DIVISION A—DEPARTMENT OF DEFENSE AUTHORIZATIONS

TITLE III—OPERATION AND MAINTENANCE

LEGISLATIVE PROVISIONS

SUBTITLE B—ENERGY AND ENVIRONMENT

Section 311—Deadline for Submission of Reports on Proposed Budgets for Activities
Relating to Operational Energy Strategy

This section would modify amend section 138c(e) of title 10, United States Code, to revise the date of submission for the report on the proposed budgets for that fiscal year that were not certified.

Section 312—Facilitation of Interagency Cooperation in Conservation Programs of
the Department of Defense, Agriculture, and Interior to Avoid or Reduce Adverse
Impacts on Military Readiness Activities

This section would amend section 2684a of title 10, United States Code, to permit a recipient of funds under the Sikes Act to be able to use the funds for matching funds or cost-sharing requirements of conservation programs. This section would also expire the authority on October 1, 2019, but permit any agreements that were entered into prior to September 30, 2019 to continue according to its terms and conditions.

Section 313—Reauthorization of Sikes Act

This section would extend the authority of the Sikes Act through 2019.

Section 314—Cooperative Agreements Under Sikes Act for Land Management
Related to Department of Defense Readiness Activities

This section would amend section 103A of the Sikes Act, section 670c-1 of title 16, United States Code, to permit lump sum payment and accrual of interest used for the purposes of the original agreement. This section would also permit the cooperative agreements to be used to acquire property or services for the direct benefit or use of the United States Government, and sets limitations on agreements that are not on military installations. Finally, this section would also expire the authority on October 1, 2019, but permit any agreements that were entered into prior to September 30, 2019 to continue according to its terms and conditions.

Section 315—Exclusions from Definition of “Chemical Substance” under Toxic
Substances Control Act

This section would modify section 2602(2)(B) of title 15, United States Code, to add to the exclusions any component of any article including shot, bullets and other projectiles, propellants when manufactured for or used in such an article, and primers.

SUBTITLE C—LOGISTICS AND SUSTAINMENT

Section 316—Littoral Combat Ship Strategic Sustainment Plan

This section would direct the Secretary of the Navy to create a Strategic Sustainment Plan for the Littoral Combat Ship and submit this plan to the congressional defense committees not later than 120 days after the date of the enactment of this Act.

SUBTITLE D—REPORTS

Section 321—Additional Reporting Requirements Relating to Personnel and Unit Readiness

This section would amend the report required under section 482 of title 10, United States Code, to require the Secretary of Defense to report to the congressional defense committees on the ability of the geographic and functional combatant commanders to successfully meet their respective contingency and operational plans and key mission essential tasks. This section would also require the report to include an assessment by the Chairman of the Joint Chiefs of Staff of the level of risk incurred by using contract support in contingency operations. In addition, this section adds a quarterly readiness reporting requirement for the defense combat support agencies to section 482 of title 10, United States Code. These reports would have to include readiness trends and indicators and an assessment of an agency's ability to execute formal operational plans and to support contingency operations.

The committee is concerned that it does not receive comprehensive reporting on the geographic and functional combatant commanders' ability to successfully execute the full range of their respective operational and contingency plans. The committee believes that absent this information, its ability to make informed oversight decisions regarding the readiness of U.S. forces may be degraded. The committee understands that this lack of visibility may be, in part, due to classification issues. The committee encourages the Secretary of Defense to submit multiple annexes as required to provide complete and timely readiness information to the congressional defense committees.

The committee is also concerned that it lacks visibility on the readiness of the various combat support agencies. These agencies are a key readiness enabler, and the inability to understand how they contribute to military readiness limits the ability of Congress to provide effective oversight of military readiness.

Section 322—Repeal of Annual Comptroller General Report on Army Progress

This section would repeal the requirement that the Comptroller General of the United States report on the Army's progress in moving to a modular force design as the Army has completed the transition.

SUBTITLE E—LIMITATIONS AND EXTENSIONS OF AUTHORITY

Section 331—Limitation on Reduction of Force Structure at Lajes Air Force Base,
Azores

This section would prohibit the Secretary of the Air Force from reducing the force structure at Lajes Air Force Base, Azores, based on the force structure in existence on October 1, 2013, until the Secretary of Defense briefs the congressional defense committees. This brief shall specifically assess the efficacy of Lajes Air Force Base, Azores in support of the United States overseas force posture.

Section 332—Prohibition on Performance of Department of Defense Flight
Demonstration Teams Outside the United States

This section would place a 2 year moratorium on the Department of Defense use of funds for airshows outside the United States.

TITLE X—GENERAL PROVISIONS

LEGISLATIVE PROVISIONS

to Certain Other Agencies at the Department of Defense Reimbursement Rate

This section would amend section 2642 of title 10, United States Code, to extend the authority to provide other Federal agencies transportation at the same rate the Department of Defense charges its own units for similar transportation. This section would also expand the authority to allow the use of the extra capacity on strategic transportation assets of the military for transportation provided in support of foreign military sales.

SUBTITLE I—OTHER MATTERS

Section 1084—Extension of Authority of Secretary of Transportation to Issue Non-
Premium Aviation Insurance

This section would amend section 44310 of title 49, United States Code, relating to the expiration of non-premium insurance under chapter 443 of that title to extend the authority of the Secretary of Transportation to provide insurance and reinsurance.

LEGISLATIVE PROVISIONS

The payment may not exceed the annual rate of salary payable to the Vice President under section 104 of title 3, United States Code.

Section 1102—One-year Extension of Discretionary Authority to Grant Allowances, Benefits, and Gratuities to Personnel on Official Duty in a Combat Zone

This section would authorize temporary discretionary authority to Federal agencies to grant allowances, benefits, and gratuities comparable to those provided to members of the foreign service to an agency's civilian employees on official duty in a combat zone.

Section 1103—Extension of Voluntary Reduction-In-Force Authority for Civilian Employees of the Department of Defense

This section would amend 3502(f)(5) of title 5, United States Code, to extend existing reduction in force authority from September 30, 2014, to September 30, 2015.

Section 1104—Extension of Authority to Make Lump-Sum Severance Payments to Department of Defense Employees

This section would extend by 4 years the authority for the Secretary of Defense or a service secretary to allow eligible Department of Defense employees scheduled to be involuntarily separated from Federal service to request a lump sum severance payment in lieu of biweekly payments.

Section 1107—Defense Science Initiative for Personnel

This section would establish new authorities for personnel hiring and management of Department of Defense Science and Technology Reinvention Laboratories.

TITLE XVI—INDUSTRIAL BASE MATTERS

LEGISLATIVE PROVISIONS

Section 1603—Strategic Plan for Requirements for War Reserve Stocks of Meals Ready-To-Eat

This section would limit the authority of the Defense Logistics Agency (DLA) to alter stockage level requirements for meals ready-to-eat (MRE) war reserves until a strategic plan is developed and is briefed to the congressional defense committees.

