

Committee on Energy and Commerce
U.S. House of Representatives
 Witness Disclosure Requirement - "Truth in Testimony"
 Required by House Rule XI, Clause 2(g)

1. Your Name: <u>Jeremy Martin</u>		
2. Are you testifying on behalf of the Federal, or a State or local government entity?	Yes	No <input checked="" type="checkbox"/>
3. Are you testifying on behalf of an entity that is not a government entity?	Yes <input checked="" type="checkbox"/>	No
4. Other than yourself, please list which entity or entities you are representing: <u>The Union of Concerned Scientists (UCS)</u>		
5. Please list any Federal grants or contracts (including subgrants or subcontracts) that you or the entity you represent have received on or after October 1, 2011: <u>None</u>		
6. If your answer to the question in item 3 in this form is "yes," please describe your position or representational capacity with the entity or entities you are representing: <u>I am a senior scientist employed by UCS</u>		
7. If your answer to the question in item 3 is "yes," do any of the entities disclosed in item 4 have parent organizations, subsidiaries, or partnerships that you are not representing in your testimony?	Yes	No <input checked="" type="checkbox"/>
8. If the answer to the question in item 3 is "yes," please list any Federal grants or contracts (including subgrants or subcontracts) that were received by the entities listed under the question in item 4 on or after October 1, 2011, that exceed 10 percent of the revenue of the entities in the year received, including the source and amount of each grant or contract to be listed: <u>None</u>		
9. Please attach your curriculum vitae to your completed disclosure form.		

Signature

Date: July 19, 2013

Dr. Jeremy Martin is a Senior Scientist in the Union of Concerned Scientists' Clean Vehicles Program. His recent report for UCS, "The Promise of Biomass: Clean Power and Fuel – If Handled Right," quantifies the opportunity to produce clean biofuels made from waste products and environmentally friendly perennial grasses. Realizing this potential is a key element of the broader UCS plan to cut projected oil use in half over the next twenty years. He has also studied the role of biofuels in "The Energy Water Collision," a UCS investigation of the connections

between energy and water use. Most recently Jeremy has focused on improving biofuels tax policy to support innovation and cleaner fuels while building on the policy framework of the Renewable Fuels Standard.

Dr. Martin has also played an active technical role in the EPA's Renewable Fuel Standard Regulations and served as a member of the California Air Resources Board's Low Carbon Fuel Standard Expert Workgroup. Dr. Martin is the author of more than 15 technical publications and 13 patents on topics ranging from biofuels lifecycle accounting to semiconductor manufacturing and polymer physics.

Before joining UCS, Dr. Martin worked in research, development and manufacturing of computer chips at Advanced Micro Devices. Dr. Martin received his Ph.D. in chemistry and chemical engineering from the California Institute of Technology and a bachelor's degree in chemistry and English literature from Haverford College.
