

## Amendment to the Chairman's Mark

Offered by Representative Kaptur

### Adjust Function 800

1. Increase budget authority and outlays for Function 800 by the following amounts in billions of dollars to ensure that taxpayer data is protected from unlawful access of US fiscal databases by unauthorized persons.

	2026	2027	2028	2029	2030	2031	2032	2033	2034	2035
BA	.01									
Outlays	.01									

2. Make all necessary and conforming changes to the Chairman's mark.
3. Amend the committee report to reflect the following policy assumptions:

The resolution assumes there is bipartisan support for protecting our nation's financial data and systems of record. Access to U.S. Government fiscal service systems and systems of record has already occurred by the so called Department of Government Efficiency, creating uncertainty and chaos in our federal workforce, foreign allies, and corporate partners. This budget ensures those with money and political power are not weaponized to disrupt our nation's critical workforce or damage its system for upholding privacy and our Congressional power of the purse to appropriate funds.