The committee is concerned that the Defense Logistics Agency’s potential reduction of its MRE war reserve stockage requirements may adversely impact military readiness. The committee commends DLA for initiating action to study the MRE war reserve but has concerns over potential reductions that could harm the industrial base and threaten military readiness for possible contingencies.

This section would increase the construction scope associated with a Fuel Systems Maintenance Hangar authorization, provided in the Military Construction Authorization Act for Fiscal Year 2013 (division B of Public Law 112–239), to \$128.0 million. The hangar is to be constructed of cast-in-place reinforced concrete and will be adequately sized to provide repairs, functionality checks, and aircraft inspections in support of the Pacific Airpower Resiliency (PAR) mission.

The committee notes that the Fuel Systems Maintenance Hangar is required to support a Continuous Bomber Presence, Tanker Task Force, Theater Security Packages, and the Global Hawk beddown. The lack of this hardened facility would significantly reduce readiness and could result in degradation of operational capabilities. The committee supports PAR’s balance of dispersal and hardening, and this project is a critical component of that program.

This section would limit the Secretary of the Air Force from expending any funds authorized by this title that are associated with the construction of a maintenance facility, a hazardous cargo pad, or an airport storage facility at Saipan, Commonwealth of the Northern Mariana Islands, until the Secretary certifies that the Secretary will purchase the requisite real estate necessary to support these projects.

LEGISLATIVE PROVISIONS

SUBTITLE A—AUTHORIZATION OF APPROPRIATIONS

Section 2701—Authorization of Appropriations for Base Realignment and Closure Activities Funded Through Department of Defense Base Closure Account

This section would authorize appropriations for ongoing activities that are required to implement the decision of Base Realignment and Closure activities at the levels identified in section 4601 of division D of this Act.

SUBTITLE B—OTHER MATTERS

Section 2711—Prohibition on Conducting Additional Base Realignment and Closure (BRAC) Round

This section would prohibit funds, appropriated pursuant to an authorization of appropriations contained in this Act, to be used to propose, plan for, or execute an additional Base Closure and Realignment round.

Section 2712—Elimination of Quarterly Certification Requirement Regarding Availability of Military Health Care in National Capital Region

This section would repeal a quarterly reporting requirement regarding the capacity of the military health care system in the National Capital Region. The committee notes that sufficient capacity has been obtained in the National Capital Region to replace the loss of the former Walter Reed Army Military Medical Center, District of Columbia.

TITLE XXVIII—MILITARY CONSTRUCTION GENERAL PROVISIONS

LEGISLATIVE PROVISIONS

SUBTITLE A—MILITARY CONSTRUCTION PROGRAM AND MILITARY FAMILY HOUSING CHANGES

Section 2801—Modification of Authority to Carry Out Unspecified Military Construction

The section would modify section 2805 of title 10, United States Code, and allow the threshold of the unspecified minor construction project to be adjusted based on area cost factors. This section would also increase the threshold of application associated with operation and maintenance funding for construction purposes from \$750,000 to \$1.0 million.

Section 2802—Repeal of Requirements for Local Comparability of Room Patterns and Floor Areas for Military Family Housing and Submission of Net Floor Area Information

This section would repeal section 2826 of title 10, United States Code, that required the Secretary concerned to acquire military family housing that is comparable in structure to family housing available in the local community. While the committee notes that the Administration has generally adopted this practice, the committee also notes that the Department should be provided latitude in the design and construction of family housing.

Section 2803—Repeal of Separate Authority to Enter into Limited Partnerships with Private Developers of Housing

This section would repeal the limited authority of the Department of Defense to enter into partnerships with private developers for the purpose of providing family housing construction. The committee notes that subchapter IV of chapter 169 of title 10, United States Code, provides the Department of Defense broad authority to implement an extremely successful privatization family housing program which is not being abridged by this section.

Section 2804—Military Construction Standards to Reduce Vulnerability of Structures to Terrorist Attack

This section would provide additional latitude to the Department of Defense (DOD) to apply local threat criteria into the design of DOD facilities.

Currently, the Department of Defense uses a universal design basis threat to develop facilities criteria. Unfortunately, the universal application of a design basis threat drives increased facility costs when no credible threat exists. The committee continues to be concerned about institutional cost additions that only serve to increase the Federal cost premium.

Section 2805—Treatment of Payments Received for Providing Utilities and Services in Connection with Use of Alternative Authority for Acquisition and Improvement of Military Housing

This provision would modify section 2872a of title 10, United States Code, and eliminate the fiscal year reimbursement loss that occurs on late fiscal year reimbursements to the military family housing account. Specifically, payments made for utilities and services would be credited to the appropriation or working capital account that is current at the time the reimbursements are received, instead of the appropriation account from which the services were originally funded.

Section 2806—Repeal of Advance Notification Requirement for Use of Military Family Housing Investment Authority

This section would repeal a family housing notification requirement required in section 2875 of title 10, United States Code, that has been previously assessed in the President's request.

Section 2807—Additional Element for Annual Report on Military Housing Privatization Projects

This section would provide additional oversight and accountability in the pursuit of military family housing privatization projects to include an assessment of litigation costs that are being pursued by the privatization partners.

Section 2808—Extension of Temporary, Limited Authority to Use Operation and Maintenance Funds for Construction Projects in Certain Areas Outside the United States

This section would amend section 2808 of the Military Construction Authorization Act for Fiscal Year 2004 (division B of Public Law 108-136) and extend the Department of Defense's ability to use operation and maintenance appropriations for military construction purposes for the U.S. Central Command and Horn of Africa area until September 30, 2014.

SUBTITLE B—REAL PROPERTY AND FACILITIES ADMINISTRATION

Section 2811—Codification of Policies and Requirements Regarding Closure and Realignment of United States Military Installations in Foreign Countries

This section would repeal section 2921 of the National Defense Authorization Act for Fiscal Year 1991 (Public Law 101-510) and consolidate the requirements of overseas basing notification process in section 2687a of title 10, United States Code. This section would also remove a redundant reporting requirement associated with the proposed residual value of foreign military closure determinations.

SUBTITLE C—ENERGY SECURITY

Section 2821—Continuation of Limitation on Use of Funds for Leadership in Energy and Environmental Design (LEED) Gold or Platinum Certification

This section would continue the prohibition on the use of funds for Leadership in Energy and Environmental Design gold or platinum certifications for fiscal year 2014, set forth in the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112-81), as amended by the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112-239).

The committee notes that the Department of Defense has met two of the three requirements to include submission of a report regarding the different design standards and a new high performance and sustainable building unified facilities criteria. The committee looks forward to receiving the updated policy guidance that prescribes building design and certification standards that specifically address energy- and water-efficient standards and sustainable design attributes for military construction based on the cost-benefit analysis, return on investment, total ownership costs, and demonstrated payback applied by specific geographic location and local circumstances to ensure maximum savings.

