

Dougbeh-Chris Nyan, M.D. is medical doctor and a biomedical research scientist of Liberian origin. He earned his medical degree from the Medical Faculty of the Humboldt-University of Berlin in the Federal Republic of Germany and was trained as a scientist at the National Institutes of Health (NIH). Dr. Nyan specializes in infectious disease diagnostics. His expertise focuses on developing simple and rapid diagnostic tests for detecting blood-borne infections/pathogens such as HIV, Hepatitis B virus, Hepatitis C virus, Hepatitis E virus, Dengue virus, West Nile virus, and Chikungunya virus. Dr. Nyan is currently a scientist at the Laboratory of Emerging Pathogens of the Division of Emerging and Transfusion Transmitted Diseases at the US Food and Drug Administration (FDA). His latest work on Hepatitis B virus diagnosis was recently published in the journal, "Clinical Infectious Diseases". Dr. Nyan currently heads the Diaspora Liberian Emergency Response Task Force on the Ebola Crisis, a conglomeration of Liberian professionals and Diaspora organizations in the fight against the Ebola outbreak in Liberia and the Sub region.
