other military partners provide by offering civilian based emergency response trauma and critical care training including public health, bio-environmental, and biomedical instruction to sustain capabilities of the National Guard Enhanced Response Forces Packages, National Guard Homeland Response Forces, and Army Reserve Consequence Management Response Forces. The Committee encourages the Director of the National Guard Bureau and the Chiefs of the reserve components to continue pursuing advanced trauma and public health training with these civilian partners in order to maintain unit readiness. The Committee also encourages the development of enhanced medical and critical care preparedness programs.

SEXUAL ASSAULT PREVENTION AND RESPONSE

The Committee is troubled by the ongoing epidemic of sexual assault in the military and at the Service academies and believes that this will persist until a change in culture occurs across all Services at every level. The Department of Defense provides an annual report to Congress which provides details on sexual assaults involving servicemembers. However, the most recent report's findings make it clear that more action by the Department is necessary to combat this widespread problem. In addition to the annual report, the Committee directs the Director of the Department of Defense Sexual Assault Prevention and Response Office (SAPRO) to brief the House and Senate Appropriations Committees not later than 30 days after the enactment of this Act and quarterly thereafter, on the initiatives the Department is implementing to reform how the military prevents, responds to, and adjudicates sexual assault cases, as well as the efforts underway to develop robust research, evaluation, and analytics to assess the effectiveness of its prevention efforts.

The Committee recognizes SAPRO's efforts to implement a comprehensive policy to ensure the safety, dignity and well-being of all members of the military. Despite seeing promising outcomes from some newly implemented SAPRO programs, the most recent Department report from 2019 on the prevalence of sexual assault in the military is disturbing. The report found the number of sexual assaults in the military rose by 38 percent from 2016 to 2018 with roughly 20,500 servicemembers experiencing sexual assault, up from an estimated 14,900 in 2016. The report also found the sexual assault rate for women jumped a shocking 50 percent. While the Department touts increased reporting as a measure of success, only a third of all sexual assaults in the military were reported according to the 2019 report. Despite these dire findings and rhetoric from leadership in the Department and the Services, the budget for sexual assault prevention and response remains stagnant. The fiscal year 2021 budget proposes to cut funding for SAPRO by \$5,000,000 at the Department level. The Committee is appalled by the Department's failure to prioritize funding to address the systemic cultural problems associated with sexual assault in the military and the Service academies.

In recent years, Congress has given the Services numerous new tools and responsibilities to improve the military justice system. In particular, the Special Victims' Counsel program was created to provide sexual assault survivors with attorneys to represent their interests in criminal proceedings. The program has proved so critical and successful that it was expanded to serve survivors of domestic violence in the National Defense Authorization Act for Fiscal Year 2020. Despite the inherent importance of the Special Victims' Counsel program and the growing caseload of Special Victim Advocates, the Department fails to request dedicated funding in its annual budget request. Although the Services have taken the role of the Special Victims' Counsel program seriously, the Committee is disappointed by the Department's apparent apathy towards providing adequate funding to sustain a longstanding program.

The Committee recommends \$282,934,000, an increase of \$5,000,000 above the budget request, for sexual assault prevention and response programs at the Department and Service levels and provides an additional \$40,000,000 for the Department of Defense SAPRO for the Special Victims' Counsel program for transfer to the Services, including the National Guard and reserve components.

SUICIDE PREVENTION AND OUTREACH

The Committee is alarmed by the growing number of suicides among servicemembers. The Department's first Annual Suicide Report, released in 2019, found a statistically significant increase in the military's suicide rate among active duty servicemembers. The report found in just five years the rate of suicide rose by more than one-third, from 18.5 to 24.8 suicides per 100,000 active duty members.

For the National Guard, the report found the rate of suicide was statistically higher than that of the American population at 30.6 suicides per 100,000 members of the National Guard regardless of duty status. The Committee recognizes that programs like the National Guard Bureau's national counseling and suicide prevention peer-to-peer outreach programs are vital to reducing the number of suicides among guardsmen. The Committee encourages the Chief of the National Guard Bureau to continue supporting such programs.

The Committee acknowledges the Defense Suicide Prevention Office's (DSPO) hard work and dedication to advance holistic, data-driven suicide prevention through its partnership with the Services. However, the most recent report emphasizes the need for a more dedicated response to address the troubling rise of suicide among servicemembers. Despite statements by the Secretary of Defense that the military, "has the means and the resources to get ahead of this and do better than our civilian counterparts," the Department's investment in DSPO is negligible at best. The budget for staffing and programming of DSPO has remained flat despite the uptick in suicides among servicemembers. Instead of seeking to expand resources available to the Services, the Department has prioritized finding nominal cuts through the Defense-Wide Review for this office. The Committee is disappointed by the Department's failure to prioritize appropriate resources for DSPO and invest in efforts to understand the efficacy and effectiveness of its own suicide prevention programs.

In addition to the Annual Suicide Report, the Committee directs the Director of the DSPO to brief the House and Senate Appropriations Committees not later than 30 days after the enactment of this Act and quarterly thereafter, on the initiatives the Department is implementing to prevent military suicide, as well as the efforts underway to develop robust research, evaluation, and analytics to assess the effectiveness of its prevention efforts.

Further, the Committee directs the Secretary of Defense to submit to the House and Senate Appropriations Committees, not later than 90 days after the enactment of this Act, and monthly thereafter, a report on suicide among members of the armed forces. The report shall provide the number of suicides, attempted suicides, and occurrences of suicidal ideation involving a member of the

armed forces, including the reserve components. The report shall include the gender, age, rank, and method of suicide for each.

MILITARY PERSONNEL, ARMY

Fiscal year 2020 appropriation	\$42,746,972,000
Fiscal year 2021 budget request	45,087,813,000
Committee recommendation	44,936,603,000
Change from budget request	- 151,210,000

The Committee recommends an appropriation of \$44,936,603,000 for Military Personnel, Army which will provide the following program in fiscal year 2021:

CYBERSECURITY PROFESSIONALS

The Committee notes the importance of cybersecurity programs for the advancement of cybersecurity professionals in the Department of Defense. The Committee encourages the Secretary of the Navy to work with higher education institutions, including Historically Black Colleges and Universities, Hispanic Serving Institutions, and other Minority Serving Institutions, to develop programs for Navy Reserve Officer Training Corps midshipmen to prepare more students in critical cybersecurity skillsets.

MILITARY PERSONNEL, MARINE CORPS

Fiscal year 2020 appropriation	\$14,098,666,000
Fiscal year 2021 budget request	14,840,871,000
Committee recommendation	14,534,551,000
Change from budget request	- 306,320,000

The Committee recommends an appropriation of \$14,534,551,000 for Military Personnel, Marine Corps which will provide the following program in fiscal year 2021:

(DOLLARS IN THOUSANDS)

TITLE II

OPERATION AND MAINTENANCE

The fiscal year 2021 Department of Defense operation and maintenance budget request totals \$196,630,496,000. The Committee recommendation provides \$196,703,001,000 for the operation and maintenance accounts. The table below summarizes the Committee recommendations:

(DOLLARS IN THOUSANDS)

REPROGRAMMING GUIDANCE FOR OPERATION AND MAINTENANCE
ACCOUNTS

(INCLUDING BASE AND OVERSEAS CONTINGENCY OPERATIONS
FUNDING)

The Secretary of Defense is directed to submit the Base for Re-programming (DD Form 1414) for each of the fiscal year 2021 appropriation accounts not later than 60 days after the enactment of this Act. The Secretary of Defense is prohibited from executing any reprogramming or transfer of funds for any purpose other than originally appropriated until this report is submitted to the House and Senate Defense Appropriations Subcommittees.

The Secretary of Defense is directed to use the normal prior approval reprogramming procedures to transfer funds in the Services' operation and maintenance accounts between O-1 budget activities, or between sub-activity groups in the case of Operation and Maintenance, Defense-Wide, in excess of \$10,000,000. In addition, the Secretary of Defense shall follow prior approval reprogramming procedures for transfers in excess of \$10,000,000 out of the following readiness sub-activity groups:

Army:

Maneuver units
Modular support brigades
Land forces operations support
Aviation assets
Force readiness operations support
Land forces depot maintenance
Base operations support
Facilities sustainment, restoration, and modernization
Specialized skill training
Flight training

Navy:

Mission and other flight operations
Fleet air training
Aircraft depot maintenance
Mission and other ship operations
Ship depot maintenance
Combat support forces
Facilities sustainment, restoration, and modernization
Base operating support

Marine Corps:

Operational forces
Field logistics
Depot maintenance
Facilities sustainment, restoration, and modernization

Air Force:

Primary combat forces
Combat enhancement forces
Depot purchase equipment maintenance
Facilities sustainment, restoration, and modernization
Contractor logistics support and system support
Flying hour program

Global C3I and early warning
Base support

Space Force:

Global C3I and early warning
Space operations
Depot maintenance
Contractor logistics support and system support
Administration

Defense-Wide:

Office of the Secretary of Defense

Air National Guard:

Aircraft operations

Additionally, the Secretary of Defense is directed to use normal prior approval reprogramming procedures when implementing transfers in excess of \$10,000,000 into the following budget sub-activities:

Operation and Maintenance, Army National Guard:

Base operations support
Facilities sustainment, restoration, and modernization

Operation and Maintenance, Air National Guard:

Aircraft operations
Contractor logistics support and systems support

REPROGRAMMING GUIDANCE FOR SPECIAL OPERATIONS COMMAND

The Committee directs the Secretary of Defense to submit a baseline report that shows the Special Operations Command's operation and maintenance funding by sub-activity group for the fiscal year 2021 appropriation not later than 60 days after the enactment of this Act. The Secretary of Defense is further directed to submit quarterly execution reports to the congressional defense committees not later than 45 days after the end of each fiscal quarter that addresses the rationale for the realignment of any funds within and between budget sub-activities and the movement of any base funds used to support overseas contingency operations. Finally, the Secretary of Defense is directed to notify the congressional defense committees 30 days prior to the realignment of funds in excess of \$10,000,000 between sub-activity groups.

OPERATION AND MAINTENANCE SPECIAL INTEREST ITEMS

Items for which additional funds have been provided or have been specifically reduced as shown in the project level tables or in paragraphs using the phrase "only for" or "only to" in this report are congressional special interest items for the purpose of the Base for Reprogramming (DD Form 1414). Each of these items must be carried on the DD Form 1414 at the stated amount as specifically addressed in this report. Below Threshold Reprogrammings may not be used to either restore or reduce funding from congressional special interest items as identified on the DD Form 1414.

QUARTERLY OPERATION AND MAINTENANCE UPDATES

Regular interaction with each of the Service's financial management offices enhances the ability of the Committee to perform its essential oversight responsibilities. Through these interactions, the Committee gains a better understanding of the challenges each of the Services face with the obligation and execution of their programs and contracts. The Committee notes the successful quarterly meetings this year with each of the Services and directs the Director of each of the Service's Operations Divisions (Financial Management and Budget) to continue to provide quarterly briefings to the House and Senate Appropriations Committees on their respective operation and maintenance execution rates in fiscal year 2021.

RESTORING READINESS

The Committee recommendation includes additional readiness funds for each of the Services within the operation and maintenance accounts which shall only be used to improve military readiness, including providing for increased training and depot maintenance activities. None of the funding provided may be used for recruiting, marketing, or advertising programs. The additional funding is a congressional special interest item. The Committee directs the Secretary of Defense and the Service Secretaries to submit a detailed spend plan by sub-activity group not less than 30 days prior to the obligation of these funds.

RECLAIMED REFRIGERANTS

Reclaiming refrigerant mitigates the need to create new and potentially contaminating refrigerants and ensures the safe disposal of chemicals. Considering the large number of Department of Defense facilities and the widespread use of refrigerants, the Committee urges the Under Secretary of Defense (Acquisition and Sustainment) to give preference to the use of reclaimed refrigerants to service existing equipment in Department of Defense facilities.

MEALS READY-TO-EAT WAR RESERVE

The Committee recommendation fully supports the fiscal year 2021 request for the Defense Logistics Agency for a minimum of 2,500,000 cases of meals ready-to-eat and reaffirms support for the War Reserve stock objective of 5,000,000 cases and the minimum sustaining rate for the industrial base.

ADVERTISING

The Committee notes that, as the largest advertiser in the United States, the federal government should work to ensure fair access to its advertising contracts for small disadvantaged businesses and businesses owned by minorities and women. The Committee directs the Secretary of Defense to include with the fiscal year 2022 budget submission the total level of expenditures for fiscal year 2021 and the requested level of funding for fiscal year 2022 for all contracts for advertising services; contracts for advertising services by minority or women owned businesses; and contracts for advertising services by socially and economically dis-

advantaged small businesses (as defined in section 8(a)(4) of the Small Business Act (15 U.S.C. 637(a)(4)).

MINORITY AND WOMEN-OWNED BUSINESSES

The Committee is concerned that the Department of Defense does not take full advantage of the products and services available to the Department from minority and women-owned small businesses. The Committee directs the Secretary of Defense to submit a report to the congressional defense committees on the Department's efforts to work with minority and women-owned small businesses not later than 180 days after the enactment of this Act. The report shall specify the number and value of Department of Defense contracts for minority and women-owned small businesses and include a description of specific outreach programs the Department uses to reach minority and women-owned small businesses.

CLASSIFIED CONTRACTING FOR SMALL BUSINESSES

The Committee recognizes the vital role small businesses play in fostering technological innovation and expedited or novel approaches to acquisition within the national security enterprise. The Department of Defense and Intelligence Community benefit from these relationships that promote faster, more efficient, and cost-effective solutions to critical national security problems. Small businesses, however, can be disadvantaged given the non-trivial expenses associated with handling, transmitting, protecting, and storing classified information. These additional costs often manifest themselves as barriers to entry, giving rise to conditions that favor large and established contractors by providing them an implicit advantage over smaller businesses who cannot afford the added expense.

The Committee seeks solutions that allow new and non-traditional entrants to compete for classified contracts. The Committee, therefore, directs the Secretary of Defense and the Director of National Intelligence to submit a report to the House and Senate Appropriations Committees not later than 60 days after the enactment of this Act which surveys programs and initiatives in both the Department of Defense and the Intelligence Community that incentivize outreach to small businesses and lessen the burden and need for dedicated, company-specific classified infrastructure. The report shall also address how the Department and the Intelligence Community can expand relationships with small businesses that may or may not include access to secure compartmentalized information facilities.

PILOT SHORTAGES

The Committee supports efforts throughout the Department of Defense to address the shortage of pilots across the Services. The Committee encourages the Secretary of Defense to work with higher education institutions, including Historically Black Colleges and Universities, Hispanic Serving Institutions, and other Minority Serving Institutions, to develop programs that will prepare more students to meet the eligibility requirements for pilot training. In addition, the Committee encourages the Secretary of the Air Force

to examine university-based training for Air Force ROTC cadets and civilian aviation students as pilots and sensor operators for remotely piloted aircraft.

MILITARY FUNERAL HONORS

The Committee is concerned that military funeral honors are not provided to eligible veterans due to the absence of the required DD 214 form. The Committee encourages the Secretary of Defense to consider accepting alternative proof of service in the event the family of a deceased veteran is unable to locate or provide the DD 214 form in a timely manner in accordance with their cultural funeral procedures.

BODY COMPOSITION TESTING

The Committee recognizes the need for body composition testing for servicemembers to be based on medically tested and scientifically accurate indicators of health and fitness. The Committee directs the Secretary of Defense, in coordination with the Service Secretaries, to submit a report to the congressional defense committees not later than 90 days after the enactment of this Act on the status of changes to military fitness testing and the scientific evidence that led to the changes.

INVENTORY MANAGEMENT

The Committee remains concerned by the lack of accurate inventory management controls in place at the Department of Defense which often result in lost material, parts, and funding. The Committee directs the Secretary of Defense, in coordination with the Directors of the Defense Logistics Agency, the Defense Contract Management Agency, and the Defense Contract Audit Agency, to submit a report to the congressional defense committees not later than 60 days after the enactment of this Act that describes how the Department can better track its inventory. The report shall include possible recommendations on how to hold contractors liable for lost or unaccounted parts and materials, especially when contractors are on contract to provide inventory management.

LANGUAGE FLAGSHIP PROGRAM

The Committee recognizes the National Security Education Program provides training for servicemembers and civilians in languages and cultures critical to national security. The Committee is disappointed that the Secretary of Defense targeted the Language Flagship program for reduction during the Defense-Wide Review.

The Committee recommendation restores the funding removed in the budget request for this critical program and includes a total of \$16,000,000 for the program. The Committee encourages the Secretary of Defense to continue supporting programs that ensure warfighters receive the language and culture training needed to effectively complete missions. Additionally, the Committee directs the Secretary of Defense to submit a spend plan for this program's funding to the House and Senate Appropriations Committees not later than 15 days before the obligation of funds.

The Committee is concerned about the lack of military personnel with advanced language skills and believes this could be addressed by promoting foreign language study programs targeting elementary and secondary students. The National Defense Authorization Act for Fiscal Year 2020 authorized the development of a competitive grant program to provide support to eligible entities, including Department of Defense Education Activity schools, for the establishment, improvement, or expansion of world language study for this population. In support of this program, the Committee recommendation includes an additional \$15,000,000 for Department of Defense Education Activity schools. The Committee directs the Secretary of Defense to provide a detailed spend plan to the House and Senate Appropriations Committees for the implementation of the program, which should commence with the 2021-2022 academic year, not later than 45 days after the enactment of this Act.

Additionally, the Committee directs the Secretary of Defense to submit a report to the congressional defense committees not later than October 1, 2021 which lists the schools that receive funds, in what amount, how the funds were executed, as well as how the Department plans to expand the program to public schools in a local education agency that hosts a unit of the Junior Reserve Officers Corps Training Center, in the following academic year.

MILITARY FOOD TRANSFORMATION

The Committee remains concerned about the growing obesity crisis in the Department of Defense and its impact on military recruitment, readiness, and retention. The Committee is also concerned that the Department's current food system is overly complex and inefficient, which may result in higher costs per meal at dining facilities, unnecessary internal competition between on-base food service providers, and poor food service planning. Emphasis should be placed on providing nutritious food options at dining facilities and modernizing the on-base food system by using best practices from universities and industry partners.

The Committee directs the Secretary of Defense to submit a report to the congressional defense committees not later than 90 days after the enactment of this Act on food transformation efforts. The report should include details of the Department's ongoing efforts, costs associated with each effort, and an outline for a potential demonstration pilot program at multiple military installations. The Committee also anticipates submission of the completed audit by the Comptroller General of a sample of the Services' dining facilities to determine whether the Services are accurately measuring meal card holder utilization rates, costs per meal, and all input costs such as food, operating, capital expenditures, facility sustainment, and military labor.

The Committee also notes that funds are collected from servicemembers' pay in order to provide government furnished meals to military personnel. The Committee is concerned that the Department is not using those funds efficiently or exclusively for the intended purpose. The Committee directs the Service Secretaries to submit a report to the congressional defense committees not later than December 1, 2020 with the following information from the previous fiscal year: the average daily number of

servicemembers on essential station messing (ESM); the total aggregate amount of Basic Allowance for Subsistence withheld from the pay of these same servicemembers for the purposes of providing them a government meal; the total number of meals consumed by ESM servicemembers using their meal entitlement; the total actual cost of the food purchased for the government-provided meals consumed by ESM; and to the extent the amount collected from ESM exceeds the amount spent on purchasing food for the meals consumed by these ESM, a detailed accounting of the difference to include the rationale for any spending for other purposes.

VIEQUES AND CULEBRA

The Committee remains concerned with the pace and scope of environmental restoration on the island municipalities of Culebra and Vieques in Puerto Rico. The Committee encourages the Secretary of the Army and the Secretary of the Navy to work closely with the Environmental Protection Agency, the Fish and Wildlife Service, and the Puerto Rico Environmental Quality Board to maximize public participation and transparency in the decontamination process in order to achieve a thorough decontamination result on both islands.

The Committee also is concerned about public safety on the northwest peninsula of Culebra due to unexploded ordnance identified there by the Army. The Committee encourages the Secretary of the Army to exercise available authorities, including the authority clarified in the National Defense Authorization Act for Fiscal Year 2015, to decontaminate the northwest peninsula. Additionally, the Committee directs the Secretary of the Army and the Secretary of the Navy each to submit a report to the congressional defense committees not later than 90 days after the enactment of this Act detailing all respective decontamination authorities and plans applicable to Culebra and Vieques, to include particular emphasis on the decontamination of the northwest peninsula of Culebra.

The Committee also notes that there are gaps in information about the types and amounts of ordnance used on Vieques and Culebra, as well as potential links between the ordnance used and threats to public health. The Committee directs the Secretary of the Army and the Secretary of the Navy to provide a report to the congressional defense committees not later than 60 days after the enactment of this Act on previously released information related to the ordnance on the two islands. The Committee also urges the Secretaries to publish the relevant documents on the internet in a single location and in a user-friendly format.

INDIAN FINANCING ACT

The Committee recommendation includes funds for activities authorized in the Indian Financing Act of 1974 and directs the Secretary of Defense to obligate such funds not later than 90 days after the enactment of this Act.

PFOS/PFOA EXPOSURE ASSESSMENT

The National Defense Authorization Act for Fiscal Year 2020 authorized a study and assessment of the health implications of

perfluorooctane sulfonate (PFOS) and perfluorooctanoic acid (PFOA) contamination in drinking water. The Committee recommendation includes \$15,000,000 for the study and assessment. The Committee also directs the Assistant Secretary of Defense (Energy, Installations, and Environment) to submit a report to the House and Senate Appropriations Committees not later than 30 days after the enactment of this Act on the Department's strategy to execute this funding.

The Committee remains deeply concerned about PFOS/PFOA contamination on current and former domestic military installations. As the Department conducts its exposure assessment on all installations known to have PFOS/PFOA drinking water contamination, the Committee directs the Assistant Secretary of Defense (Energy, Installations, and Environment) to publicly release the measured levels of contamination found at each installation. For all remediation activities, the Department is directed to achieve a drinking water cleanup standard no higher than the threshold of the Environmental Protection Agency (EPA) health advisory level (currently 70 parts per trillion) for federally controlled sites and surrounding communities whose water sources were contaminated as a result of Department activities. Additionally, the Committee directs the Department to comply with the provisions of section 322 of the National Defense Authorization Act for Fiscal Year 2020. The Committee notes that today's currently available Aqueous Film Forming Foams (AFFF) contain Per- and Polyfluoroalkyl Substances (PFAS) and currently, none of the commercially available PFAS-free foams meet the Department's strict safety standards to rapidly extinguish dangerous fuel fires. The Committee understands that a prohibition on the use of current versions of AFFF would drastically reduce the ability of the Department's firefighters to fight fuel fires and increase risk to servicemembers and firefighters. However, due to the significant and salient public health risks associated with PFOS/PFOA contamination, the Committee urges the Secretary of Defense to expedite replacement of fluorinated AFFF throughout all branches of the military and cease use of AFFF prior to October 1, 2024.

PER- AND POLYFLUOROALKYL SUBSTANCES CLEANUP COST REPORTING

The Committee notes the creation of a Per- and Polyfluoroalkyl Substances (PFAS) Task Force to address the growing health concerns over releases of these substances and their effects on military installations and the surrounding communities. To support the Department's efforts, the Committee directs the Secretary of Defense to submit to the House and Senate Appropriations Committees, not later than 90 days after the enactment of this Act, and quarterly thereafter, a report on costs associated with investigating and cleaning up PFAS at sites with funding provided by either the environmental restoration or operation and maintenance appropriation accounts. The report shall provide, for each component and by installation name, for the investigation and cleanup of PFAS: the actual obligations through the end of fiscal year 2018; the actual obligations in fiscal year 2019; the planned and actual obligations in fiscal year 2020; the planned obligations for fiscal year 2021; and the estimated cost after fiscal year 2021.

CHILDCARE

The Committee commends the Navy and the Air Force for increasing funding in their respective fiscal year 2021 budget requests for childcare programs, but notes with concern the proposed reductions by the Marine Corps and the Army in their budget requests for childcare. The Committee continues to believe that delays in providing affordable and acceptable childcare negatively impact the quality of life for servicemembers, Department of Defense civilian employees, and their families. Funding for these programs needs to be a priority for all components. The Committee recommendation provides additional funds for the Army and the Marine Corps and directs the Secretaries of the Army and the Navy to provide spend plans to the House and Senate Appropriations Committees not later than 30 days after the enactment of this Act.

The Committee was disappointed that it did not receive the report requested in House Report 116–84 and again directs the Service Secretaries to provide a report to the House and Senate Appropriations Committees not later than 60 days after the enactment of this Act on their respective plans to address obstacles to childcare, whether it be additional childcare development centers, additional staff, pay rates for staff, or acceptable alternatives for fiscal year 2020 and in the future year defense program to ensure that these challenges are met.

The Committee is also concerned by reports of the impromptu closure of childcare facilities and directs the respective Service Secretary to notify the congressional defense committees not later than 30 days prior to a closure of any childcare facility, with the reason for closure, the number of children and families affected, and how the Service is assisting affected families in finding alternative childcare.

MOVEMENT OF HOUSEHOLD GOODS

Last year the Committee expressed concern with the plans by the United States Transportation Command (USTRANSCOM) to award the global household goods contract to only one provider. On April 30, 2020, USTRANSCOM executed this plan; however, the Committee notes that on June 10, 2020, USTRANSCOM rescinded the award due to allegations of misinformation by the awardee in its application documents.

For these and other reasons, the Committee continues to have concerns and notes issues highlighted by a recent Government Accountability Office report related to the Global Household Goods Contract. The report recommends USTRANSCOM develop methodologies for adequate data collection during the first three years of the contract; outline a detailed plan on retraining and transferring current USTRANSCOM personnel, including precise funding and staffing needs; and provide a clear strategy for providing counseling services. Due to these highlighted deficiencies, the Committee directs the Secretary of Defense to provide a report to the congressional defense committees not later than September 30, 2021 on the execution of servicemember moves under the Global Household Goods Contract during fiscal year 2021. The report shall

include move timelines, customer claims and compensation related to damaged goods and missed moving windows, customer satisfaction surveys and survey response rates, data on moves provided by Transportation Service Providers (TSPs) versus Personally Procured Moves (PPM), the number and type of trainings and transfers of USTRANSCOM personnel and transportation specialists, and counseling services provided by government personnel vice TSPs.

The Committee is concerned that servicemembers may not receive the same access to choose PPM, also known as do-it-yourself moves, under the Global Household Goods Contract. Counseling services provided by TSPs are solely informational. When providing counseling services, nothing in the Global Household Goods Contract permits TSPs to influence servicemember choice of provider or moving method for PPM beyond providing information on the difference between a TSP move and a PPM. The contract also does not permit TSPs to restrict access to a specific PPM provider or option if that option was available to the servicemember prior to the Contract. The Committee encourages the Commander, USTRANSCOM to ensure that counseling for servicemembers is offered no matter what methodology of move a servicemember may choose to make.

Finally, the Committee notes that delays associated to COVID-19 could result in changes to possible savings originally stipulated in its fiscal year 2021 report and overall execution of the program. The Committee directs the Commander, USTRANSCOM to submit a report to the congressional defense committees, not later than 45 days after the enactment of this Act, and again, 180 days after the initial report, detailing the implementation effort and an update of possible savings broken out by Service across the future years defense program.

COLD WEATHER CLOTHING AND EQUIPMENT

The Committee commends the Services for providing cold weather and mountaineering clothing and equipment to servicemembers stationed abroad. Cold weather items including handwear, footwear, socks, balaclavas, water bottle parkas, canteens, and clothing layers manufactured with innovative, domestically-produced fabrics and textiles provide the warfighter with a distinct combat advantage. The Committee is concerned that procurement timelines for these items have been slowed by research, development, testing, and evaluation delays that prevent cold weather units from being issued the most effective items in a timely manner. The Committee encourages the Service Secretaries to review and accelerate procurement timelines for organizational clothing and individual equipment to all eligible servicemembers and utilize the domestic defense industrial base to provide the necessary clothing and equipment.

USE OF REMOTE PILOTING SYSTEMS

The Committee believes there should be parity between active and reserve components regarding the use of remotely piloted and unmanned aircraft systems for domestic emergency, search and rescue, and civil support activities. The Committee directs the Sec-

retary of Defense to submit a report to the congressional defense committees not later than 90 days after the enactment of this Act on the Department's policies for all aspects of use of remote piloting for both active and reserve components. Aspects shall include use of remote and unmanned air systems for training, search and rescue, and support to other federal agencies. If differences exist between the active and reserve components in these areas, the report shall detail these reasons, to include the policy explanations and if there is a plan to examine, and possibly, change these differences.