SUBTITLE D—PROVISIONS RELATED TO GUAM REALIGNMENT

Section 2831—Change From Previous Calendar Year to Previous Fiscal Year for Period Covered by Annual Report of Interagency Coordination Group of Inspectors General for Guam Realignment

This authority shall expire on September 30, 2014, or enactment of an act authorizing military construction for fiscal year 2015, whichever is later.

Section 2846—Land Conveyance, Former Fort Monroe, Hampton, Virginia

This section would authorize the Secretary of the Army to convey certain properties at Fort Monroe, Virginia, to the Commonwealth of Virginia.

SUBTITLE F—OTHER MATTERS

7 reversion to the Commonwealth of approximately 371.77
8 acres of property depicted as areas 3 and 5 on the Map.

9 (d) CONDITIONS OF CONVEYANCE.—As a condition
10 of the conveyance of real property under subsection (b)—

16 cels to third-party buyers or from any lease of areas
17 4–1 or 4–2, payable over a period of seven years fol-
18 lowing the conveyance by the Secretary;

19 (2) the parties shall agree to transfer authority

9 Compensation, and Liability Act of 1980 (42 U.S.C. 9601
10 et seq.) and the Solid Waste Disposal Act (42 U.S.C. 6901
11 et seq.).

12 (f) ADDITIONAL TERMS AND CONDITIONS.—The par-
13 ties may agree to such additional terms and conditions in
14 connection with the conveyance under this section as the
15 parties consider appropriate to protect their respective in-

3 **ERSIDE, CALIFORNIA.**

4 (a) FINDINGS.—Congress finds the following:

5 (1) The most reliable statistics regarding the
6 number of members of the Armed Forces who have
7 been awarded the Distinguished Flying Cross indi-
8 cate that 126,318 members of the Armed Forces re-
9 ceived the medal during World War II, approxi-
10 mately 21,000 members received the medal during
11 the Korean conflict, and 21,647 members received
12 the medal during the Vietnam War. Since the end
13 of the Vietnam War, more than 203 Armed Forces
14 members have received the medal in times of con-

21 members of the Armed Forces who have received the
22 medal and are undocumented.

24 tional memorial dedicated to the bravery and sac-
25 rifice of those members of the Armed Forces who

1 have distinguished themselves by heroic deeds per-
2 formed in aerial flight.

3 (4) An appropriate memorial to current and
4 former members of the Armed Forces is under con-
5 struction at March Field Air Museum in Riverside,
6 California.

7 (5) This memorial will honor all those members
8 of the Armed Forces who have distinguished them-
9 selves in aerial flight, whether documentation of
10 such members who earned the Distinguished Flying
11 Cross exists or not.

12 (b) DESIGNATION.—The memorial to members of the
13 Armed Forces who have been awarded the Distinguished
14 Flying Cross, located at March Field Air Museum in Riv-
15 erside, California, is hereby designated as the Distin-

17 (c) EFFECT OF DESIGNATION.—The national memo-
18 rial designated by this section is not a unit of the National
19 Park System, and the designation of the national memo-
20 rial shall not be construed to require or permit Federal
21 funds to be expended for any purpose related to the na-

Comptroller General Littoral Combat System Sustainment Review

The committee notes the critical nature of the Littoral Combat Ship (LCS) program and the importance of the initial deployment of the USS Freedom to the Republic of Singapore to test and refine operational support and sustainment concepts. The LCS class takes a unique approach to maintenance which relies heavily on contractor-provided maintenance in contrast to other Navy ship classes, which typically use the Navy's organic capabilities and U.S. shipyards to provide maintenance. The Navy established an LCS Council to address major concerns raised by several Navy reports on problems with the LCS's manning, training, and maintenance concepts, among other issues. This council has developed a plan of action with milestones to bring high-level attention to resolving these issues as the LCS class is introduced into the surface combatant fleet. Given the central role of the LCS for the future of the surface fleet, the committee has concerns about the Navy's long-term sustainment plan. Therefore, the committee directs the Comptroller General of the United States to analyze and review:

- (1) Plans to collect and analyze data during the USS Freedom's Singapore deployment, as well as any mid-point or final reports of lessons learned from the deployment;
- (2) Projected costs associated with providing preventive and depot maintenance including, but not limited to, an analysis of the alternatives considered in the use of contractor fly-away maintenance teams and U.S. Government and commercial shipyards;
- (3) Progress on meeting targets established in the LCS plan of action and milestones;
- (4) Lifecycle cost estimates for the variants of the LCS and their associated mission modules compared with other Navy ship classes; and

(5) Any other issue that the Comptroller General determines appropriate with respect to the sustainment of the LCS platform and its associated mission modules, including modifications and improvements to reduce long-term sustainment costs and improve efficiencies.

The committee directs the Comptroller General of the United States to provide to the congressional defense committees a preliminary briefing by March 3, 2014, on the above factors, with a report or reports to follow by May 30, 2014.

Continuous Technology Refreshment

The Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (Public Law 111-383) provided expanded authority to the Department of Defense to foster use of technology-enhanced maintenance capabilities with Working Capital funds. The accompanying Joint Explanatory Statement (Committee Print 5) specifically discussed Continuous Technology Refreshment (CTR), which is a proven post-production sustainment acquisition strategy to acquire technologically improved replacement parts and to significantly reduce long-term ownership costs. The committee notes that the Army Aviation and Missile Life Cycle Command is projected to achieve \$254.0 million in sustainment cost savings over a 10-year period on just a limited set of legacy helicopter parts. The committee is concerned that the Department of Defense has been slow to implement robust CTR programs, to expand their use beyond this one Army command, and to take full advantage of the Working Capital authorities provided in law which have become much more important due to national budget pressures.

The committee directs the Under Secretary of Defense for Acquisition, Technology, and Logistics to brief the congressional defense committees, not later than April 30, 2014, on the Department's Continuous Technology Refreshment initiatives for improving the quality and significantly lowering the cost of replacement parts for Department weapon systems. The briefing should address:

- (1) The guidance provided to the military services on the use of Working Capital authorities for technology-enabled maintenance capabilities;
- (2) Information on the results achieved to date from developing modern parts to replace obsolete legacy parts using CTR with the resulting associated estimated cost savings; and
- (3) The plans of each military department and appropriate Defense agencies to develop and implement CTR acquisition strategies in fiscal year 2014 for obsolete parts most likely to achieve significant cost savings.

Defense Logistics Agency Roles and Missions Assessment

The committee is concerned that the 2005 Base Realignment and Closure Commission process may have placed the Defense Logistics Agency (DLA) in roles and assigned missions outside its core competencies which may be resulting in suboptimal support of its customers. In particular, the committee is concerned about the operational and readiness impacts to customers of DLA's continued

challenges in effectively managing the supply chain. The committee notes that supply chain management, supply inventories, materiel distribution, and asset visibility, in particular, continue to be “high risk” areas within the Department of Defense, according to the 2013 Government Accountability Office’s High Risk Report. While the committee notes the significant progress DLA has made in reducing excess inventory and improving its business processes, the committee has been made aware of persistent challenges in the timely provision of specialized, low-quantity parts and supply chain management, which the committee believes could be a result of a misalignment of roles and missions.

