

Dr. Rachel Cleetus is the policy director with the Climate and Energy program at the Union of Concerned Scientists. She is an expert on effective and equitable policies to advance clean energy and address climate change to bring widespread economic and public health benefits.

Dr. Cleetus has over twenty years of experience working on policies to promote renewable energy, drive deep cuts in heat-trapping emissions, and enhance climate resilience. She also researches the risks and costs of climate impacts on people and the economy. She has co-authored numerous reports and articles, including *Looming Deadlines for Coastal Resilience: Rising Seas, Disruptive Tides, and Risks to Coastal Infrastructure*; *Accelerating Clean Energy Ambition*; *Compound Climate Risks in the COVID-19 Pandemic*; *A Transformative Climate Action Framework: Putting People at the Center of Our Nation's Clean Energy Transition*; *Killer Heat in the United States: Climate choices and the future of Dangerously Hot Days*; and *Underwater: Rising Seas, Chronic Floods, and the Implications for US Coastal Real Estate*.

Dr. Cleetus holds a Ph.D. and an M.A. in economics from Duke University and a B.S. in economics from West Virginia University. She has testified several times before Congress; served as a member of the National Academies Roundtable on Macroeconomics and Climate-related Risks, and Opportunities; and has been quoted widely in the media.