OPERATION AND MAINTENANCE, ARMY

Fiscal year 2020 appropriation	\$39,597,083,000
Fiscal year 2021 budget request	40,312,968,000
Committee recommendation	40,424,428,000
Change from budget request	+111,460,000

The Committee recommends an appropriation of \$40,424,428,000 for Operation and Maintenance, Army which will provide the following program in fiscal year 2021:

SMALL BUSINESSES AND ARMY FUTURES COMMAND

The Committee is concerned with findings by the Government Accountability Office in its “Army Futures Command Should Take Steps to Improve Small Business Engagement for Research and Development” report, notably lack of coordination between the Army Futures Command and small businesses. The Committee recognizes the importance of small businesses to the entire Department of Defense enterprise and encourages the Commanding General, Army Futures Command, to develop methods to improve small business engagement for research and development. In addition, the Committee encourages the Commanding General, Army Futures Command, to coordinate with the Army Office of Small Business Programs in its engagement efforts.

FACILITIES REDUCTION PROGRAM

The Committee is encouraged by the commitment of the Army to continue funding the complete disposal of potentially hazardous facilities at Aberdeen Proving Ground, including decommissioning, decontamination, and demolition through a phased approach under the Facilities Reduction Program. The Army has obligated funds, begun demolition, and programmed additional funds in the future to continue these efforts. The Committee encourages the Secretary of the Army to continue these efforts to ensure demolition activities continue. The Committee believes demolition of these facilities will result in cost savings on infrastructure, maintenance, and security of these unusable buildings; reduce the risk of contamination; and have a positive impact on other missions.

OPERATION AND MAINTENANCE, NAVY

Fiscal year 2020 appropriation	\$47,622,510,000
Fiscal year 2021 budget request	49,692,742,000
Committee recommendation	49,248,117,000
Change from budget request	- 444,625,000

The Committee recommends an appropriation of \$49,248,117,000 for Operation and Maintenance, Navy which will provide the following program in fiscal year 2021:

(DOLLARS IN THOUSANDS)

ADVANCED SKILLS MANAGEMENT LEGACY SYSTEMS UPGRADES

The Committee is concerned by the lack of progress in transitioning the Advanced Skills Management (ASM) software system into a commercial-off-the-shelf (COTS) software system. The Committee is concerned that sustainment costs for this software system are unsustainable and that commercial software solutions currently being utilized by the Navy's Fleet Readiness Centers offer greater capability at reduced costs. Further, the Committee is increasingly concerned about the availability of the current ASM system to the user community given the antiquated nature of the software and need for increased remote telework capacity.

The Committee recommendation includes \$500,000 for the Navy to establish updated requirements for a COTS software solution to replace the existing ASM system. The Navy shall consider commercial solutions that are already developed, that need minimal customization work, and that are currently being fielded by industry partners who are conducting similar job functions at the NAVAIR Fleet Readiness Centers. The Navy shall also work with the entire ASM user community to incorporate feedback on capabilities that are needed in ASM that are available in a COTS product.

The Committee recommendation also includes \$10,000,000 in Other Procurement, Navy for the procurement, consistent with federal acquisition regulations, of a COTS solution to replace the ASM software system.

The Committee directs the Secretary of the Navy to submit a spend plan for the \$10,500,000 to the House and Senate Appropriations Committees not later than 60 days after the enactment of this Act.

CHINA LAKE NAVAL AIR WEAPONS STATION

The Committee continues to monitor efforts by the Department of the Navy to rebuild China Lake Naval Air Weapons Station after two earthquakes damaged the installation in July 2019. To further the recovery effort, the Navy requires the purchase of equipment, components, materials, services, and test and evaluation support. The Committee commends the Department of the Navy's recovery efforts to date and appreciates inclusion of validated funding requirements in the fiscal year 2021 budget submission. The Committee directs the Secretary of the Navy to provide the congressional defense committees with quarterly updates, beginning not later than 90 days after the enactment of this Act, on repair efforts, including any refinements to validated funding requirements.

OPERATION AND MAINTENANCE, MARINE CORPS

Fiscal year 2020 appropriation	\$7,868,468,000
Fiscal year 2021 budget request	7,328,607,000
Committee recommendation	7,512,336,000
Change from budget request	+183,729,000

The Committee recommends an appropriation of \$7,512,336,000 for Operation and Maintenance, Marine Corps which will provide the following program in fiscal year 2021:

DEPARTMENT OF THE AIR FORCE BUDGET JUSTIFICATION DOCUMENTS

The Committee is disappointed with the quality of the justification material and responses to inquiries received from all components of the Air Force for its operation and maintenance programs. Information was frequently vague and ill defined. For example, prior year baseline levels are not included for each requested increase; depot level increases are presented with overall baselines, instead of each airframe presented by baseline; and decreasing levels of activities are intermingled with lines requesting increases.

The Committee expects the Air Force to present a clearer picture of its budgetary requirements. Therefore, the Committee directs the Secretary of the Air Force to include the following changes in its fiscal year 2022 budget submission for operation and maintenance programs: (1) any request for an increase within a sub-activity group must include a baseline level for the specific program being increased, not the overall baseline of the sub-activity group; (2) depot and contractor maintenance activities should include baselines for each airframe; and (3) if activities are labeled "classified," information on the increase should be presented in a classified format upon submission of the budget request.

C-17

The C-17 aircraft is a strategic transport aircraft, able to airlift heavy cargo close to a battle area or an area in need of humanitarian assistance. The Committee understands that the Air Force is considering changing the mix of depot level heavy maintenance for its C-17 fleet from a contractor-managed, near equal split of organic and contractor depot heavy maintenance to all organic depot heavy maintenance. The Committee has reservations about this change in strategy because the current product support strategy for the C-17 has consistently demonstrated a mission capable rate above eighty percent. The Committee is also aware that the Air Force acknowledges that this change would result in a negative impact to performance.

Therefore, prior to obligating any funds to change the current C-17 product support strategy, the Committee directs the Secretary of the Air Force, in consultation with the Director of Cost Assessment and Program Evaluation, the Commander of United States Transportation Command, and the Chief of the National Guard Bureau, to certify to the congressional defense committees that such a change in product strategy will result in no additional costs to the Air Force over the next ten years as compared to the current product strategy.

AIRCRAFT PROTECTION

The Committee recognizes the adverse impact that sunlight and hail can have on the readiness and service life of aircraft. Unprotected aircraft can sustain significant damage during hailstorms and long-term damage due to extensive sun exposure, creating additional, yet preventable, maintenance costs. The Committee encourages the Secretary of the Air Force to prioritize maintenance that may provide protection for aircraft to prevent damage caused by weather.

AIR FORCE PILOT SHORTFALL

During the current fiscal year, the Air Force's pilot shortfall will increase to over 2,000, including more than 1,000 fewer fighter and bomber pilots than required. The Committee supports initiatives such as Pilot Training Next and other efforts to increase training throughput but is concerned that the differences between total force pilot requirements and actual output may be widening. The Committee will continue to monitor the Air Force's plan to grow undergraduate pilot training and increase programmed flying time. With these concerns in mind, the Committee believes augmenting existing pilot training with commercial capacity and expertise could create a scalable, rapidly deployable, temporary solution. To properly realize the benefits and value of a turn-key approach at a new location, any proposed program should maximize previous investments by the Air Force including, but not limited to, established special use airspace, required environmental studies, and locations previously investigated and approved for operations. To ensure the Air Force is developing plans to partner with industry and increase undergraduate pilot training, the Committee directs the Secretary of the Air Force to submit a report to the congressional defense committees not later than 30 days after the enactment of this Act which includes a five-year spend plan for establishing a contractor-operated undergraduate pilot training program.

OPERATION AND MAINTENANCE, SPACE FORCE

Fiscal year 2020 appropriation	\$40,000,000
Fiscal year 2021 budget request	2,531,294,000
Committee recommendation	2,498,544,000
Change from budget request	-32,750,000

The Committee recommends an appropriation of \$2,498,544,000 for Operation and Maintenance, Space Force which will provide the following program in fiscal year 2021:

(DOLLARS IN THOUSANDS)

READINESS AND ENVIRONMENTAL PROTECTION INTEGRATION
PROGRAM

The Committee continues to support the Readiness and Environmental Protection Integration (REPI) program. The REPI program advances important military goals by implementing conservation easements to buffer the off-base impacts of military activities. The Committee sees positive examples of how productive the program can be by looking at progress along the Chesapeake Bay and encourages the Secretary of Defense to replicate these activities nation-wide. The Committee also encourages the Secretary of Defense to prioritize REPI projects that leverage other federal and non-federal funding sources to deploy best management practices on lands conserved through REPI.

DEFENSE COMMUNITY INFRASTRUCTURE PROGRAM

The Committee recommendation includes \$50,000,000 for the Defense Community Infrastructure Program. The Committee is disappointed that the Secretary of Defense did not swiftly allocate funds to specific projects with the \$50,000,000 provided in the Department of Defense Appropriations Act, 2020, waiting until mid-May, or over five months from date of enactment, to provide direction to the Office of Economic Adjustment for execution. The Committee is also dismayed about the parameters the Secretary of Defense has instituted for execution of this program in fiscal year 2020, particularly the distinct lack of interaction with military communities, the exact group this program was created to assist. The parameters determined for use of the Defense Community Infrastructure Program seem to fund activities not funded in other sections of the bill, for example, daycare facilities and hospitals. The Committee is also disappointed to learn that the Department does not expect to include funding for this program in its fiscal year 2022 budget request.

Given this divergence from congressional intent, the Committee directs that, prior to the obligation of funds, yet not later than 30 days after the enactment of this Act, the Secretary of Defense provide a spend plan to the congressional defense committees on the use of the fiscal year 2021 funding.

SERVICE-PROVIDED SUPPORT AND ENABLING CAPABILITIES TO UNITED
STATES SPECIAL OPERATIONS FORCES

The Committee directs the Service Secretaries and the Secretary of Defense on behalf of the defense agencies to include with the fiscal year 2022 budget submission and each subsequent year thereafter, a consolidated budget justification display showing Service-common support and enabling capabilities contributed from each of the military Services and defense agencies to special operations forces. The report shall include a detailed accounting of the resources allocated by each Service or defense agency at the appropriation and line item level to provide combat support, combat service support, training, base operating support, pay and allowances, and enabling capabilities or other common services and support for special operations forces. The exhibit shall also include an

identification of any changes in the level or type of support in the current fiscal year when compared to the preceding year.

THEATER SPECIAL OPERATIONS COMMAND ACTIVITIES

The Committee directs the Assistant Secretary of Defense (Special Operations/Low Intensity Conflict), in coordination with the Commander of United States Special Operations Command, the Service Secretaries, and the Chairman of the Joint Chiefs of Staff, to provide a report on the activities of Theater Special Operations Commands (TSOCs). The report shall be provided with the fiscal year 2022 budget request submission and include a detailed accounting of activities performed by the TSOCs in the preceding year, current fiscal year, and current budget request submission at the budget line item level of detail. The report shall include a detailed accounting of resources allocated by the military Services, United States Special Operations Command, and the combatant commands.

MILITARY INFORMATION SUPPORT OPERATIONS

Over the past decade, the bulk of activities under Military Information Support Operations (MISO) focused on countering violent extremist organizations (VEO). While VEOs remain an ongoing threat and require continued vigilance, peer and near-peer adversaries like China and Russia are using social media and other vectors to weaken domestic and international institutions and undermine United States interests. This new information environment and the difficulty of discriminating between real and fake information heightens the importance of enhancing and coordinating United States government information-related capabilities as a tool of diplomatic and military strategy.

The Committee recognizes the efforts and accomplishments of the United States Special Operations Command and other agencies within the executive branch to operate in the digital domain. However, it is difficult to view individual agency activities as a coordinated whole of government effort. Over the past several years, the classified annex accompanying annual Department of Defense Appropriations Acts included direction focusing on the individual activities of geographic combatant commands. However, information messaging strategies to counter Chinese and Russian malign influences cuts across these geographic boundaries and requires coordination between multiple government agencies using different authorities.

Therefore, in order to better understand how MISO activities support a whole of government messaging strategy, the Committee directs the Assistant Secretary of Defense (Special Operations/Low Intensity Conflict) to submit a report for MISO activities for the individual geographic combatant commands justified by the main pillars of the National Defense Strategy to the House and Senate Appropriations Committees not later than 15 days after submission of the fiscal year 2022 budget request and annually thereafter. The report shall include spend plans identifying the requested and enacted funding levels for both voice and internet activities and how those activities are coordinated with the Intelligence Community and the Department of State. The enacted levels will serve as the

baseline for reprogramming in accordance with section 8007 of this Act. Furthermore, the Committee directs the Assistant Secretary of Defense (Special Operations/Low Intensity Conflict) to submit to the congressional defense committees, not later than 90 days after the end of the fiscal year, an annual report that provides details on each combatant commands' MISO activities by activity name, description, goal or objective, target audience, dissemination means, executed funds, and assessments of their effectiveness. Additional details for the report are included in the classified annex accompanying this Act.

SPECIAL OPERATIONS COMMAND COLD WEATHER TACTICAL
OUTERWEAR

The United States Special Operations Command's (USSOCOM) Lost Arrow Project has developed technical outerwear that reduces burden on the operator while extending capability at lower extreme temperatures. The Committee understands that USSOCOM has identified a critical need for this system to address near-term operational requirements and encourages the Commander, USSOCOM to accelerate procurement of these systems.

137TH SPECIAL OPERATIONS WING

The Committee supports the 137th Special Operations Wing (SOW) and believes that reductions to the unit were misguided as part of the Defense Wide Review. Therefore, the Committee recommendation includes \$22,000,000 to support the MC-12 mission in fiscal year 2021. Furthermore, the Committee recognizes the unique role the 137th SOW serves and directs the Commander, United States Special Operations Command, to internally resource deployment costs in fiscal year 2021.

DEFENSE POW/MIA ACCOUNTING AGENCY

The Committee commends the work of the Defense POW/MIA Accounting Agency (DPAA) and appreciates its continual efforts to return the remains of fallen servicemembers, even as challenges inhibit its ability to execute its mission, such as foreign government obstruction or COVID-19. However, the Committee is concerned that the Services are not prioritizing activities that directly support DPAA. The Committee believes that the Services must ensure that their efforts to collect DNA family reference samples are as swift as possible to ensure that the DPAA can execute its mission and give the families of fallen heroes the closure they seek.

PERFLUORINATED CHEMICALS CONTAMINATION AND FIRST RESPONDER
EXPOSURE

The Committee remains concerned with the health implications of exposure to perfluorinated chemicals (PFCs), including the increased rate of cancer in Department of Defense firefighter and first responder personnel. The Committee understands there are ongoing efforts to develop an alternative firefighting foam that meets military requirements and is free from PFCs that have been linked to higher rates of certain cancers. Given the lack of definitive guidance around exposure levels, the Committee encourages

the Secretary of Defense to accelerate adoption of other forms of foam that meet military specifications and do not contain PFCs. Further, the Committee understands that testing for firefighters for exposure to PFCs has begun. The Committee is encouraged by these efforts but believes that additional measures need to be taken. The Committee directs the Assistant Secretary of Defense (Health Affairs) to update the House and Senate Appropriations Committees not later than 180 days after the enactment of this Act on the Department's plan to test and track potential first responder exposure to these chemicals as part of their existing, annual medical surveillance exams.

CLIMATE CHANGE REPORT

The Committee notes the Secretary of Defense is required to submit a report which contains a list of the top ten most climate-vulnerable bases within each Service and provides a cost estimate to mitigate the risks at each of these bases to the congressional defense committees as directed in House Report 116-84. The Committee understands the Department is working with the Army Corps of Engineers to develop a tool to meet this requirement and better assess exposure to extreme weather and climate impacts. The Committee understands the Department expects to complete this tool and report by the end of September 2020. The Committee expects the Secretary of Defense to update the congressional defense committees with any changes to the anticipated date of completion for the tool and report.

SPECIAL MEASURES AGREEMENT

The Committee recognizes the United States-South Korea alliance as foundational for peace and security on the Korean Peninsula and throughout the region. The Committee encourages the Secretary of Defense to coordinate with the Secretary of State to support good faith negotiations with the Republic of Korea government that result in a fair and equitable five-year Special Measures Agreement.

COMPOSTING OF SHREDDED GOVERNMENT DOCUMENTS

The Committee encourages the Secretary of Defense to study the financial and environmental impacts of composting shredded government documents.

DEFENSE SECURITY COOPERATION AGENCY PROGRAMS

The Committee recommendation provides \$659,225,000 for base programs administered by the Defense Security Cooperation Agency (DSCA) and an additional \$1,651,296,000 in title IX for overseas contingency operations. The Committee notes the significant unobligated balances from prior appropriations and the disruption of programs due to the COVID-19 pandemic.

Section 8120 of the Act requires that a spend plan be submitted prior to the initial obligation of funds. The Committee expects the Director of DSCA to ensure the appropriate distribution of funds with two-year availability, which accounts for more than half of the funding provided. The Act also requires quarterly reports on the

use and status of funds, which shall include amounts appropriated, obligated, and expended for each budget activity and sub-activity for DSCA, including base and overseas contingency operations funding. The spend plan and quarterly reports should include such information for each program listed in the OP-5 budget justification document for DSCA as modified by this Act and report.

The Committee does not recommend funding for a proposed National Defense Strategy Implementation Account and notes that the implementation of the National Defense Strategy extends well beyond the scope of programs funded under this heading. Instead, the Committee recommends funding for International Security Cooperation Programs, the Combating Terrorism and Irregular Warfare Fellowship Program, and the Ministry of Defense Advisors Program.

The Committee recommendation provides \$1,141,048,000 for International Security Cooperation Programs. The Committee directs that congressional notifications submitted for such programs specify the funding source (including fiscal year and base or overseas contingency operations), whether such funds support ongoing or new programs, and the duration and expected cost over the life of each program.

The Committee recommendation rejects several reductions proposed in the budget request. The recommendation provides not less than \$160,000,000, an increase of \$63,377,963 above the request, for International Security Cooperation Programs with countries in the Africa Command area of responsibility. The recommendation also provides not less than \$130,000,000, an increase of \$60,553,073 above the request, for International Security Cooperation Programs with countries in the Southern Command area of responsibility.

The Committee recommendation transfers \$26,006,000 requested for international programs under Drug Interdiction and Counter-Drug Activities, Defense to this heading to build the capacity of countries in the Northern Command and Southern Command areas of responsibility to counter illicit drug trafficking. More broadly, the Committee notes that counter-illicit drug trafficking programs supported under this heading should complement, not replace programs supported by the Department of State, and urges close coordination between both departments. The Committee directs that notifications submitted by DSCA for counter-illicit drug trafficking programs include information on related programs being conducted by other federal agencies.

The Committee recommendation provides \$220,000,000, an increase of \$10,928,776 above the request, for International Security Cooperation Programs with countries in the Central Command area of responsibility. Not less than \$105,250,000 is included for Jordan, which is the same as the budget request. The Committee directs that such amounts be specified in the spend plan required by this Act. The Committee also supports programs to enhance security along the Tajikistan-Afghanistan border.

The Committee directs that such funds provided above the request for International Security Cooperation Programs be used to enhance existing programs with countries such as Colombia, and to continue programs for countries that would otherwise not receive

funding under the budget request submission, including Morocco, Oman, and Costa Rica.

The Committee recommendation provides \$290,662,471 for International Security Cooperation Programs with countries in the Indo-Pacific Command area of responsibility, as requested, including for maritime security programs.

The Committee notes the ongoing conflict in eastern Ukraine due to Russian aggression. Last year, the Organization for Security and Cooperation in Europe Special Monitoring Mission to Ukraine recorded 299,633 cease-fire violations, 3,373 explosions, and 148 civilian casualties. The Committee also notes Ukraine's contributions to NATO operations and welcomes the selection of Ukraine as one of six enhanced opportunities partners, which will increase access to programs, exercises, and information sharing.

The Committee recommendation continues support for the defense of Ukraine by providing \$275,000,000 for the Ukraine Security Assistance Initiative, an increase of \$25,000,000 above the request. The recommendation does not provide additional funding for Ukraine under International Security Cooperation Programs. The Committee expects the Government of Ukraine to continue to adopt and implement reforms in the security sector and to reduce corruption in the security services and directs the Secretary of Defense to update the report required by House Report 116-84 not later than 90 days after the enactment of this Act.

The Committee is concerned with the inability of the Department of Defense to obligate funds for the Ukraine Security Assistance Initiative in a timely manner. The recommendation includes language exempting funds from apportionment and requires the Secretary of Defense to inform the congressional defense committees if funds have not been obligated 60 days after a congressional notification is submitted. Furthermore, the Committee directs the Secretary of Defense, in coordination with the Director of DSCA, to review the Department's policies and procedures with respect to funding for the Ukraine Security Assistance Initiative, and to submit a report to the House and Senate Appropriations Committees not later than 60 days after the enactment of this Act on steps taken to improve the delivery and timeliness of assistance.

The Committee recommendation provides \$292,612,243, an increase of \$6,174,901 above the request, for International Security Cooperation Programs with countries in the European Command area of responsibility. The Committee supports efforts to strengthen deterrence against Russian aggression. The Committee recommendation provides \$150,000,000 for International Security Cooperation Programs with Estonia, Latvia and Lithuania through the Baltic Security Initiative, including \$50,000,000 to enhance the integrated air defense of such countries. Such amounts shall be included under the European Command area of responsibility in the spend plan required by this Act. Additionally, not later than 90 days after the enactment of this Act and prior to the initial obligation of funds for the Baltic Security Initiative, the Secretary of Defense, in coordination with the Secretary of State, is directed to submit a strategy to the congressional defense committees for the Baltic Security Initiative, which shall include goals, objectives, and milestones for programs supported by the initiative, as well as in-

formation on the capabilities of each country and their financial contributions towards their own security, the NATO alliance, and programs supported by the initiative.

The Committee recommends a focus on programs that advance the recruitment, employment, development, retention, and promotion of women in foreign security forces. Not later than 90 days after the enactment of this Act, the Committee directs the Secretary of Defense to submit a report to the congressional defense committees on DSCA programs and policies that advance such goals. The report shall include information on current programs, including funding that supports such programs, and the results. The Secretary shall consult with the House and Senate Appropriations Committees prior to the obligation of additional funding provided for International Security Cooperation Programs women's programs.

The Committee supports training for foreign security forces in human rights, which is a required component of building partnership capacity programs. The Committee directs that notifications submitted for such programs include information on the subject matter, type, duration, and cost of such training.

The Committee supports the provision of Department of Defense excess defense articles to enhance the security of partners countries but notes that such programs could operate in a more strategic manner. The Secretary of Defense is currently required to submit a report that contains a list of expected defense articles that are likely to become available for transfer during the next 12 months, and another report that contains a list of countries eligible for such transfers. The Committee recommends greater integration of the information contained in these two reports, as well as how proposed transfers can be integrated into an overall country security cooperation plan. The Committee directs the Director of DSCA to consult with the House and Senate Appropriations Committees not later than 45 days after the enactment of this Act on efforts to improve such programs.

The Committee recommendation includes funds above the request for DSCA Regional Centers and notes the important role that these centers play in building strong and sustainable international networks of security leaders, which furthers United States objectives and leadership.

The Committee recommendation includes \$21,814,000 for DSCA headquarters. The Committee is concerned with the apparent lack of budget controls to ensure DSCA adheres to congressionally directed levels for headquarters expenses and includes language limiting such costs.

The Committee recommendation includes funding requested under this heading for the Lift and Sustain program, which provides support to allied forces participating in a combined operation with the armed forces of the United States and coalition forces supporting military and stability operations. The Committee is concerned, however, with the proper management and execution of prior year funds by the Department of Defense. The Committee directs the Secretary of Defense to assess the policies and procedures in place for this program and, not later than 60 days after the enactment of this Act and prior to the initial obligation of funds pro-

vided in this Act for these purposes, to submit a report to the House and Senate Appropriations Committees detailing changes made to address such problems, including those made at the recommendation of the Government Accountability Office. The Committee also expects the Secretary of Defense to promptly notify the Committees upon any finding of a similar issue in the future.

The Committee recommendation includes requested funding for border security, including support to Jordan and Tunisia.

ZERO TRUST ARCHITECTURE

The Committee encourages the Secretary of Defense to implement a Zero Trust Architecture to increase its cybersecurity posture and enhance the Department's ability to protect its systems and data.

NOISE MITIGATION COMMUNITIES PARTNERSHIPS

The Committee is aware of the negative effects that jet noise has on communities near installations with airfields. Given the concerns raised by communities, the Committee directs the Secretary of Defense to utilize the noise assessments found in environmental impact studies (EIS) to measure the level of jet noise generated by aviation assets and to make that noise measurement data available to affected communities. If an EIS assessment has already determined the effects of noise to the surrounding community to be damaging to the local community, that assessment should be used as the underlying data for consideration of relief. Data should be assessed from communities near both active and reserve installations with airfields.

After reviews of the EIS are completed, the Committee directs the Office of Economic Adjustment to work with communities and the Service Secretaries to find measures that would mitigate any impacts from noise caused by defense aviation activities, with special attention to communities with new airframes. All types of mitigation efforts should be considered for implementation. The Committee directs the Office of Economic Adjustment to submit a report to the congressional defense committees not later than 180 days after the enactment of this Act on the progress it has made reviewing each of the assessments, to date, with a list of the communities involved, the timeline for completion of all of the assessments for each of the communities with installations with airfields, examples of tools to mitigate the impact of jet noise, and the costs involved in each of these steps.

To ensure the program is resourced for success, the Committee recommendation includes \$50,000,000, to be used over two years, to provide grants to communities affected by excessive noise. Grants to communities shall be provided on a priority basis determined by the participating communities to entities such as hospitals, daycare facilities, schools, senior citizen facilities, and private homes within a mile of the airfield.

OPERATION AND MAINTENANCE, ARMY RESERVE

Fiscal year 2020 appropriation	\$2,984,494,000
Fiscal year 2021 budget request	2,934,717,000
Committee recommendation	\$3,004,717,000
Change from budget request	+70,000,000

The Committee recommends an appropriation of \$3,004,717,000 for Operation and Maintenance, Army Reserve which will provide the following program in fiscal year 2021:

(DOLLARS IN THOUSANDS)

JOINT FORCE HEADQUARTERS ANALYSIS CELLS

Intelligence fusion centers are information sharing hubs that provide threat-related information to federal, state, and local agencies. These centers allow the flexibility to determine which critical infrastructure areas merit the dedication of resources on each governmental level. The Committee recognizes that the National Guard Bureau is developing a Joint Force Headquarters Analysis Cell concept to expand state-level intelligence capabilities. As this work progresses, the Committee encourages the Chief, National Guard Bureau to consult with state-level entities, particularly individual state National Guard units who specialize in this area, to integrate key aspects of concepts that have already proved successful at the state level.

OPERATION AND MAINTENANCE, AIR NATIONAL GUARD

Fiscal year 2020 appropriation	\$6,655,292,000
Fiscal year 2021 budget request	6,753,642,000
Committee recommendation	6,853,942,000
Change from budget request	+100,300,000

The Committee recommends an appropriation of \$6,853,942,000 for Operation and Maintenance, Air National Guard which will provide the following program in fiscal year 2021:

UNITED STATES COURT OF APPEALS FOR THE ARMED
FORCES

Fiscal year 2020 appropriation	\$14,771,000
Fiscal year 2021 budget request	15,211,000
Committee recommendation	15,211,000
Change from budget request	---

The Committee recommends an appropriation of \$15,211,000 for the United States Court of Appeals for the Armed Forces.

ENVIRONMENTAL RESTORATION, ARMY

Fiscal year 2020 appropriation	\$251,700,000
Fiscal year 2021 budget request	207,518,000
Committee recommendation	264,285,000
Change from budget request	+56,767,000

The Committee recommends an appropriation of \$264,285,000 for Environmental Restoration, Army.

ENVIRONMENTAL RESTORATION, NAVY

Fiscal year 2020 appropriation	\$385,000,000
Fiscal year 2021 budget request	335,932,000
Committee recommendation	404,250,000
Change from budget request	+68,318,000

The Committee recommends an appropriation of \$404,250,000 for Environmental Restoration, Navy.

ENVIRONMENTAL RESTORATION, AIR FORCE

Fiscal year 2020 appropriation	\$485,000,000
Fiscal year 2021 budget request	303,926,000
Committee recommendation	509,250,000
Change from budget request	+205,324,000

The Committee recommends an appropriation of \$509,250,000 for Environmental Restoration, Air Force.

ENVIRONMENTAL RESTORATION, DEFENSE-WIDE

Fiscal year 2020 appropriation	\$19,002,000
Fiscal year 2021 budget request	9,105,000
Committee recommendation	19,952,000
Change from budget request	+10,847,000

The Committee recommends an appropriation of \$19,952,000 for Environmental Restoration, Defense-Wide.

ENVIRONMENTAL RESTORATION, FORMERLY USED
DEFENSE SITES

Fiscal year 2020 appropriation	\$275,000,000
Fiscal year 2021 budget request	216,587,000
Committee recommendation	288,750,000
Change from budget request	+72,163,000

The Committee recommends an appropriation of \$288,750,000 for Environmental Restoration, Formerly Used Defense Sites. The Committee expects the Secretary of Defense and the Service Secretaries to execute the Military Munitions Response Program in a manner consistent with the budget request.

