

Kimberly Denbow

Vice President, Security and Operations

Kimberly Denbow is the Vice President of Security & Operations at the American Gas Association (AGA). She is also the Executive Director of the Downstream Natural Gas Information Sharing & Analysis Center (DNG-ISAC). Over the course of her 27 years with AGA, she has served as staff executive for multiple AGA Safety, Operations, Engineering & Security Section technical committees covering security, safety, gas control, underground storage, field operations, environment, and supplemental gas. At present, she leads the AGA Board Safety & Security Committee and the AGA Cybersecurity Strategy & Regulatory Action Committee. Kimberly helped build AGA's cyber and physical security program, stood up the DNG-ISAC, and developed AGA's Emergency Preparedness Program. She also supports pipeline resilience and reliability initiatives.

Kimberly serves as the industry liaison to numerous U.S. Department of Homeland Security and Department of Energy (DOE) natural gas physical and cybersecurity programs. She was an inaugural voting member of the Transportation Security Administration Surface Transportation Security Advisory Committee, in which she helped stand-up and co-chair the Cybersecurity Subcommittee. She also served the maximum term as a voting member of the DOE Electricity Advisory Committee. Kimberly is an active member of the Oil & Natural Gas Subsector Coordinating Council (ONG SCC), where she stood up and co-chairs the Cybersecurity Work Group. She has testified before Congress on the matters of cybersecurity incident reporting and the value of the government/industry partnership.

Kimberly holds a Bachelor of Science in marine biology from the University of Florida and a Master of Science in Environmental Engineering from the University of Michigan.
