**AMENDMENT TO H.R. 4350**  
**OFFERED BY MS. CHENEY OF WYOMING**

Add at the appropriate place in title VII the following new section:

1 **SEC. 7 \_\_\_\_ . SENSE OF CONGRESS ON NATIONAL WARRIOR**

2 **CALL DAY.**

3 (a) FINDINGS.—Congress finds the following:

4 (1) Establishing an annual “National Warrior  
5 Call Day” will draw attention to those members of  
6 the Armed Forces whose connection to one another  
7 is key to our veterans and first responders who may  
8 be dangerously disconnected from family, friends,  
9 and support systems.

10 (2) The number of suicides of members of the  
11 Armed Forces serving on active duty increased to  
12 377 in 2020, a figure up from 348 the previous  
13 year.

14 (3) The epidemic of veteran suicide has steadily  
15 increased since 2014 with 6,435 veterans taking  
16 their own lives in 2018.

17 (4) After adjusting for sex and age, the rate of  
18 veteran suicide in 2018 was 27.5 per 100,000 indi-

1       viduals, higher than the rate among all United  
2       States adults at 18.3.

3           (5) More veterans have died by suicide in the  
4       last 10 years than members of the Armed Forces  
5       who died from combat in Vietnam.

6           (6) Roughly two-thirds of these veterans who  
7       take their own lives have had no contact with the  
8       Department of Veterans Affairs.

9           (7) The COVID-19 pandemic has only in-  
10      creased isolation and disconnection, further exacer-  
11      bating mental and physical ailments such as post-  
12      traumatic stress disorder and traumatic brain in-  
13      jury.

14          (8) The Centers for Disease Control and Pre-  
15      vention note that law enforcement officers and fire-  
16      fighters are more likely to die by suicide than in the  
17      line of duty, and emergency medical services pro-  
18      viders are 1.39 times more likely to die by suicide  
19      than members of the general public.

20          (9) Invisible wounds linked to an underlying  
21      and undiagnosed traumatic brain injury can mirror  
22      many mental health conditions, a problem that can  
23      be addressed through connections to members of the  
24      Armed Forces and veterans who can better identify  
25      and address these wounds.

1 (10) Urgent research is needed to highlight the  
2 connection between traumatic brain injury as a root  
3 cause of invisible wounds and suicide by members of  
4 the Armed Forces and veterans.

5 (b) SENSE OF CONGRESS.—It is the sense of Con-  
6 gress that Congress—

7 (1) supports the designation of a “National  
8 Warrior Call Day”;

9 (2) encourages all Americans, especially mem-  
10 bers of the Armed Forces serving on active duty and  
11 veterans, to call up a warrior, have an honest con-  
12 versation, and connect them with support, under-  
13 standing that making a warrior call could save a life;  
14 and

15 (3) implores all Americans to recommit them-  
16 selves to engaging with members of the Armed  
17 Forces through “National Warrior Call Day” and  
18 constructive efforts that result in solutions and  
19 treatment for the invisible scars they carry.

## **Amendment to H.R. 4350 National Defense Authorization Act for Fiscal Year 2022**

### **Offered by: Mr. Scott of Georgia**

In the appropriate place in the report to accompany H.R. 4350, insert the following new Directive Report Language:

#### **Use of Multi-role Contractor Own Contractor Operated Aircraft**

The committee understands that Combatant Commanders continue to manage air assets to maximize ability to meet mission requirements in their Area of Responsibility. It also understands those forces are composed of combination of organic and contractor personnel operating single-role and multi-role aircraft and that currently, all contractor owned contractor operated Intelligence Surveillance and Reconnaissance (ISR) aircraft are dedicated to ISR missions and contractor owned contractor operated Mobility/Casualty Evacuation aircraft are dedicated to mobility/casualty evacuation missions. As a result, there are missed opportunities for cross-over or economies of scale. The committee believes an increase in the use of multi-role assets could provide Combatant Commanders additional flexibility in executing day-to-day mission requirements. Any contractor-owned, contractor operated (COCO) solutions considered should be responsive to validated Joint Service gaps and should be incorporated into their Force Development processes. However, the committee is concerned about potential tasking and funding restrictions on the use of contractor owned multi-role capable aircraft and the ability to execute missions such as air mobility, medical and casualty evacuation and ISR.

Therefore, the committee directs the Secretary of Defense to provide the congressional defense committees a briefing, not later than June 1, 2022, on the Department of Defense's ability to utilize contractor owned contractor operated aircraft in a multi-use role. At a minimum, the briefing will include: challenges and opportunities associated with a single or fleet of contractor owned contractor operated aircraft equipped to carry out multiple functions and missions; cost associated with single-role vs multi-use contractor operated contractor owned aircraft; comparison of operational value associated with single-role vs multi-use contractor operated contractor owned aircraft; capability of swapping payloads in a timely manner to meet changing mission requirements; assessment of types of aircraft available to meet multi-role mission requirements; assessment of single role mission capabilities with similar mission capabilities on a multi-role aircraft; potential contracting challenges associated with executing multi-role missions using contractor operated contractor owned aircraft (i.e. air mobility, medical/casualty evacuation, ISR, etc.); mission prioritization and tasking constraints; and analysis that weighs the costs, benefits, and risks required to determine the expected impact on costs and on mission achievement; methods to ensure that multi-role aircraft that will transport service members are certified to the proper standard; processes for evaluating functions that could be categorized as inherently governmental or closely associated to governmental services.