Therefore, the committee directs the Secretary of Defense to conduct an assessment of the roles and missions of the DLA. The assessment may, at the election of the Secretary, be conducted by a federally funded research and development center (FFRDC) or an independent, non-governmental institute which is described in section 501(c)(3) of the Internal Revenue Code of 1986 and exempt from tax under section 501(a) of such Code, and has recognized credentials and expertise in national security and military affairs appropriate for the assessment.

The assessment should include, but not be limited to, the following:

- (1) An examination of the roles and missions currently assigned to the DLA;
- (2) An assessment of the DLA’s ability (resources, structure, workforce, etc.) to adequately accomplish those roles and missions outside of DLA-Energy;
- (3) Identification of any DLA functions, roles, missions, activities, or initiatives that could be more efficiently performed by the military departments or other defense agencies;
- (4) A transition plan for any activities recommended for migration;
- (5) An assessment of functions, roles, missions, activities, or initiatives that could be most efficiently performed by DLA that are currently performed by other military departments or defense agencies; and
- (6) Any other recommendations on ways the DLA could further improve its support to customers, management practices, demand forecasting, its use of modeling to determine the optimal number and inventory management.

The committee directs the Secretary of Defense to deliver this assessment in conjunction with the annual budget submission for fiscal year 2015. Further, to enable the committee to provide the necessary oversight, the committee directs the Department to brief the congressional defense committees on the strategy within 30 days of its delivery to Congress.

F-35 Sustainment Plan

The committee recognizes the importance of the F-35 Joint Strike Fighter Program to our national defense. This advanced fighter aircraft will replace a variety of existing aircraft in the Air Force, the Navy, and the Marine Corps. In 2012, the Department of Defense reported that sustainment of the F-35 aircraft fleet could cost more than \$1.0 trillion (in then-year dollars) over the planned 30-year service life. However, the Department has said that it is actively engaged in

evaluating opportunities to reduce life-cycle sustainment costs based on concerns about the affordability of the program. Past experience has shown that decisions made during the development of a weapon system can influence, positively or negatively, the cost of sustaining that system over its life cycle. Considering the magnitude of the estimated sustainment costs for the F-35, the committee is concerned about whether the Department has established comprehensive sustainment plans, developed appropriate cost analyses, and identified potential options to control and/or minimize future sustainment costs for the aircraft program. Given the fiscal uncertainties facing the Department and growing concerns related to the affordability of the F-35's long-term sustainment costs, the committee directs the Government Accountability Office (GAO) to review the Department's ongoing F-35 sustainment planning efforts. This review should include:

(1) The extent to which the Department has developed comprehensive sustainment plans, including a Life-Cycle Sustainment Plan, and regularly updated these plans to reflect program changes;

(2) The extent to which the Department has utilized appropriate analyses of operating and support costs, including a business case analysis, to evaluate the full range of sustainment options available for the F-35 program;

(3) The extent to which the Department is pursuing additional opportunities, such as competition for sustainment contracts, to reduce long-term sustainment costs; and

(4) Any other issues that the Comptroller General determines appropriate with respect to the sustainment of the F-35.

The committee directs the Comptroller General of the United States to provide a preliminary briefing by March 14, 2014, on the above factors, with a report or reports to follow.

Item Unique Identification and Automated Information and Data Capture

The committee is aware that numerous Government Accountability Office audits have found that significant improvements are needed in the tracking, management, and accountability for assets deployed across the Department of Defense. The committee believes that Item Unique Identification (IUID), Radio Frequency Identification (RFID), biometrics, and other automated information and data capture (AIDC) technologies have the potential for realizing significant cost savings and improving management of defense equipment and supplies throughout their life cycles. Further, the committee judges that the use of the implementing technologies can secure supply-item data for logistics and engineering analysis; improve item intelligence for operational warfighter planning; upgrade access to historical item data across life cycles; lower total life cycle cost of items acquired and managed; save taxpayer funding through improved productivity, efficiency, maintenance, and logistical planning; and combat the growing problem of counterfeit parts in the military supply chain.

The committee understands that in 2003, the Department of Defense initiated the IUID initiative, which requires the marking and tracking of assets deployed throughout the Armed Forces or in the possession of Department contractors, but implementation has been fragmented, incomplete, and not enforced. The committee believes the Department of Defense must improve its efforts to capture meaningful data and optimize the benefits of Item Unique Identification and other AIDC initiatives to include the investment of sufficient resources and continued training and leadership.

Therefore, the committee directs the Secretary of Defense to promulgate rules and regulations sufficient to enforce compliance with section 252.211–7003 (entitled “Item Identification and Valuation”) of the Defense Supplement to the Federal Acquisition Regulation, on Item Unique Identification, which requires unique identification for all delivered items meeting the standards set forth in the regulation.

In addition, the committee directs the Secretary of Defense to provide a briefing to the congressional defense committees by January 31, 2014, on current compliance rates with section 252.211–7003 of the Defense Supplement to the Federal Acquisition Regulation, measures being taken to improve compliance, and a projected date for full compliance.

Long-term Investment Plan for Land, Facilities, and Equipment of Former Guam Ship Repair Facility

In testimony before the committee in April 2013, the Chief of Naval Operations highlighted the importance of a ship repair capability on Guam to support increased naval operations in the western Pacific region as key to the national security strategy. The committee understands that maintaining a depot-level ship repair capability on Guam will require significant investment. The committee is concerned that the Navy has been unable to provide a detailed investment plan for upgrading and modernizing the former Navy ship repair facility on Guam. The committee notes that a failed long-term lease approach would have required private industry to provide capital improvements estimated at nearly \$150.0 million. Therefore, the committee anticipates that a similar level of investment would be needed by the Navy to provide the necessary depot-level repair capability for the western Pacific region. The committee believes that improvements to these facilities will be critical to ensuring the long-term viability of a depot-level ship repair capability in the western Pacific.

Therefore, the committee directs the Secretary of the Navy, in coordination with the Chief of Naval Operations, to submit to the congressional defense committees no later than December 31, 2013, a long-term investment plan for the land, facilities, and equipment of the former Guam ship repair facility. The plan should include:

(1) A description of how the Secretary of the Navy will prioritize the improvements made to land, facilities, and equipment under the plan, including an explanation and estimated cost and schedule for each such improvement; and

(2) An identification of the accounts from which funds will be used for such improvements.

