

Brian Eyler, Senior Fellow and Director

Stimson Center Southeast Asia Program

Brian Eyler directs the Southeast Asia Program and the Energy, Water, and Sustainability Program. He is an expert on transboundary issues in the Mekong region and specializes in China's economic cooperation with Southeast Asia. He spent more than 15 years living and working in China and over the last two decades has conducted extensive research with stakeholders in the Mekong region. He is widely recognized as a leading voice on environmental, energy, and water security issues in the Mekong. Brian is co-lead on the Mekong Dam Monitor, the winner of 2021 Esri Special Achievement in GIS Award, 1st Prize in the 2021 Prudence Foundation's Disaster Tech Competition, and the Renewable Natural Resources Foundation's 2021 Outstanding Achievement Award. He also serves as chair of the Stimson Center's War Legacy Working Group. His first book, *Last Days of the Mighty Mekong*, was published by Zed Books in 2019. He holds a MA from the University of California, San Diego and a BA from Bucknell University.
