

**About Avlok Kohli**

Since joining AngelList as CEO in 2019, Avlok Kohli has presided over perhaps the most unexpected and astounding transformation in the venture ecosystem: taking AngelList from an SPV provider to a company that is quickly becoming the software platform for the entire private market industry. Today, AngelList provides funds and startups with the infrastructure they need to launch and scale, and supports over \$100B+ of assets on the platform.

Prior to AngelList, Avlok started & sold a company to Square / Block where Jack Dorsey is Founder & CEO. He's also an active angel investor in 80+ startups.
