CTIA Statement on \$7.6 Billion Emergency Connectivity Fund Provision

WASHINGTON – Please attribute the following to CTIA® Senior Vice President, Government Affairs, Kelly Cole.

“We commend Chairman Pallone and the House E&C Committee for recognizing the urgent need to help kids participate in remote learning and taking swift action to address that need. Wireless providers have partnered with schools across the country to connect millions of kids to their peers and teachers through mobile hotspots, and this legislation builds on that work. We look forward to working with Congress and the FCC to harness mobile wireless services to close the homework gap for good.”
