Joe,

If this does not pass CPIT this Friday, I would like to have a specific review with the leadership team. At VPR PQSR, I believe that I received full support to go ahead with this change.

Subject URGENT Request! PRTS 1078137: PWO 1070202 Cobalt Key Hole Change to Address Customer Complaint

Gentleman!

This issue has been around since man first lumbered out of sea and stood on two feet. In fact, I think Darwin wrote the first PRTS on this and included as an attachment as part of his Theory of Evolution. Anyhow, there is an active PRTS in the system as of 18 Feb. Also, a PWO has been generated to revise the key hole to address this issue. I am suggesting we review this at CPIT this Friday and make a decision once and for all based on the business case.

Brad:

Can you please add this to the agenda for this Friday's CPIT?

Dave:

Please be prepared to review the PRTS and PWO/solution with business case & metrics to enable the CPIT to render a decision.

Thx All!

Joe
