

**Tim O'Neill** is an accomplished global Chief Information Security Officer and Product Security Leader with 30+ years of experience in cybersecurity, fraud, and abuse management. Prior to his current role as Vice President, Chief Information Security Officer & Product Security with Hitachi Vantara, Tim held executive leadership roles at Amazon, Hewlett Packard, and Blue Shield of California. He also served as a law enforcement officer focused on cybercrime forensics and investigations.

Tim has a proven track record of developing and implementing successful security strategies that protect global and regulated organizations, its products/services, and their customers from cyber incidents and data breaches, thus enabling them to meet business objectives. He has broad experience, including within the following sectors: technology, financial services, healthcare, manufacturing, e-commerce, and government.

Tim is a cybersecurity expert in strategy, risk management, compliance, engineering and ops, threat and incident management. He maintains a deep understanding of emerging technologies, security threats, solutions, and trends. He holds multiple cybersecurity certifications; has instructed private-sector and law enforcement in the field of cybersecurity; has been recognized by the International High Tech Crime Investigators Association; and awarded a Silver Star for bravery in the line of duty.