READINESS ISSUES

Comptroller General Encroachment Study

The committee is concerned about military readiness and preserving the Department of Defense's ability to train and operate in the air, at sea, and on land. U.S. military force readiness is directly dependent on many factors, including realistic training for a variety of missions in myriad environments worldwide. An important component of military readiness is timely and routine access to training ranges that permit realistic training without hindrance from activities that can limit access to, encroach upon, or at times compromise security of the ranges. The Government Accountability Office (GAO) previously reported in "Military Training: Compliance With Environmental Laws Affects Some Training Activities, but DOD Has Not Made a Sound Business Case for Additional Environmental Exemptions" (GAO-08-407) that the requirement to comply with environmental laws has affected some training activities and how they are conducted. Specifically, the GAO found some instances where training activities were cancelled, postponed, or modified in order to address environmental requirements. While the GAO also reported at the time that readiness data did not indicate an impact on readiness from these instances, it also reported that the Department was developing systems to measure the impact.

Limitations on access to training ranges and encroachment of national security interests can take many forms:

(1) Environmental limitations, both land- and sea-based, involve endangered species that may be present through nesting or migration at or near training ranges.

(2) Urban encroachment can consist of commercial or residential construction in the civilian economy in proximity to or adjacent to military bases.

(3) Encroachment from energy-generation projects can occur both adjacent to installations and also in the Outer Continental Shelf, potentially affecting the military's ability to train and operate both on installations and at sea. The installation of renewable energy-generation facilities, including wind turbines and solar power facilities, can be incompatible with the installations' missions.

(4) Competition for the electromagnetic spectrum through the proliferation of consumer demand for wireless devices, including smart phones and tablet computers, and the associated data-intensive applications, is increasingly conflicting with the Department's need to use the electromagnetic spectrum for modern military training and assurance of proper functioning of some weapon systems.

(5) National security interests may be threatened when range security becomes a concern based on the nature of the encroachment. For example, ocean observing systems may be used for marine mammal and weather research, climate research, tsunami warning/verification, and seismic/earthquake monitoring. The littoral nature of Navy training ranges, and the unique types of activity that occur there, make the ranges valuable for data gathering in each of those categories. However, the open nature of the high seas also makes it possible for data to be gathered that may exploit an operational vulnerability. Similarly, land-based development can lead to security concerns due to incompatible development adjacent to or in near proximity to ranges and ownership of such development that raises security concerns.

The Department's actions to prevent or mitigate the impediments to realistic training are vital to ensuring adequate range access and ensuring U.S. forces remain at a high state of readiness. However, the committee wants to ensure that the Department is effectively preventing or mitigating these restrictions to ensure that U.S. force readiness remains high. Therefore, the committee directs the Comptroller General of the United States to undertake a review of the Department's activities to prevent or mitigate environmental limitations and man-made encroachment, and ensure adequate security of training ranges and operations. At a minimum, this study should address the following:

(1) What are the types of restrictions, and how do they affect the Department's ability to train and operate?

(2) What authorities does the Department have, or need, to be able to protect its ability to train and operate?

(3) To what extent has the Department identified restrictions on its air-, land-, and sea-based training ranges, and how has the Department prevented or mitigated such restrictions?

(4) How does the Department collaborate with local governments, private companies, and/or other federal agencies to protect its ability to train and operate? And, what areas require improvement?

(5) How effective are the Department's systems to measure the effects of environmental limitations and man-made encroachment and to what extent do opportunities exist to improve these systems?

(6) What options does the Department have to mitigate impacts of environmental limitations and man-made encroachment, and at what cost?

(7) How does the Department identify and mitigate any relevant security issues related to training range restrictions?

(8) Which ranges are at highest risk? And, which ranges should be the highest priority to protect from encroachment due to unique training environments and/or ability to minimize electromagnetic spectrum interference?

The committee further directs the Comptroller General to submit a report to the congressional defense committees by March 3, 2014, on the findings of the study.

Missile Defense Capabilities for Guam

The committee recognizes the strategic importance of providing ballistic missile defense for Guam and the current U.S. assets based there. The committee further recognizes that as part of bilateral negotiations with the Government of Japan, the U.S. military presence on the island and the need to protect it from a missile threat are projected to increase. The committee notes that the Final Environmental Impact Statement on the Guam and Commonwealth of the Northern Mariana Islands Military Relocation contains a recommendation to base an Army Air and Missile Defense Task Force (AMDTF) on Guam as part of the realignment of U.S. Marines from Okinawa, Japan, to Guam. The committee also notes the actions of the Department of Defense of temporarily stationing a Terminal High-Altitude Area Defense (THAAD) missile defense capability on Guam to respond to immediate threats of missile launches from the Democratic People's Republic of Korea toward U.S. military assets on Guam.

The committee is concerned that despite projected growth in the U.S. military population on Guam and the President's new Defense Strategic Guidance focusing on the U.S. Pacific Command area of responsibility, the Army has not provided any resources for the basing of an AMDTF or other missile defense capability on Guam in the current year budget proposal or in the Future Years Defense Program. The committee is aware that Aegis-based missile defense capabilities or other land-based missile defense capabilities also could, if required, provide coverage and defense for assets on Guam. Therefore, the committee directs the Secretary of Defense, in coordination with the appropriate military services, to brief the committee by December 1, 2013, on:

(1) Any analysis the Department of Defense has conducted to determine which missile-defense capability or capabilities are best suited for the defense of Guam and the recommendations from that analysis;

(2) The Department's timeline for resourcing and establishing an AMDTF or other missile-defense capability on or for Guam, including the number of required personnel billets and costs;

(3) An assessment of which component of the military – Active or Reserve – would be most appropriate to support the mission, either fully or partially; and

(4) A description of permanent and other missile defense capabilities in the Asia-Pacific region that could provide protection to U.S. military assets on Guam.

Report on Career Progression of U.S. Army and U.S. Marine Corps Advisory Personnel

For the past several years, the U.S. Army and U.S. Marine Corps have been providing forces to support security force assistance missions in the Islamic Republic of Afghanistan and other locations around the world. To conduct these missions, the services have relied on a number of non-doctrinal approaches. For example, in Afghanistan, the U.S. Army and U.S. Marine Corps have increasingly relied on larger units, such as brigade combat teams, to provide advisory teams. In

addition, the U.S. Army is beginning to execute its regionally aligned force concept, which aligns specific brigades to specific regions and calls for the deployment of small groups of leaders to conduct security force assistance activities while the rest of the unit remains at the home station.

The committee is concerned about the career implications for U.S. Army and U.S. Marine Corps personnel assigned to security force assistance-related activities as well as the ability of these units to conduct these activities while maintaining readiness requirements. Therefore, the committee directs the Comptroller General of the United States to examine and report to the congressional defense committees by April 1, 2014, on the impact of the U.S. Army's and U.S. Marine Corps' approaches to the security force assistance mission, including:

(1) To what extent the U.S. Army and U.S. Marine Corps have policies or procedures to identify personnel with advising or other security force assistance-related skills and experience;

(2) To what extent the assignment of U.S. Army and U.S. Marine Corps officer and senior enlisted personnel to advising or other security force assistance-related activities has affected the career progression of these individuals, including opportunities for command positions, promotions, or other career development opportunities; and

(3) What impact, if any, the U.S. Army and U.S. Marine Corps' approaches of relying on units to provide personnel for advising and other security force assistance-related activities have had on the units' ability to maintain readiness.