**Enterprise Telecommunications Security**

The committee asserts that the military forces require a robust telecommunications infrastructure with built-in resilience and persistent risk mitigations measures. While the Department must develop enterprise-wide efforts, the regional combatant commands must also consider regionally specific considerations. These often include analyses of military-managed and commercially managed infrastructures. To understand these region-specific considerations devised by combatant commands, the committee directs the Chief Information Officer of the Department of Defense, in coordination with the combatant commands, to brief the committee no later than May 31, 2022 on the evolution of the Department's secure communications infrastructure. The committee further directs that the briefing should place greater emphasis on European Command and Indo-Pacific Command, in line with the National Defense Strategy. The briefing should specifically address how integration with U.S. hosted commercial capabilities could improve mission effectiveness, including considerations of reduced latency and increased fidelity through emerging technologies.

In the appropriate place in the report to accompany H.R. 4350, insert the following new text:

Defense Security Cooperation Agency briefing on lessons learned from the failure of the ANSF and partner forces with less capable security forces.

“The committee is concerned about the failure of the Afghan National Security Forces (ANSF) to sustain security operations after the withdrawal of American forces. The rapid failure of the ANSF raises questions about the Department’s ability to oversee security cooperation programs. After years of training, funding, and embedding with the ANSF, their mission failure raises serious concerns about how the United States trains and equips certain partner forces. Training less capable partner forces to fight with American technology and assets, to include multi-domain intelligence, ISR, close air support, and other sophisticated technology that is not present organically for host nations, may not achieve U.S. security cooperation objectives nor develop an enduring capability for partner nations. The committee directs the Secretary of Defense to provide a briefing to the House Committee on Armed Services no later than December 1, 2021, that includes how the agency plans to incorporate lessons learned from the failure of the ANSF; and how the agency trains other partner forces with less capable security forces.”

10 under subsection (a), the Secretary shall select for test  
11 and evaluation under the pilot program at least one exist-  
12 ing covered biobased solution.

**Military Wellness Programs**

Congress is aware of the significant challenges the Department faces regarding both the readiness and health of the force. The Committee commends the Department for placing a priority on and making a concerted investment in these matters.

A key aspect to this focus is the integration of human and technological factors to enhance traditional approaches to readiness. The explosive growth in membership to a military wellness community of interest should serve as an indicator that our soldiers, sailors, marines and airmen are reaching out for assistance at an alarming rate. The significant interest of programs like this give credence that proven, digital resources may provide a connection and community for members is in high demand.

Given the increasing costs associated with recruiting, training and sustaining the armed forces, Congress encourages the Department to continue their investment in existing technologies within the private and non-profit sectors that enhances their ability to analyze readiness data to better inform the decision-making process. Accordingly, the committee urges the Department to continue to resource these programs. The Committee also directs the Secretary of Defense to submit a report to the Committees of Armed Services of the Senate and the House of Representatives no later than February 1, 2022, on their plan to leverage existing digital solutions and capabilities to aid DoD efforts to improve and sustain force readiness.

**Amendment to H.R. 4350**  
**National Defense Authorization Act for Fiscal Year 2022**

**Offered by:**

**Mr. Gallagher of Wisconsin**

In the appropriate place in the report to accompany H.R. 4350, insert the following new Directive Report Language:

*Update on the Limitation of Funds to Institutions of Higher Education Hosting Confucius Institutes*

Section 1062 of the Fiscal Year 2021 (FY21) National Defense Authorization Act (NDAA) (PL 116-617) placed a limitation on the provision of Department of Defense funds to institutions of higher education that hosted Confucius Institutes, unless the Secretary of Defense, in consultation with the National Academies of Sciences, Engineering, and Medicine, determines a waiver is appropriate. Section 1299C of the same bill established an academic liaison in the Department responsible for working with the academic and research communities to protect Department-sponsored academic research of concern from undue foreign influence and threats. Section 1062 directed that academic liaison manage the waiver process on behalf of the Secretary, and that waivers may be granted to institutions of higher education that have taken steps to:

- (1) Protect academic freedom at the institution;
- (2) Prohibit the application of any foreign law on any campus of the institution;
- (3) Grant full managerial authority of the Confucius Institute to the institution, including full control over what is being taught, the activities carried out, the research grants that are made, and who is employed at the Confucius Institute; and
- (4) Engage with the Academic Liaison Officer in the Under Secretary of Defense for Research and Engineering, and take appropriate measures to safeguard defense-funded fundamental research activities.

The conferees directed that the Secretary brief the congressional defense committees on the establishment of the waiver process, including the institutions for which the waiver has been invoked. The committee is now aware that the majority of universities have closed or ended their agreements with Confucius Institutes, and that there are fewer than 20 universities with these contracts today.

Therefore, the Committee directs the Secretary to provide a briefing to the Committee on Armed Services of the House of Representatives, not later than March 1, 2022, on which of these universities that have obtained waivers from the Secretary and therefore still receive Department funding also host or coordinate Department programs such as the Reserve Officers' Training Corps or innovation programs including the National Security Innovation Network (NSIN).