OVERSEAS HUMANITARIAN, DISASTER, AND CIVIC AID

Fiscal year 2020 appropriation	\$135,000,000
Fiscal year 2021 budget request	109,900,000
Committee recommendation	147,500,000
Change from budget request	+37,600,000

The Committee recommends an appropriation of \$147,500,000 for Overseas Humanitarian, Disaster, and Civic Aid, which will provide the following program in fiscal year 2021:

EXPLANATION OF PROJECT LEVEL ADJUSTMENTS

[In thousands of dollars]

	Budget Request	Committee Recommended	Change from Request
FOREIGN DISASTER RELIEF	20,000	35,000	15,000
Program increase		15,000	
HUMANITARIAN ASSISTANCE	74,900	90,000	15,100
Program increase		15,100	
HUMANITARIAN MINE ACTION PROGRAM	15,000	22,500	7,500
Program increase		7,500	
TOTAL, OVERSEAS HUMANITARIAN, DISASTER, AND CIVIC AID	109,900	147,500	37,600

HUMANITARIAN ASSISTANCE

The Committee recommends an appropriation of \$90,000,000 for Humanitarian Assistance, which is \$15,100,000 above the budget request. The Committee supports the use of such assistance to strengthen basic education in host countries, which should be coordinated with other federal agencies and non-government organizations, as appropriate.

SPEND PLAN

The Committee remains interested in the details of funds provided for Humanitarian Assistance and the Humanitarian Mine Program. As such, the Committee directs the Secretary of Defense to submit a spend plan to the House and Senate Appropriations Committees not later than 45 days after the enactment of this Act for funds for Humanitarian Assistance and the Humanitarian Mine Action Program. The plan shall include amounts planned for each combatant command and country and a comparison to such amounts provided in the previous two fiscal years. The Committee also directs the Secretary of Defense to include this detailed information as part of the Department’s fiscal year 2022 budget request submission.

COOPERATIVE THREAT REDUCTION ACCOUNT

Fiscal year 2020 appropriation	\$373,700,000
Fiscal year 2021 budget request	238,490,000
Committee recommendation	360,190,000
Change from budget request	+121,700,000

The Committee recommends an appropriation of \$360,190,000 for the Cooperative Threat Reduction Account which will provide the following program in fiscal year 2021:

EXPLANATION OF PROJECT LEVEL ADJUSTMENTS

(In thousands of dollars)

TITLE III
PROCUREMENT

The fiscal year 2021 Department of Defense procurement budget request totals \$130,866,091,000. The Committee recommendation provides \$133,633,757,000 for the procurement accounts. The table below summarizes the Committee recommendations:

REPROGRAMMING GUIDANCE FOR ACQUISITION ACCOUNTS
(INCLUDING BASE AND OVERSEAS CONTINGENCY OPERATIONS
FUNDING)

The Secretary of Defense is directed to continue to follow the reprogramming guidance as specified in the report accompanying the House version of the Department of Defense Appropriations bill for Fiscal Year 2008 (House Report 110–279). Specifically, the dollar threshold for reprogramming funds shall be \$10,000,000 for procurement and research, development, test and evaluation.

Also, the Under Secretary of Defense (Comptroller) is directed to continue to provide the congressional defense committees quarterly, spreadsheet-based DD Form 1416 reports for Service and defense-wide accounts in titles III and IV of this Act. Reports for titles III and IV shall comply with the guidance specified in the explanatory statement accompanying the Department of Defense Appropriations Act, 2006. The Department shall continue to follow the limitation that prior approval reprogrammings are set at either the specified dollar threshold or 20 percent of the procurement or research, development, test and evaluation line, whichever is less. These thresholds are cumulative from the base for reprogramming value as modified by any adjustments. Therefore, if the combined value of transfers into or out of a procurement (P–1) or research, development, test and evaluation (R–1) line exceeds the identified threshold, the Secretary of Defense must submit a prior approval reprogramming to the congressional defense committees. In addition, guidelines on the application of prior approval reprogramming procedures for congressional special interest items are established elsewhere in this report.

FUNDING INCREASES

The funding increases outlined in these tables shall be provided only for the specific purposes indicated in the tables.

PROCUREMENT SPECIAL INTEREST ITEMS

Items for which additional funds have been recommended or items for which funding is specifically reduced as shown in the project level tables detailing recommended adjustments or in paragraphs using the phrase “only for” or “only to” in this report are congressional special interest items for the purpose of the Base for Reprogramming (DD Form 1414). Each of these items must be carried on the DD Form 1414 at the stated amount, as specifically addressed elsewhere in this report.

AUTONOMIC LOGISTICS INFORMATION SYSTEM

The budget justification documents submitted with the fiscal year 2021 budget request indicate that the Department of Defense has received \$394,017,000 through fiscal year 2020 for equipment related to the Autonomic Logistics Information System (ALIS) for the F–35 Joint Strike Fighter. The request for ALIS equipment in fiscal year 2021 is \$59,361,000 across all variants of the F–35, an increase of \$17,498,000 over fiscal year 2020.

The Committee recommends funding this request only because there is little choice but to sustain the F-35 enterprise with the existing ALIS until the Department determines a clear path to transitioning to a new system. Although ALIS is an integral part of the F-35 weapon system, the evidence to date indicates the initial design and implementation of ALIS has failed to meet its intended purpose. Rather than facilitating the maintenance and readiness of F-35 aircraft, ALIS perversely absorbs additional personnel and time to remedy its common problems and institute workarounds. The Government Accountability Office has reported continuing problems with ALIS such as a lack of trustworthy data and a high number of deficiency reports.

The parallels to the Air Force's recent experience with the Remote Visual System (RVS) on the KC-46 are noticeable. Like the RVS system until recently, the development of the ALIS system has suffered from vague requirements, lack of objective performance measures, a design based on hardware and software that has been overtaken by technological innovation during the program's prolonged development, overreliance on the assumption that the prime contractor is properly incentivized to deliver a system that meets the needs of the warfighter, and a lack of senior leadership intervention until the problems became too large to ignore.

The Committee acknowledges that the Department currently is pursuing efforts to improve the existing ALIS while planning to transition to a new system known as the Operational Data Integrated Network (ODIN), the plan for which has not been fully developed. It is unclear whether this new approach is adequately resourced, and the Committee is concerned that the present attention to ALIS again will be overcome by the demands of managing changes to the air vehicle itself as the Department proceeds through follow-on modernization. Based on the information provided thus far, it appears that ODIN likely will result in significant dematerialization of the ALIS system by transitioning capabilities currently hosted on individual servers to a cloud-based environment, therefore rendering much of the currently procured equipment unnecessary.

Therefore, the Committee directs the Director of the F-35 Joint Program Office to submit a report that includes an estimate of the full procurement cost of equipment required to support the legacy ALIS for all aircraft in the program of record, as well as an estimate of the cost savings in equipment procurement that can be derived from the transition to ALIS Next and subsequent transition to ODIN. This report shall be submitted to the congressional defense committees not later than 90 days after the enactment of this Act.

USE OF ADVANCED PROCUREMENT FUNDING

In many instances the Committee supports departmental requests for advanced procurement (AP) funding. As reflected in the Department's Financial Management Regulation (FMR), AP funding is provided in a fiscal year prior to the year in which the related end item is to be procured. This allows for the early funding of long-lead components in order to preserve an orderly delivery schedule for that major end item. When authorized, AP may also

be used to fund economic quantity orders under a multiyear contract in order to promote supplier stability and save money compared to annual contracting.

The Committee notes that there have been recent instances in which the Department has not used AP funding for its intended and legitimate purpose, but instead has treated it either as incremental funding or as a fungible source of money that can be used for any and all purposes within the related program. This situation has arisen in cases where AP funding has been requested and received, but the quantities of end items to be procured in the succeeding year has changed.

The Committee directs the Under Secretary of Defense (Comptroller) to ensure that AP funds are both requested and executed properly according to the FMR. The Committee will continue to exercise its proper role by denying or rescinding funds for AP that are not used appropriately.

AIRCRAFT PROCUREMENT, ARMY

Fiscal year 2020 appropriation	\$3,771,329,000
Fiscal year 2021 budget request	3,074,594,000
Committee recommendation	3,503,013,000
Change from budget request	+428,419,000

The Committee recommends an appropriation of \$3,503,013,000 for Aircraft Procurement, Army which will provide the following program in fiscal year 2021:

	PROGRAM INCREASE - COVID RECOVERY FOR SECOND, THIRD, AND FOURTH TIER SUPPLIERS		100,000	100,000

CH-47F CHINOOK BLOCK II

The Committee remains concerned with the Army’s lack of support for the CH-47F Block II program. The Chief of Staff of the Army certified the need for this capability less than three years ago and the Department of Defense Appropriations Act, 2020 outlined certain expectations for future CH-47F Block II funding. The Committee recommendation includes an additional \$198,000,000 for the first five F Block II aircraft in fiscal year 2021, and an additional \$29,000,000 in advanced procurement to enable the second lot of five F Block II aircraft in fiscal year 2022. The Committee expects the Secretary of the Army to restore funding for the CH-47F Block II program across the next future years defense program when the fiscal year 2022 budget request is submitted.

DEGRADED VISUAL ENVIRONMENT

The Degraded Visual Environment Pilotage System (DVEPS) is a quick reaction capability on MH-60, MH-47, and HH-60 rotorcraft. The Committee is concerned that the Army has not developed a comprehensive strategy to transition DVEPS to a Degraded Visual Environment program of record for enduring future vertical lift platforms. Operational testing of DVEPS has demonstrated increased situational awareness of hazards during all phases of flight, a key enabler for aircraft to fly in multi-domain operations using tactics, techniques, and procedures to counter anti-access, area denial threats. The Committee directs the Secretary of the Army to submit a report to the congressional defense committees not later than 120 days after the enactment of this Act which outlines DVEPS role in future vertical lift platforms.

MISSILE PROCUREMENT, ARMY

Fiscal year 2020 appropriation	\$2,995,673,000
Fiscal year 2021 budget request	3,491,507,000

MK93 MACHINE GUN MOUNT

The Committee believes that the MK93 machine gun mount upgrade will improve existing systems and supports Army modernization investments that rely on the performance of the MK93 mount. The Committee encourages the Secretary of the Army to include funding for the MK93 machine gun mount upgrade in future budget requests, as well as details on the Army's plan to develop and deploy the previously funded upgrade.

PROCUREMENT OF AMMUNITION, ARMY

Fiscal year 2020 appropriation	\$2,578,575,000
Fiscal year 2021 budget request	2,777,716,000

SUSTAINMENT OF MUNITIONS

The Joint Munitions Command provides the Army and the Joint Force with ready, reliable, lethal munitions to sustain global operations. However, challenges exist to the organic industrial base in securing the supply chain for a wide range of systems, including munitions. The Committee believes that additional steps must be taken to ensure the continued implementation of life-cycle needs for ammunition. Therefore, the Committee directs the Secretary of the Army to submit a report to the House and Senate Appropriations Committees, not later than 90 days after the enactment of this Act, which outlines the Army’s sustainment efforts as part of the overall life-cycle management of all munitions programs. The report shall include a review of potential cost savings and operational efficiencies gained by centralizing the sustainment of munitions and explore how an automated process could determine the critical levels of requirements and resources necessary to fulfill them.

OTHER PROCUREMENT, ARMY

Fiscal year 2020 appropriation	\$7,581,524,000
Fiscal year 2021 budget request	8,625,206,000
Committee recommendation	8,453,422,000
Change from budget request	- 171,784,000

The Committee recommends an appropriation of \$8,453,422,000 for Other Procurement, Army which will provide the following program in fiscal year 2021:

HIGH MOBILITY MULTIPURPOSE WHEELED VEHICLES

The Committee recommends a transfer of funds for the purpose of obtaining new High Mobility Multipurpose Wheeled Vehicles (HMMWVs) or “like-new” HMMWVs fully restored to zero-hours, zero-miles condition by the installation of a new powered chassis. The HMMWVs obtained with this funding shall incorporate any necessary safety or capability improvements, including Anti-Lock Braking and Electronic Stability Control systems. Obtaining HMMWVs with a new, up-to-date chassis will enable future technology insertions and capability upgrades to the fleet and will reduce future sustainment costs and logistical challenges. Installing safety enhancements on new production vehicles or new production chassis will ensure that appropriate quality control and testing is performed before vehicles are fielded.

AIRCRAFT PROCUREMENT, NAVY

Fiscal year 2020 appropriation	\$19,605,513,000
Fiscal year 2021 budget request	17,127,378,000
Committee recommendation	17,710,109,000
Change from budget request	+582,731,000

The Committee recommends an appropriation of \$17,710,109,000 for Aircraft Procurement, Navy which will provide the following program in fiscal year 2021:

(DOLLARS IN THOUSANDS)

F/A-18 E/F SUPER HORNET PRODUCTION

The Committee appreciates the focus that the Navy has recently placed on reducing the strike fighter shortfall and improving the readiness of its tactical aviation fleet. As such, the Committee continues to support the F/A-18 E/F Super Hornet program and funds the request for 24 aircraft in fiscal year 2021. However, the Committee notes that the future years defense program eliminates the further procurement of F/A-18 E/F aircraft, resulting in a reduction of three years of production and three squadrons of aircraft from the previously planned future years defense program. The Committee believes that the Navy’s decision to eliminate future production of F/A-18 E/F aircraft is premature and requires further analysis. The Navy states that this elimination of new aircraft is offset by the startup of the F/A-18E/F Service Life Modification (SLM) program, which will extend the life of the Super Hornet fleet and maintain tactical aviation readiness. While this is somewhat true, the SLM program is in its nascent stage and will take time to contribute to fleet readiness levels. SLM also relies on a production line of new Super Hornets for on-time parts and production expertise. It is unclear if the Navy has assessed the impact of eliminating new Super Hornets on SLM cost, effectiveness, and the long-term cost of sustaining an increasingly aging fleet.

The Committee directs the Secretary of the Navy to submit a report to the congressional defense committees not later than 45 days after the enactment of this Act that provides an update on the Navy’s strike fighter shortfall projected over the next 20 years, the impact of these previously mentioned outyear aircraft reductions on this shortfall, and an updated schedule of inductions and deliveries of aircraft in the SLM program. Further, the Committee directs the Director of the Office of Cost Assessment and Program Evaluation to provide a report to the congressional defense committees not later than 45 days after the enactment of this Act on the life-cycle cost assessment of aircraft inducted through SLM and new aircraft, including procurement, personnel, and cost-per-flight hour comparisons.

V-22 NACELLE IMPROVEMENT PROGRAM

The nacelle improvement program modifies MV-22 and CV-22 aircraft to improve mission capable rates by ten percent per aircraft. The program is one of the Marine Corps’ highest priorities for V-22 readiness. The Committee encourages the Secretary of the Navy to increase the program beyond the current common configuration readiness and modernization effort to accelerate readiness and maintainability of the Marine Corps V-22 fleet.

WEAPONS PROCUREMENT, NAVY

Fiscal year 2020 appropriation	\$4,017,470,000
Fiscal year 2021 budget request	4,884,995,000
Committee recommendation	4,378,594,000
Change from budget request	-506,401,000

The Committee recommends an appropriation of \$4,378,594,000 for Weapons Procurement, Navy which will provide the following program in fiscal year 2021:

YC contract award delays		-3,461	
PROGRAM INCREASE - COVID RECOVERY FOR SECOND, THIRD, AND FOURTH TIER SUPPLIERS		100,000	100,000

TAO FLEET OILER PROGRAM

The Committee recognizes that Navy TAO Fleet Oilers are essential for providing fuel to deployed ships, allowing them and their embarked aircraft to remain combat ready and extending the reach of naval forces worldwide. However, while the Committee remains supportive of the TAO Fleet Oiler program, it understands there are long term affordability concerns with the program due to aggregate capability and material choices made during the post-contract award phase. The Committee also believes that ship costs must be reduced in order to build the required fleet of ships. Therefore, the Committee recommendation includes \$20,000,000 for non-recurring engineering costs to execute cost reduction initiatives and requirements changes that should be inserted into the TAO design as soon as practical.

Additionally, the Committee directs the Secretary of the Navy to submit a report to the congressional defense committees not later than 45 days after the enactment of this Act that details how these changes will be implemented and the savings they will produce.

SHIP TO SHORE CONNECTOR

The Committee remains supportive of the Ship to Shore Connector (SSC) acquisition program which aims to replace the rapidly aging Landing Craft Air Cushion vehicle fleet. While the Committee is concerned with program delays, it is encouraged by the first craft delivery and the award to build the next 15 SSCs. This award, which includes an additional SSC provided by Congress in the Department of Defense Appropriations Act, 2020, helps fulfill an important "Operational Maneuver from the Sea" requirement. This will allow the Navy and Marine Corps to fulfill future amphibious assault and humanitarian missions. The Committee encourages the Secretary of the Navy to ensure next-generation SSC craft continue to be an integral element of the fleet's responsibilities for ensuring personnel and equipment are supplied from amphibious ships to the shore.

DDG-51 MULTI YEAR PROCUREMENT

The Committee continues to support the Navy's stated goal of a 355-ship fleet, which is an essential part of the National Defense Strategy and its emphasis on near-peer competitors. The Committee recognizes that DDG-51 Destroyers are the backbone of the surface fleet, providing multi-mission flexibility and increasing capability with the introduction of the Flight III variant. The Committee understands the Navy has plans to develop and procure a future Large Surface Combatant in the near future, and notes that the current multi-year procurement of DDG-51s will end in fiscal year 2022. The Committee believes that a follow-on DDG-51 multi-year procurement contract awarded for fiscal year 2023 will ensure that Flight III capability will be available to the fleet and the domestic industrial base will be sustained until the award of the Large Surface Combatant contract. The Committee encourages the Secretary of the Navy to review the potential benefits of awarding a multi-year contract for DDG-51 Flight IIIs in fiscal year 2023.

OTHER PROCUREMENT, NAVY

Fiscal year 2020 appropriation	\$10,075,257,000
Fiscal year 2021 budget request	10,948,518,000
Committee recommendation	9,986,796,000
Change from budget request	-961,722,000

The Committee recommends an appropriation of \$9,986,796,000 for Other Procurement, Navy which will provide the following program in fiscal year 2021:

PRIVATE CONTRACTED SHIP MAINTENANCE

The Committee is disappointed that the Department of the Navy did not analyze the results of its private contracted ship maintenance pilot program before requesting an additional \$1,260,721,000 for the continuation of the program. The Committee also notes that the quarterly updates do not include viable metrics to determine whether the program is successful and should be continued. Therefore, the Committee recommendation includes \$815,945,000 for the pilot program.

The funding provided in Other Procurement, Navy line 24 Ship Maintenance, Repair and Modernization shall only be for such activities executed in the United States and is hereby designated a congressional special interest item. The Committee directs the Secretary of the Navy to provide the congressional defense committees the following in relation to the pilot—

1. An execution plan for the funding in Other Procurement, Navy line 24, Ship Maintenance, Repair and Modernization. This shall be submitted to the congressional defense committees prior to the execution of funding and shall include the following data points for each ship included in the pilot program:

- a. Ship class, hull number and name of each ship;
- b. Type of availability;
- c. Location of the work;
- d. Execution plan start date;
- e. Execution plan end date; and
- f. Execution plan funded amount (in thousands).

2. Not later than 15 days after the end of each fiscal quarter, an updated plan to the first report showing:

- a. Ship class, hull number and name of each ship;
- b. Type of availability;
- c. Location of the work;
- d. Actual or current estimate of start date;
- e. Actual or current estimate of end date;
- f. Actual funded amount and estimate to complete (in thousands); and

the quarterly update shall also include an execution review of the funding in line 1B4B Ship Depot Maintenance in Operation and Maintenance, Navy.

Additionally, the Committee directs the Secretary of the Navy to establish performance metrics for the program, to measure against the metrics quarterly, and to submit a written analysis to the congressional defense committees not later than 45 days after each quarterly performance evaluation.

EXPLOSIVE ORDNANCE DISPOSAL EQUIPMENT

The Committee is concerned with the potential lack of availability of standard, qualified explosive ordnance disposal (EOD) equipment for Navy divers.

The Committee directs the Secretary of the Navy to submit a report to the congressional defense committees not later than 90 days after the enactment of this Act on the standard equipment provided to EOD divers, the age of such equipment, the process through which EOD diving teams acquire new equipment, and

whether additional resources are required to provide more up-to-date and technologically advanced equipment.

PROCUREMENT, MARINE CORPS

Fiscal year 2020 appropriation	\$2,898,422,000
Fiscal year 2021 budget request	2,903,976,000
Committee recommendation	2,693,354,000
Change from budget request	- 210,622,000

The Committee recommends an appropriation of \$2,693,354,000 for Procurement, Marine Corps which will provide the following program in fiscal year 2021:

AUTOMATED PARTS SCREENING AND SELECTION TOOL FOR ADDITIVE
MANUFACTURING

The automated parts screening and selection tool for additive manufacturing is an innovative advancement for the use of additive manufacturing throughout the Department of Defense. The tool will create an automated methodology for additive manufacturing parts selection in support of sustainment operations, particularly for ground combat and combat support vehicles, and will identify the best parts candidates for additive manufacturing that will have the greatest impact on readiness. As part of the development of the tool, a select group of identified parts will be additively manufactured, installed, and field tested. The Committee encourages the Secretary of the Navy to resource these innovations to improve readiness and enhance warfighter capabilities.

AIRCRAFT PROCUREMENT, AIR FORCE

Fiscal year 2020 appropriation	\$17,512,361,000
Fiscal year 2021 budget request	17,908,145,000
Committee recommendation	19,587,853,000
Change from budget request	+1,679,708,000

The Committee recommends an appropriation of \$19,587,853,000 for Aircraft Procurement, Air Force which will provide the following program in fiscal year 2021:

OPEN SKIES TREATY AND OC-135 RECAPITALIZATION

The Department of Defense Appropriations Act, 2019 included \$146,374,000 to begin the recapitalization of the two OC-135 aircraft that perform United States flights under the Open Skies Treaty. These funds were approved despite the Committee's concerns that the Air Force was unready to execute the program; congressional approval was based on the insistence by the Office of the Secretary of Defense that the funds were urgently required and that the Air Force would be able to execute the acquisition within the year of appropriation. The Committee's concerns about execution proved well-founded and as of May 2020 little of the funding had been spent; however, the Air Force finally appeared positioned to award a contract for the program within the calendar year. On May 21, the Administration announced its decision to withdraw from the Open Skies Treaty and submitted the notice of intent under the Treaty on the following day. This abrupt announcement violated section 1234 of the National Defense Authorization Act for Fiscal Year 2020, which requires the Secretaries of Defense and State to notify Congress 120 days prior to any such action. The Committee views this action as further confirmation of the Department of Defense's increasing disregard for the law and the Congress. The Committee opposes the Administration's decision to withdraw from the Open Skies Treaty and is concerned with the Administration's apparent contempt for arms control measures. The Committee further notes that the Department has signaled its intent to reprogram the funding appropriated for the OC-135 recapitalization effort for other purposes. The Committee will not approve any such reprogramming and the recommendation rescinds \$158,448,000 of fiscal year 2019 and 2020 funding for OC-135 recapitalization.

BATTLEFIELD AIRBORNE COMMUNICATION NODE

The Department of Defense Appropriations Act, 2019 included \$100,000,000 to procure an additional RQ-4 aircraft modified for the Battlefield Airborne Communication Node (BACN) mission. To date that funding remains unexecuted, and the Air Force has proposed in its fiscal year 2021 budget submission to divest the RQ-4 Block 20 BACN aircraft and procure manned E-11 aircraft to replace them. The Committee supports the use of the fiscal year 2019 funding to execute the Air Force's new plan for BACN and to expedite the replacement of the January 2020 E-11 operational aircraft loss.

LC-130H AIRCRAFT

The Air National Guard operates a unique fleet of ski-equipped LC-130H aircraft capable of operating in the arctic and Antarctic regions. In addition to supporting vital scientific research, the capabilities of these aircraft have increasing relevance due to growing national interests in the arctic region. As the Department of Defense's 2019 report on arctic strategy notes, the arctic region is gaining importance through the combined effects of climate change and geopolitical competition for territorial claims, waterways and underlying resources, with attendant implications for homeland se-

curity. The report identifies the LC-130H wing as the only unit of its kind capable of operating from ice locations in the arctic. While the Committee notes that these aircraft have benefited from recent propulsion upgrades, it is concerned that these aircraft are becoming degraded by age and operational use.

Therefore, the Committee directs the Secretary of the Air Force to submit a report to the congressional defense committees on the status of these LC-130H aircraft not later than 90 days after the enactment of this Act. The report shall include information on the age and estimated service life of the aircraft, trends in operating costs and mission capable rate, known sustainment and safety problems, and the benefits of both completed and planned aircraft modifications. Finally, the report shall include an estimate of the cost of replacing these aircraft with C-130Js, including the cost of modifications required to support the LC-130 wing's unique mission.

MQ-NEXT

The Air Force's fiscal year 2021 budget request proposes to terminate production of MQ-9 aircraft, citing an excess of aircraft compared to projected operational requirements. The Committee does not accept this proposal and recommends additional funding for 16 MQ-9 aircraft. The Committee is concerned that the Air Force has reached this decision without adequate planning for a follow-on system. The Committee is aware that the Air Force recently released a request for information (RFI) to industry for improved solutions for future unmanned aerial systems with both intelligence, surveillance, and reconnaissance and strike capabilities, including a potential follow-on to the MQ-9. However, this RFI assumes that initial operating capability would not be achieved until 2030, and the Air Force budget request includes only a small amount of funding for concept exploration.

The Committee therefore directs the Secretary of the Air Force to submit a report to the congressional defense committees not later than the submission of the fiscal year 2022 budget request on an MQ-9 follow-on program to be designated as MQ-Next. The goal of the MQ-Next program should be to accelerate the development and fielding of a next-generation medium altitude unmanned aerial system. The report shall detail the desired features of such a system, the cost and timeline required to achieve development and fielding, proposed measures to ensure full and open competition, and an explanation of how such a system would fulfill the goals of the National Defense Strategy.

F-15EX

The Committee continues to support the F-15EX program, which was recently affirmed by the Air Force to be the most expedient and cost-effective solution to addressing urgent availability problems with the F-15C/D fleet and improving fighter force capacity. The Committee notes that the Air Force acquisition strategy includes the provision of F-15EX engines as government furnished equipment. The Committee understands that the Air Force will procure engines for the initial stage of the program, which is being executed under middle tier acquisition authorities for rapid field-

ing, using a sole-source exception. The Committee is aware that the Air Force recently issued a sources sought notice to determine market capacity to deliver a fully integrated propulsion system for subsequent lots of F-15EX aircraft. The Committee encourages the Secretary of the Air Force to use full and open competition methods, including transparent selection criteria and due consideration of life-cycle costs, consistent with the goals of the F-15EX program.

MISSILE PROCUREMENT, AIR FORCE

Fiscal year 2020 appropriation	\$2,575,890,000
Fiscal year 2021 budget request	2,396,417,000
Committee recommendation	2,249,157,000
Change from budget request	- 147,260,000

The Committee recommends an appropriation of \$2,249,157,000 for Missile Procurement, Air Force which will provide the following program in fiscal year 2021:

CHEMICAL BIOLOGICAL SITUATIONAL AWARENESS

The Committee commends the Joint Program Executive Office for Chemical, Biological, Radiological and Nuclear Defense (JPEO–CBRND) for the fielding of dismounted reconnaissance sets, kits, and system enhancement packages critical for CBRND capabilities. These equipment sets provide situational awareness and accelerate innovative technologies that extend the longevity of these capabilities. The Committee encourages the Joint Program Executive Officer for JPEO–CBRND to ensure timely fielding of these capabilities.

DEFENSE PRODUCTION ACT PURCHASES

Fiscal year 2020 appropriation	\$64,393,000
Fiscal year 2021 budget request	181,931,000
Committee recommendation	191,931,000
Change from budget request	+10,000,000

The Committee recommends an appropriation of \$191,931,000 for the Defense Production Act Purchases which will provide the following program in fiscal year 2021:

EXPLANATION OF PROJECT LEVEL ADJUSTMENTS

[In thousands of dollars]

	Budget Request	Committee Recommended	Change from Request

TITLE IV

RESEARCH, DEVELOPMENT, TEST AND EVALUATION

The fiscal year 2021 Department of Defense research, development, test and evaluation budget request totals \$106,224,793,000. The Committee recommendation provides \$104,348,089,000 for the research, development, test and evaluation accounts. The table below summarizes the Committee recommendations:

(DOLLARS IN THOUSANDS)

REPROGRAMMING GUIDANCE FOR ACQUISITION ACCOUNTS
(INCLUDING BASE AND OVERSEAS CONTINGENCY OPERATIONS
FUNDING)

The Secretary of Defense is directed to continue to follow the reprogramming guidance as specified in the report accompanying the House version of the Department of Defense Appropriations bill for Fiscal Year 2008 (House Report 110-279). Specifically, the dollar threshold for reprogramming funds shall be \$10,000,000 for procurement and research, development, test and evaluation.

