

Sara Baldwin, Director of Electrification Policy with Energy Innovation, leads the firm's electrification policy practice area, providing research and analysis on the pathways to electrify and decarbonize buildings, transportation, and some industry. She is the co-author of several publications, including *Assessing the Viability of Hydrogen Proposals: Considerations for State Utility Regulators and Policymakers*, *Accelerating Clean, Electrified Transportation By 2035: Policy Priorities*, and *Increasing Electric Vehicle Charging Access At Multi-Unit Dwellings*. Over her 18-year career, she has also served as V.P. of Regulatory for the Interstate Renewable Energy Council and as Senior Policy Associate for Utah Clean Energy. She serves on GridLab's Advisory Board and is host of the Electrify This! podcast. A Utah native, she holds degrees from the University of Utah and resides in Salt Lake City.
