

Terry L. Turpin
Director, Office of Energy Projects
Federal Energy Regulatory Commission

Terry Turpin is the Director of the Office of Energy Projects. The Office is responsible for siting infrastructure projects including licensing, administration, and safety of non-federal hydropower projects; authorization of interstate natural gas pipelines and storage facilities; and authorization and operation of liquefied natural gas (LNG) terminals.

Terry started his career at the Commission in 1998 as a staff engineer where he was responsible for the review of natural gas pipeline applications. He then took on positions of increasing responsibility, serving as LNG Engineering Branch Chief, Director of the Division of Gas – Environment and Engineering, and Deputy Director for the Office of Energy Projects.

Terry holds a Bachelor of Science Degree in Civil Engineering and is a Registered Professional Engineer.