Also, the Under Secretary of Defense (Comptroller) is directed to continue to provide the congressional defense committees quarterly, spreadsheet-based DD Form 1416 reports for Service and defense-wide accounts in titles III and IV of this Act. Reports for titles III and IV shall comply with the guidance specified in the explanatory statement accompanying the Department of Defense Appropriations Act, 2006. The Department shall continue to follow the limitation that prior approval reprogrammings are set at either the specified dollar threshold or 20 percent of the procurement or research, development, test and evaluation line, whichever is less. These thresholds are cumulative from the base for reprogramming value as modified by any adjustments. Therefore, if the combined value of transfers into or out of a procurement (P-1) or research, development, test and evaluation (R-1) line exceeds the identified threshold, the Secretary of Defense must submit a prior approval reprogramming to the congressional defense committees. In addition, guidelines on the application of prior approval reprogramming procedures for congressional special interest items are established elsewhere in this report.

FUNDING INCREASES

The funding increases outlined in these tables shall be provided only for the specific purposes indicated in the tables.

RESEARCH, DEVELOPMENT, TEST AND EVALUATION SPECIAL INTEREST
ITEMS

Items for which additional funds have been recommended or items for which funding is specifically reduced as shown in the project level tables detailing recommended adjustments or in paragraphs using the phrase "only for" or "only to" in this report are congressional special interest items for the purpose of the Base for Reprogramming (DD Form 1414). Each of these items must be carried on the DD Form 1414 at the stated amount, as specifically addressed elsewhere in this report.

FEDERALLY FUNDED RESEARCH AND DEVELOPMENT CENTERS

The Committee was disappointed that the annual report on the Department's request for Federally Funded Research and Development Centers (FFRDC) was delivered more than three months late for the second consecutive year from the Office of the Under Secretary of Defense (Research and Engineering). This report is due to Congress with the submission of the annual budget request. De-

tails of FFRDC funding and staffing levels are incorporated into the budget request in various programs, projects, and activities; therefore, the Committee is confused why the annual summary report, which assists in determining any necessary adjustments to the FFRDC legislative provision, is consistently delivered late. The Committee is also disturbed by the lack of transparency the Under Secretary's office provides to the Committee on possible changes it seems to be contemplating for the use of FFRDCs. Therefore, the Committee directs the Secretary of Defense to provide a report to the congressional defense committees not later than 30 days after the enactment of this Act, on the methodology and criteria being used to assess each of the FFRDCs, the definition of core competencies, and what, if any, transitions will take place in fiscal years 2021 and 2022. The Secretary is also directed to inform the congressional defense committees on possible changes to the policy document for the FFRDC program, Department of Defense Instruction 5000.77, prior to the implementation of any decisions that are made.

HUMAN PERFORMANCE OPTIMIZATION RESEARCH

The Committee believes that developmental programs aimed at human performance optimization in the physical, cognitive, organizational, and social domains could improve military readiness. The Committee encourages the Service Secretaries to prioritize human performance optimization research efforts and encourages utilizing public-private partnerships when possible.

RESEARCH, DEVELOPMENT, TEST AND EVALUATION, ARMY

Fiscal year 2020 appropriation	\$12,543,435,000
Fiscal year 2021 budget request	12,587,343,000
Committee recommendation	13,126,499,000
Change from budget request	+539,156,000

The Committee recommends an appropriation of \$13,126,499,000 for Research, Development, Test and Evaluation, Army which will provide the following program in fiscal year 2021:

EXPLANATION OF PROJECT LEVEL ADJUSTMENTS
[In thousands of dollars]

R-1	Budget Request	Committee Recommended	Change from Request
2 DEFENSE RESEARCH SCIENCES	303,257	346,457	43,200
Program increase - unmanned aerial systems propulsion		15,000	
Program increase		10,000	
Program increase - flexible LED lighting for tents and shelters		5,200	
Program increase - counter UAS technology research		5,000	
Program increase - cell-free expression for biomanufacturing		5,000	
Program increase - explosives and opioids dual-use UV detection		3,000	
3 UNIVERSITY RESEARCH INITIATIVES	67,148	101,148	34,000
Program increase		20,000	
Program increase - additive manufacturing using ultra high-performance concrete		10,000	
Program increase - clean modular hydro technology		4,000	
4 UNIVERSITY AND INDUSTRY RESEARCH CENTERS	87,877	117,877	30,000
Program increase - Army artificial intelligence innovation		20,000	
Program increase - materials in extreme dynamic environments		10,000	
12 LETHALITY TECHNOLOGY	42,425	96,425	54,000
Program increase - novel and sustainable energetic materials		24,000	
Program increase - quantum technologies for armament systems		10,000	
Program increase - solid fuel propulsion technology		10,000	
Program increase - optimized additive manufacturing		5,000	
Program increase - next generation remote sensing		5,000	
13 ARMY APPLIED RESEARCH	30,757	43,467	12,710
Program increase - pathfinder airborne		8,000	
Program increase - UTDD catalyst		5,000	
Program increase - smart installation and community program		5,000	
Insufficient justification		-5,290	
14 SOLDIER LETHALITY TECHNOLOGY	125,435	155,435	30,000
Program increase - lightweight body armor		10,000	
Program increase - advanced textile-based products		6,000	
Program increase - HEROES program		5,000	
Program increase - soldier ballistic technologies		5,000	
Program increase - medical simulation and training		4,000	

R-1		Budget Request	Committee Recommended	Change from Request
15	GROUND TECHNOLOGY	28,047	112,047	84,000
	Program increase - defense resiliency against extreme cold weather		10,000	
	Program increase - rapid advanced deposition		10,000	
	Program increase - additive manufacturing machine learning initiative		10,000	
	Program increase - materials manufacturing processes		10,000	
	Program increase - materials recovery technologies for defense supply resiliency		10,000	
	Program increase - autonomous digital design and manufacturing		5,000	
	Program increase - environmental quality enhanced coatings		5,000	
	Program increase - integrity of transparent armor		5,000	
	Program increase - high performance polymers		5,000	
	Program increase - military waste stream conversion		5,000	
	Program increase - robotic RTCH		5,000	
	Program increase - advanced concrete		4,000	
16	NEXT GENERATION COMBAT VEHICLE TECHNOLOGY	217,565	251,565	34,000
	Program increase - prototyping energy smart autonomous ground systems		12,000	
	Program increase - additive metals manufacturing		10,000	
	Program increase - self-sealing fuel tanks technology		6,000	
	Program increase - silicon carbide electronics		6,000	
	Program increase - highly electrified vehicles		5,000	
	BF9 insufficient justification		-3,000	
	BH5 insufficient justification		-2,000	
17	NETWORK C3I TECHNOLOGY	114,404	149,404	35,000
	Program increase - artificial intelligence and machine learning electronic warfare sensor technology		10,000	
	Program increase - integrating energy and computing networks		10,000	
	Program increase - energy efficient devices		5,000	
	Program increase - CHARM		5,000	
	Program increase - APNT for autonomous vehicles		5,000	
18	LONG RANGE PRECISION FIRES TECHNOLOGY	60,553	80,553	20,000
	Program increase - extended range hybrid and precision gun launched projectiles		15,000	
	Program increase - composite cannon tubes		5,000	
19	FUTURE VERTICAL LIFT TECHNOLOGY	96,484	116,484	20,000
	Program increase - individual blade and higher harmonic control		10,000	
	Program increase - high strength functional composites		5,000	
	Program increase - additive manufacturing of multi-functional composite aerospace components		5,000	
20	AIR AND MISSILE DEFENSE TECHNOLOGY	56,298	75,298	19,000
	Program increase - beam control systems and industry grade optical fiber fabrication for energy laser		12,000	
	Program increase - high energy laser enabling and support technology		7,000	

R-1		Budget Request	Committee Recommended	Change from Request
42	MEDICAL TECHNOLOGY	95,496	100,496	5,000
	Program increase - military force vector borne health protection		5,000	
44	MEDICAL ADVANCED TECHNOLOGY	38,896	84,896	46,000
	Program increase - peer-reviewed neurofibromatosis research		20,000	
	Program increase - peer-reviewed neurotoxin exposure treatment Parkinson's research		16,000	
	Program increase - peer-reviewed military burn research		10,000	
54	SOLDIER LETHALITY ADVANCED TECHNOLOGY	109,608	137,608	28,000
	Program increase		10,000	
	Program increase - advanced AI/AA analytics for modernization and readiness		10,000	
	Program increase - small arms fire control advanced technology		8,000	
55	GROUND ADVANCED TECHNOLOGY	14,795	111,295	96,500
	Program increase - flow battery demonstration		20,000	
	Program increase - corrosion protection and prevention		10,000	
	Program increase - rapid entry and sustainment for the arctic		8,000	
	Program increase - composite flywheel technology		7,000	
	Program increase - high-performance concrete technology		6,000	
	Program increase - secure management of energy generation and storage		5,000	
	Program increase - water quality and resiliency		5,000	
	Program increase - electrical system safety and reliability		5,000	
	Program increase - rare earth element extraction		5,000	
	Program increase - organic light emitting diode		5,000	
	Program increase - coatings technology		5,000	
	Program increase - heavy load simulator		4,200	
	Program increase - integrated microgrids		4,000	
	Program increase - infrastructure resiliency and flood assessment		3,000	
	Program increase - single connection quick oil change system		3,000	
	Program increase - cross-laminated timber and recycled carbon fiber materials		1,300	
63	C3I CYBER ADVANCED DEVELOPMENT	23,357	43,357	20,000
	Program increase - high bandwidth cryptomodule enhancements and certification		10,000	
	Program increase - low SWAP software-defined MFEW		10,000	

R-1		Budget Request	Committee Recommended	Change from Request
	NEXT GENERATION COMBAT VEHICLE ADVANCED			
65	TECHNOLOGY	199,358	272,358	73,000
	Program increase - additive manufacturing for jointless hull		10,000	
	Program increase - hydrogen fuel cells		10,000	
	Program increase - carbon fiber and graphitic foam technology		10,000	
	Program increase - combat vehicle weight reduction		10,000	
	Program increase - ATE5.2 engine development		10,000	
	Program increase - combat vehicle blast testing		6,000	
	Program increase - additive manufacturing of critical components		5,000	
	Program increase - advanced adhesives		5,000	
	Program increase - combat vehicle lithium 6T battery development		5,000	
	Program increase - vehicle technology readiness levels		2,000	
66	NETWORK C3I ADVANCED TECHNOLOGY	158,608	172,608	14,000
	Program increase - mesh network-enabled small satellites		10,000	
	Program increase - geospatial artificial intelligence analytic tools		4,000	
	LONG RANGE PRECISION FIRES ADVANCED			
67	TECHNOLOGY	121,060	141,060	20,000
	Program increase - hypervelocity projectile extended range		20,000	
68	FUTURE VERTICAL LIFT ADVANCED TECHNOLOGY	156,194	193,444	37,250
	Program increase - advanced helicopter seating system		15,000	
	Program increase - joint tactical aerial resupply vehicle		8,000	
	Program increase - surface tolerant adhesives		5,000	
	Program increase - UH-60 main rotor blade modernization		5,000	
	Program increase - soldier information interface for aviation fleet management tool		2,250	
	Program increase - helicopter emergency oil systems		2,000	
69	AIR AND MISSILE DEFENSE ADVANCED TECHNOLOGY	58,130	85,630	27,500
	Program increase		20,000	
	Program increase - thermal management system for high energy laser		7,500	
77	HUMANITARIAN DEMINING	8,515	17,000	8,485
	Program increase		8,485	
78	ARMY MISSILE DEFENSE SYSTEMS INTEGRATION	11,062	34,062	23,000
	Program increase		15,000	
	Program increase - gun launched interceptors		8,000	
80	AIR AND MISSILE DEFENSE SYSTEMS ENGINEERING	26,482	25,082	-1,400
	Program increase - machine learning for integrated fires		5,000	
	Excess support costs		-6,400	
81	LANDMINE WARFARE AND BARRIER - ADV DEV	64,092	61,858	-2,234
	Program increase - M58 mine clearing line charge		2,000	
	Excess carryover		-4,234	

R-1		Budget Request	Committee Recommended	Change from Request
86	TACTICAL ELECTRONIC SURVEILLANCE SYSTEM - AD MDSS sensor development early to need	194,775	170,025 -24,750	-24,750
88	ENVIRONMENTAL QUALITY TECHNOLOGY Program increase - high pressure waterjet technology	13,387	18,387 5,000	5,000
90	AVIATION - ADV DEV Program increase - FLRAA Program increase - model-based systems engineering	647,937	672,937 20,000 5,000	25,000
94	ROBOTICS DEVELOPMENT Excess testing and evaluation growth	121,207	114,792 -6,415	-6,415

	CROWS-J program delay		-5,667	
	Bradley excess carryover		-3,000	
234	155MM SELF-PROPELLED HOWITZER IMPROVEMENTS	427,254	420,963	-6,291
	Prior year carryover		-6,291	
239	OTHER MISSILE PRODUCT IMPROVEMENT PROGRAM	79,424	76,174	-3,250
	ATACMS excess support and test costs		-3,250	
244	LOWER TIER AIR AND MISSILE DEFENSE (AMD) SYSTEM	166	0	-166
	Prior year carryover		-166	
264	END ITEM INDUSTRIAL PREPAREDNESS ACTIVITIES	61,012	106,012	45,000
	Program increase - functional fabrics and smart textiles		10,000	
	Program increase - nanoscale materials manufacturing		10,000	
	Program increase - compact efficient rotary engine		10,000	
	Program increase - lightweight high efficiency generators		10,000	
	Program increase - glass separators for lithium batteries		5,000	
	UNDISTRIBUTED REDUCTION - EXCESS TO NEED		-35,669	-35,669

SHOULDER LAUNCHED MUNITIONS

The Committee is concerned about the increased weight carried by soldiers while utilizing shoulder launched munitions. The Secretary of the Army is encouraged to consider employing mature shoulder fired weapons technology which can address threats in a defilade position. Additionally, the Committee directs the Secretary of the Army to submit a report to the congressional defense committees not later than 90 days after the enactment of this Act detailing the Army's shoulder launched munitions procurement strategy.

ADVANCED MANUFACTURING CENTER OF EXCELLENCE

The Committee commends the Army for establishing a Center of Excellence for Advanced Manufacturing. The National Defense Authorization Act for Fiscal Year 2019 required the Under Secretary of Defense (Acquisition and Sustainment) and the Under Secretary of Defense (Research and Engineering) to work with each of the Service Secretaries to establish activities that demonstrate advanced manufacturing techniques and capabilities at depot-level activities or military arsenal facilities. The Committee continues to be supportive of this effort and directs the Secretary of Defense to submit a report to the congressional defense committees not later than 90 days after the enactment of this Act providing further detail on the activities that have been identified by each Service.

DENGUE VACCINE DEVELOPMENT

Exposure to the dengue virus continues to be one of the largest infectious disease threats facing the military. The impact of dengue infection on troop health in multiple military operations, combined with the continually expanding global endemic range makes the lack of an effective tetravalent dengue vaccine an urgent issue. The Committee encourages the Commanding General, United States Army Medical Research and Development Command, to prioritize the research and development of such a vaccine in order to reduce the threat of dengue infection.

ARMY ARTIFICIAL INTELLIGENCE INNOVATION INSTITUTE

The Committee supports the Army Research Laboratory's (ARL) Army Artificial Intelligence Innovation Institute (A2I2) and its support of ARL's various essential research programs. The A2I2 initiative seeks to accelerate innovation in areas such as artificial intelligence and machine and deep learning technologies that will be critical to the success of future Army missions. The Committee recommendation includes an additional \$20,000,000 to support these efforts and expects the additional funds to remain under the purview of ARL.

FUTURE LONG-RANGE ASSAULT AIRCRAFT

The Committee continues to support the Future Long-Range Assault Aircraft (FLRAA) program and notes it remains a top Army modernization priority. The 2020 Army Aviation Strategic Plan and Modernization Roadmap notes that, as a result of the funding provided in the Department of Defense Appropriations Act, 2020, the

Army has been able to accelerate the FLRAA program by four years. To continue supporting this acceleration effort, the Committee recommendation includes an additional \$20,000,000 for robust risk-mitigation efforts. The Committee expects these additional resources to be used to advance the program and shorten the time required to achieve Milestone B of the acquisition process.

FUTURE VERTICAL LIFT SENSOR PAYLOADS

The Committee is concerned that the Army has not clearly defined the acquisition strategy for Future Vertical Lift (FVL) mission equipment payloads and sensors. Due to the accelerated FVL schedule and the desire for high technology readiness level sensor payloads, the Army risks fielding advanced aircraft platforms equipped with outdated payloads that will not meet desired operational capabilities. Therefore, the Committee directs the Secretary of the Army to submit a report to the congressional defense committees not later than 90 days after the enactment of this Act, on FVL mission equipment payloads and sensors. The report shall include the acquisition strategy for FVL mission equipment payloads and sensors, including radar, electronic warfare, 360 distributed aperture system, missile warning system, and advanced electro-optical infrared system; planned risk reduction activities for the sensor payloads; and an estimate of the cost and schedule for the development and production of the required sensor payloads.

ARMY COMMAND POST

The Committee supports the development of advanced materials and technologies in support of the next generation command post and the expeditionary maneuver support mission for a more mobile and protected forward deployed unit.

RESEARCH, DEVELOPMENT, TEST AND EVALUATION, NAVY

Fiscal year 2020 appropriation	\$20,155,115,000
Fiscal year 2021 budget request	21,427,048,000
Committee recommendation	20,165,874,000
Change from budget request	-1,261,174,000

The Committee recommends an appropriation of \$20,165,874,000 for Research, Development, Test and Evaluation, Navy which will provide the following program in fiscal year 2021:

(DOLLARS IN THOUSANDS)

	BUDGET REQUEST	COMMITTEE RECOMMENDED	CHANGE FROM REQUEST	
RESEARCH, DEVELOPMENT, TEST & EVALUATION, NAVY				
BASIC RESEARCH				
1	UNIVERSITY RESEARCH INITIATIVES.....	116,816	136,816	+20,000
2	IN-HOUSE LABORATORY INDEPENDENT RESEARCH.....	19,113	19,113	---
3	DEFENSE RESEARCH SCIENCES.....	467,158	482,984	+15,826
	TOTAL, BASIC RESEARCH.....	603,087	638,913	+35,826
APPLIED RESEARCH				
4	POWER PROJECTION APPLIED RESEARCH.....	17,792	22,792	+5,000
5	FORCE PROTECTION APPLIED RESEARCH.....	122,281	161,781	+39,500

EXPLANATION OF PROJECT LEVEL ADJUSTMENTS
[In thousands of dollars]

R-1	Budget Request	Committee Recommended	Change from Request
1 UNIVERSITY RESEARCH INITIATIVES	116,816	136,816	20,000
Program increase - university research initiatives		10,000	
Program increase - defense university research instrumentation program		10,000	
3 DEFENSE RESEARCH SCIENCES	467,158	482,984	15,826
Mathematics, computer, and information sciences unjustified growth		-4,174	
Program increase - defense research sciences		15,000	
Program increase - silicon-germanium-tin alloy research		5,000	
4 POWER PROJECTION APPLIED RESEARCH	17,792	22,792	5,000
Program increase - miniaturization of lasers		5,000	
5 FORCE PROTECTION APPLIED RESEARCH	122,281	161,781	39,500
Program increase - direct air capture and blue carbon removal technology		7,500	
Program increase - navy power and energy systems technology		6,000	
Program increase - power generation and storage research		5,000	
Program increase - data-model fusion		3,000	
Program increase - UAVs in austere environments		7,000	
Program increase - coastal environmental research		5,000	
Program increase - advanced energetics research		4,000	
Program increase - machine discovery and learning		2,000	
6 MARINE CORPS LANDING FORCE TECHNOLOGY	50,623	55,623	5,000
Program increase - unmanned logistics solutions		5,000	
7 COMMON PICTURE APPLIED RESEARCH	48,001	44,724	-3,277
Applied information sciences for decision making excess growth		-3,277	
8 WARFIGHTER SUSTAINMENT APPLIED RESEARCH	67,765	84,255	16,490
Surveillance technology excess growth		-1,010	
Program increase - health and safety research of underground fuel storage facilities		5,000	
Program increase - humanoid robotics in unstructured environments		5,000	
Program increase - human performance and injury rehabilitation assessment tool		2,500	
Program increase - force health protection and application		5,000	
9 ELECTROMAGNETIC SYSTEMS APPLIED RESEARCH	84,994	87,994	3,000
Program increase - navigation technology		3,000	

R-1	Budget Request	Committee Recommended	Change from Request
OCEAN WARFIGHTING ENVIRONMENT APPLIED			
10 RESEARCH	63,392	78,392	15,000
Program increase - task force ocean		10,000	
Program increase - naval special warfare		5,000	
12 UNDERSEA WARFARE APPLIED RESEARCH	56,397	71,397	15,000
Program increase - undersea sensing and communications		5,000	
Program increase - cross domain autonomy for persistent maritime operations		10,000	
13 FUTURE NAVAL CAPABILITIES APPLIED RESEARCH	167,590	170,724	3,134
Sea warfare and weapons excess growth		-2,461	
Warfighter performance excess growth		-2,405	
Program increase - cooperative engagement capability mission based networking for data distribution systems		3,000	
Program increase - improved detection of submarine threats		5,000	
MINE AND EXPEDITIONARY WARFARE APPLIED			
14 RESEARCH	30,715	33,215	2,500
Program increase - robotics for mine neutralization		2,500	
INNOVATIVE NAVAL PROTOTYPES (INP) APPLIED			
15 RESEARCH	160,537	147,813	-12,724
CLAWS unjustified growth		-4,988	
Full spectrum undersea warfare unjustified request		-11,736	
Program increase - thermoplastic composites for lightweight naval applications		4,000	
MARINE CORPS ADVANCED TECHNOLOGY			
19 DEMONSTRATION (ATD)	219,045	207,692	-11,353
Command, control, communications, computers excess growth		-9,299	
Combat service support and force protection excess growth		-7,054	
Program increase - expeditionary process, exploitation, and dissemination		5,000	
FUTURE NAVAL CAPABILITIES ADVANCED			
21 TECHNOLOGY DEV	246,054	228,159	-17,895
Expeditionary maneuver warfare excess growth		-11,557	
Long endurance airborne platform decoy concurrency		-4,818	
DECAF unjustified request		-6,520	
Program increase - advanced energetics research		5,000	
23 WARFIGHTER PROTECTION ADVANCED TECHNOLOGY	4,851	29,151	24,300
Program increase - bone marrow registry program		24,300	
INNOVATIVE NAVAL PROTOTYPES (INP) ADVANCED			
26 TECHNOLOGY	141,948	157,786	15,838
HIJENKS concurrency		-2,162	
Long range targeting concurrency		-2,000	
Program increase - electromagnetic railgun		20,000	

R-1	Budget Request	Committee Recommended	Change from Request
27 MEDIUM AND LARGE UNMANNED SURFACE VEHICLES	464,042	259,242	-204,800
LUSV additional prototypes		-159,300	
Unmanned surface vehicle enabling capabilities - payload program reduction		-45,500	
32 ASW SYSTEMS DEVELOPMENT	15,719	18,719	3,000
Program increase		3,000	
34 ADVANCED COMBAT SYSTEMS TECHNOLOGY	70,218	66,661	-3,557
LOCUST fixed wing tests funding early to need		-1,338	
Advanced long range targeting funding early to need		-2,219	
SURFACE AND SHALLOW WATER MINE			
35 COUNTERMEASURES	52,358	47,808	-4,550
Barracuda schedule delays		-4,550	
36 SURFACE SHIP TORPEDO DEFENSE	12,816	11,816	-1,000
Torpedo warning systems funding excess to need		-1,000	
38 PILOT FISH	358,757	277,702	-81,055
Excess growth		-81,055	
43 ADVANCED SUBMARINE SYSTEM DEVELOPMENT	185,356	156,746	-28,610
Project 2033 strategic capability R&D infrastructure previously funded		-4,219	
Project 9710 unjustified new start		-33,391	
Program increase - workforce partnership research		5,000	
Program increase - improved CAVES technology		4,000	
45 SHIP CONCEPT ADVANCED DESIGN	126,396	113,260	-13,136
Historical underexecution		-6,636	
Cybersecurity previously funded		-1,500	
Next generation medium amphibious ship excess to need		-10,000	
Next generation medium logistics ship excess to need		-10,000	
Program increase - additive manufacturing		5,000	
Program increase - polymorphic build farm for open source technologies		10,000	
46 SHIP PRELIMINARY DESIGN & FEASIBILITY STUDIES	70,270	65,270	-5,000
Future surface combatant concept development concurrency		-5,000	
48 ADVANCED SURFACE MACHINERY SYSTEMS	38,449	50,699	12,250
Historical underexecution		-2,250	
Power and energy systems contract award delay		-500	
Program increase - silicon carbide power modules		7,500	
Program increase - advanced power electronics integration		2,500	
Program increase - small boat electric propulsion		5,000	
50 LITTORAL COMBAT SHIP (LCS)	32,178	42,178	10,000
Program increase - defensive capability improvements		10,000	

R-1	Budget Request	Committee Recommended	Change from Request
52 SSBN NEW DESIGN CMC design and prototype historically overbudgeted	317,196	306,682 -10,514	-10,514
54 AUTOMATED TEST AND RE-TEST Program increase	4,797	34,797 30,000	30,000
57 MARINE CORPS GROUND COMBAT/SUPPORT SYSTEM Armored reconnaissance vehicle concurrency Long range unmanned surface vehicle concurrency Long range fires unjustified new start	189,603	132,664 -2,600 -4,339 -50,000	-56,939
61 NAVY ENERGY PROGRAM Program increase	23,422	38,422 15,000	15,000
63 CHALK CORAL Excess growth	545,763	426,577 -119,186	-119,186
65 RETRACT MAPLE Excess growth	353,226	297,685 -55,541	-55,541
66 LINK PLUMERIA Excess growth	544,388	470,448 -73,940	-73,940
68 LINK EVERGREEN Excess growth	236,234	201,984 -34,250	-34,250
70 NATO RESEARCH AND DEVELOPMENT Historical underexecution	6,880	4,849 -2,031	-2,031
DIRECTED ENERGY AND ELECTRIC WEAPON SYSTEMS			
74 SYSTEMS HELCAAP concurrency Program increase - high energy laser weapon system for counter-UAS area defense	128,845	126,895 -6,950 5,000	-1,950
76 DIGITAL WARFARE Historical underexecution Project 3255 excess growth Project 3425 excess growth	54,699	35,975 -2,023 -9,979 -6,722	-18,724
SMALL AND MEDIUM UNMANNED UNDERSEA VEHICLES			
77 VEHICLES Small unmanned underwater vehicles concurrency	53,942	52,020 -1,922	-1,922
80 LARGE UNMANNED UNDERSEA VEHICLES Contract award early to need	78,122	45,557 -32,565	-32,565
GERALD R. FORD CLASS NUCLEAR AIRCRAFT CARRIER			
81 CARRIER Integrated digital shipbuilding excess growth Program increase - electronic personnel qualification standards system	107,895	104,895 -7,000 4,000	-3,000

R-1	Budget Request	Committee Recommended	Change from Request
82 AIRBORNE MINE COUNTERMEASURES	17,366	17,966	600
Historical underexecution		-2,400	
Program increase - coastal battlefield reconnaissance and analysis		3,000	
TACTICAL AIR DIRECTIONAL INFRARED			
84 COUNTERMEASURES	59,776	52,026	-7,750
DAIRCM hardware development contract award delay		-7,750	
85 EXPEDITIONARY LOGISTICS	0	2,000	2,000
Program increase - automated parts screening and selection tool for additive manufacturing		2,000	
87 RAPID TECHNOLOGY CAPABILITY PROTOTYPE	3,664	1,064	-2,600
Historical underexecution		-2,600	
89 ADVANCED UNDERSEA PROTOTYPING	115,858	80,232	-35,626
Test and evaluation delays		-35,626	
90 COUNTER UNMANNED AIRCRAFT SYSTEMS (C-UAS)	14,259	9,628	-4,631
System development excess growth		-4,631	
PRECISION STRIKE WEAPONS DEVELOPMENT			
91 PROGRAM	1,102,387	1,052,792	-49,595
Conventional prompt global strike program management excess growth		-20,000	
Conventional prompt global strike initial integration efforts - transfer to line 165		-15,000	
Miniature air launched decoy historical underexecution		-8,600	
Advanced aerial refueling system lack of acquisition strategy		-5,995	
SPACE & ELECTRONIC WARFARE (SEW)			
92 ARCHITECTURE/ENGINE	7,657	6,208	-1,449
Historical underexecution		-1,449	
OFFENSIVE ANTI-SURFACE WARFARE WEAPON			
93 DEVELOPMENT	35,750	46,750	11,000
LRASM funds - Navy requested transfer from line 141		11,000	
95 ADVANCED TACTICAL UNMANNED AIRCRAFT SYSTEM	22,589	34,013	11,424
Historical underexecution		-2,576	
Program increase - KMAX experimentation and support		7,000	
Program increase - mobile unmanned/manned distributed lethality airborne network joint capability technology demonstration		7,000	
99 OTHER HELO DEVELOPMENT	18,133	14,063	-4,070
Historical underexecution		-2,250	
Attack and utility replacement aircraft hardware development early to need		-1,820	

