

Charles Carmakal is the Chief Technology Officer of Mandiant Consulting. He oversees a team of incident responders, analysts, and security consultants that have helped thousands of organizations respond to complex security breaches orchestrated by foreign governments and organized criminals. Charles led the teams that discovered and responded to some of the most impactful security events, including the SolarWinds supply chain attack and the Colonial Pipeline cyber disruption. Charles has over 20 years of experience helping organizations become more resilient to cyber attacks.

Charles has significant experience helping Fortune 500 organizations build and enhance security programs to combat advanced attacks. He provides strategic security guidance to executive leadership and boards of directors.

Prior to joining Mandiant, Mr. Carmakal served in various leadership roles within PwC in the US and Australia. He received Bachelor's and Master's degrees in Decision and Information Sciences from the University of Florida.
