Attachment—Additional Questions for the Record

The Honorable Tim Murphy

1. Why do you think there are so many misconceptions about HIPAA? Do you think more training would help dispel the myths that many health workers have about the law? Whose responsibility is it to dispel these myths and clarify the privacy rule?
2. Do you have any thoughts on how well HHS has communicated with the health profession? Do you think HHS needs to dialogue more with doctors and professional associations? What would this dialogue look like?
