

**Alexander Botting**

Senior Director, Global Security & Technology Strategy, Venable LLP

Alexander Botting has extensive experience in international policy, having shaped policies at the intersection of security, technology & telecommunications in more than 60 countries and multilateral organizations around the world. In his role at Venable, Alexander leads initiatives encompassing cybersecurity, Open RAN, and the security of subsea cables.

Alexander most recently served as director for global regulatory cooperation at the U.S. Chamber of Commerce, where he led initiatives in the areas of cybersecurity, emerging technologies, and regulatory cooperation. During his tenure at the Chamber, Alexander launched global cybersecurity and law enforcement access initiatives, championing an enabling policy environment for trade and the digital economy on behalf of several dozen member companies. He also provided guidance to senior Chamber and member company executives on technology policy issues, while managing relationships with officials in the White House, Department of Commerce, Department of State, and USTR.

Before joining the Chamber, Alexander spent two years in Chicago as a consultant at a leading provider for global business intelligence and strategic market analysis, where he worked with a range of Fortune 500 companies to create international expansion and product development strategies.

Alexander is a Global Fellow at NYU's Wahba Institute for Strategic Competition and has served as a member of OECD Expert Groups on cybersecurity policy and Data Free Flows with Trust (DFFT).
