Matt Blaze is the McDevitt Professor of Law and Computer Science at Georgetown University. From 2004 to 2018, he was a professor of Computer and Information Science at the University of Pennsylvania. From 1992 to 2003, he was a research scientist at AT&T Bell Laboratories in New Jersey. He holds a PhD in computer science from Princeton University, an MS in computer science from Columbia University, and a BS from the City University of New York. His research focuses on large-scale secure systems, surveillance, voting, and similar problems that lie at the intersection of technology and public policy. He has led voting systems security studies on behalf of two states, is a founder of the DEFCON Voting Village, and has been called upon numerous times by various government entities to offer analysis and advice on securing election systems.
