

## **Biography of Miles Keogh**

Miles Keogh is the Executive Director of the National Association of Clean Air Agencies (NACAA). NACAA is the national, non-partisan, non-profit association of air pollution control agencies in 40 states, the District of Columbia, four territories and 114 metropolitan areas. NACAA provides technical resources, training, expertise, support and community to agencies advancing clean air and protecting public health from air pollution. NACAA committees address issues including mobile sources, criteria pollutants, air toxics, greenhouse gases, permitting, monitoring and modeling, resilience, and sustainability, among others.

Miles previously started and directed the Research Lab at the National Association of Regulatory Utility Commissioners (NARUC), where he advised State Utility Commissions on regulatory design and on energy, environmental, and security issues for over a decade. He continues to participate on a number of advisory boards related to the power system.

Prior to joining NARUC in 2005, Miles worked in the wind power industry and sited power infrastructure for the Massachusetts Public Utility Commission. He also spent five years as an ambulance driver and medic in Washington, DC. He received a Bachelor's degree in International Relations from Georgetown University and a Master's degree in Environmental Management from the University of Cape Town, South Africa.
