1. In my opinion, one of the most important things about ERISA is that it has enabled employers to develop initiatives and interventions to help their employees stay healthy and active participants in the workforce. I know employers spend a lot of time, energy, and resources to develop their workforce and so keeping them healthy is of critical importance. Can you discuss how ERISA has helped employers keep a healthy workforce, specifically as it relates to employees with chronic diseases or ongoing health care challenges?
2. Too often some of my friends on the other side of the aisle see government programs as the best possible solution. However, in my opinion, actively engaging individuals in their health care and keeping them active in the workforce is the most ideal outcome. Can you comment on the benefits of engaging individuals in their own health care, as well as the benefits of keeping employees active in the workforce?
