Arn McIntyre

Performance Home Corporation

Rockford, MI

Principle at Performance Home Corporation and McIntyre Builders Inc. Arn works as research support and consulting to the building industry. Working closely with Habitat for Humanity, the Home Innovation Research Labs and other industry groups in the design and performance improvement of residential structures as well as building forensics, performance modeling and energy audits. Arn was a founding member of the ANSI ICC 700 2008 committee developing the National Green Building Standard. He has worked with Ferris State University establishing the Michigan Energy Center which worked as a DOE Building America program. He is also a RESNET certified rater. At McIntyre Builders they have been focused on designing and constructing affordable value driven high performance homes for the market for 25 years. In doing so McIntyre Builders has been selected as a DOE Energy Value Housing Award recipient and State of Michigan Energy Star recipient. He is also a founding member of Green Built Michigan and built the first independently certified green home in Michigan in 2002. He holds an engineering and masters degree from Michigan State University and Western Michigan University respectively and has continually worked over the last 15 years to educate and advance the industry in better building practices that lead to highly efficient affordable homes.
