JOHN J. SULOWAY

SUMMARY

Experienced professional with over 35 years in project development, licensing, and environmental research. Extensive experience in project evaluation, regulatory processes, public relations, contract negotiations, and management of environmental, economic and engineering studies. Demonstrated leadership, staff development, and organizational abilities. Excellent communication skills.

PROFESSIONAL EXPERIENCE

New York Power Authority - Retired

Vice President of Project Development, Licensing & Compliance: July 2008 – December 2014

Executive Director of Licensing, Implementation & Compliance: September 2003 - July 2008

Director of Licensing: December 1984 - September 2003

Assistant Director of Licensing: December 1982 - December 1984

Responsible for project development and licensing of the New York Power Authority's (NYPA) generation and transmission facilities as well as for license compliance and implementation.

- **Managed NYPA's Small Hydro Program including environmental, engineering and economic studies for approximately 10 sites. Prepared applications and received regulatory approvals for four sites (20 MW).**
- **Obtained a new 50 year Federal Energy Regulatory Commission (FERC) license for the St. Lawrence-FDR Project through the groundbreaking Cooperative Consultation Process and by negotiating a comprehensive settlement agreement with the Local Governments, the New York State Office of Parks, Recreation and Historic Preservation; Department of Environmental Conservation; the U. S. Fish and Wildlife Service; and several non-governmental organizations.**
- **Managed the implementation of NYPA's new 50-year licenses for the 912 MW St. Lawrence Project and 2700 MW Niagara Project with a combined budget exceeding \$600 million including community projects and funds, recreational facilities and environmental enhancement projects.**
- **Obtained amendment of the FERC license for the Blenheim-Gilboa Pumped Storage Project to replace the pump turbines and increase the generating capacity from 1040 MW to 1160 MW.**

- Licensed a 500 MW Combined Cycle Plant in Astoria, Queens, New York to meet the capacity requirement for New York City using a Public Involvement Program to encourage extensive participation by stakeholders including the Queens Borough President, the City Council Speaker, Congressmen and Community Boards in Queens and the Bronx.
- Sited and licensed 450 MW of natural gas-fired combustion turbines at seven sites in the New York Metropolitan Area in a highly accelerated, 10-month effort at the request from the New York Department of Public Service to address a projected shortfall of generating capacity for the summer of 2001.
- Sited and licensed the 150 MW Flynn Combined Cycle Plant as part of successful competitive bid to the Long Island Lighting Company.
- Completed Feasibility Study for a 500 MW Combined Cycle Plant in New York City to replace the 825 MW Poletti Facility which was retired in 2010.
- Represented NYPA in the development of the New York Transco, a public/private, statewide transmission company composed of affiliates of the six incumbent transmission owners in New York State.
- Conducted technical and economic studies with three major utilities on a 400 mile, 345 kV transmission line from the Canadian border to New York City and Long Island with an estimated cost of \$6 billion.
- Licensed a \$375 million, 27 mile, 345 kV buried/submarine transmission line from Westchester County to Long Island including testifying as expert witness in adjudicatory hearings before the New York State Public Service Commission.
- Licensed a 23 mile, 46 kV transmission line in the Adirondack Park. Regulatory approvals were obtained from the Adirondack Park Agency, New York State Department of Conservation (DEC) and U.S. Army Corps of Engineers using an extensive public outreach program. The project required amendment of the New York State Constitution and was supported by local communities and environmental groups. This \$36 million project was a joint venture with National Grid.
- Developed NYPA's Project Development and Licensing Capabilities including recruiting and training staff, hiring consultants and preparing a manual for Project Development of Transmission Project
- Developed an Environmental Compliance Audit Program to assure that NYPA's facilities are in conformance with all applicable environmental laws, regulations, permits, policies and procedures. The program has been expanded to include health and safety audits.
- Managed engineering, environmental and economic studies for biomass and resource recovery projects.

Chas. T. Main, Inc. – Ecologist/Toxicologist

July 1981 – December 1982

- Conducted environmental studies and prepared licensing documents for several small hydro projects.
- Participated in environmental and routing studies for transmission and generation projects.

**Illinois Natural History Survey – Research Associate
June 1975 – July 1981**

- Investigated the ecological impacts of increased usage of coal including the toxicity of coal solid wastes and the ecological and health problems associated with fly ash.
- Conducted bioassays and literature reviews, collected and identified macroinvertebrates, collected and analyzed water samples, and prepared reports.

EDUCATIONAL EXPERIENCE

University of Illinois: Bachelor of Science Degree with honors, 1973.

University of Illinois: 1973 – 1981 Candidate for Doctor of Philosophy Degree. Completed all requirements except dissertation.

RECOGNITION

- **Dr. Kenneth Henwood Award – National Hydropower Association – 2015**
- **Secretary of the National Hydropower Association – 2015**
- **President of the National Hydropower Association – 2002 - 2003**
- **Director on the Board of National Hydropower Association**
- **Chairman of the Regulatory Affairs Committee of the National Hydropower Association**
- **Outstanding Steward of American Rivers awards from the National Hydropower Association.**
