555 12th Street NW, Suite 1001
Washington, D.C. 20004

1-800-552-5342
NFIB.com

Dear Representative,

On behalf of NFIB, the nation's leading small business advocacy organization, I present the petition signatures of 10,000 small business owners nationwide urging Congress and the administration to protect small businesses by rejecting the establishment of any heat standard.

Small businesses are the foundation of the American economy, yet millions of small businesses are about to face a massive new regulation called the heat standard. A heat standard will devastate nearly every small employer across the country with crippling new paperwork and recordkeeping requirements and unworkable new mandates that will harm small businesses and their employees.

A new heat standard will also empower OSHA with new regulatory authority and ability to impose significant fines even as small businesses already protect their employees from workplace heat hazards. On top of that, OSHA's General Duties Clause already provides a robust enforcement mechanism for OSHA to target bad actors who are not taking steps to ensure workplace safety. The proposed heat standard is simply a solution in search of a problem.

The *Heat Workforce Standards Act* (H.R. 6213/S. 4427) would protect small businesses from this onerous proposal. The legislation will stop the Biden administration's proposed heat standard from being finalized and prevent a future administration from enacting a heat standard. Small businesses urge President Trump to withdraw the Biden heat standard proposal and urge Congress to enact the *Heat Workforce Standards Act*.

Sincerely,

Elizabeth A. Milito

Elizabeth A. Milito
Vice President, NFIB Small Business Legal Center

Tell Congress: Pass the Heat Workforce Standards Act to protect small businesses.
