9. Please attach your curriculum vitae to your completed disclosure form. see Attachment		

Signature:  **Date:** November 12, 2013 /

Anthony S. Campbell

President & Chief Executive Officer, East Kentucky Power Cooperative

Anthony S. Campbell is President and CEO of East Kentucky Power Cooperative (EKPC), a generation & transmission cooperative based in Winchester, Ky. EKPC provides wholesale electricity to 16 distribution cooperatives that serve 521,000 Kentucky homes, farms, businesses and industries across 87 counties. EKPC provides power through three coal-fired plants located in Mason, Clark and Pulaski counties, as well as renewable energy plants in Boone, Laurel, Greenup, Hardin and Pendleton counties, along with gas peaking units, hydro power and more than 2,800 miles of transmission lines.

Before joining EKPC in June 2009, Campbell served as CEO of Citizens Electric Corporation (CEC), a transmission and distribution company located in Southeast Missouri. CEC's transmission system has 345 kV, 161 kV and 138 kV lines, and 7 bulk substations. CEC is unique to the cooperative world because it serves a certificated territory which includes many large industrial customers including Proctor & Gamble, Holcim Cement and several lime mining operations, to name a few.

Campbell began his career at CEC in August 2003. During his tenure, CEC's load grew 46 percent. In addition, CEC's power supply issues were a major challenge, and Campbell was instrumental in integrating Citizens Electric into Wabash Valley Power Association (WVPA).

Campbell has served on multiple boards and committees including the following:

- WVPA
- Association of Missouri Electric Cooperatives (AMEC)
- ACES Power Marketing
- Illinois Governor Ryan's Environmental Committee
- Illinois Coal Development Committee

Throughout his career, Campbell has headed the development of a coal-fired generation plant and been involved in the development of simple-cycle gas plants. He has worked on issues with the Missouri Public Service Commission, the Illinois Environmental Protection Agency, the Federal Environmental Protection Agency, the Federal Energy Regulatory Commission, the Midwest Independent System Operator, the Southeast Electric Reliability Council and multiple Federal and State political leaders.

Campbell earned his Bachelor of Science degree in Electrical Engineering from the University of Southern Illinois at Carbondale and his Masters of Business Administration from the University of Illinois at Champaign. A native of Central Illinois, Campbell has been active in the community throughout his career.
