PAUL N. CICIO

Paul N. Cicio has been the President of the Industrial Energy Consumers of America (IECA) since its founding sixteen years ago. IECA is recognized as the “voice of the industrial energy consumer” in our nation’s capital. IECA testifies before Congress and federal agencies more than any other manufacturing trade association in the country on energy and environmental issues every year.

The Industrial Energy Consumers of America is a nonpartisan association of leading manufacturing companies with \$1.0 trillion in annual sales, over 2,900 facilities nationwide, and with more than 1.4 million employees worldwide. It is an organization created to promote the interests of manufacturing companies through advocacy and collaboration for which the availability, use and cost of energy, power or feedstock play a significant role in their ability to compete in domestic and world markets. IECA membership represents a diverse set of industries including: chemical, plastics, steel, iron ore, aluminum, paper, food processing, fertilizer, insulation, glass, industrial gases, pharmaceutical, building products, automotive, brewing, independent oil refining, and cement.

Mr. Cicio is a well-known consumer advocate for the industrial sector on issues related to energy and the environment and is recognized for his efforts within national and international circles.

Mr. Cicio graduated from Youngstown State University with a BS in Business Administration and Economics.
