Kieran Connolly

Vice President, Generation and Asset Management
Bonneville Power Administration

Kieran Connolly was named Bonneville Power Administration vice president of Generation and Asset Management in October, 2014. In this role, Connolly is responsible for management of the Federal Columbia River Power System in partnership with the US Army Corps of Engineers, the Bureau of Reclamation, and Energy Northwest to meet the multiple purposes authorized by Congress.

Beginning in April 2007, Connolly served as BPA manager of Generation Scheduling, which includes hydroelectric duty scheduling of the 31 dams in the Federal Columbia River Power System, day-ahead system planning and policy issues that impact real-time power system operations. Before that, Connolly was manager of Regional Coordination in Power Services Generation and Asset Management's Power and Operations Planning group. That job required knowledge of long-term system modeling, coordination with Canada and fish operations.

Connolly began his career at BPA in 1991 as a supply system analyst. He holds a B.S. degree in Business Economics from Willamette University and a Master's in Business Administration from the University of Portland. He lives in Beaverton, Ore., with his wife, Allison, and their three children.