R-1	Budget Request	Committee Recommended	Change from Request
100 AV-8B AIRCRAFT - ENG DEV	20,054	16,749	-3,305
Historical underexecution		-3,305	
MULTI-MISSION HELICOPTER UPGRADE			
102 DEVELOPMENT	27,340	32,340	5,000
Program increase - MH-60 obsolescence issues		5,000	
105 WARFARE SUPPORT SYSTEM	9,065	14,982	5,917
Historical underexecution		-1,083	
Program increase - COTS-based counter-UAV technology		5,000	
Program increase - diesel fuel outboard motor testing		2,000	
106 TACTICAL COMMAND SYSTEM	97,968	89,186	-8,782
NOBLE projects delay		-8,782	
107 ADVANCED HAWKEYE	309,373	292,175	-17,198
Sensors excess growth		-17,198	
108 H-1 UPGRADES	62,310	53,960	-8,350
Historical underexecution		-8,350	
113 ELECTRONIC WARFARE DEVELOPMENT	134,194	128,684	-5,510
Historical underexecution		-6,397	
Adaptive radar countermeasures delays		-3,230	
Dual band decoy risk reduction early to need		-6,883	
Program increase - intrepid tiger II		11,000	
114 EXECUTIVE HELO DEVELOPMENT	99,321	93,255	-6,066
VH-92A product improvement development unjustified growth		-3,097	
VH-92A improvements test and evaluation excess growth		-2,969	
115 NEXT GENERATION JAMMER (NGJ)	477,680	447,152	-30,528
Historical underexecution		-29,199	
Trainer early to need		-1,329	
116 JOINT TACTICAL RADIO SYSTEM - NAVY (JTRS-NAVY)	232,818	234,180	1,362
ATDLS integration delays		-2,638	
Program increase - multifunctional information distribution system acceleration		4,000	
117 NEXT GENERATION JAMMER (NGJ) INCREMENT II	170,039	154,496	-15,543
Historical underexecution		-11,118	
Primary hardware development contract delay		-4,425	
SURFACE COMBATANT COMBAT SYSTEM			
118 ENGINEERING	403,712	365,019	-38,693
Aegis development support excess growth		-7,159	
Aegis capability build 2023-1 excess to need		-31,534	
120 SMALL DIAMETER BOMB (SDB)	62,488	44,630	-17,858
Historical underexecution		-17,858	

R-1	Budget Request	Committee Recommended	Change from Request
121 STANDARD MISSILE IMPROVEMENTS	386,225	343,200	-43,025
Historical underexecution		-4,550	
SM-6 Block IB schedule delays and concurrency		-38,475	
NAVAL INTEGRATED FIRE CONTROL-COUNTER AIR			
123 SYSTEMS ENG	44,548	42,160	-2,388
Historical underexecution		-2,388	
124 ADVANCED SENSORS APPLICATION PROGRAM	13,673	1,000	-12,673
Unjustified new start		-12,673	
125 ADVANCED ABOVE WATER SENSORS	87,809	71,449	-16,360
Shipboard passive electro-optical infrared development concurrency		-16,360	
126 SSN-688 AND TRIDENT MODERNIZATION	93,097	90,897	-2,200
Historical underexecution		-2,200	
128 SHIPBOARD AVIATION SYSTEMS	9,593	11,593	2,000
Program increase - fleet strike group aviation management		2,000	
129 COMBAT INFORMATION CENTER CONVERSION	12,718	11,718	-1,000
Historical underexecution		-1,000	
130 AIR AND MISSILE DEFENSE RADAR (AMDR) SYSTEM	78,319	62,005	-16,314
Hardware production and sustainment early to need		-16,314	
134 SHIP CONTRACT DESIGN/LIVE FIRE T&E	51,853	56,263	4,410
Historical underexecution		-2,590	
Program increase - DDG-51 advanced degaussing mine protection system		7,000	
136 MINE DEVELOPMENT	92,607	83,505	-9,102
Historical underexecution		-1,700	
Encapsulate effector program delays		-7,402	
137 LIGHTWEIGHT TORPEDO DEVELOPMENT	146,012	124,250	-21,762
Advanced anti-submarine lightweight torpedo program delays		-21,762	
139 SYSTEMS - ENG DEV	33,784	23,744	-10,040
Increment II program delays		-10,040	
PERSONNEL, TRAINING, SIMULATION, AND HUMAN			
140 FACTORS	8,599	7,269	-1,330
Historical underexecution		-1,330	
141 JOINT STANDOFF WEAPON SYSTEMS	73,744	62,744	-11,000
LRASM funds - Navy requested transfer to line 93		-11,000	
142 SHIP SELF DEFENSE (DETECT & CONTROL)	157,490	153,095	-4,395
Historical underexecution		-4,395	

R-1	Budget Request	Committee Recommended	Change from Request
143 SHIP SELF DEFENSE (ENGAGE: HARD KILL) Project 0173 excess new starts	121,761	94,961 -26,800	-26,800
144 SHIP SELF DEFENSE (ENGAGE: SOFT KILL/EW) Project 3316 decoy development effort government engineering previously funded SEWIP block 3 government engineering previously funded	89,373	81,902 -3,349 -4,122	-7,471
145 INTELLIGENCE ENGINEERING Non-kinetic countermeasures support contract delays	15,716	11,422 -4,294	-4,294
146 MEDICAL DEVELOPMENT Program increase - wound care research Program increase - military dental research Program increase - autonomous aerial technology for distributed logistics Program increase - ETEC enteric disease research	2,120	39,620 10,000 10,000 7,500 10,000	37,500
152 INFORMATION TECHNOLOGY DEVELOPMENT Historical underexecution NMMES-TR contract delays NMMES-TR excess support growth Program increase - cyber solutions for aviation systems and facilities Program increase - cyber innovations in classified environments	356,173	340,431 -12,972 -6,308 -6,462 7,000 3,000	-15,742
153 ANTI-TAMPER TECHNOLOGY SUPPORT Historical underexecution	7,810	6,978 -832	-832
155 MISSION PLANNING STORM unjustified growth	86,134	82,980 -3,154	-3,154
157 SHIP TO SHORE CONNECTOR (SSC) Program increase - naval hovercraft propulsion applications	5,155	12,655 7,500	7,500
159 UNMANNED CARRIER AVIATION Air segment ESA excess to need	266,970	256,970 -10,000	-10,000
161 MULTI-MISSION MARITIME AIRCRAFT (MMA) Program increase - small business technology insertion	24,424	29,424 5,000	5,000
MARINE CORPS ASSAULT VEHICLES SYSTEM 163 DEVELOPMENT AND DEMO Historical underexecution	41,775	31,235 -10,540	-10,540

R-1	Budget Request	Committee Recommended	Change from Request
165 DDG-1000	208,448	199,073	-9,375
Historical underexecution		-8,259	
Excess to need		-16,116	
Conventional prompt global strike initial integration efforts - transfer from line 91		15,000	
169 TACTICAL CRYPTOLOGIC SYSTEMS	111,434	108,645	-2,789
Historical underexecution		-2,789	
170 CYBER OPERATIONS TECHNOLOGY DEVELOPMENT	26,173	25,098	-1,075
Historical underexecution		-1,075	
173 MAJOR T&E INVESTMENT	85,195	105,195	20,000
Program increase - undersea range modernization		10,000	
Program increase - integrated sensor effectiveness test		10,000	
MANAGEMENT, TECHNICAL & INTERNATIONAL			
180 SUPPORT	94,297	104,297	10,000
Program increase - printed circuit board executive agent		10,000	
184 TEST AND EVALUATION SUPPORT	446,960	419,212	-27,748
Navy requested transfer to OM,N line BSM1		-27,748	
185 OPERATIONAL TEST AND EVALUATION CAPABILITY	27,241	25,207	-2,034
OPTEVFOR support funding realignment not properly accounted		-2,034	
190 WARFARE INNOVATION MANAGEMENT	37,022	33,171	-3,851
Historical underexecution		-3,851	
200 F-35 C2D2	379,549	388,249	8,700
Program increase - advanced countermeasure dispenser system for F-35B		8,700	
202 COOPERATIVE ENGAGEMENT CAPABILITY (CEC)	143,667	130,617	-13,050
Historical underexecution		-8,673	
CEC cyber resiliency excess growth		-2,577	
FIRECAP unjustified new start		-1,800	
204 STRATEGIC SUB & WEAPONS SYSTEM SUPPORT	173,056	129,260	-43,796

Classified adjustment		3,000	
UNDISTRIBUTED REDUCTION - EXCESS TO NEED		-213,435	-213,435

SMALL BUSINESS INNOVATION RESEARCH PROGRAM

The Small Business Innovation Research Program (SBIR) is designed to attract small technology companies to participate in federally sponsored research and development in order to enable advances in innovative technology disruption. Despite significant investment and acquisition preference for SBIR companies, there are few signs of creative disruptions. The failure of the Department of Defense to capitalize on SBIR investments and incorporate disruptive innovation is demonstrated by the repeated failure of the Navy to sufficiently resource the Automated Test and Retest (ATRT) program, which has produced transformative technology, including the ATRT/AEGIS Virtual Twin.

The Committee recommendation includes a total of \$34,797,000 for the ATRT program. Additionally, the Committee directs the Secretary of the Navy to adhere to SBIR law and use SBIR awardees to the greatest extent practicable, thus allowing and assisting SBIR awardees to commercialize technologies related to those developed under SBIR Phase I, II, and III awards.

UNDERGROUND FUEL STORAGE TANK RESEARCH

The Committee is concerned with the safety of underground fuel storage tanks commonly used on military installations by the Department of Defense. The Committee encourages the Secretary of the Navy to conduct additional research on the safety of underground fuel storage tanks to mitigate any risks to drinking water supplies for military bases and surrounding communities. Research areas should focus on advanced techniques for measuring and controlling corrosion; improved testing, inspection, repair, and maintenance of tanks; cost-effective secondary containment technology; and groundwater monitoring and modeling.

ADVANCED TACTICAL UNMANNED AIRCRAFT SYSTEM

The Committee is encouraged by the development of technologies to provide secure and resilient battlefield networking capability referred to as the Mobile Unmanned/Manned Distributed Lethality Airborne Network Joint Capability Technology Demonstration project. The Committee encourages the Secretary of the Navy to continue development and deployment of this technology to provide an affordable capability with existing operational Department of Defense systems.

INFRARED TELESCOPE TECHNOLOGY

The Committee recognizes the importance of infrared telescope technology for northern sky surveys in the short-wave infrared H and K bands, astrophysics observations, Earth orbital debris, and space traffic management research. The collection of critical stellar data supports future ground- and space-based defense systems. The Committee encourages the Secretary of the Navy to prioritize research for infrared telescope technology.

ANTI-CORROSION NANOTECHNOLOGY

The Committee remains concerned about the high costs associated with fixing corrosion on Department of Defense platforms. The

military, and in particular the Navy, face complex threats in the Indo-Pacific region that require military equipment and infrastructure to be resilient and have maximum operational availability. The Committee urges the Chief of Naval Research to pursue lightweight, nanotechnology-based materials and coatings that provide high corrosion resistance in order to decrease the cost of corrosion and increase operational availability of military equipment and infrastructure.

OCEAN ACOUSTICS

The Committee recognizes that changes to ocean environments and coastlines will create new security concerns and that the Navy requires further research in ocean acoustics to be prepared to operate successfully and to monitor the changing environment. The Committee encourages the Secretary of the Navy to work with academia to develop the ocean monitoring capabilities necessary to understand the rapidly changing ocean.

FOREIGN OBJECT DAMAGE

The Committee recognizes the harmful and expensive effects of Foreign Object Damage (FOD) on tactical aircraft in the Department of Defense and commends the Naval Air Systems Command for attempting to reduce the number of these incidents. The Committee supports an integrated, modular approach to addressing this issue and supports continued research on the integration of a sensor and camera agnostic architecture within the Naval Air Systems Command to determine the best solution for FOD detection and mitigation. The Committee directs the Secretary of the Navy to submit a report to the congressional defense committees not later than 90 days after the enactment of this Act on the number of incidents involving FOD in the last two years that have caused damage and the cost of fixing the damage; the process the Navy is taking to establish a FOD mitigation approach and architecture; and the cost avoidance associated with a comprehensive FOD mitigation architecture.

INTEGRATED POWER AND ENERGY SYSTEMS

The Committee recognizes that the Office of Naval Research is researching power and energy alternatives, including reviewing current ship design and de-risking of technologies for integrated power and energy systems to support future growth of electric pulse power demands of advanced electric mission loads. The Committee understands that as the Department of Defense moves towards a digital engineering paradigm, a research effort is required to make partner facilities compliant. It is vital to ensure facilities are upgraded to the classification standard they require. The Committee encourages the Secretary of the Navy to work with partner facilities to advance their integration into this new paradigm.

STERN TUBE SEALS

The Committee is aware of data indicating a higher than desired failure rate of stern tube seals on some classes of Navy ships. Many of these seals are failing prior to major maintenance inter-

vals when the ships are in dry dock for the scheduled replacement of such equipment. The premature failure of these seals while at sea can compromise the combat readiness of ships. The Committee encourages the Secretary of the Navy to partner with the appropriate shipyards and industry partners to design, prototype, and test new designs that are more durable, safe, and cost effective.

COASTAL ENVIRONMENTAL RESEARCH

The Committee understands the importance of the littoral region to Navy operations worldwide and believes that testing and training must replicate the operational and threat environments that submarines and unmanned systems are likely to encounter in these areas. The Committee believes that additional research of the magnetic, electric, and acoustic ambient fields in the littoral regions and the development of predictive techniques to distinguish ships and submarines from naturally occurring background features would be beneficial for littoral operations. The Committee encourages the Secretary of the Navy to conduct additional research in this area.

NAVY ALTERNATIVE ENERGY RESEARCH

The Committee recognizes the need for additional research by the Navy in its efforts to create a more robust energy infrastructure, to reduce the cost of energy, and to increase energy security, reliability, and resiliency at Department of the Navy facilities and on naval platforms. A broader range of experimentation, prototyping, and development is necessary for future naval capabilities related to powering maritime systems, at-sea persistent surveillance and communications systems, and unmanned undersea vehicle charging.

The Committee encourages the Secretary of the Navy to partner with universities, affiliated research facilities, and other federal agencies to conduct research on electrical power intermittency, integrating renewable energy sources into the grid, energy storage, improved micro-grids, local generation of zero-carbon fuels, marine hydrokinetic energy converters for autonomous systems, tactical energy solutions, and the inspection and structural health monitoring of critical energy infrastructure.

INTERFERENCE MITIGATION TECHNOLOGY TEST AND VERIFICATION

The Committee encourages the Secretary of the Navy to establish an independent verification and validation center that uses modular, open source hardware that allows new technology to be developed, tested, and fielded in a very rapid manner.

RESEARCH, DEVELOPMENT, TEST AND EVALUATION, AIR FORCE

Fiscal year 2020 appropriation	\$45,566,955,000
Fiscal year 2021 budget request	37,391,826,000
Committee recommendation	36,040,609,000
Change from budget request	- 1,351,217,000

The Committee recommends an appropriation of \$36,040,609,000 for Research, Development, Test and Evaluation, Air Force which will provide the following program in fiscal year 2021:

(DOLLARS IN THOUSANDS)

	BUDGET REQUEST	COMMITTEE RECOMMENDED	CHANGE FROM REQUEST	
RESEARCH, DEVELOPMENT, TEST & EVALUATION, AIR FORCE				
BASIC RESEARCH				
1	DEFENSE RESEARCH SCIENCES.....	315,348	325,348	+10,000
2	UNIVERSITY RESEARCH INITIATIVES.....	161,861	186,861	+25,000
3	HIGH ENERGY LASER RESEARCH INITIATIVES.....	15,085	15,085	---

PROGRAM ELEMENT CONSOLIDATION

The Air Force's fiscal year 2021 budget request for research, development, test and evaluation proposes to eliminate funding for 14 program elements within the budget activities for applied research and advanced technology development, and consolidate funding for multiple budget program activity codes totaling approximately \$955,000,000 into one existing and five new program elements.

The Committee understands that the intent of the Air Force proposal is to convert the existing geographically aligned budget structure into a more integrated format that better serves the Air Force's science and technology strategy. The Air Force believes this consolidation will increase the transparency of its research and development efforts and facilitate more coherent cross-domain solutions to problem sets. Additionally, the Air Force proposes to consolidate most funding for acquisition workforce civilian pay funded through this account into a single line by eliminating five program elements and partially reducing another. The Committee understands the intent of the Air Force and does not reject it outright, but the Committee finds that one effect of this consolidation would be the increased ability of the Department of Defense to realign funding among different activities without seeking prior congressional approval. The granting of additional budget flexibility to the Department is based on the presumption that a state of trust and comity exists between the legislative and executive branches regarding the proper use of appropriated funds. This presumption presently is false. Since the Department has repeatedly demonstrated its willingness to disregard congressionally mandated reprogramming procedures, the Committee cannot agree to provide the additional budget flexibility the Air Force requested. The recommendation therefore restores funding for these activities to the program elements and budget lines in which they were previously funded. The Committee is open to reconsidering this proposal once the Department's leadership recommits to honoring Congress's constitutional power of the purse.

HYPERSONICS PROTOTYPING

The Committee recommendation fully funds the Air Force's request of \$381,862,000 for hypersonics prototyping; however, the Committee continues to have concerns with the Air Force's repeated failure to adequately budget for this program. The Air Force received full funding for the fiscal year 2020 request of \$576,000,000 to continue two efforts: the air-launched rapid response weapon (ARRW) and the hypersonic conventional strike weapon (HCSW). The Committee noted in House Report 116-84 that HCSW had no programmed funding in fiscal year 2021 and thereafter. The Committee was notified by the Air Force at the time of the fiscal year 2021 budget submission that the HCSW effort would be terminated upon the conclusion of the critical design review. The Committee views this decision as a direct consequence of the Air Force's failure to properly budget for the continuation of the HCSW effort.

At the same time, the remaining ARRW effort has seen dramatic growth in cost estimates. A March 2018 non-advocate cost assess-

ment produced an estimate of \$854,700,000; the most recent estimate from March 2020 is \$1,364,000,000, a growth of nearly 60 percent. Entailed in this cost growth is a further increase to the previously known budget shortfall for ARRW in fiscal year 2020, which the Air Force intends to remedy by realigning \$146,700,000 from the HCSW effort.

The Committee understands that the cost growth in ARRW is attributable to cost elements that were not previously captured in earlier estimates, yet these estimates have been used to establish baselines for congressional reporting. The May 2019 “804 Triannual Report” submitted to the congressional defense committees by the Assistant Secretary of the Air Force (Acquisition, Technology and Logistics) used the March 2018 cost estimate as the baseline for the ARRW effort, and a ten percent growth from this baseline was established as a “guardrail” triggering congressional notification. Even though the Air Force produced an updated cost estimate of \$1,213,000,000 in March 2019, an increase of nearly 42 percent over the previously reported figure, the October 2019 “Triannual Report” simply substituted the new baseline for the prior one. The latest estimate from March 2020 is more than 12 percent above even this revised baseline. These facts call into question the value of existing reporting mechanisms for middle-tier acquisition (MTA) programs. Even though the ARRW program now appears to be fully funded in the fiscal year 2021 budget request, it still projects relatively smaller shortfalls in fiscal years 2022 and 2023.

The Committee increasingly finds that the Department-wide mantra of increasing speed and accepting greater risk in acquisition programs has not been matched by the necessary discipline when it comes to programming, budgeting, and transparency. The Government Accountability Office has found that most major MTA programs are planning for transition to another MTA or a more traditional major defense acquisition program. The Committee believes that the Air Force, and the Department in general, need to plan for success by ensuring that the proper resources are programmed. Otherwise, future decision makers will be forced into sub-optimal decisions for lack of resources, such as terminating an effort prematurely, abruptly cancelling or reducing other programs to find the necessary funds, or simply accepting “residual capability” of questionable long-term value. This has been acutely illustrated by the recent experience with the hypersonics prototyping program.

While the Committee recommendation fully funds the ARRW program, the Committee does not intend to approve funding for further cost increases for the section 804 effort beyond the March 2020 estimate, whether through future budget submissions or reprogramming requests. The Committee also strongly urges the Secretary of the Air Force to program funding for the transition of the ARRW effort to production beginning with the submission of the fiscal year 2022 request.

ADVANCED BATTLE MANAGEMENT SYSTEM

The budget request includes \$302,323,000 for the Advanced Battle Management System (ABMS). The requested funding is more

than double the comparable level for fiscal year 2020, and the Committee notes that this program is projected to grow to \$1,087,601,000 by 2024 in the current future years defense plan (FYDP). While the Committee acknowledges the need for a robust and agile “sensor-to-shooter” network to meet the challenges of future operating environments, and supports broad principles of the ABMS approach such as open architecture and the avoidance of “vendor lock,” the Committee currently lacks enough confidence in the Air Force’s structuring and execution of ABMS to support the rate of budget growth beginning with the fiscal year 2021 request.

The Committee notes several weaknesses within the current ABMS program that should be addressed before the Committee agrees to the budget growth for ABMS envisioned in the current FYDP. The Government Accountability Office (GAO) has identified several of these weaknesses, such as the absence of firm requirements, acquisition strategy, or cost estimate, as well as the unclear definition of responsibilities of the Chief Architect of the Air Force and other offices involved in executing the ABMS program. While the Air Force emphasizes that ABMS is being executed as a “non-traditional” acquisition program, this reinforces rather than reduces the need for discipline in what GAO refers to as the control environment. In addition, the Committee believes that the Air Force needs to articulate a strategy for transitioning technologies that are successfully developed by the ABMS program to existing weapon systems and other programs of record. It is unclear how the costs of fully integrating elements of the ABMS family of systems will be accounted for through their lifecycles across multiple programs without simply being handed down as unfunded mandates to individual program managers. Finally, the Committee is not confident that existing Air Force programs of record have been adequately reviewed to ensure that they are consistent with the Air Force’s vision for ABMS and its requirements, to the extent they are actually known.

The budget justification documentation for the fiscal year 2021 request poorly describes how the requested funds will be executed, but from additional information provided by the Air Force the Committee understands that the request includes approximately \$75,000,000 for “on ramp” exercises that are intended to demonstrate potential technologies and capabilities. The Air Force intends to conduct three such exercises in the fiscal year and sustain this pace indefinitely. The Committee cannot ascertain any specific requirement or other programmatic justification for conducting this number of exercises, nor does the Committee have adequate confidence in the cost estimate of \$25,000,000 per exercise. It is unclear if the ABMS program intends to limit the scope of exercises to the allocated funds, if other Air Force funds would be used to augment such exercises as necessary, or if other efforts within the ABMS program would be reduced in order to support the exercises if their actual costs exceed the budgeted amounts. The Committee therefore recommends a reduction of \$50,000,000 to the ABMS program and directs the Secretary of the Air Force to limit the total cost of “on ramp” exercises to no more than \$25,000,000 in fiscal year 2021.

MINORITY LEADERS PROGRAM

The Committee supports the Minority Leaders Program, which enables and enhances collaborative research partnerships between Historically Black Colleges and Universities, Hispanic Serving Institutions, and other Minority Serving Institutions and the Air Force Research Laboratory. A critical aspect of the program is to increase the core competencies of these institutions to make them more competitive with academia and industry within their fields. The Committee encourages the Secretary of the Air Force to execute the program in a manner that maximizes the funding and participation of these institutions and the students that they serve.

SKYBORG AND LOW-COST ATTRITABLE AIRCRAFT TECHNOLOGY

The Committee supports the Air Force’s Skyborg effort, which will develop and demonstrate an autonomy-focused suite of capabilities enabling the Air Force to produce and sustain effective combat mass using low-cost attritable aircraft technology (LCAAT) teamed with manned platforms. An additional \$100,000,000 for LCAAT was provided in the Department of Defense Appropriations Act, 2020 and accompanying language directed the Secretary of the Air Force to execute that funding according to the spend plan submitted in March 2020. The Committee recommendation includes an additional \$25,000,000 for the Skyborg program and associated LCAAT efforts. The Committee directs the Secretary of the Air Force to submit a spend plan to the congressional defense committees encompassing this additional funding, as well as funding for the Skyborg and LCAAT efforts included in the underlying fiscal year 2021 budget request, not later than 90 days after the enactment of this Act. The Committee encourages the Secretary of the Air Force to pursue further prototyping of LCAAT systems consistent with this spending plan and the Skyborg effort.

AFFORDABLE MULTI-FUNCTIONAL AEROSPACE COMPOSITES

The Committee recognizes that the development of scalable and affordable multi-functional aerospace composites and nanocomposite manufacturing have great potential to contribute to improved warfighter capabilities. The Committee encourages the Secretary of the Air Force to engage in partnerships with public universities to rapidly advance scalable manufacturing of multi-functional aerospace nanocomposites.

RESEARCH, DEVELOPMENT, TEST AND EVALUATION,
SPACE FORCE

Fiscal year 2020 appropriation	---
Fiscal year 2021 budget request	\$10,327,595,000
Committee recommendation	10,187,840,000
Change from budget request	- 139,755,000

The Committee recommends an appropriation of \$10,187,840,000 for Research, Development, Test and Evaluation, Space Force which will provide the following program in fiscal year 2021:

(DOLLARS IN THOUSANDS)

	BUDGET REQUEST	COMMITTEE RECOMMENDED	CHANGE FROM REQUEST

SPACE FORCE ORGANIZATION AND MANAGEMENT

The Committee believes the primary mission of the United States Space Force is to provide capabilities from space in support of all combatant commands, and views protecting and defending the assets operating in the space domain as a necessary, but derived, mission to assure space capabilities are available to support all combatant commands during conflict. The Committee views the Space Force investment priorities through this lens and expects the Space Force will devote more time, attention, and funding to critical support capabilities, particularly with the weather satellite program and future strategic satellite communications program.

The Committee, however, is most concerned that the Department of the Air Force has no Senate-confirmed senior civilian leader solely focused on space with authority over acquisition, budget, and long-term planning. The Committee believes this is a fundamental problem which must be addressed for the Space Force to succeed. Unlike the other Services, the Space Force budget is dominated by unique technology-driven investments and system acquisitions with research and development and procurement accounting for more than 80 percent of the Space Force budget, with only 16 percent for operations. A key challenge for the Space Force is addressing the slow pace of acquisition, accelerating the delivery of next-generation capabilities, and improving its systems engineering and programmatic discipline, particularly with respect to cost and schedule. The unique nature of space program management and systems engineering require dedicated civilian oversight and control for space programs. However, the Space Force does not yet have a dedicated Service Acquisition Executive to focus exclusively on these unique acquisition challenges. Therefore, the Committee strongly urges the Secretary of the Air Force to accelerate the transition of the Service Acquisition Executive authority to the Assistant Secretary of the Air Force for Space Acquisition and Integration and to seek a space acquisition professional to serve in this position. Further, the Committee recommendation includes \$15,000,000 for use by the Assistant Secretary of the Air Force for Space Acquisition and Integration for systems engineering and planning to ensure the integration of Space Force capabilities across the national security space enterprise and user community.

Finally, the Committee is aware that the Department intends to eventually transfer space elements of the Army, Navy, and defense agencies into the Space Force. The Committee is concerned about potential disruption and unintended consequences of such transfers, and cautions that it will not be supportive of such transfers without convincing justifications that they will not adversely impact the Army, Navy, and affected defense agencies, and that the transfers are necessary to improve national security. The Committee recommendation includes a general provision directing the Secretary of Defense to provide a certification to the House and Senate Appropriations Committees not less than 60 days before making such transfers.

NEXT GENERATION OVERHEAD PERSISTENT INFRARED

The Committee recommendation fully funds the budget request of \$2,318,864,000 for the Next-Generation Overhead Persistent Infrared (OPIR) program. The Committee appreciates that the fiscal year 2021 request provides sufficient funding to continue the planned program without relying on reprogramming requests as has been the case in recent years. However, the Committee continues to be concerned that the Space Force is not adequately planning and budgeting for the program over the next five years. The fiscal year 2021 budget request relies on significant realignments of funds to fix near-term budget shortfalls at the expense of increasing technical, schedule, and budget risk over the next five years, especially for the polar satellite and ground segments of the program. Further, the Committee is concerned that the decision to fund the ground segment to a level that will only deliver the minimum viable capability, with performance comparable to the legacy systems, raises questions about the return on the investments made in the Next-Generation OPIR Block 0 system and the soundness of the program plan. Therefore, the Committee directs the Director of Cost Assessment and Program Evaluation to provide the congressional defense committees, not later than 60 days after the enactment of this Act, with its most recent analyses and cost estimates for the program.

