Andrew R. Morral

Senior Behavioral Scientist

RAND Corporation

Andrew R. Morral is a senior behavioral scientist at the RAND Corporation and leader of Gun Policy in America, a RAND initiative to understand the effects of gun policies. His research expertise includes program evaluation, modeling and simulation, survey research, and performance measurement. He has developed innovative techniques for examining drug use epidemiology and survey response accuracy, and causal modeling software that is now in wide distribution. Morral has published dozens of peer-reviewed reports in leading scientific and policy journals and has served as a science advisor to the National Institute of Occupational Safety and Health, to the Department of Homeland Security's（DHS）Center for Risk and Economic Analysis of Terrorist Events, and to the DHS Chemical Facility Anti-Terrorism Standards program. He currently serves as the Director of the National Collaborative on Gun Violence Research, a private philanthropy that funds gun policy research.

Morral received his Ph.D. in psychology from the New School for Social Research.
