## Pulmonary Fibrosis FOUNDATION

September 8, 2020

The Honorable Cathy McMorris Rogers  
U.S. House of Representatives  
Washington, D.C. 20515

Dear Representative McMorris Rogers:

On behalf of the undersigned organizations, we want to express our support for H.R. 8158, your legislation to suspend the budget neutrality requirement for oxygen under the Medicare program. We greatly appreciate your leadership on this critical issue.

The Medicare competitive bidding program has yielded significant budget savings for the Centers for Medicare and Medicaid Services (CMS), but it has also resulted in unintended reductions in access to supplemental oxygen for many Medicare beneficiaries. As we have communicated with your office and many of your colleagues on the Energy and Commerce Committee, the precipitous drop in Medicare reimbursement for supplemental oxygen has led to nationwide problems with access to supplemental oxygen. Barriers to access and service disruptions have impacted all types of supplemental oxygen delivery systems, however, the impacts are most acute for liquid supplemental oxygen.

CMS has recognized the problem and recently implemented changes in payment policy to change reimbursement for supplemental oxygen. While we recognize and appreciate CMS' acknowledgement of the problem, the payment changes they made were constrained by budget neutrality requirements and were insufficient to address the problem. If enacted, your legislation would give CMS the administrative flexibility it needs to truly address the issue and restore Medicare beneficiary access to supplemental oxygen.

As physicians and health care professionals who care for and as organizations who advocate for patients in need of supplemental oxygen, we appreciate your persistent advocacy to address barriers to supplemental oxygen under the Medicare program. Thank you for your leadership.

Sincerely,
