Debbie Taylor Moore leads North America's Quantum Safe & Secure AI efforts for IBM Consulting. She is a 20+ year cybersecurity executive and SME on emerging and converging technologies in cybersecurity. Debbie has worked with government and industry at the forefront and inflection point of enterprise security program development and implementation for Cloud, Mobile, IoT, AI for Robotics, Generative AI and Quantum Safe/Quantum Computing.

Debbie has worked globally across 22 countries and 4 continents. Debbie helps organizations achieve successful results through rigorous planning and execution. Debbie has directly collaborated with the U.S. Federal government on a variety of public/private cybersecurity initiatives, examples include:

- RMF (Risk Management Framework)
- CDM (Continuous Diagnostic Mitigation)
- CSF (Cybersecurity Framework)
- FedRAMP Initial 3PAO for Cloud Service Providers ATOs (Authority to Operate)

Debbie currently serves on the Pentagon's Independent Cyber AB Board of Directors, and the Board of Industry Leaders for the Consumer Technology Association, along with a variety of early stage cyber tech councils. She has been a founder and CEO for two cyber accelerators.

She has also led security organizations at SecureInfo, Kratos Defense, Verizon Business and others.
