

Marlene Ellis MacEwan

Cancer Survivors Against Radon (CanSAR)

Since her husband Bob's death from radon-induced lung cancer as a non-smoker in 2004, MacEwan has become one of Oregon's most well-known radon awareness advocates. As Oregon Radon Coalition co-chair and CanSAR Treasurer, she testifies before congressional committees and works with the American Lung Association in Oregon and the American Association of Radon Scientist and Technologist (AARST) nationally to increase radon awareness and save lives.
