Efficiency For All

Chair; co-founder

Green Eco Warriors

President; co-founder

PROFILE

Leticia is the CEO of Energy Efficiencies Solutions and the founder & co-chair of Efficiency For All, both based in Windsor, Connecticut. She is also the co-founder and operational manager of Best Insulation of Connecticut and Green Eco Warriors, a nonprofit providing STEAM based education and outreach to urban and at-risk youth.

Leticia founded Energy Efficiencies Solutions in 2010, and together with Best Insulation of Connecticut, has completed weatherization and comprehensive energy efficiency upgrades in over 12,000 Connecticut homes and 10 million square feet of multifamily properties. EES has been the recipient of several awards, including a 2013 U.S. Department of Energy Home Performance with Energy Star Award for Customer Service and Market Leadership, 2013 and 2017 Capital Workforce Partners Business Star Awards, 2015 Capital Workforce Partners Employer of the Year and a Building Performance Institute Hall of Fame inductee in 2015.

In 2017, Leticia co-founded Efficiency For All (EFA), a nonprofit trade organization for contractors and stakeholders in the energy efficiency industry. EFA's diverse membership allows for a multi-disciplinary approach to advocacy at the state and local level, which aids in conveying the benefits of energy efficiency to policy makers across the state.

Through Green Eco Warriors, Leticia has enlightened and educated over 10,000 children in over 100 schools with STEAM-based performances and outreach material. She is the author of seven children's books and an environmental hero comic book series.

Leticia serves as the policy chair for the Connecticut Energy Workforce Consortium and the advocacy co-chair for the Home Performance Alliance of Connecticut (HPACT).