OVERHEAD PERSISTENT INFRARED ENTERPRISE ARCHITECTURE

The Department of Defense Appropriations Act, 2020 directed the Secretary of Defense to develop an integrated enterprise architecture to clearly articulate a realistic and affordable plan to meet the requirements for strategic and tactical missile warning, missile defense, battlespace awareness, and technical intelligence mission areas. The Committee reiterates its expectation that this plan will be delivered to the congressional defense committees by the September 2020 deadline.

NATIONAL SECURITY SPACE LAUNCH PROGRAM

The Committee supports the Space Force's National Security Space Launch (NSSL) program acquisition strategy and plan to award launch service procurement contracts to no more than two launch providers. This meets the statutory guidance for two launch providers for assured access to space, enables continued competition, and maximizes efficiency through economies of scale. The Committee is aware that transitioning from the legacy launch vehicles to new systems entails potential risks. Therefore, the Committee directs the Secretary of the Air Force to provide the congressional defense committees, not later than 60 days after the enactment of this Act, with a detailed transition plan on how the Space Force intends to manage program and mission risks over this transition period.

The Committee recommendation fully funds the budget request of \$560,978,000 for research, development, test, and evaluation, but notes that this assumes the maximum amount needed to continue funding the current launch service agreements and is subject to revision once the source selection is made.

The Committee recommendation provides \$933,271,000 for NSSL procurement, a reduction of \$109,900,000. The Committee is concerned with the cost of the NSSL procurements, which account for more than 40 percent of the Space Force procurement budget. The Committee is aware that the cost of launch services has dropped significantly in recent years as a result of increased competition from new entrants, yet the requested budget does not follow this downward trend, and remains stubbornly high, raising questions about the government’s cost to manage and oversee the program. The Committee believes commercial practices must remain the cornerstone of the launch program and should only incorporate mission assurance practices that improve it.

Furthermore, the Committee believes the level of detail provided in the budget justification materials for the NSSL program is lacking and needs an overhaul to provide greater consistency, clarity, and finer granularity to justify the costs of the program. Therefore, the Committee directs the Secretary of the Air Force to provide the congressional defense committees, not later than 90 days after the enactment of this Act, a plan to revamp the budget structure and improve the quality of justification materials in future budget submissions.

DIRECTED ENERGY RESEARCH COLLABORATION

The Committee supports the Department’s increased focus on the threats and challenges posed by directed energy systems, including directed energy microwaves and lasers. Given the large, skilled workforce needed in this critical area in the future, the Committee encourages the Secretary of Defense to increase collaboration with universities and defense laboratories focused on directed energy research, education, testing, and technology transfer.

RESEARCH, DEVELOPMENT, TEST AND EVALUATION,
DEFENSE-WIDE

Fiscal year 2020 appropriation	\$25,938,027,000
Fiscal year 2021 budget request	24,280,891,000
Committee recommendation	24,617,177,000
Change from budget request	+336,286,000

The Committee recommends an appropriation of \$24,617,177,000 for Research, Development, Test and Evaluation, Defense-Wide which will provide the following program in fiscal year 2021:

(DOLLARS IN THOUSANDS)

HYPERSONIC AND BALLISTIC TRACKING SPACE SENSOR

Hypersonic weapons pose a serious threat to national security, which makes detecting and tracking them a top priority of the Department of Defense. The Department of Defense Appropriations Act, 2020 included \$108,000,000 for the Missile Defense Agency (MDA) to begin development of the Hypersonic and Ballistic Missile Tracking Space Sensor (HBTSS) to meet the Department's requirements. However, the Committee does not support the funding and management approach proposed in the fiscal year 2021 budget request. The request does not include any funding for MDA to continue the development of the HBTSS sensor and proposes a token amount of funding for a HBTSS-derived sensor as a secondary priority in the Space Development Agency's (SDA) planned space tracking layer. While the Committee supports cooperation between MDA and SDA, the Committee disagrees with this proposed plan which prioritizes funding for SDA's other programs over HBTSS. Therefore, the Committee recommends a transfer of \$120,000,000 from SDA to MDA to develop and demonstrate on-orbit the HBTSS by the end of fiscal year 2022.

The Committee recognizes this funding transfer will have a significant impact on SDA's plans for its multi-layer constellation. The Committee supports SDA's aggressive approach to rapidly develop and demonstrate space capabilities and encourages SDA to focus the \$168,416,000 recommended in the bill to developing and demonstrating its proposed transport layer.

DISTRIBUTED LEDGER TECHNOLOGY RESEARCH AND DEVELOPMENT

The Committee is aware that distributed ledger technologies, such as blockchain, may have potentially useful applications for the Department of Defense, which include but are not limited to distributed computing, cybersecurity, logistics, and auditing. Therefore, the Committee encourages the Under Secretary of Defense (Research and Engineering) to consider research and development to explore the use of distributed ledger technologies for defense applications.

ARTIFICIAL INTELLIGENCE PARTNERSHIPS

The Committee is aware of the United States-Singapore partnership focusing on applying artificial intelligence in support of humanitarian assistance and disaster relief operations, which will help first responders better serve those in disaster zones. The Committee encourages the Secretary of Defense to pursue similar partnerships with additional partners in different regions, including the Middle East.

PFOS/PFOA REMEDIATION TECHNOLOGIES

The Committee remains concerned about the prevalence of PFOS/PFOA contamination on current and former domestic military installations and continues to support groundwater remediation activities undertaken by the Department. However, the Committee notes that current methods of PFOS/PFOA remediation are both costly and time consuming. As the Department continues PFOS/PFOA remediation activities, the Committee encourages the

Assistant Secretary of Defense (Energy, Installations, and Environment) to continue to explore innovative technological solutions for treating PFOS/PFOA contamination and to develop a competitive process for industry and academia to develop and utilize promising PFOS/PFOA remediation technologies to treat contaminated groundwater.

5G TELECOMMUNICATIONS TECHNOLOGY

The Committee is concerned about reports that foreign manufacturers are significantly ahead of United States companies in the development and deployment of 5G telecommunications technologies, which poses a national security risk to the United States and its allies. Without a robust domestic 5G supply chain, the United States will be vulnerable to 5G systems that facilitate cyber intrusion from hostile actors. In order to secure a reliable 5G system and a domestic supply chain that meets the national security needs of the United States and its allies, the Committee encourages the Secretary of Defense to accelerate engagement with domestic industry partners that are developing 5G systems.

Additionally, the Committee is aware of the significant investments being made in 5G efforts but is concerned with the level of detail provided for congressional oversight. The Committee directs the Under Secretary of Defense (Research and Engineering) to conduct quarterly execution briefings with the House and Senate Appropriations Committees beginning not later than 90 days after the enactment of this Act.

FULL-SCALE SPACE TEST FACILITIES

The Committee is aware that space systems provide critical capabilities essential to national security and that these systems face increasing threats from potential adversaries. The Committee understands that aggressive ground testing of space systems is crucial to gain confidence that new technologies will perform as expected before they are launched in space. However, the Committee is concerned that the nation lacks adequate space test infrastructure to meet its needs, especially facilities capable of performing full-scale system level tests.

The Committee directs the Under Secretary of Defense (Research and Engineering) to submit a report to the House and Senate Appropriations Committees not later than 120 days after the enactment of this Act that assesses the current state of existing federal, full-scale testing facilities, including those with electromagnetic interference test capability, and to provide options for investments to enhance capabilities and infrastructure necessary to meet projected needs.

CERAMIC-MATRIX COMPOSITES FOR HYPERSONICS

The Committee is encouraged by the potential of high and ultra-high temperature ceramic-matrix composites in extreme environments experienced during hypersonic flight. The Committee encourages the Under Secretary of Defense (Research and Engineering) to explore the value of these materials for Department of Defense hypersonic efforts.

GLOBAL FOOD SECURITY

The Committee encourages the Secretary of Defense, in cooperation with the Secretary of State and the Secretary of Agriculture, to conduct research to evaluate the risks and national security implications of foreign reliance and control of the United States and global food supply. The research should examine likely offensive threats and postures resulting in potential food supply disruptions, particularly in the context of great power competition, climate change, and pandemics. The research should establish methodologies and metrics to assess indications and warnings of food supply threats and recommend protocols to mitigate these threats.

CYBER EDUCATION COLLABORATIVES

The Committee remains concerned by widespread shortages in cybersecurity talent across both the public and private sector. In accordance with the recommendations of the Cyberspace Solarium Commission, the Committee encourages the Under Secretary of Defense (Research and Engineering) to direct cyber-oriented units to collaborate with local colleges and universities on research, fellowships, internships, and cooperative work experiences to expand cyber-oriented education opportunities and grow the cybersecurity workforce. The Committee also appreciates that veterans and transitioning servicemembers could serve as a valuable recruiting pool to fill gaps in the cybersecurity workforce. Accordingly, the Committee encourages the Under Secretary to prioritize collaboration with colleges and universities near military installations as well as the veteran population.

JOINT HYPERSONICS TRANSITION OFFICE

The Committee recommendation includes \$90,000,000 for the Joint Hypersonics Transition Office (JHTO) to fund applied and interdisciplinary research and workforce development to advance United States hypersonics capabilities. In fiscal year 2020, the Committee noted its concerns that the Department's expanding hypersonic research portfolio had the potential to develop proprietary systems that duplicate capabilities and increase costs. While the Committee is aware of efforts underway in the Department to develop the required integrated hypersonics science and technology roadmap and to establish a university consortium for hypersonics research and workforce development, the concerns with inefficient overlapping efforts expressed in the prior fiscal year remain. Therefore, the Committee strongly encourages the Under Secretary of Defense (Research and Engineering) to expeditiously implement the JHTO, and to seek involvement from all Department agencies and military Services with activities in hypersonics, consistent with the Inter-Service Memorandum of Agreement for Hypersonic Boost Glide Technology Development dated August 2019. The Committee believes this agreement represents the most mature approach for a common hypersonic glide body system. Additionally, the Committee has been disappointed in the timeliness and depth of the quarterly updates provided to the Committee, and expects that the Under Secretary of Defense (Research and Engineering) will ensure that future reports are timely and complete.

MOBILE MICROREACTOR STRATEGY

The Committee supports efforts by the Department of Defense to explore new methods of power production for use in operational needs, future weapon systems, force protection, asset protection, and humanitarian and disaster response. The Committee recommendation provides \$40,000,000 to support the development of a prototype mobile microreactor and \$10,000,000 to support the production of fuel for the prototype.

The Committee is concerned, however, that the Department has not established an executive agent to direct the microreactor program and has not secured fuel stocks. The Committee directs the Under Secretary of Defense (Research and Engineering) to submit a report to the congressional defense committees not later than thirty days after the enactment of this Act, on the Department's plans for the mobile microreactor program. The report shall address whether the Department has identified an executive agent for mobile energy; plans to include mobile energy solutions, such as microreactors, in force modernization initiatives; the strategy for deploying microreactors, including site identification processes, fielding, personnel training, and deployment timelines; the procurement strategy to acquire feed material for microreactors; the plan to identify and use existing authorities to provide appropriate indemnities; and the status of pilot programs for microreactors, including suitable locations for pilot activities.

HIGH ENERGY LASER ENDLESS MAGAZINES

The Committee notes the investments by the Department of Defense in directed energy systems capable of countering incoming threats, including the development of systems with endless or near endless magazines to ensure capability to counter salvos or swarms of any size.

However, the Committee is concerned that while the Department of Defense has included reference to near endless magazines in its budget justification for high energy laser systems, it has not adequately defined the term in order to facilitate predictable requirements development or guide internal investment. Therefore, the Committee directs the Secretary of the Defense to submit a report to the congressional defense committees not later than 180 days after the enactment of this Act, which details capabilities, cost, and logistical implications of endless or near endless magazines.

RAPID, ACCURATE, AND AFFORDABLE BIODETECTION SYSTEM

The Committee is encouraged by the progress of the Defense Threat Reduction Agency in developing a prototype sensor that enables real-time detection of aerosolized biological threat agents. The Committee encourages the Secretary of Defense to field these critical capabilities to Department of Defense facilities and operational commands. The Committee directs the Director of the Joint Program Executive Office for Chemical, Biological, Radiological and Nuclear Defense to provide a report to the congressional defense committees not later than 90 days after the enactment of this Act, which details efforts to fund, test, and field a reliable, cost-effec-

tive, near real-time detection/identification capability for aerosolized biological threats.

ACADEMIC HYPERSONIC RESEARCH, TEST AND EVALUATION FACILITIES

The Committee recognizes the importance of higher-education institutions in establishing high-quality test facilities and training the future workforce for the development and evaluation of hypersonic weapon platforms. The Committee encourages the Under Secretary of Defense (Research and Engineering) to partner with academia as key contributors in the research, testing and evaluation of hypersonic vehicle platforms.

ARTIFICIAL INTELLIGENCE COORDINATION

The Committee notes the widespread interest and large number of artificial intelligence projects and programs across all facets of the operations and activities of the Department of Defense. While the Committee understands that the Department believes artificial intelligence shows great promise to revolutionize and improve its operations, the Committee is concerned that there is a lack of coordination of the myriad ongoing artificial intelligence activities. Therefore, the Committee directs the Director of the Joint Artificial Intelligence Center to provide the congressional defense committees, not later than 60 days after the enactment of this Act, an inventory of all significant artificial intelligence activities in the Department, including, but not limited to, for each activity: the annual funding requested for the next five years; the source of funds identifying appropriation account, program, project, and line number; an identification of mission partners, including academia and industry; and the planned partner to whom the capability will be transitioned.

OPERATIONAL TEST AND EVALUATION, DEFENSE

Fiscal year 2020 appropriation	\$227,700,000
Fiscal year 2021 budget request	210,090,000
Committee recommendation	210,090,000
Change from budget request	---

The Committee recommends an appropriation of \$210,090,000 for Operational Test and Evaluation, Defense which will provide the following program in fiscal year 2021:

EXPLANATION OF PROJECT LEVEL ADJUSTMENTS

[In thousands of dollars]

DEFENSE WORKING CAPITAL FUND, DECA	1,146,660	1,146,660	0
TOTAL, DEFENSE WORKING CAPITAL FUNDS	1,348,910	1,348,910	0

ARSENAL SECURITY

The Committee believes that maintaining security, including threats from cyber-attacks, data piracy, and other technological risks, of Department of Defense arsenals is essential. The Committee directs that of the funds included under Industrial Operations, \$3,500,000 is to implement efforts to combat these types of threats.

DEFENSE COUNTERINTELLIGENCE AND SECURITY AGENCY WORKING
 CAPITAL FUND

The Committee recognizes the challenges facing the Defense Counterintelligence and Security Agency (DCSA) as it combines and assumes the roles and responsibilities of other Department of Defense and Office of Personnel Management offices and missions. While the creation of a dedicated DCSA Working Capital Fund (WCF) provides ample and necessary flexibility aimed at achieving efficiencies, the creation of such a function can also lead to mission creep—where activities not directly related to those originally intended for the WCF end up being funded with WCF receipts. The Committee believes that steps should be taken to avoid this unintended consequence and expects that obligations from the DCSA

WCF will only reimburse costs specifically associated with conducting background investigations.

The Committee directs the Under Secretary of Defense (Comptroller), in consultation with the Under Secretary of Defense (Intelligence and Security), to provide quarterly updates to the House and Senate Appropriations Committees, beginning not later than 30 days after the enactment of this Act, on the status of the DCSA WCF. These updates shall include appropriations (direct and reimbursable), obligations, and expenses by WCF line of business to and from the Fund. The first update shall also include the prior six months' historical monthly cash flow analysis by line item receipt and expense, and the first and subsequent updates shall include a prospective monthly cash flow analysis by line item receipt and expense updated on a quarterly basis.

TITLE VI
OTHER DEPARTMENT OF DEFENSE PROGRAMS
DEFENSE HEALTH PROGRAM

Fiscal year 2020 appropriation	\$34,074,119,000
Fiscal year 2021 budget request	32,690,372,000

REPROGRAMMING GUIDANCE FOR THE DEFENSE HEALTH PROGRAM
(INCLUDING BASE AND OVERSEAS CONTINGENCY OPERATIONS
FUNDING)

The Committee includes a provision which caps the funds available for Private Sector Care under the TRICARE program subject to prior approval reprogramming procedures. The provision and accompanying report language should not be interpreted as limiting the amount of funds that may be transferred to the In-House Care budget sub-activity from other budget sub-activities within the Defense Health Program. In addition, funding for the In-House Care budget sub-activity continues to be designated as a congressional special interest item. Any transfer of funds from the In-House Care budget sub-activity into the Private Sector Care budget sub-activity or any other budget sub-activity requires the Secretary of Defense to follow prior approval reprogramming procedures for operation and maintenance funds.

The Committee directs the Secretary of Defense to provide written notification to the congressional defense committees of cumulative transfers in excess of \$10,000,000 out of the Private Sector Care budget sub-activity not later than fifteen days after such a transfer. Furthermore, the Committee directs the Secretary of Defense to provide a report to the congressional defense committees not later than 30 days after the enactment of this Act that delineates transfers of funds, and the dates any transfers occurred, from the Private Sector Care budget sub-activity to any other budget sub-activity.

The Committee further directs the Assistant Secretary of Defense (Health Affairs) to provide quarterly reports to the congressional defense committees on budget execution data for all Defense Health Program budget activities and to adequately reflect changes to the budget activities requested by the Services in future budget submissions. These reports should also be provided to the Government Accountability Office.

CARRYOVER

For fiscal year 2021, the Committee recommends one percent carryover authority for the operation and maintenance account of the Defense Health Program. The Committee directs the Assistant Secretary of Defense (Health Affairs) to submit a detailed spending plan for any fiscal year 2020 designated carryover funds to the congressional defense committees not less than 30 days prior to executing the carryover funds.

PEER-REVIEWED CANCER RESEARCH PROGRAMS

The Committee recommends \$150,000,000 for the peer-reviewed breast cancer research program, \$110,000,000 for the peer-reviewed prostate cancer research program, \$35,000,000 for the peer-reviewed ovarian cancer research program, \$50,000,000 for the peer-reviewed kidney cancer research program, \$20,000,000 for the peer-reviewed lung cancer research program, \$10,000,000 for the peer-reviewed pancreatic cancer research program, \$7,500,000 for the peer-reviewed rare cancer research program, and \$110,000,000 for

the peer-reviewed cancer research program that would research cancers not addressed in the aforementioned programs currently executed by the Department of Defense.

The funds provided in the peer-reviewed cancer research program are directed to be used to conduct research in the following areas: cancers associated with the use of beryllium, bladder cancer, blood cancers, brain cancer, colorectal cancer, endometrial cancer, esophageal cancer, germ cell cancers, head and neck cancer, liver cancer, lymphoma, melanoma and other skin cancers, mesothelioma, metastatic cancers, neuroblastoma, pediatric brain tumors, sarcoma, stomach cancer, thyroid cancer, the link between scleroderma and cancer, and cancer in children, adolescents, and young adults. The inclusion of the individual rare cancer research program shall not prohibit the peer-reviewed cancer research program from funding the previously mentioned cancers or cancer subtypes that may be rare by definition.

The funds provided under the peer-reviewed cancer research program shall be used only for the purposes listed above. The Committee directs the Assistant Secretary of Defense (Health Affairs) to provide a report not later than 180 days after the enactment of this Act to the congressional defense committees on the status of the peer-reviewed cancer research program. For each research area, the report shall include the funding amount awarded, the progress of the research, and the relevance of the research to servicemembers and their families.

The Committee commends the Department of Defense for ensuring that projects funded through the various peer-reviewed cancer research programs maintain a focus on issues of significance to military populations and the warfighter. This includes promoting collaborative research proposals between Department of Defense researchers and non-military research institutions. These collaborations leverage the knowledge, infrastructure and access to clinical populations that the partners bring to the research effort. Additionally, promoting these collaborations provides a valuable recruitment and retention incentive for military medical and research personnel. The Committee encourages the Commanding General, United States Army Medical Research and Development Command, to continue to emphasize the importance of these collaborations between military and non-military researchers throughout the peer-review process.

JOINT WARFIGHTER MEDICAL RESEARCH PROGRAM

The Committee recommendation includes \$40,000,000 for the continuation of the joint warfighter medical research program. The funding shall be used to augment and accelerate high priority Department of Defense and Service medical requirements and to continue prior year initiatives that are close to achieving their objectives and yielding a benefit to military medicine. The funding shall not be used for new projects nor for basic research, and it shall be awarded at the discretion of the Secretary of Defense following a review of medical research and development gaps as well as unfinanced medical requirements of the Services. Further, the Committee directs the Assistant Secretary of Defense (Health Affairs) to submit a report not later than 180 days after the enact-

ment of this Act to the congressional defense committees that lists the projects that receive funding. The report should include the funding amount awarded to each project, a thorough description of each project's research, and the benefit the research will provide to the Department of Defense.

COMBAT READINESS MEDICAL RESEARCH PROGRAM

The Committee recommendation includes \$10,000,000 for the Combat Readiness Medical Research program. The program should focus on medical needs of the warfighter on the battlefield. Research should address the "golden hour" for servicemembers with life threatening injuries, battlefield diagnostics, and medical threats and treatments for warfighters deployed around the world.

The Committee expects the Assistant Secretary of Defense (Health Affairs) to identify current gaps in medical planning and resources, consider medical capabilities that may mitigate fatalities, enhance battlefield diagnostics, and find solutions for life threatening complications after battlefield injury.

The funding in the Combat Readiness Medical Research program should be used for research and development of rapidly deployable, all-in-one acute and chronic wound care therapy engineered to address complex trauma and start tissue regeneration; repairing or restoring damaged or missing genitourinary organs and tissue; freeze dried plasma and platelets; portable neurological devices in support of mild traumatic brain injury assessment; ruggedized oxygen generation systems; medical simulation technology; sleep disorders; Myalgic Encephalomyelitis/Chronic Fatigue Syndrome; preventing and relieving service-related arthritis; telemedicine; and infectious diseases.

Additionally, the Committee is concerned with the lack of standardization in the delivery of the Joint Trauma System Tactical Combat Casualty Care (TCCC) curriculum. The Committee directs the Director of the Defense Health Agency, in coordination with the Service Surgeons General, not later than 120 days after the enactment of this Act, to provide a briefing to the congressional defense committees on the coordination between the Defense Health Agency and the Services to ensure the curriculum is taught by qualified personnel; the plan to validate that TCCC training is standard across the Services; the impact of expanding TCCC on the Services' readiness training; and the funding requirements for the Services to support the delivery of the TCCC curriculum.

ELECTRONIC HEALTH RECORDS

The Committee continues to support the efforts that the Department of Defense and the Department of Veterans Affairs are undertaking with regard to electronic health records and the health record system. It is the Committee's ongoing expectation that the Departments' electronic health record systems must be completely and meaningfully interoperable with seamless compatibility.

The Committee acknowledges that the response to COVID-19 has superseded many planned efforts in the Military Health System, including the deployment of the Department of Defense's electronic health record system, MHS GENESIS. As sustainment continues at sites where MHS GENESIS is currently operating, delays

in future deployments are expected. Though the Department of Defense had been making strides in its deployment, with the shift in focus to COVID-19 response the Committee understands that there will be several factors that will contribute to the system being successfully implemented.

One factor is the need to improve informational technology and related infrastructure prior to deployment of the electronic health record system. The Committee directs the Secretary of Defense to provide a report to the congressional defense committees not later than 90 days after the enactment of this Act on the status of the installation of all remaining information technology and related infrastructure required to complete the deployment of the electronic health record system, including the timeline to complete installation, and costs associated if the Department accelerated the deployment timeline.

Another critical factor in the success of deployments will be the quality of training for users of the system. The Committee directs the Director, Operational Test and Evaluation to conduct an evaluation of change management strategies and training programs related to the deployment of MHS GENESIS and provide a briefing to the House and Senate Appropriations Subcommittees not later than 90 days after the enactment of this Act on related findings and recommendations for improvement.

The Committee continues to direct the Comptroller General to perform quarterly performance reviews of the Department of Defense electronic health record deployment so that the Committee can further monitor implementation of the system and whether it is meeting predicted costs.

Additionally, the Committee directs the Director of the Interagency Program Office (IPO) to continue to provide quarterly reports on the progress of interoperability between the two Departments to the House and Senate Defense Appropriations Subcommittees and the House and Senate Military Construction, Veterans Affairs, and Related Agencies Appropriations Subcommittees. The Program Executive Office (PEO) for Defense Healthcare Management Systems (DHMS), in conjunction with the Director of the IPO and the Director of the Defense Health Agency, is directed to provide quarterly reports to the congressional defense committees on the cost of the program, including indirect costs being funded outside of the DHMS Modernization Electronic Health Record program; and schedule of the program, to include milestones, knowledge points, and acquisition timelines, as well as quarterly obligation reports. The Committee directs the PEO DHMS to continue briefing the House and Senate Defense Appropriations Subcommittees on a quarterly basis, coinciding with the report submission.

MILITARY HEALTH SYSTEM TRANSFORMATION

The Committee remains concerned with the implementation of medical restructuring mandated by the National Defense Authorization Act for Fiscal Year 2017. The restructuring represents the most significant changes to the military health system in decades, and the Committee believes it is critical to implement the restructuring in such a way that minimizes risk for servicemembers and beneficiaries.

Prior to implementation, both medical readiness and healthcare benefits were intertwined, managed by the Service Surgeons General. Under that model, there was no separation between benefits and readiness, and the Services had a holistic picture in treating servicemembers and their families. The Committee has followed implementation efforts of the restructuring closely, to include management of the military treatment facilities transitioning from the Services to the Defense Health Agency; descoping military treatment facilities; and the Department's evaluation that fewer military medical providers in non-combat critical specialties may be required.

The impact of these changes on servicemembers and eligible beneficiaries is important. It is unclear whether readiness levels or healthcare benefits will be negatively affected. The future is uncertain due to COVID-19 and the Committee acknowledges the difficulty in predicting how beneficiaries' behaviors may change in the near or long term and also understands the challenges in assessing the impact on mental health and medical care professions in both the direct care and private sector care settings, as a result of the virus. Important questions remain about each aspect of the implementation, and the Committee is unsatisfied with the Department's inadequate responses to Committee inquiries.

Additionally, in order to start accounting for the funding and details related to medical readiness and healthcare benefits, Congress directed the Secretary of Defense, in coordination with the Service Secretaries and the Assistant Secretary of Defense (Health Affairs), to submit separate annual budget justification materials for readiness related care and healthcare benefits beginning with the fiscal year 2021 budget submission. In the fiscal year 2021 budget request, medical readiness was budgeted for in the Services' operation and maintenance accounts, while the operating budgets of the military treatment facilities and healthcare benefits were budgeted for in the Defense Health Program account. Separating medical readiness from the benefit was not seamless, and what was submitted was a Defense Health Program budget that transferred \$1,891,488,000 to Service medical readiness activities and the Services' operation and maintenance budgets that struggled to provide the level of detail that the Committee requires to evaluate these activities. Therefore, the Committee expects the fiscal year 2022 budget request submission to provide greater detail for medical readiness efforts, as detailed under the "Reporting on Medical Readiness" heading in this title of the report.

DESCOPING MILITARY TREATMENT FACILITIES

The Committee notes that the report required by section 703 of the National Defense Authorization Act for Fiscal Year 2017 was submitted to Congress on February 19, 2020. After a review of the military treatment facilities that met screening and evaluation criteria, 50 were identified for a change of scope, while an additional six await a final decision. In the majority of the 50 military treatment facilities, healthcare services would be reduced or eliminated, and, in many cases, non-servicemember beneficiaries would have to find new providers in the TRICARE network. The Committee questions several of the assumptions made about the quality and acces-

sibility of private sector care, the cost of changing the venue of care, and the relationship to other restructuring efforts, such as reducing the number of military medical billets. The Committee is also concerned with the Department's approach in responding to this provision, which was not a de-facto medical base realignment and closure process. Congress must be a partner in these decisions going forward.

The Committee directs the Assistant Secretary of Defense (Health Affairs), in coordination with the Director of the Defense Health Agency and the Service Surgeons General, to brief the congressional defense committees on the implementation plan prior to the obligation of funds in fiscal year 2021 to close or descope any military treatment facilities, including an update to the market analysis conducted, cost implications, timeline, impact on providers, and benefits or risks to the served population.

REDUCTION OF MILITARY BILLETS

The fiscal year 2020 budget request included a proposal to decrease medical billets for the Services to increase the number of operational billets needed for lethality. Reductions would have major ramifications throughout the military health system, yet leaders across the Department of Defense have been ill-prepared to articulate the consequences of these reductions.

In order to mitigate potential access to care issues caused by the reduction of military providers, the Department requested \$250,000,000 in the fiscal year 2020 budget that was not adequately justified, and therefore Congress did not appropriate the requested funds. Despite requests for additional information, the Committee still has not been provided with a detailed mitigation plan for beneficiary care or medical readiness. Serious questions remain about the quality and availability of care for beneficiaries, as well as the negative impact on readiness that may be caused by an unnecessary reduction of military medical providers. As a result, the Committee is disappointed that the fiscal year 2021 budget request includes an increase of \$334,613,000 with wholly insufficient detail to evaluate the request, and therefore denies the request.