Water Egress Training

The committee recognizes the need to ensure that the Department of Defense provides its rotary-wing aviators with the best survivability training available. The committee is concerned that not all services have the facilities and capabilities necessary to ensure adequate training and throughput. The committee believes that a reassessment of the Department's capabilities is especially important given the new defense strategic guidance shifting departmental focus to the Pacific Rim.

The committee directs the Comptroller General of the United States to conduct a formal assessment and report back to the congressional defense committees, not later than April 1, 2014, on the state of the Department's rotary-wing water egress training capabilities. At a minimum, this assessment should include:

(1) Training facilities and infrastructure;

(2) Disparities and commonalities among the military departments;

(3) Current training capacity and its adequacy to meet future requirements;

and

(4) Any capacity shortfalls in meeting water egress training requirements.

OTHER MATTERS

Navy Arctic Roadmap

The committee continues to be concerned about the Department of Defense's resources and preparedness for accessing, operating in, and protecting national interests in the Arctic. The Navy currently estimates that between 2020 and 2030, the Arctic could be ice free for one month during the summer which may lead to an increase in trans-Arctic passage for vessels seeking to reduce transit distance by utilizing the Northern Sea Route and the Northwest Passage. The Navy's Strategic Objectives for the Arctic was signed in May 2010 and is referred to in both the Navy Arctic Capabilities Based Assessment, approved in September 2011, and the Navy Arctic Environmental Capabilities Based Assessment, approved in December 2012. Those objectives include ensuring Navy forces are capable and ready, contributing to the safety, stability and security in the region, safeguarding U.S. maritime interests, protecting critical infrastructure and key resources in the Arctic, and strengthening and fostering new cooperative relationships in the region. As a global Nation, the United States needs to ensure that the Navy is adequately prepared to preserve U.S. national security interests and collaborate with other Arctic nations if and when the region will be open for passage with increased traffic.

The committee recognizes the importance of transparency of action without seeking to militarize the region. Therefore, the committee directs the Secretary of the Navy to provide a roadmap for future activities and costs for training and operating in the Arctic. This roadmap should be a derivative of the National Security Strategy, and shall identify proposed exercises (including table top exercises), to include the frequency, cost, and a more detailed investment strategy across the Program Objective Memorandum through fiscal years 2020 to support a timeframe leading to increased operations in the region between 2020 to 2030. Additionally, the Navy should include details regarding international forums in which they participate. The committee further directs the Secretary of the Navy to provide this roadmap to the congressional defense committees by February 28, 2014.

TITLE IX—DEPARTMENT OF DEFENSE ORGANIZATION AND MANAGEMENT

ITEMS OF SPECIAL INTEREST

Air Force Force Structure

The committee recognizes the challenges the U.S. Air Force confronts as a result of sequestration, a restricted budget with limited resources to modernize, and an aging aircraft fleet. The committee believes that the Air Force must remain a premier fighting force. To this end, the National Defense Authorization Act for

Fiscal Year 2013 (Public Law 112-239) created the National Commission on the Structure of the Air Force following extensive debate during the last budget cycle regarding the Air Force's Total Force Plan submitted with the President's fiscal year 2013 budget request and as revised in November 2012.

The commission is undertaking a comprehensive study of the structure of the Air Force to determine whether, and how, the structure should be modified to best fulfill current and anticipated mission requirements in a manner consistent with strategy and available resources. The considerations of the commission, outlined in section 363(a)(2) of Public Law 112-239, state that the commission shall give particular consideration to evaluating a structure that:

- (1) Meets current and anticipated requirements of the combatant commands;
- (2) Achieves an appropriate balance between the regular and Reserve Components, taking advantage of the unique strengths and capabilities of each;
- (3) Ensures that the regular and Reserve Components have the capacity needed to support current and anticipated homeland defense and disaster assistance missions in the United States;
- (4) Provides for sufficient numbers of Active Duty members of the Air Force to provide a base of trained personnel from which the personnel of the Reserve Components of the Air Force could be recruited;
- (5) Maintains a peacetime rotation force to support operational tempo goals of 1:2 for active-duty members of the Air Force and 1:5 for members of the Reserve Components; and
- (6) Maximizes and appropriately balances affordability, efficiency, effectiveness, capability, and readiness.

As the committee awaits the report by the commission due by February 1, 2014, the committee seeks to understand the measures the Air Force is taking to retrain airmen affected by the elimination of weapons systems and equipment under the November 2012 Total Force Plan to ensure mission readiness. Therefore, the committee directs the Secretary of the Air Force to provide to the Committees on Armed Services of the Senate and the House of Representatives, by October 1, 2013, the plan to transition qualified airmen, whose weapons systems or positions are being terminated, to new skills and weapons systems.

Air Force Materiel Command Metrics

The committee notes that the Air Force is undertaking a significant reorganization of Air Force Materiel Command (AFMC) that the Secretary of the Air Force indicates will improve warfighter support, drive standard processes, improve life-cycle acquisition management, and reduce overhead. Specifically, the Air Force is reducing more than 1,000 positions across the command at an estimated annual savings of more than \$100.0 million.

As the Air Force implements this reorganization, the committee expects the Secretary to adhere to the reporting requirements in section 2687 of title 10, United

States Code, and the reporting requirement in section 2814 of the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112-239). While the committee agrees it is imperative to generate efficiencies across the Air Force enterprise, the committee also believes it is essential to preserve critical functions and capabilities at AFMC installations.

The committee notes that RAND Project Air Force, in its 2012 report “Air Force Materiel Command Reorganization Analysis,” recommended AFMC develop and use a suite of metrics to track mission performance against goals. These metrics would facilitate root-cause analysis of any inefficiencies resulting from the reorganization. The committee is pleased that AFMC, through the AFMC corporate governance structure outlined in the 2013 AFMC strategic plan, currently uses these metrics to monitor progress towards meeting AFMC’s enduring priorities.

The committee seeks to better understand how AFMC is measuring organizational successes and identifying challenges arising from the new 5-Center construct. Accordingly, the committee directs the Secretary of the Air Force to adopt an additional metric which measures progress on AFMC objectives against a designated pre-reorganization baseline. The committee also directs the Secretary of the Air Force to submit a report to the Committees on Armed Services of the Senate and the House of Representatives by January 1, 2014, on AFMC’s internal metrics. The report should include, but not be limited to, command metrics, tracking, and data collected as of the report due date. The report should be submitted quarterly and in an unclassified form, with a classified annex if necessary. Updated reports should be submitted to the aforementioned committees on a quarterly basis through January 1, 2015.

