**SHORT BIO OF SHANE PAULSEN FRY, CTO, RUNSAFE SECURITY, INC**

Shane Fry is the CTO at RunSafe Security, Inc. He has over a decade of experience in cybersecurity, on both the offensive and defensive sides of the house. Shane began his career performing vulnerability assessments on a variety of software platforms, including Unix/Linux-based operating systems, Mac OS, Android and iOS devices, internet browsers, and cloud computing platforms. His research has spanned all layers of the hardware and software stack, including physical circuit security, secure boot, software update, memory corruption, and web-application vulnerabilities. Shane has worked for the US Government, a large prime contractor, and numerous cybersecurity startups.