Additionally, with lessons learned about the capacity and capability of both military and civilian medical care in the shadow of the novel coronavirus pandemic, the Committee expects the Secretary of Defense, the Service Secretaries, and the Service Surgeons General will reevaluate the military medical personnel required to respond to all operational requirements, including in support of the homeland defense mission. The Committee directs the Assistant Secretary of Defense (Health Affairs), in coordination with the Service Secretaries, the Chairman of the Joint Chiefs of Staff, and the Director of Cost Assessment and Program Evaluation to brief the congressional defense committees on the Department's reevaluation plan not later than 120 days after the enactment of this Act.

REPORTING ON MEDICAL READINESS

In the fiscal year 2021 budget request, military medical readiness funding and activities transferred from the Defense Health Program budget into the Services' operation and maintenance and

research, development, test and evaluation accounts. In the Department of Defense Appropriations Act, 2020, the Department was directed to provide separate budget justification for medical readiness and the healthcare benefit; it was not the intent of the Committee to lose the ability to locate and evaluate medical funding across the Department in a meaningful or detailed way.

The Committee notes its concern with the level of justification provided for the \$1,891,488,000 that transferred from the Defense Health Program to the Services' operation and maintenance accounts for medical readiness, and while the Committee is supportive of the military departments' ability to better manage and plan for readiness requirements holistically, the Services must provide adequate details for congressional oversight. Therefore, the Committee directs the Service Secretaries to account for medical readiness activities in financial management systems and to submit a quarterly report on the execution of medical readiness activities. The reports shall be consolidated and submitted with the Defense Health Program quarterly reports. Additionally, the Committee directs the Under Secretary of Defense (Comptroller), in coordination with the Service Secretaries, Assistant Secretary of Defense (Health Affairs), and the Director of the Defense Health Agency, to submit a comprehensive, consolidated, and detailed Unified Medical Budget exhibit with the Defense Health Program budget justification material for fiscal year 2022, and to provide a proposal for the exhibit to the House and Senate Appropriations Committees, not later than 90 days after the enactment of this Act.

METASTATIC CANCER RESEARCH

While recent research has revealed that there is a genetic basis for susceptibility to metastatic cancer or resistance to metastasis, more research is required to develop a comprehensive understanding of this complex process. Clinical trials are an important aspect of that progress, and diverse representation of patients in clinical trials is integral to the development of medications and therapies that effectively treat disease. Ethnicity, gender, age and genetics all play a role in the safety and efficacy of a treatment for an individual. Therefore, as recommended in April 2018 by the Task Force Report to Congress on Metastatic Cancer, the Committee encourages the Director, Congressionally Directed Medical Research Program to partner with outside experts and other federal agencies, as appropriate, to achieve representation of the demographics of the United States population in these trials.

PANCREATIC CANCER EARLY DETECTION

The Committee recommendation includes \$10,000,000 for pancreatic cancer research. Despite being the third leading cause of cancer-related death in the United States, early detection of pancreatic cancer requires additional research. The Committee encourages the Director, Congressionally Directed Medical Research Program, to expand early detection research for pancreatic cancer, to include the prevalence in pre-diabetic and diabetic individuals, as well as those in underserved ethnic and minority communities.

ALCOHOL AND SUBSTANCE USE DISORDERS

The Committee recognizes the ongoing threat posed to warfighters and the general public by the opioid epidemic. Those who may develop an opioid dependency following an injury generally struggle with addiction, or those servicemembers who have family members that struggle with addiction are often not positioned to dedicate themselves entirely to the required military mission. The Committee encourages the Assistant Secretary of Defense (Health Affairs) to prioritize congressionally directed medical research on substance use disorders aimed at reducing the overall number of opioid-related overdose deaths.

MAINTAINING A HIGHLY-SKILLED WORKFORCE IN MEDICAL RESEARCH

As the Administration implements a government-wide response to COVID-19, the disease caused by the novel coronavirus, the Committee encourages the Assistant Secretary of Defense (Health Affairs), the Director of the Defense Health Agency, and the Commander of Army Futures Command to prioritize maintaining a strong workforce of highly-skilled scientists and researchers vital to conducting the medical research necessary to protect warfighters and contribute to the nation-wide response to this and future pandemics.

SEXUAL ASSAULT AND POST-TRAUMATIC STRESS DISORDER

The Committee believes that providing servicemembers access to outpatient programs designed to treat individuals suffering from post-traumatic stress disorder (PTSD) resulting from sexual assault trauma could improve outcomes received for military sexual assault survivors experiencing PTSD. The Committee encourages the Assistant Secretary of Defense (Health Affairs) to collaborate with research institutions currently investigating treatment strategies for PTSD resulting from sexual trauma.

TRAUMATIC BRAIN INJURY

The Committee recognizes that traumatic brain injury (TBI), including mild-TBI and concussion, continues to be a significant health issue affecting servicemembers both in training and during combat operations. More than 402,000 brain injuries have occurred since the beginning of operations in Afghanistan and Iraq. Most recently, the attack at Ayn al Asad Air Base in Iraq impacted more than 109 servicemembers. While the Committee recommendation includes \$175,000,000 to continue research on traumatic brain injury and psychological health, the Committee believes additional efforts would help advance the understanding of TBI injuries sustained by servicemembers.

The Committee believes the Department should have better metrics and data on military personnel prior to the possibility of injury in training or combat. Therefore, the Committee directs the Assistant Secretary of Defense (Health Affairs), in coordination with the Director of the Defense Health Agency, and the Service Surgeons General, to develop a cost analysis plan for conducting uniform traumatic brain injury baseline testing for all new recruits across each military Service. The plan shall provide for a screening

program for any already-existing traumatic brain injuries which shall inform healthcare professionals should a servicemember be subject to any circumstances in the future that might result in a traumatic brain injury. The Committee directs the Assistant Secretary of Defense (Health Affairs) to submit a report on its plan to the congressional defense committees not later than 180 days after the enactment of this Act.

For injuries experienced during training or operations, the Committee is encouraged by research and development initiatives to advance expeditionary, non-invasive medical devices for analyzing the full spectrum of traumatic brain injuries that have received clearance by the Food and Drug Administration. Portable devices capable of rapidly providing a comprehensive and objective clinical picture should be fully utilized to effectively enable clinicians to identify the full spectrum of brain injuries immediately after injury. The Committee encourages the Assistant Secretary of Defense (Health Affairs) and the Service Surgeons General to deploy mild-TBI/concussion multi-modal diagnostic devices in support of both readiness and beneficiary care.

Additionally, the Committee recognizes efforts by the Department of Defense to leverage partnerships with academia and the private sector to understand and improve prevention and treatment of traumatic brain injuries for servicemembers and cadets at the United States military academies. The Committee encourages the Assistant Secretary of Defense (Health Affairs) to continue to leverage partnerships with academia and the private sector to support long-term studies of traumatic brain injuries to gain a deeper understanding of concussive injuries, including how they impact the brain, how and to what extent the brain recovers, and how prevention and treatment methods may be improved.

Lastly, the Committee is supportive of ongoing research examining the increased risk of certain conditions after an individual experiences TBI. The Committee is aware of research into the relationship between traumatic brain injury and neurodegenerative diseases, such as chronic traumatic encephalopathy and Parkinson's disease, and encourages the Assistant Secretary of Defense (Health Affairs) to continue to invest in research and development efforts aimed at halting the neurodegenerative processes that follow traumatic brain injury.

NATIONWIDE CANCER RESEARCH AT THE CANCER CENTER AT WALTER
REED NATIONAL MILITARY MEDICAL CENTER

The Committee commends the Assistant Secretary of Defense (Health Affairs) for continuing to support the John P. Murtha Cancer Center Research Program of the Uniformed Services University of the Health Sciences and at the Walter Reed National Military Medical Center in its partnership with the Oncology Research Information Exchange Network (ORIEN). This partnership enables the Murtha Cancer Center Research Program to collaborate with eighteen major academic cancer centers to improve outcomes for servicemembers with cancer. The ORIEN protocol is now being implemented at Walter Reed, with the potential to expand to other facilities in the military health system. The Committee encourages

the Assistant Secretary of Defense (Health Affairs) to support this program.

SLEEP DISORDERS

The Committee notes the leadership of the National Institute of Neurological Disorders and Stroke (NINDS) in advancing research into under-represented sleep disorders, such as narcolepsy and restless leg syndrome. The Committee encourages the Director of the Defense Health Agency to work with NINDS to bolster these activities and advance initiatives that advance scientific understanding of sleep disorders impacting servicemembers.

TRICARE PRIME AVAILABILITY

The Committee directs the Assistant Secretary of Defense (Health Affairs) to review the feasibility of TRICARE Prime being made available to eligible Department of Defense beneficiaries across all states and territories and to submit a report to the congressional defense committees not later than 90 days after the enactment of this Act.

MENTAL HEALTH PROFESSIONALS

The Committee remains concerned about the shortage of current and prospective mental health care professionals for servicemembers and their families, including social workers, clinical psychologists, and psychiatrists. The Committee directs the Assistant Secretary of Defense (Health Affairs), in coordination with the Service Surgeons General, to brief the House and Senate Appropriations Committees not later than 180 days after the enactment of this Act on an assessment of eligible beneficiaries' demand for behavioral health services, including services provided through telehealth, and funding required to adequately recruit and retain behavioral health professionals required to meet such demand. The assessment shall include a review of tools, such as pay grade increases, use of special and incentive pays, and the pipeline development of increasing the number of professionals in this field through scholarships or programs through the Uniformed Services University.

ARMED FORCES RETIREMENT HOMES AND THE DEFENSE HEALTH AGENCY

The Committee notes the important role that the military health system plays for the care of the military retiree population, especially those living in the two Armed Forces Retirement Homes. As the Defense Health Agency continues to make recommendations for the rescoping of certain military treatment facilities, the Committee encourages the Director of the Defense Health Agency to take necessary steps to ensure in-patient care is available at a military treatment facility within 20 miles of each Armed Forces Retirement Home.

OUTDOOR RECREATION FOR MILITARY FAMILIES

The Committee honors the service and sacrifice of military spouses and their children and recognizes the psychological and

emotional stress placed on families of servicemembers. Research shows children of military parents who have deployed are more likely than civilian peers to have a behavioral health diagnosis. It is a priority of the Committee to support the physical, emotional, and psychological health of military families. The Committee also recognizes the wellness and health benefits of organized outdoor recreation and education activities for the children of military parents.

PEER-REVIEWED TICKBORNE DISEASE RESEARCH

The Committee encourages the Director of the Congressionally Directed Medical Research Program to prioritize research on Lyme disease by including additional Lyme disease experts on its tickborne disease programmatic panel. Doctors and researchers with experience in chronic Lyme issues should be considered for inclusion on the panel and the scientific review panel to ensure the burden of Lyme disease is appropriately addressed.

BIOREPOSITORIES

The Committee is encouraged by efforts within the medical research community to better understand chronic diseases through biorepositories which store and catalogue medical tissue for scientific understanding. Collecting and cataloguing samples from a diverse population allows the medical community to perform research into health disparities in those populations. The Committee encourages the Assistant Secretary of Defense (Health Affairs) to adequately resource efforts to increase the number of samples collected from a diverse population.

GLOBAL HEALTH SECURITY PREPAREDNESS

The Committee continues to support Department of Defense contributions to biosecurity and the global health security agenda. The Department possesses unique capabilities that contribute to inter-agency efforts to prevent, detect, and respond to outbreaks of infectious disease worldwide. Response to global public health threats such as pandemic influenza, Ebola, and COVID-19 requires a robust national approach across all federal agencies and private partners. The Committee directs the Secretary of Defense to brief the House and Senate Appropriations Committees, not later than 120 days after the enactment of this Act, on the Department's efforts to collaborate with federal agencies and private partners to ensure the United States is prepared to respond to the next infectious disease outbreak.

SERVICEMEMBERS AND VETERANS WITH AMYOTROPHIC LATERAL SCLEROSIS

The Committee directs the Assistant Secretary of Defense (Health Affairs), in coordination with the Secretary of the Department of Veterans Affairs, to submit a report to the House and Senate Appropriations Committees not later than 90 days after the enactment of this Act on the costs to each Department to treat servicemembers and veterans with Amyotrophic Lateral Sclerosis.

TRAUMATIC INJURY

The Committee understands the uniqueness of traumatic injuries and neurological diseases sustained by servicemembers in combat. Extramural research focused on accelerating functional recovery and rehabilitation of sensorimotor function that is also personalized to the needs of the patient would have value to injured servicemembers and their caregivers. The Committee is aware of the promising technology of wirelessly activated implantable biomedical technologies capable of focal stimulation inside nerves and encourages the Assistant Secretary of Defense (Health Affairs) to explore research into such technologies to offset the effects of limb amputation, orthopedic injury and disease, and other neurodegenerative diseases.

NATIONAL DISASTER MEDICAL SYSTEM PILOT

The Committee is concerned with the fracturing of the military health system and its primary focus of readiness and survivability of servicemembers in combat operations. While this fundamental cornerstone of defense health is undisputed, the Committee is concerned that not enough attention has been placed on medical capabilities and capacity required for the homeland defense mission.

Section 740 of the National Defense Authorization Act for Fiscal Year 2020 authorized a pilot program on civilian and military partnerships to enhance interoperability and medical surge capability and capacity of the National Disaster Medical System (NDMS). The Committee recommendation includes additional funds in fiscal year 2021 to accelerate this pilot program, and directs that the first location selected for inclusion in the pilot program is underway not later than 180 days after the enactment of this Act. The Committee directs the Secretary of Defense to work collaboratively with members of the NDMS and selected private partners to accelerate the planning and execution of the pilot programs. Funds provided shall support the work of the agencies in the NDMS and include an allocation to private partners to assure they can move quickly to achieve the determined goals of Section 740.

The Committee directs the Secretary of Defense to submit a report to the congressional defense committees not later than 180 days after the enactment of this Act on a description of the pilot program, including partnerships established and evaluation metrics. The report shall also include a threat assessment of the most likely homeland defense scenarios requiring medical surge capability and capacity; an evaluation of departmental resources that are most likely to be required in response, and projected shortages of equipment, supplies, or personnel; how the NDMS could be better leveraged in future emergencies; current and projected medical surge plans; and a detailed cost estimate for the Department to plan, prepare for or respond to the most likely emergencies requiring medical surge capability and capacity. The Committee further expects the fiscal year 2022 budget submission to include sufficient funding for the pilot program.

**CHEMICAL AGENTS AND MUNITIONS DESTRUCTION,
DEFENSE**

Fiscal year 2020 appropriation	\$985,499,000
Fiscal year 2021 budget request	889,500,000
Committee recommendation	889,500,000
Change from budget request	-----

The Committee recommends an appropriation of \$889,500,000 for Chemical Agents and Munitions Destruction, Defense which will provide the following program in fiscal year 2021:

EXPLANATION OF PROJECT LEVEL ADJUSTMENTS

[In thousands of dollars]

	Budget Request	Committee Recommended	Change from Request
OPERATION AND MAINTENANCE	106,691	106,691	0
PROCUREMENT	616	616	0
RESEARCH, DEVELOPMENT, TEST AND EVALUATION	782,193	782,193	0
TOTAL, CHEMICAL AGENTS AND MUNITIONS DESTRUCTION, DEFENSE ..	889,500	889,500	0

**DRUG-INTERDICTION AND COUNTER DRUG ACTIVITIES,
DEFENSE**

Fiscal year 2020 appropriation	\$893,059,000
Fiscal year 2021 budget request	769,629,000
Committee recommendation	746,223,000
Change from budget request	- 23,406,000

The Committee recommends an appropriation of \$746,223,000 for Drug Interdiction and Counter-Drug Activities, Defense which will provide the following program in fiscal year 2021:

EXPLANATION OF PROJECT LEVEL ADJUSTMENTS

[In thousands of dollars]

	Budget Request	Committee Recommended	Change from Request
COUNTER-NARCOTICS SUPPORT	546,203	421,029	- 125,174
Transfer to National Guard Counter-Drug Program		- 31,768	
Transfer to International Security Cooperation Programs		- 26,006	
Program decrease—no continuation of projects reduced in fiscal year 2020 for southwest border barrier construction		- 47,400	
Program decrease—southwest border barrier construction		- 20,000	
DRUG DEMAND REDUCTION PROGRAM	123,704	123,704	0
NATIONAL GUARD COUNTER-DRUG PROGRAM	94,211	195,979	101,768
Transfer from Counter-Narcotics Support		31,768	
Program increase		70,000	
NATIONAL GUARD COUNTER-DRUG SCHOOLS	5,511	5,511	0
TOTAL, DRUG INTERDICTION AND COUNTER-DRUG ACTIVITIES, DEFENSE	769,629	746,223	- 23,406

DRUG INTERDICTION AND COUNTER-DRUG ACTIVITIES

The Committee recommendation includes \$421,029,000 for Counter-Narcotics Support, which supports the counter-narcotics activities of United States Northern Command and United States Southern Command, including the Joint Interagency Task Force South. The Committee also supports the provision of intelligence,

surveillance, and reconnaissance assets to these combatant commands to support their counter-drug operations.

The Committee recommendation transfers \$31,768,000 from Counter-Narcotics Support to the National Guard Counter-Drug Program. The Committee recommendation also transfers \$26,006,000 requested for international programs under Counter-Narcotics Support to International Security Cooperation Programs managed by the Defense Security Cooperation Agency to build the capacity of countries in the Northern Command and Southern Command areas of responsibility to counter illicit drug trafficking. The budget request for fiscal year 2022 should request funding for these programs in a manner similar to the Committee recommendation for this fiscal year.

The Committee is concerned with the misrepresentation by the Department of Defense regarding the purposes for which funds were requested under this heading in fiscal year 2020. The Department of Defense has reallocated \$47,400,000 from Counter-Narcotics Support for activities that were neither requested by the Department nor appropriated by Congress, namely to fund southwest border barrier construction. Such actions deny the Committee its constitutional and oversight responsibilities and the Committee recommendation for fiscal year 2021 does not continue funding programs that were reduced as a result of the Department's actions.

The Committee is also concerned with the proper management of funds appropriated under this heading. The Committee understands that the Department of Defense delayed transfers from this account to other appropriations for months while estimates for border construction were being developed. In lieu of the intended source, other appropriations were used to implement programs normally funded under this heading. The Committee expects the Secretary of Defense to ensure that funding provided under this heading is properly managed and executed in a timely manner.

The Committee recommendation does not include the \$20,000,000 requested in fiscal year 2021 for southwest border barrier construction, and section 8134 prohibits funds in this Act from being used for that purpose. Moreover, section 8135 of the Act returns any unobligated funds, which were transferred by the Department of Defense on February 13, 2020 for southwest border barrier construction, to their original accounts to be used for the original purposes for which they were appropriated by Congress.

The Committee recognizes the important role of the National Guard Counter-Drug program in assisting local and state agencies in addressing national drug-related challenges. The Committee encourages the administrators of the National Guard Counter-Drug program to continue their coordination with communities, regions, and other organizations to help alleviate the national drug problem. The Committee notes the recommendations contained in Government Accountability Office report 19-27 and encourages the Chief of the National Guard Bureau to issue guidance on the operation and administration of the National Guard Counterdrug Program in order to improve program performance.

OFFICE OF THE INSPECTOR GENERAL

Fiscal year 2020 appropriation	\$363,499,000
Fiscal year 2021 budget request	371,439,000
Committee recommendation	387,696,000
Change from budget request	+16,257,000

The Committee recommends an appropriation of \$387,696,000 for the Office of the Inspector General which will provide the following program in fiscal year 2021:

EXPLANATION OF PROJECT LEVEL ADJUSTMENTS

[In thousands of dollars]

	Budget Request	Committee Recommended	Change from Request
OPERATION AND MAINTENANCE	369,483	385,740	16,257
Program increase—oversight of PL 116–136 funding		16,257	
PROCUREMENT	858	858	0
RESEARCH, DEVELOPMENT, TEST AND EVALUATION	1,098	1,098	0
TOTAL, OFFICE OF THE INSPECTOR GENERAL	371,439	387,696	16,257

TITLE VII

RELATED AGENCIES

NATIONAL AND MILITARY INTELLIGENCE PROGRAMS

The National Intelligence Program and the Military Intelligence Program budgets funded in this Act consist primarily of resources for the Director of National Intelligence, including the Intelligence Community Management staff, the Central Intelligence Agency (CIA), the Defense Intelligence Agency, the National Reconnaissance Office, the National Security Agency, the National Geospatial-Intelligence Agency, the intelligence services of the Departments of the Army, Navy, and Air Force, and the CIA Retirement and Disability fund.

CLASSIFIED ANNEX

Adjustments to classified programs are addressed in a separate, detailed, and comprehensive classified annex. The Intelligence Community, the Department of Defense, and other organizations are expected to fully comply with the recommendations and directions in the classified annex accompanying the Department of Defense Appropriations Act, 2021.

CENTRAL INTELLIGENCE AGENCY RETIREMENT AND
DISABILITY SYSTEM FUND

Fiscal year 2020 appropriation	\$514,000,000
Fiscal year 2021 budget request	514,000,000
Committee recommendation	514,000,000
Change from budget request	---

The Committee recommends an appropriation of \$514,000,000 for the Central Intelligence Agency Retirement and Disability System Fund. This is a mandatory account.

This appropriation provides payments of benefits to qualified beneficiaries in accordance with the Central Intelligence Agency Retirement Act of 1964 for Certain Employees (P.L. 88-643), as amended by Public Law 94-522. This statute authorized the establishment of the CIA Retirement and Disability System for certain employees and authorized the establishment and maintenance of a fund from which benefits would be paid to those beneficiaries.

INTELLIGENCE COMMUNITY MANAGEMENT ACCOUNT

Fiscal year 2020 appropriation	\$556,000,000
Fiscal year 2021 budget request	663,000,000
Committee recommendation	619,728,000
Change from budget request	-43,272,000

The Committee recommends an appropriation of \$619,728,000 for the Intelligence Community Management Account.

TITLE VIII

GENERAL PROVISIONS

Title VIII of the accompanying bill includes 139 general provisions. A brief description of each provision follows.

Section 8001 provides that no funds made available in this Act may be used for publicity or propaganda purposes not authorized by Congress.

Section 8002 provides for conditions and limitations on the payment of compensation to, or employment of, foreign nationals.

Section 8003 provides that no funds made available in this Act may be obligated beyond the end of the fiscal year unless expressly provided for a greater period of availability elsewhere in the Act.

Section 8004 limits the obligation of certain funds provided in this Act during the last two months of the fiscal year.

Section 8005 has been amended and provides for the general transfer authority of funds to other military functions.

Section 8006 provides that the tables titled "Explanation of Project Level Adjustments" in the Committee report and classified annex shall be carried out in the manner provided by the tables to the same extent as if the tables were included in the text of this Act.

Section 8007 has been amended and provides for the establishment of a baseline for application of reprogramming and transfer authorities for the current fiscal year.

Section 8008 provides for limitations on the use of transfer authority of working capital fund cash balances.

Section 8009 provides that none of the funds appropriated in this Act may be used to initiate a special access program without prior notification to the congressional defense committees.

Section 8010 provides limitations and conditions on the use of funds made available in this Act to initiate multiyear procurement contracts.

Section 8011 has been amended and provides for the use and obligation of funds for humanitarian and civic assistance costs.

Section 8012 has been amended and provides that civilian personnel of the Department of Defense may not be managed on the basis of end strength or be subject to end strength limitations.

Section 8013 prohibits funding from being used to influence congressional action on any matters pending before the Congress.

Section 8014 prohibits compensation from being paid to any member of the Army who is participating as a full-time student and who receives benefits from the Education Benefits Fund when time spent as a full-time student is counted toward that member's service commitment.

Section 8015 provides for the transfer of funds appropriated in title III of this Act for the Department of Defense Pilot Mentor-Protege Program.

Section 8016 has been amended and provides for the Department of Defense to purchase anchor and mooring chains manufactured only in the United States.

Section 8017 provides that no funds made available in this Act shall be used for the support of any non-appropriated funds activity of the Department of Defense that procures malt beverages and wine except under certain conditions.

Section 8018 prohibits funds made available to the Department of Defense from being used to demilitarize or dispose of certain surplus firearms and small arms ammunition or ammunition components.

Section 8019 provides a limitation on funds being used for the relocation of any Department of Defense entity into or within the National Capital Region.

Section 8020 has been amended and provides for incentive payments authorized by section 504 of the Indian Financing Act of 1974 (25 U.S.C. 1544).

Section 8021 provides that no funding for the Defense Media Activity may be used for national or international political or psychological activities.

Section 8022 provides for the obligation of funds for purposes specified in section 2350j(c) of title 10, United States Code, in anticipation of receipt of contributions from the Government of Kuwait.

Section 8023 is new and requires notification of the receipt of contributions from foreign governments.

Section 8024 has been amended and provides funding for the Civil Air Patrol Corporation.

Section 8025 has been amended and prohibits funding from being used to establish new Department of Defense Federally Funded Research and Development Centers (FFRDC), with certain limitations, and increases funding provided for FFRDCs.

Section 8026 provides for the Department of Defense to procure carbon, alloy, or armor steel plate melted and rolled only in the United States and Canada.

Section 8027 defines the congressional defense committees as the Armed Services Committees of the House and Senate and the Subcommittees on Defense of the House and Senate Appropriations Committees.

Section 8028 provides for competitions between private firms and Department of Defense depot maintenance activities.

Section 8029 has been amended and provides for the revocation of blanket waivers of the Buy American Act.

Section 8030 provides for the availability of funds contained in the Department of Defense Overseas Military Facility Investment Recovery Account.

Section 8031 provides for the conveyance, without consideration, of relocatable housing units that are excess to the needs of the Air Force.

Section 8032 provides authority to use operation and maintenance appropriations to purchase items having an investment item unit cost of not more than \$250,000.

Section 8033 has been amended and provides authority to use operation and maintenance appropriations for the Asia Pacific Regional Initiative Program.

Section 8034 prohibits the sale of tobacco products in military resale outlets below the most competitive price in the local community.

Section 8035 has been amended and prohibits the use of Working Capital Funds to purchase specified investment items.

Section 8036 has been amended and provides that none of the funds appropriated for the Central Intelligence Agency shall remain available for obligation beyond the current fiscal year except for funds appropriated for the Reserve for Contingencies, the Working Capital Fund, or other programs as specified.

Section 8037 provides for the availability of funds for the mitigation of environmental impacts on Indian lands resulting from Department of Defense activities.

Section 8038 requires the Department of Defense to comply with the Buy American Act, chapter 83 of title 41, United States Code.

Section 8039 places certain limitations on the use of funds made available in this Act to establish field operating agencies.

Section 8040 places restrictions on converting to contractor performance an activity or function of the Department of Defense unless it meets certain guidelines provided.

(RESCISSIONS)

Section 8041 has been amended and provides for the rescission of \$2,491,100,000 from the following programs:

2019 Appropriations:	
Procurement of Weapons and Tracked Combat Vehicles, Army:	
Bradley program mods	\$14,250,000
Other Procurement, Army:	
Family of weapon sights	12,953,000

Section 8042 prohibits funds made available in this Act from being used to reduce authorized positions for military technicians (dual status) of the Army National Guard, Air National Guard, Army Reserve, and Air Force Reserve unless such reductions are a direct result of a reduction in military force structure.

Section 8043 has been amended and prohibits funding from being obligated or expended for assistance to the Democratic People's Republic of Korea unless specifically appropriated for that purpose.

Section 8044 provides for reimbursement to the National Guard and reserve when members of the National Guard and reserve provide intelligence or counterintelligence support to the combatant commands, defense agencies, and joint intelligence activities.

Section 8045 prohibits the transfer of Department of Defense and Central Intelligence Agencies drug interdiction and counter-drug activities funds to other agencies.

Section 8046 prohibits funding from being used for the procurement of ball and roller bearings other than those produced by a domestic source and of domestic origin.

Section 8047 has been amended and provides funding for Red Cross and United Services Organization grants.

Section 8048 prohibits funding from being used to purchase supercomputers which are not manufactured in the United States.

Section 8049 provides funds for the Small Business Innovation Research program and the Small Business Technology Transfer program.

Section 8050 prohibits funding from being used for contractor bonuses being paid due to business restructuring.

Section 8051 provides transfer authority for the pay of military personnel in connection with support and services for eligible organizations and activities outside the Department of Defense.

Section 8052 has been amended and provides for the Department of Defense to dispose of negative unliquidated or unexpended balances for expired or closed accounts.

Section 8053 provides conditions for the use of equipment of the National Guard Distance Learning Project on a space-available, reimbursable basis.

Section 8054 has been amended and provides funding for Sexual Assault Prevention and Response Programs.

Section 8055 has been amended and provides for the limitation on the use of funds appropriated in title IV to procure end-items for delivery to military forces for operational training, operational use or inventory requirements.

Section 8056 provides for a waiver of "Buy American" provisions for certain cooperative programs.

Section 8057 prohibits funding in this Act from being used for repairs or maintenance to military family housing units.