Comptroller General of the United States Report Reviewing the Department of Defense’s Implementation of Civilian Personnel Furloughs

The committee is disappointed that the Department of Defense waited so late in the fiscal year to explore options and the potential impact resulting from the required reductions in spending in accordance with the Budget Control Act of 2011 (Public Law 112-25). The Department’s civilian workforce is key to carrying out its role and responsibilities. The Department has announced that it will implement furloughs of the civilian workforce in order to meet its required reductions. According to the Secretary of Defense’s May 14, 2013, memorandum, certain civilian employees will be excepted from furloughs. In light of this, the committee directs the Comptroller General of the United States to assess what criteria were used in the determination of which civilian employees to except from furloughs and how the Department planned for, implemented, and is monitoring furloughs of the civilian workforce to include what challenges the Department has faced in its implementation and cost savings realized. The Comptroller General should submit the results of the review to the Committees on Armed Services of the Senate and the House of Representatives by April 10, 2014.

Further, the committee directs the Secretary of Defense to submit a report to the congressional defense committees by than December 1, 2013, on the steps that the Department is taking to minimize any negative impact on the morale of the civilian workforce and long-term consequences on recruiting and retention of the civilian workforce.

Guidance on the Use of Borrowed Military Manpower

As the Department of Defense (DOD) makes reductions in its Total Force workforce composition, military, civilians, and contractors, the committee is increasingly concerned about the use of military manpower to perform functions previously performed by either civilians or contractors. While the Department of the Navy and the Department of the Air Force have indicated they do not anticipate wholesale substitutions using military personnel, the Secretary of the Army, in testimony before the committee in April 2013, predicted that the Army could use as many as 8,000 uniformed personnel to fill positions during the current fiscal year because reduced funding for training has created time gaps in the duty day and freed up soldiers for other duties. The committee understands the need for temporary, limited local command use of military personnel performing civilian work to accomplish mission objectives, but the committee notes that use of military manpower outside the service member's military occupational specialty poses risks to readiness and training, and raises issues of unsustainable costs.

Consistent with "Guidance Related to the Utilization of Military Manpower to Perform Certain Functions," issued March 2, 2012, by the Under Secretary of Defense for Personnel and Readiness, the committee expects the Department of Defense to calculate the cost of using military personnel in lieu of civilian personnel or service contractors to perform non-military tasks in accordance with Directive Type Memorandum (DTM)-09-007, "Estimating and Comparing the Full Costs of Civilian and Military Manpower and Contract Support" or any succeeding guidance. For the purposes of this direction, military tasks are as defined in DOD Directive 1100.4, DOD Instruction 1100.22, and any successor or amplifying guidance as issued by the Under Secretary of Defense for Personnel and Readiness.

Additionally, the committee directs the Comptroller General of the United States to review the use of borrowed military manpower (BMM) and to provide a report to the Committees on Armed Services of the Senate and the House of Representatives by April 30, 2014, regarding the impacts on military readiness and training in fiscal year 2013, including how the Department weighed operational risks and capabilities and readiness levels with BMM calculations and decisions. The Comptroller General also should examine the extent to which manpower costs were calculated using the DTM 09-00. The committee understands that the Government Accountability Office is undertaking an extensive body of work regarding the impacts of sequestration on the Department of Defense and further directs the Comptroller General to include the use of BMM as a part of this effort.

Guidance Regarding the Conversion of Functions Performed by Non-appropriated Fund Employees

In the committee report (H. Rept. 112-439) accompanying the National Defense Authorization Act for Fiscal Year 2013, the committee directed the Department of Defense to clarify that the December 2011 guidance entitled Prohibition on Converting Certain Functions to Contract Performance “applies as well to functions performed by Non-Appropriated Fund employees, which is consistent with section 2461 of title 10, United States Code.” Section 2461 ensures that work performed by Department of Defense civilian employees is not outsourced without first conducting a formal cost comparison process; the committee notes that the law includes no exceptions for Non-Appropriated Fund employees. However, the committee is aware that the Department has not clarified the guidance and directs the Under Secretary of Defense for Personnel and Readiness to issue the clarification guidance by July 8, 2013.

Energy Security Assessments in the Quadrennial Defense Review

The committee notes that the Secretary of Defense is required every four years to conduct a Quadrennial Defense Review (QDR), pursuant to section 118 of title 10, United States Code. The QDR is intended to provide a strategic defense review of plans necessary to execute successfully the full range of missions called for in the national defense strategy. The committee believes an essential element of any defense plan is the importance of energy security as a fundamental component of the Department of Defense’s ability to project power and enable combat capability for operations. In the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112-81), energy security was defined as “having assured access to reliable supplies of energy and the ability to protect and deliver sufficient energy to meet mission essential requirements.” Noting that the committee report (H. Rept. 112-78) accompanying the National Defense Authorization Act for Fiscal Year 2012 urged the Secretary to conduct a more comprehensive QDR review, the committee directs the Secretary of Defense to ensure that the final assessment includes details regarding the importance of, and funding necessary to achieve energy security.

TITLE XI—CIVILIAN PERSONNEL MATTERS

ITEMS OF SPECIAL INTEREST

Wage Grade Pay Parity at Joint Installations

The committee continues to be concerned about pay parity for Department of Defense employees at joint bases and is disappointed that it has not received the required follow up from the Office of Personnel Management regarding the actions being taken to address the Federal Prevailing Wage System area within the same General Schedule (GS) locality pay area, as directed in the committee report (H. Rpt. 112-78) accompanying the National Defense Authorization Act for Fiscal Year 2012. Since October 2010, the Federal Prevailing Rate Advisory Committee has consistently recommended consolidation of the Federal Wage System area within the same GS locality pay area; however, no further action has been taken. As previously noted, an example of pay disparity is Joint Base McGuire-Dix-Lakehurst, New Jersey, where the former McGuire Air Force Base and Fort Dix are in the Philadelphia cost-of-living area, and the former Lakehurst Naval Air Engineering Station is in the New York cost-of-living area. Therefore, the committee directs the Secretary of Defense, in cooperation with the Director of the Office of Personnel Management, to brief the committee not later than January 31, 2014, on actions planned or previously undertaken to correct the disparities between GS and Federal Wage System employees employed at joint military installations.

DIVISION B—MILITARY CONSTRUCTION AUTHORIZATIONS

TITLE XXVIII—MILITARY CONSTRUCTION GENERAL PROVISIONS

ITEMS OF SPECIAL INTEREST

Blast Protection for Forward Military Locations in Contingency Operations

The committee is aware that establishing forward operating bases and outposts is required to support military operations, especially during stability or counterinsurgency operations. Such locations allow forces to conduct operations or logistic support activities. Due to the threat environment around these locations, greater security measures must be deployed, such as increasing standoff distances, hardening access of facilities, and installing blast protection measures where necessary to ensure the safety and security of personnel operating from such a location. In continuing to evaluate force protection requirements and procedures in contingency locations, the committee encourages the Department to assess current policies, procedures, and capabilities for blast protection of facilities in forward locations, to include current and appropriate standoff requirements, and new and available technology that could help reduce standoff distance requirements and improve force protection and building security.

