Border Protection**

## **CBP Enforcement Statistics**

U.S. Customs and Border Protection is the nation's largest federal law enforcement agency charged with securing the nation's borders and facilitating international travel and trade. Our top priority is to keep terrorists and their weapons from entering the United States.

At the nation's more than 300 ports of entry, CBP officers have a complex mission with broad law enforcement authorities tied to screening all foreign visitors, returning American citizens and imported cargo that enters the U.S. Along the nation's borders, the United States Border Patrol and Air and Marine Operations are the uniformed law enforcement arms of CBP responsible for securing U.S. borders between ports of entry.

Visit CBP's [Southwest Border Migration](#) page for demographic information regarding apprehensions and inadmissibles on the southwest border and the [Assaults and Use of Force](#) page for data on assaults on agents and officers, and uses of force by CBP personnel.

## Border Searches of Electronic Devices

In addition to longstanding federal court precedent recognizing the constitutional authority of the U.S. Government to conduct border searches, numerous federal statutes and regulations also authorize CBP to inspect and examine all individuals and merchandise entering or departing the United States, including all types of personal property, such as electronic devices. See, for example, 8 U.S.C. §§ 1225, 1357 and 19 U.S.C. §§ 482, 507, 1461, 1496, 1499, 1581, 1582. CBP established strict guidelines for conducting border searches of electronic devices in its January 2018 [Directive on Border Searches of Electronic Devices](#).

Border searches of electronic devices have helped detect evidence relating to terrorist activity and other national security matters, child pornography, drug smuggling, human smuggling, bulk cash smuggling, human trafficking, export control violations, intellectual property rights violations and visa fraud. In Fiscal Year 2020, CBP processed more than 238 million travelers at U.S. ports of entry. During that same period of time, CBP conducted 32,038 border searches of electronic devices, representing less than .014 percent of arriving international travelers.

The Terrorist Screening Dataset (TSDS) – also known as the “watchlist” – is the U.S. government’s database that contains sensitive information on terrorist identities. The TSDS originated as the consolidated terrorist watchlist to house information on known or suspected terrorists (KSTs) but has evolved over the last decade to include additional individuals who represent a potential threat to the United States, including known affiliates of watchlisted individuals.

Encounters of watchlisted individuals at our borders are very uncommon, underscoring the critical work CBP Agents and Officers carry out every day on the frontlines. DHS works tirelessly to secure our borders through a combination of highly trained personnel, ground and aerial monitoring systems, and robust intelligence and information sharing networks.

TSDS watchlisted non-citizens encountered by the CBP Office of Field Operations at land ports of entry prior to entry into the United States may be denied admission to our country upon presentation, barring justification for their arrest under CBP policy. TSDS watchlisted individuals encountered by the U.S. Border Patrol (USBP) after entering the country without inspection may be detained and removed, to the extent possible under CBP policy, or turned over to another government agency for subsequent detention or law enforcement action, as appropriate.

\*POE totals may include multiple encounters of the same individual.