Section 8058 provides obligation authority for new starts for advanced concept technology demonstration projects only after notification to the congressional defense committees.

Section 8059 has been amended and provides that the Secretary of Defense shall provide a classified quarterly report on certain matters as directed in the classified annex accompanying this Act.

Section 8060 provides for the use of National Guard personnel to support ground-based elements of the National Ballistic Missile Defense System.

Section 8061 prohibits the use of funds made available in this Act to transfer to any nongovernmental entity ammunition held by the Department of Defense that has a center-fire cartridge and is

designated as “armor piercing” except for demilitarization purposes.

Section 8062 provides for a waiver by the Chief of the National Guard Bureau or his designee for all or part of consideration in cases of personal property leases of less than one year.

Section 8063 has been amended and provides for the transfer of funds made available in this Act under Operation and Maintenance, Army to other activities of the federal government for classified purposes.

Section 8064 has been amended and prohibits funding to separate, or to consolidate from within, the National Intelligence Program budget from the Department of Defense budget.

Section 8065 has been amended and provides grant authority for the construction and furnishing of additional Fisher Houses to meet the needs of military family members when confronted with the illness or hospitalization of an eligible military beneficiary.

Section 8066 provides for the transfer of funds made available in this Act under Operation and Maintenance, Navy to the John C. Stennis Center for Public Service Development Trust Fund.

Section 8067 has been amended and prohibits the modification of command and control relationships to give Fleet Forces Command operational and administrative control of United States Navy forces assigned to the Pacific fleet.

Section 8068 has been amended and requires notification for the rapid acquisition and deployment of supplies and associated support services.

Section 8069 has been amended and provides funding and transfer authority for the Israeli Cooperative Programs.

Section 8070 has been amended and provides for the funding of prior year shipbuilding cost increases.

Section 8071 has been amended and provides that funds made available in this Act for intelligence activities are deemed to be specifically authorized by Congress for purposes of section 504 of the National Security Act of 1947 until the enactment of the Intelligence Authorization Act for the current fiscal year.

Section 8072 has been amended and prohibits funding from being used to initiate a new start program without prior written notification.

Section 8073 has been amended and provides that the budget of the President for the subsequent fiscal year shall include separate budget justification documents for costs of the United States Armed Forces’ participation in contingency operations.

Section 8074 prohibits funding from being used for the research, development, test, evaluation, procurement, or deployment of nuclear armed interceptors of a missile defense system.

Section 8075 has been amended and makes funds available for transfer for the purposes of rapid acquisition and deployment of supplies and associated support services.

Section 8076 prohibits funding from being used to reduce or disestablish the operation of the 53rd Weather Reconnaissance Squadron of the Air Force Reserve.

Section 8077 prohibits funding from being used for the integration of foreign intelligence information unless the information has

been lawfully collected and processed during conduct of authorized foreign intelligence activities.

Section 8078 prohibits funding from being used to transfer program authority relating to current tactical unmanned aerial vehicles from the Army and requires the Army to retain responsibility for and operational control of the MQ-1C Unmanned Aerial Vehicle.

Section 8079 has been amended and limits the availability of funding provided for the Office of the Director of National Intelligence beyond the current fiscal year, except for funds appropriated for research and technology, which shall remain available for the current and the following fiscal years.

Section 8080 provides limitations on the Shipbuilding and Conversion, Navy appropriation.

Section 8081 has been amended and provides for the establishment of a baseline for application of reprogramming and transfer authorities for the Office of the Director of National Intelligence for the current fiscal year.

Section 8082 provides that certain support to friendly foreign countries be made in accordance with section 8005 or 9002 of this Act.

Section 8083 has been amended and places limitations on the reprogramming of funds from the Department of Defense Acquisition Workforce Development Account.

Section 8084 prohibits funding from being used in violation the Child Soldiers Prevention Act of 2008.

Section 8085 provides for limitations on funding provided for the National Intelligence Program to be available for obligation or expenditure through a reprogramming or transfer of funds in accordance with section 102A(d) of the National Security Act of 1947 (50 U.S.C. 3024(d)).

Section 8086 defines the congressional intelligence committees as being the Permanent Select Committee on Intelligence of the House, the Select Committee on Intelligence of the Senate, and the Subcommittees on Defense of the Committees on Appropriations of the House and Senate.

Section 8087 provides the authority to transfer funding from operation and maintenance accounts for the Army, Navy, and Air Force to the central fund for Fisher Houses and Suites.

Section 8088 has been amended and prohibits the use of funds for the purpose of making remittances to the Department of Defense Acquisition Workforce Development Account.

Section 8089 provides that any agency receiving funds made available in this Act shall post on a public website any report required to be submitted to Congress with certain exceptions.

Section 8090 prohibits the use of funds for federal contracts in excess of \$1,000,000 unless the contractor meets certain conditions.

Section 8091 has been amended and provides funds for transfer to the Joint Department of Defense—Department of Veterans Affairs Medical Facility Demonstration Fund.

Section 8092 prohibits the use of funds providing certain missile defense information to certain entities.

Section 8093 provides for the purchase of heavy and light armed vehicles for the physical security of personnel or for force protection purposes up to a limit of \$450,000 per vehicle.

Section 8094 has been amended and provides the Director of National Intelligence with general transfer authority with certain limitations.

Section 8095 prohibits funding from being used in contravention of the War Powers Resolution.

Section 8096 has been amended and prohibits funds from being used to enter into a contract, memorandum of understanding, or cooperative agreement with, make a grant to, or provide a loan or loan guarantee to Rosoboronexport, except under certain conditions.

Section 8097 prohibits the use of funds for the purchase or manufacture of a United States flag unless such flags are treated as covered items under section 2533a(b) of title 10, United States Code.

Section 8098 directs the Secretary of Defense to post grant awards on a public website in a searchable format.

Section 8099 places restrictions on transfer amounts available in the Rapid Prototyping Fund.

Section 8100 prohibits the use of funds by the National Security Agency targeting United States persons under authorities granted in the Foreign Intelligence Surveillance Act.

Section 8101 prohibits the transfer of administrative or budgetary resources to the jurisdiction of another Federal agency not financed by this Act without the express authorization of Congress.

Section 8102 has been amended and provides that operation and maintenance funds may be used for any purposes related to the National Defense Reserve Fleet.

Section 8103 prohibits the use of funds to provide counterterrorism support to foreign partners unless the congressional defense committees are notified accordingly.

Section 8104 prohibits the use of funds to award a new TAO Fleet Oiler or FFG Frigate program contract for the acquisition of certain components unless those components are manufactured in the United States.

Section 8105 has been amended and prohibits certain transfers from the Department of Defense Acquisition Workforce Development Account.

Section 8106 prohibits the use of funds for gaming or entertainment that involves nude entertainers.

Section 8107 prohibits the use of funding for information technology systems that do not have pornographic content filters.

Section 8108 has been amended and prohibits funds to deliver F-35 aircraft to the Republic of Turkey.

Section 8109 has been amended and places certain limitations on the transfer of funds for the Global Engagement Center.

Section 8110 has been amended and makes funds available through the Office of Economic Adjustment for transfer to the Secretary of Education, to make grants to construct, renovate, repair, or expand elementary and secondary public schools on military installations.

Section 8111 provides guidance on the implementation of the Policy for Assisted Reproductive Services for the Benefit of Seriously or Severely Ill/Injured Active Duty Service Members.

Section 8112 has been amended and places restrictions on the use of funding for military parades.

Section 8113 has been amended and provides for the use of funds to modify two F-35 Joint Strike Fighters per variant to a test configuration.

Section 8114 provides for funding available in the Defense Health Program for death gratuity payments.

Section 8115 prohibits funds in the Act from being used to enter into a contract or provide a loan to any corporation that has any unpaid Federal tax liability.

Section 8116 has been amended and provides that any advance billing for background investigation services and related services purchased from activities financed using the Defense Working Capital Fund shall be excluded from the calculation of cumulative advance billings.

Section 8117 has been amended and prohibits funds from being used to transfer the National Reconnaissance Office to the Space Force.

Section 8118 is new and requires the Secretary of Defense to make a certification prior to the transfer of any element to the Space Force.

Section 8119 is new and provides funds appropriated under military personnel may be used for expenses for members of the Space Force.

Section 8120 is new and requires the Director of the Defense Security Cooperation Agency to submit a spend plan.

Section 8121 has been amended and reduces funding due to favorable foreign exchange rates.

Section 8122 is new and reduces funding due to favorable fuel costs.

Section 8123 is new and prohibits funds from being used to exclude or implement the exclusion of the Department of Defense from cover under the Federal Service Labor Management Relations Statute.

Section 8124 is new and requires the Secretary of Defense to provide information and documents regarding the December 1981 massacre in El Mozote.

Section 8125 is new and provides funds for agile development, test and evaluation, procurement, production and modification, and the operation and maintenance for certain software pilot programs.

Section 8126 is new and requires the Secretary of Defense to report on deployed personnel by each geographic combatant command.

Section 8127 is new and requires the Secretary of Defense to provide notification before the deployment of security force assistance brigades.

Section 8128 is new and provides funds for the purposes of public healthcare professionals and public health laboratory staff, laboratory and medical equipment, and medical supplies.

Section 8129 is new and prohibits funds for the development and design of certain future naval ships unless any contract specifies

that all hull, mechanical, and electrical components are manufactured in the United States.

Section 8130 is new and prohibits funds for the decommissioning of any Littoral Combat Ships.

Section 8131 is new and requires the Secretary of Defense provide notification of deployments of armed forces to locations outside the United States.

Section 8132 is new and prohibits funding from being obligated or expended in a manner that does not comply with the requirements in section 365 of H.R. 7120 limiting the transfer of Department of Defense personal property to state or local law enforcement agencies.

Section 8133 is new and prohibits the use of funds to conduct, or prepare to conduct, any explosive nuclear weapons test that produces any yield. This section does not limit science-based stockpile stewardship activities consistent with the zero-yield standard or requirements under other provisions of law, such as sections 2523 and 2525 of title 50, United States Code.

Section 8134 is new and prohibits funds to construct a wall, fence, border barriers, or border security infrastructure along the southern land border of the United States.

Section 8135 is new and requires funds provided for the Department of Defense for fiscal year 2020 that were transferred by the Department and remain unobligated be returned to the original accounts.

Section 8136 is new and limits the use of active armed forces on the southern border unless the costs are reimbursed by the requesting agency.

Section 8137 is new and provides \$50,000,000 for a new program that will assist communities that surround military installations with excessive decibel noise caused by military aircraft.

Section 8138 is new and prohibits the use of funds to provide guidance on, review, prepare, approve, or recommend budget request funding levels or initiatives for the Department of Energy.

Section 8139 is new and provides funding for renaming Army installations, facilities, roads, and streets named after confederate leaders and officers.

TITLE IX
OVERSEAS CONTINGENCY OPERATIONS/GLOBAL WAR ON
TERRORISM

COMMITTEE RECOMMENDATION

In title IX, the Committee recommends additional appropriations totaling \$68,435,000,000 for overseas contingency operations/global war on terrorism pursuant to section 251(b)(2)(A)(ii) of the Balanced Budget and Emergency Deficit Control Act of 1985. A detailed review of the Committee recommendation for programs funded in this title is provided in the following pages.

REPORTING REQUIREMENTS

The Committee recommendation includes a number of reporting requirements related to overseas contingency operations and building capacity efforts. The Committee directs the Secretary of Defense to continue to report to the House and Senate Appropriations Committees the incremental costs for all named operations in the Central Command area of responsibility on a quarterly basis and to submit, also on a quarterly basis, commitment, obligation, and expenditure data for the Afghanistan Security Forces Fund and the Counter-Islamic State of Iraq and Syria Train and Equip Fund.

The Committee directs the Secretary of Defense to submit an updated report to the congressional defense committees not later than 60 days after the enactment of this Act on military actions being conducted pursuant to Public Law 107-40 and Public Law 107-243.

The Committee directs the Secretary of Defense to update the report required by House Report 115-769 under the heading "Report on U.S. Defense Assistance to Saudi Arabia and United Arab Emirates Coalition in Yemen" not later than 60 days after the enactment of this Act. Such report shall include an assessment of the current conflict and a detailed description of any United States assistance provided to or involvement with the operations of the coalition; a description of United States military, Department of Defense civilian employees, and defense contractor employees involved in such matters; and the specific legal authority under which such personnel are involved.

The Committee recognizes the strategic partnership between the United States and Iraq and supports efforts to normalize the security relationship after more than 17 years. Accordingly, the Committee directs the Secretary of Defense, in coordination with the Secretary of State, to undertake a comprehensive review and assessment of United States security assistance programs with Iraq, including the current management, personnel, funding, and goals associated with such assistance. The review shall examine the de-

livery and management of such assistance, including through Office of Security Cooperation-Iraq. The results of the review and assessment along with recommendations shall be submitted in a report to the congressional defense committees not later than 60 days after the enactment of this Act.

The Committee expects the Secretary of Defense to comply with section 1090 of Public Law 114-328 regarding the cost of wars in Afghanistan, Iraq, and Syria, and to post this information on the Department's public website in a timely manner.

OVERSEAS CONTINGENCY OPERATIONS JUSTIFICATION DOCUMENTS

The Committee is concerned with the lack of detailed information provided in the budget justification documents associated with programs and activities supported by overseas contingency operations (OCO) funding. Such documents do not accurately depict how funds will be obligated and expended. Moreover, different operations within combatant commands are often combined and described as named operations, when they should be requested separately. The Committee rejects the notion that if the overall level for the sub-activity group remains level from one year into the next, that funding changes between named operations do not require further justification or budget documentation. All changes within sub-activity groups should be justified.

The Committee directs the Secretary of Defense and the Service Secretaries to include in the fiscal year budget 2022 request for OCO funding a breakout for each named operation, including a comparison of funds for such operations for the previous two fiscal years; the number of personnel associated with such funds; and a description of the direct war, enduring, or base funding being requested. Such information should be included in unclassified form but may be accompanied by a classified annex to the budget submission. The Secretary of Defense is also directed to consult with the House and Senate Appropriations Committees not later than 30 days after the enactment of this Act and prior to the submission of the budget request.

MILITARY PERSONNEL

The Committee recommends an additional appropriation of \$4,602,593,000 for Military Personnel. The Committee recommendation for each military personnel account is as follows:

EXPLANATION OF PROJECT LEVEL ADJUSTMENTS

GUANTANAMO BAY DETENTION FACILITY

The Committee is concerned with the extraordinary costs associated with the Guantanamo Bay detention facility, which amounts to millions of dollars annually per detainee, and encourages a focus on reducing such costs in a responsible manner. The Committee directs the Secretary of Defense to submit a report to the House and Senate Appropriations Committees not later than 60 days after the enactment of this Act on the current number of detainees; their legal status; a description of all Department Defense costs associated with the facility during the last two fiscal years and planned for fiscal year 2021, by program, account, and activity; and recommendations to reduce such costs over the next three fiscal years. The Committee directs that the fiscal year 2022 budget request include a similar description of such costs and any associated cost savings measures planned for that fiscal year.

COMMANDERS' EMERGENCY RESPONSE PROGRAM

The Committee recommendation provides that not more than \$2,000,000 under Operation and Maintenance, Army may be used for the Commanders' Emergency Response Program. The Committee believes that after nearly two decades the time has come to wind down this program. The Committee directs the Secretary of Defense to transition program activities to the Afghanistan Security Forces and other agencies of the United States government, as appropriate, and to phase out this program during fiscal year 2021.

EFFORTS TO MINIMIZE CIVILIAN CASUALTIES

The Committee supports efforts by the Department of Defense to minimize civilian casualties and fully funds the request for resources to improve tracking of civilian casualties.

EX GRATIA PAYMENTS

The Committee recommendation includes sufficient funding for the Office of the Secretary of Defense under Operation and Maintenance, Defense-Wide, for payments made to redress injury and loss pursuant to section 1213 of the National Defense Authorization Act for Fiscal Year 2020.

AFGHANISTAN SECURITY FORCES FUND

The Committee recommendation includes \$3,047,612,000 for the Afghanistan Security Forces Fund and notes the significant unobligated balances from prior year appropriations.

The Committee recognizes the sacrifices made by the members of the Afghanistan Security Forces and the recommendation provides the support necessary for such forces to continue to defend their country. The Committee notes the gains made in Afghanistan and the significant investments made by the United States and coalition partners in the Afghanistan Security Forces over nearly two decades.

The Committee supports efforts to bring peace to Afghanistan but notes the considerable uncertainty associated with the conflict, including the current level of violence and with respect to intra-Afghan negotiations. Irrespective of the outcome of these efforts, the

Committee believes that certain conditions must be in place for United States assistance under this heading to continue. Accordingly, the Committee recommendation provides that funds appropriated under this heading for the Afghanistan Security Forces may only be obligated if the Secretary of Defense, in consultation with the Secretary of State, certifies in writing to the congressional defense committees that such forces are controlled by a civilian, representative government that is protecting human rights and women's rights and preventing terrorists and terrorist groups from using the territory of Afghanistan to threaten the security of the United States and United States allies.

The Committee recommendation does not include funding for major capital projects, major upgrades, or the procurement of new systems, including the procurement of ten CH-47 helicopters. The recommendation also includes modified language prohibiting funds for the transfer of additional C-130 cargo aircraft to the Afghanistan National Security Forces or the Afghanistan Air Force.

The Committee recommendation includes funding for Afghanistan security personnel at their current levels, rather than authorized levels. The recommendation fully funds the request for the Afghanistan Personnel and Pay System and provides funding only for personnel who are enrolled in the system. The Committee also supports the use of identification cards, biometrics, and other measures to prevent fraud. The Committee directs the Secretary of Defense to submit a report to the congressional defense committees not later than 90 days after the enactment of this Act on efforts to reduce corruption in the Afghanistan Security Forces, including through programs and technologies supported under this heading.

The Committee recommendation provides not less than \$20,000,000 for the recruitment and retention of women in the Afghanistan National Security Forces, and the recruitment and training of female security personnel, which is twice the amount specified in the Department of Defense Appropriations Act, 2020. The Committee directs the Secretary of Defense to submit a report to the congressional defense committees not later than 45 days after the enactment of this Act describing the proposed use of such funds, including programmatic details, personnel targets, and other goals and objectives to be achieved with this funding.

The Committee recommendation includes funding for items to reduce Afghanistan Security Forces casualties, including equipment for explosive ordnance disposal and to counter improvised explosive devices.

The Committee supports the efforts of the Combined Security Transition Command-Afghanistan to transition costs of items such as fuel from the United States to the Government of Afghanistan. The Committee recommendation assumes the transition of additional items, including funding requested for civilian pay for the Ministry of Defense not funded during fiscal year 2020; funding for sustainment/general operations not funded during fiscal year 2020; and a portion of funding for facilities sustainment, restoration, and modernization.

The Committee remains interested in the details of the conditions-based withdrawal of United States and coalition forces from Afghanistan. Not later than 30 days after the enactment of this Act

and quarterly thereafter, the Committee directs the Secretary of Defense, in coordination with the Director of National Intelligence, to submit a report to the congressional defense committees on United States coalition personnel in Afghanistan and the current conditions of the conflict, including metrics related to the peace agreement and an assessment of whether the Taliban is adhering to its commitments under the agreement.

The Committee recommendation continues language prohibiting funds for any member of the Taliban except to support a reconciliation activity that includes the participation of members of the Government of Afghanistan, does not restrict the participation of women, and is authorized by section 1218 of the National Defense Authorization Act for Fiscal Year 2020.

The Committee is concerned about reports that Russian military intelligence units secretly offered bounties to Taliban-linked militants for killing United States and coalition forces in Afghanistan. The Committee directs the Secretary of Defense, in coordination with the Director of National Intelligence, to submit an assessment and report to the congressional defense committees not later than 30 days after the enactment of this Act, on Russia's malign activities in Afghanistan, including activities specifically directed against United States and coalition forces in Afghanistan; any damage done by such activities; and measures taken or planned by the Administration in response.

The Committee notes the recent statements made by the Administration to reduce funding previously appropriated by Congress for Afghanistan due to the political situation in that country. The Committee is not aware of any specific statutory authority that would allow the withholding of funding provided under this heading for such purposes. The Committee notes the January 2020 decision by the Government Accountability Office regarding the withholding of funds in violation of the Impoundment Control Act.

COUNTER-ISIS TRAIN AND EQUIP FUND

The Committee recommendation includes \$700,000,000 for the Counter-ISIS Train and Equip Fund. The Committee notes the significant unobligated balances from prior appropriations and the disruption of programs due to the COVID-19 pandemic.

The Committee recognizes the gains made by the Global Coalition to Defeat the Islamic State of Iraq and Syria (ISIS) to liberate the territory once controlled by that terrorist organization. Nevertheless, the Committee is concerned by the continued threat of ISIS and the potential for ISIS to regenerate. The Committee recommendation continues support under this heading for the Iraqi Security Forces, Kurdish Peshmerga, and the Syrian Democratic Forces to participate in activities to counter ISIS. The Committee recommendation also continues the requirement that the Secretary of Defense ensure that elements are appropriately vetted and have made commitments to promote respect for human rights and the rule of law.

The Committee recommendation continues enhanced notification and reporting requirements for funds provided under this heading, including the requirement for the Secretary of Defense to notify the congressional defense committees not fewer than 15 days prior to

obligating funds. The Committee directs that such notifications include a description of the amount, type, and purpose of assistance to be funded and the recipient of the assistance; the budget and implementation timeline, with milestones and anticipated delivery schedule for such assistance; and a description of any material misuse of such assistance since the last notification was submitted, along with a description of any remedies taken by the Department of Defense. The first notification submitted for funds provided under this heading shall also include an explanation of how such funds will build security force capabilities, professionalize partner security forces, provide wide-area security, and promote long-term stability in the region.

The Committee recommendation includes \$500,000,000 to counter ISIS in Iraq, including support for units of the Iraqi Security Forces directly engaged in such efforts. The Committee recommendation also supports the Kurdish Peshmerga. In conjunction with the central government of Iraq, the Department of Defense should continue to provide the Peshmerga with the security capabilities necessary to help secure territory liberated from ISIS and to counter ISIS threats. Such support should include training, equipment, and operational support tailored to conditions on the ground. The Committee also notes that continued insecurity in northern Iraq has hindered the return of religious minorities and encourages a focus on programs that will increase security in these areas.

The Committee recommendation includes \$200,000,000 to counter ISIS in Syria, including support for units of the Syrian Democratic Forces directly engaged in such efforts.

The Committee directs the Secretary of Defense to submit a report to the congressional defense committees not later than 90 days after the enactment of this Act on measures taken to minimize civilian casualties and mitigate any negative impacts on the civilian population from the defeat ISIS campaign, including through training programs supported under this heading.

The Committee notes that the mission of the Combined Joint Task Force Operation Inherent Resolve is to work by, with, and through regional partners to militarily defeat ISIS, not to guard oil fields. The Committee recommendation includes modified language in section 9007 prohibiting funds to exercise United States control over any oil resource of Iraq or Syria.

The Committee recommendation continues the authority for the Secretary of Defense to provide infrastructure repair and renovation, and construction for facility fortification and humane treatment. The recommendation also allows the Secretary to accept and retain contributions from foreign governments and requires the Secretary to prioritize such contributions when providing any assistance for construction for facility fortification. The Committee directs that any congressional notification submitted for facility fortification include detailed information on the scope of proposed projects and information on contributions from partner nations, which should reflect no less than \$3 for every \$1 from the United States. The Committee directs the Secretary of Defense to consult with the House and Senate Appropriations Committees prior to submitting a notification for such projects.

PROCUREMENT

The Committee recommends an additional appropriation of \$6,473,543,000 for Procurement. The Committee recommendation for each procurement account is as follows:

NATIONAL GUARD AND RESERVE EQUIPMENT ACCOUNT

The Committee recommends \$1,000,000,000 for the National Guard and Reserve Equipment Account. Of that amount, \$300,000,000 is for the Army National Guard; \$300,000,000 is for the Air National Guard; \$160,000,000 is for the Army Reserve; \$65,000,000 is for the Navy Reserve; \$15,000,000 is for the Marine Corps Reserve; and \$160,000,000 is for the Air Force Reserve to meet urgent equipment needs in the coming fiscal year.

This funding will allow the National Guard and reserve components to procure high priority equipment used by these components for both their military missions and missions in support of State governors. The funding within this account is not to be used to procure equipment designated as high-density critical equipment, major weapon systems, aircraft, and other equipment central to a unit's ability to perform its doctrinal mission. The funding within this account is not to be used to procure equipment purchased by the senior Service, to expand or accelerate current Service procurement plans, to purchase expendable items, or to purchase facilities or equipment for any requirement able to be satisfied elsewhere.

The Committee directs the Secretary of Defense to ensure that the National Guard and Reserve Equipment Account is executed by the Chiefs of the National Guard and reserve components with priority consideration given to the following items: acoustic hailing devices; airborne and ground detect and avoid systems; containerized ice making systems; crash-worthy, ballistically tolerant auxiliary fuel systems; counter-UAS systems; gamma radiation protection; helmet-mounted display system; hypervisor-based cross domain access solution; modular small arms ranges and small arms training simulators and tools; radiological screening portals; training systems and simulators; and virtual language training systems.

RESEARCH, DEVELOPMENT, TEST AND EVALUATION

The Committee recommends an additional appropriation of \$321,508,000 for Research, Development, Test and Evaluation. The Committee recommendation for each research, development, test and evaluation account is as follows:

OFFICE OF THE INSPECTOR GENERAL

The Committee recommends an additional appropriation of \$24,069,000 for the Office of the Inspector General.

GENERAL PROVISIONS

Title IX of the accompanying bill includes 27 general provisions, many of which extend or modify war-related authorities included in previous Acts. A brief description of each provision follows:

Section 9001 has been amended and provides that funds made available in this title are in addition to funds appropriated or otherwise made available for the Department of Defense for fiscal year 2021.

Section 9002 has been amended and provides for general transfer authority within title IX.

Section 9003 provides that supervision and administration costs associated with a construction project funded with appropriations available for operation and maintenance or the Afghanistan Security Forces Fund may be obligated at the time a construction contract is awarded.

Section 9004 provides for the procurement of passenger motor vehicles and heavy and light armored vehicles for use by military and civilian employees of the Department of Defense in the United States Central Command area.

Section 9005 has been amended and provides funding for the Commanders' Emergency Response Program, with certain limitations.

Section 9006 provides lift and sustainment to coalition forces supporting military and stability operations in Iraq and Afghanistan.

Section 9007 has been amended and prohibits the establishment of permanent bases in Iraq or Afghanistan or United States control over Iraq or Syria oil resources.

Section 9008 prohibits the use of funding in contravention of the United Nations Convention Against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment.

Section 9009 limits the obligation of funding for the Afghanistan Security Forces Fund until certain conditions have been met.

Section 9010 provides for the purchase of items of a particular investment unit cost from funding made available for operation and maintenance.

Section 9011 provides security assistance to the Government of Jordan.

Section 9012 has been amended and prohibits the use of funding under certain headings to procure or transfer man-portable air defense systems.

Section 9013 has been amended and provides assistance to the military and national security forces of Ukraine.

Section 9014 provides replacement funds for items provided to the Government of Ukraine from the inventory of the United States.

Section 9015 prohibits the use of funds to provide arms, training, or other assistance to the Azov Battalion.

Section 9016 has been amended and provides for the transfer of excess equipment to foreign forces receiving equipment through the Counter-ISIS Train and Equip Fund.

Section 9017 has been amended and restricts funds provided for reimbursement to the Government of Pakistan for border security operations until certain conditions are met.

Section 9018 prohibits the use of funds with respect to Iraq in contravention of the War Powers Resolution.

Section 9019 prohibits the use of funds with respect to Syria in contravention of the War Powers Resolution.

Section 9020 has been amended and prohibits the transfer of additional C-130 cargo aircraft to the Afghanistan National Security Forces or Afghanistan Air Force.

Section 9021 has been amended and requires the Secretary of Defense to certify the use of funds in the Afghanistan Security Forces Fund under certain conditions.

Section 9022 has been amended and restricts funds provided in this Act for any member of the Taliban.

Section 9023 provides that nothing in this Act may be construed as authorizing the use of force against Iran.

Section 9024 is new and required the Secretary to provide a notification when a foreign base is open or closed.

Section 9025 has been amended and provides funds to the Department of Defense to improve near-term intelligence, surveillance, and reconnaissance capabilities.

(RESCISSIONS)

Section 9026 has been amended and provides for the rescission of \$1,446,400,000 from the following programs:

2019 Appropriations:	
Aircraft Procurement, Air Force:	
B-52 infrared threat defense UON	\$16,400,000
2020 Appropriations:	
Operation and Maintenance, Defense-Wide:	
Defense Security Cooperation Account	80,000,000
Afghanistan Security Forces Fund:	
Afghanistan Security Forces Fund	1,100,000,000
Counter-ISIS Train and Equip Fund:	
Counter-ISIS Train and Equip Fund	250,000,000

Section 9027 requires the President to designate overseas contingency operations/global war on terrorism funds.