The committee directs the Secretary of Defense to assess the requirements and procedures in such contingency locations and to provide a briefing on the

assessment to the House Committee on Armed Services by March 1, 2014. The briefing should include: a review of the current design basis threat; changes to security policies that would better protect personnel; and an assessment of current facility methods, to include standoff distances and physical barriers to address the design basis threat. The briefing should also address the availability of new technologies or procedures that provide a significant improvement against the design basis threat.

Department of Defense Joint Bases

The committee supports the Department of Defense's efforts to realize efficiencies through joint basing, but it is concerned that the intent of joint basing, including a consolidation of common services across the entirety of the joint base enterprise, has not realized its full potential. Therefore, the committee directs the Comptroller General of the United States to submit a report to the congressional defense committees by March 1, 2014, on the extent to which the Department of Defense has achieved joint operations and efficiencies at joint bases. Specifically, the report should address the following elements:

(1) The common elements that are included in the individual joint base memoranda of agreements, differences that are unique to joint bases, and how the memoranda of agreements reflect best practices identified on joint bases on how the services interact and provide for support services;

(2) The extent to which joint bases have implemented the terms of their memoranda of agreement, including adopting the joint standards to provide a single source for support services;

(3) The extent to which the joint bases have reduced duplication of management and similar support services, achieved greater efficiencies through economies of scale, and consolidated and optimized existing and future service contract requirements; and

(4) How the Department of Defense measures the improvement in joint operations from the joint bases and what the Department of Defense has found in measuring joint operations.

Industrial Control Systems integration into the Department of Defense Networks

In the development of an energy monitoring and utility control system specification for military construction and military family housing activities as required by section 2841 of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111-84) and energy metering requirements directed by section 2827 of the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112-239), the committee understands that the commercially developed control systems are required to seek compliance certifications to enable them to operate on Department of Defense networks. These compliance certifications are essential for national security, but due to the lengthy and cumbersome process to gain certification to operate on defense networks, the Department of Defense is unable to

integrate the latest control energy monitoring and utility control systems into its overall physical plant and networking architecture. The committee believes that it is essential to expedite the compliance process that will allow for integration of needed, next-generation control systems while still ensuring adherence to network security protocols.

Therefore, the committee directs the Deputy Under Secretary of Defense for Installations and Environment, in coordination with the Assistant Secretary of Defense for Networks and Information Integration/DOD Chief Information Officer, to provide a briefing to the congressional defense committees by March 1, 2014 on steps to improve the Defense Information Assurance Certification and Accreditation Process to more rapidly ensure compliance for energy monitoring and utility control systems and to capture and track energy usage. Specifically, this briefing should address any updates to the Unified Facilities Guide Specification that are required to implement this direction.

KC-46A Air National Guard Basing Strategy

The committee understands that the Air Force plans to accept delivery of 179 KC-46A aircraft between 2016-28. The current strategic basing strategy, as briefed to the committee, proposed to base KC-46A aircraft at up to 10 Main Operating Bases (MOB). Of these, up to two will be Active Duty-led within the continental United States, up to four will be Air National Guard-led, up to two will be Air Force Reserve-led, and up to two will be located outside the continental United States. While the first Active Duty-led MOB will have a primary aircraft authorization (PAA) of 36 aircraft and the first Air National Guard-led MOB will have a PAA of 12 aircraft, the committee is aware that the Air Force is currently working to determine the most efficient basing construct for future Air National Guard-led MOBs. Therefore, the committee directs the Secretary of the Air Force, or a designee, to brief the House Committee on Armed Services on the basing strategy, to include PAA construct and basing criteria, for future Air National Guard-led MOBs, no later than 30 days before a final basing decision is made.

Leased Space Assessment

The committee notes that several of the Department of Defense's base closure and realignment (BRAC) recommendations were designed to relocate certain activities from leased space to Government-owned space. In the justification for some of these recommendations, the Secretary of Defense noted that implementation would reduce the Department's reliance on leased space, which historically has overall higher costs than Government-owned space and generally does not meet anti-terrorism/force protection standards. In a June 2012 report (GAO-12-709R), the Government Accountability Office noted that 2 of the recommendations to consolidate from leased space to Government-owned space were among the 14 recommendations for increasing the most in one-time costs.

However, since the conclusion of the BRAC round, the committee has become aware that Department is continuing to rely on leased space.

Therefore, the committee directs the Comptroller General of the United States to provide a report to the congressional defense committee by March 1, 2014, on the Department's reliance on leased space to meet its mission requirements and address the following:

(1) How much space does the Department lease, specifically in the National Capital Region?

(2) To what extent has the Department reduced its reliance on leased space since the beginning of BRAC 2005, particularly in the National Capital Region?

(3) How much is the Department spending on such leases?

(4) To what extent do facilities currently being leased by Department of Defense activities comply with current anti-terrorism/force protection standards?

(5) To what extent do opportunities exist to further reduce the extent to which the Department leases space, particularly in the National Capital Region?

Space Management

The committee believes that significant savings may be available in better space management on military installations. The Government Accountability Office continues to designate the Department of Defense's management of its support infrastructure as a high-risk area, in part because of issues in disposing of excess facilities. In order to identify excess or underutilized facilities, the Department needs accurate facility utilization information in its real property inventory database. This information is ultimately reported to the Federal Real Property Profile and is used by decision-makers to make asset management decisions, including disposing of unneeded federal properties or identifying opportunities for consolidation.

As the Government Accountability Office recently reported, the Department does not maintain complete and accurate data concerning the utilization of its facilities. For example, the Government Accountability Office found that the Department's real property inventory database showed utilization data for less than half of the Department's total inventory and that this data was often incomplete or did not reflect the true usage rate of the facilities. Further, the Government Accountability Office recommended that the Department calculate and record complete and accurate utilization data for all facilities. The Department concurred with this recommendation and stated that it recognizes the need for further improvements in the collection and reporting of utilization data. The Department of Defense's ability to identify excess or underutilized facilities and potential opportunities for consolidation of space relies on collecting and maintaining accurate facility utilization data. The committee encourages the Department to take action to correct its collection and reporting of facility utilization data to ensure that opportunities for disposal or consolidation are identified and not lost.

Therefore, the committee directs the Comptroller General of the United States to submit a report to the congressional defense committees by March 1, 2014, on the Department's efforts to improve the accuracy of its real property inventory database and the impact on consolidation activities. At a minimum, the report should address the following:

(1) To what extent has the Department improved collecting and accurately maintaining facility utilization data in its real property inventory database;

(2) To what extent does the Department use the data contained in its real property inventory database to identify excess facilities or potential consolidation opportunities; and

(3) To what extent the Department has consolidated facilities where the Department identified consolidation opportunities.
