

CALIBER

Jaime Angell is Senior Director, Apprenticeships & Transitional Programs at Caliber, where she leads initiatives to build sustainable technician pipelines and expand career pathways in the collision repair industry.

Raised in a collision repair family, Jaime developed early technical and industry knowledge, later gaining hands-on experience across all areas of shop operations—from detailing and parts to estimating and production—leading to managing a shop by age 24. She holds an MBA and MSM in Organizational Training and Development from the University of Denver.

Jaime is a recognized leader in workforce development and industry advancement, having served as Colorado State SkillsUSA Technical Chair, I-CAR Instructor, and Advisory Council President for a vocational collision program. At Caliber, she plays a key role in advancing the Technician Apprenticeship Program (TAP) and mentoring future technicians and leaders.

A strong advocate for women in the trades, Jaime has led initiatives that increase female participation, mentorship, and leadership development across the industry. Her work reflects a deep commitment to bridging education and industry needs, strengthening the workforce, and ensuring long-term industry growth.
