

**Andrew Holland** is the American Security Project's Senior Fellow for Energy and Climate. He is a Washington-based expert on energy, climate change, and infrastructure policy. He works at the center of debates about how to achieve sustainable energy security and how to effectively address climate change.

He served as Legislative Assistant on Energy, Environment, and Infrastructure for United States Senator Chuck Hagel of Nebraska for three years from 2006 through 2008. He worked in the US House of Representatives for the House Ways and Means Committee and the Office of Congresswoman Roukema.

He holds a Master's Degree in International Strategy and Economics from the University of St. Andrews in Scotland and a Bachelor's Degree in History and Economics from Wake Forest University in North Carolina.

He is originally from New York City, grew up in New Jersey, and currently resides in Alexandria, VA.

### **Additional Skills and Experience**

He is an experienced writer and strategic analyst. He is widely cited in the media on energy and environmental policy. He has spoken about energy security, Arctic policy, and water resources at high-level events in South Korea, Brussels, Washington, London, Berlin, Geneva, and China.

In 2009 and 2010, he was the manager of the Transatlantic Dialogue on Climate Change and Security for the London-based International Institute for Strategic Studies (IISS). This dialogue, funded by the European Commission, brought together subject experts from government, the military, NGOs, Think Tanks, and academia to discuss the impacts of climate change on food, water, and energy security. He has a close relationship with a diverse group of energy, security, and environmental experts from around the world.

He is a member of the Emerging Leaders in Energy and Environmental Policy (ELEEP) Network, a transatlantic network operated by the Atlantic Council and the Ecologic Institute, and is a member of the IISS.
