

I am a diabetic and lost two toes last year 2022, and one the previous year 2021.

On November 4th of 2022, my home health nurse was treating an open wound on my right big toe because of a recent amputation. She noticed that the toe next to it got infected and called my podiatrist. She was told to tell me to admit myself into the emergency room as soon as possible.

On way to emergency room, I stopped at the Luzerne County election bureau to cast an absentee vote. I believe that voting is one of the most important things an American Citizen could and should do.

When I got to the Bureau of Elections, I explained what was going on, and asked to sot submit an emergency ballot.

I was given one and filled it out immediately. After filling it out, the person put it in a manila security envelope, sealed it in front of me. I asked if there was anything else I needed to do, and she answered "No", and then she proceeded to take the ballot towards the back. I left for the hospital.

I went to the hospital and was admitted. I stayed the weekend getting antibiotics and I had the toe, that was infected, amputated on Monday. I was released the same day.

On Tuesday, November 8th, not feeling confident nor trusting the Luzerne County Bureau of Elections history nor their staffing, I went to the polling place to confirm my vote was submitted and counted. I believe they do not hire the best person for the job at the Bureau, but they hire their friends and people with the same party affiliations and party agenda. I believe I also have proof that this occurs. After a recent hiring, I filed a Right TO Know for the applications of all that applied to the position of deputy Director of Elections. I wanted to see if Luzerne County hired the best applicant for the job. Luzerne County denied my request, so I appealed to the State. I won and the applications shows that the best person was passed over for a connected elected official.

Back to November 8th; When I got to my polling place, I explained the forementioned and asked if they could check to if my vote was counted. They checked and said that it was not and could not find me on the voter list. They then called to the Bureau and the Bureau to see what they should do. The Bureau said I was "inactive". I said "That is impossible, I voted in the last election, here. That you guys questioned my signature the last time." They stayed on the phone and reiterated what I said. I then overheard a woman calling out to another asking about me. The she said over the phone that they had me at two different addresses and they found me. They also said they have no record of me voting, to have me do a provisional. I

questioned that, I said "Isn't that illegal? I cannot vote twice." They assured me that I would not get in trouble and they would find out if I voted twice and only one would count. So, I filled out the provisional and I was done for that day.
