

Mr. Johan Land, Senior Vice President, Product and Engineering, Safety and AI, Samsara, San Francisco, California. Founded in 2015, Samsara is an AI and IoT technology company that specializes in workplace products aimed at increasing safety, efficiency, and sustainability. Its products are used primarily in transportation but are also found in construction, wholesale and retail trade, field services, logistics, manufacturing, utilities and energy, government, health care, and education. Mr. Land joined Samsara in January 2025, where he oversees the product and engineering teams to create products that better predict and prevent risk, recognize and reward safe driving behaviors, and bring real-time intelligence to the workplace. Prior to joining Samsara, he served in roles with TomTom, Waymo, and Google. He received a Master of Science degree from the KTH Royal Institute of Technology in Stockholm, Sweden, and an MBA from the Harvard Business School.
