EXPERIENCE

GRID Alternatives, Washington, D.C.

Policy and Regulatory Manager

July 2018 – Present

- Advance policy measures in legislatures, regulatory arenas, coalitions, and other avenues to ensure that equity and inclusion are driving principles in the transition to a clean energy economy, with a focus on the Mid-Atlantic region and federal policy.
- Build and publicly promote the organization's policy leadership activities to bring the tangible benefits of solar and other clean energy technologies to underserved communities; work closely with communications, development, workforce, outreach, and construction teams.
- Support development and expansion of the nation's largest nonprofit solar installer and its model to develop and implement solar-based projects serving income-qualified households and affordable housing providers while providing solar education and hands-on job training.

Congressional Research Service, Washington, D.C.

Legislative Attorney, American Law Division

February 2015 – June 2018

- Wrote authoritative, nonpartisan, and timely reports, memoranda, and other analyses for Congress members and staff on legal inquiries pertaining to environmental, energy, and natural resources topics; gave presentations, briefings, and legal education courses.
- Worked closely with science and policy analysts in providing broad range of assistance to Congress on legislative drafting, strategizing, oversight functions, and media and constituent communications; demonstrated sensitivity to political contexts and diversity of perspectives.

Beveridge & Diamond, P.C., Washington, DC

Environmental Associate

September 2008 – February 2015

Summer Legal Associate

May – August 2007

- Advised and advocated for clients on various environmental, energy, and land use statutes and issues; tracked and analyzed pending legislative and regulatory proposals.
- Represented various corporate, institutional, and governmental clients as plaintiffs or defendants in state and federal environmental litigation and administrative proceedings.

Natural Resources Defense Council, Washington, DC

Legal Intern, Clean Air Project

May – August 2006

- Drafted pleadings, briefs, memoranda, rulemaking comments, and media releases.

Bachelor of Arts, *cum laude*, Environmental Biology

May 2005

Honors: Rector Scholarship; Science Research Fellows program

Alexandra (Andie) Wyatt is Policy and Regulatory Manager for GRID Alternatives. In that role, she works to ensure that equity is a driving principle in the transition to a clean energy economy, with a focus on the Mid-Atlantic region and federal policy. GRID, the nation's largest nonprofit solar installer, uses a unique people-first model to develop and implement solar projects that serve qualifying households and affordable housing providers, while providing solar education and hands-on solar career training. GRID's policy leadership efforts have brought the tangible benefits of clean energy, including electric bill savings, resilience, access to jobs and reduced pollution, to underserved communities nationwide.

Prior to GRID, Andie advised Congress members and staff on climate, energy, and environmental law at the Congressional Research Service, where she helped shape landmark bipartisan legislation. She also worked in the private sector at an environmental, energy, and land use focused law firm. Andie holds a master's degree in environmental science and policy and a law degree, both from Duke University, and a bachelor's degree in environmental biology from DePauw University.
