

Trump's Approval Rating Drops to Term-Low amid Israel-Iran War

Eddie Pan

Jun 23, 2025, 03:13 PM

A+

A-

Americans are growing unhappier with President Trump's policies, which include global tariffs and strikes on Iran's nuclear facilities over the weekend. That's resulted in his approval rating falling to 41%, the lowest since he was sworn in as President in January, according to a

45% of surveyed participants were opposed to the recent Iran strikes while 36% voted in favor, with the remainder declining to answer or selecting "unsure." Within surveyed Republicans, 69% supported the strikes while 17% were against them.

Americans Worried about Israel-Iran War while S&P 500 Trudges Higher

Furthermore, 79% of the survey respondents said they were worried that U.S. citizens would

Investment Ideas

be targeted as a result of the Iran strikes while 84% expressed concern about the war.

The S&P 500 ([SPX](#)) has largely shrugged off the conflict and has posted a positive return since Israel first struck Iran on June 13. That signals that investors are betting that the war will either be short-lived or have a nonmaterial impact on U.S. stocks. The market may provide a better signal than the poll because investors are putting their hard-earned capital on the line.

The [S&P 500](#) is up by 1.47% year-to-date.

Disclaimer: The TipRanks Smart Score performance is based on backtested results. Backtested performance is not an indicator of future actual results. The results reflect performance of a strategy not historically offered to investors and does not represent returns that any investor actually attained. Backtested results are calculated by the retroactive application of a model constructed on the basis of historical data and based on assumptions integral to the model which may or may not be testable and are subject to losses. General assumptions include: XYZ firm would have been able to purchase the securities recommended by the model and the markets were sufficiently liquid to permit all trading. Changes in these assumptions may have a material impact on the backtested returns presented. Certain assumptions have been made for modeling purposes and are unlikely to be realized. No representations and warranties are made as to the reasonableness of the assumptions. This information is provided for illustrative purposes only. Backtested performance is developed with the benefit of hindsight and has inherent limitations. Specifically, backtested results do not reflect actual trading or the effect of material economic and market factors on the decision-making process. Since trades have not actually been executed, results may have under- or over-compensated for the impact, if any, of certain market factors, such as lack of liquidity, and may not reflect the impact that certain economic or market factors may have had on the decision-making process. Further, backtesting allows the security selection methodology to be adjusted until past returns are maximized. Actual performance may differ significantly from backtested performance. Backtested results are adjusted to reflect the reinvestment of dividends and other income and, except where otherwise indicated, are presented gross-of fees and do not include the effect of backtested transaction costs, management fees, performance fees or expenses, if applicable. Please note all regulatory considerations regarding the presentation of fees must be taken into account. No cash balance or cash flow is included in the calculation.
