

AMENDMENT TO DRAFT OVERSIGHT PLAN

HE #17

On page 3, after “The Committee will continue to examine issues related to affordability of health care, including areas where federal government intervention has contributed to increased costs for patients and families.”, insert—

“The Committee will examine the effects of cutting federal Medicaid funding for those made eligible by Medicaid expansion on rates of uninsurance, out-of-pocket costs, and medical debt for low-income Americans, particularly in states with laws that require the termination of medical assistance for people covered under Medicaid expansion if the matching rate is reduced below 90%.”
