

Dear Chairman Pallone, Chairwoman Eshoo, Ranking Member Burgess, and Members of the Subcommittee:

"I am a victim of domestic violence. Had I not been able to make the choice to have an abortion, I would never have been capable of leaving and starting my life over. Every woman in America, this great nation of possibilities, should be able to make a choice. Her body. Her choice."
- MomsRising member, Michelle, in California

We at MomsRising—a national organization of over a million members who organize and advocate around issues that impact mothers, children, and families—are writing to express our full support for H.R. 2975, the Women's Health Protection Act. This critical federal legislation would protect access to abortion care from state-level bans and medically unnecessary restrictions that are currently reducing or eliminating access to care across the country.

Abortion care is health care. Right now in our country, we are experiencing unprecedented attacks against reproductive health and the legal right to abortion, a fundamental right that the U.S. Supreme Court has repeatedly upheld, most recently in 2016.

There have been 400 needless abortion restrictions enacted since 2011 across the country, which is why Congress must take urgent action to stop these dangerous attacks. Restrictions and the erosion of abortion access across the country cause real harm and can have serious, long-term consequences for a person's health and safety. In addition, some of the laws passed have required medical professionals to provide false or misleading information to patients or to perform unnecessary and invasive medical procedures!

It's also important to uplift the fact that most women who have abortions are already moms, and research shows they do so mainly due to concerns for their families. Being able to manage if we have children, how many children we have, and when we have them has been nothing short of revolutionary.

Moms across the country have shared their abortion stories with us, moms like Caitlin from NJ, who wrote that *"I found out halfway through my wanted pregnancy that the fetus had chromosome abnormalities that would result in multiple physical and cognitive problems. It was devastating news, but we were lucky to be able to terminate the pregnancy just shy of 20 weeks. This is a decision to be made by families in consultation with doctors, not by politicians. That child never had to be born to suffer and my husband and I went on to have another child who never would have existed if I had not gotten an abortion."*

We need the Women's Health Protection Act to block these underhanded political ploys to outlaw abortion and restrict people's right to make personal medical decisions like whether and when to become a parent.

We call on all members of Congress to support the Women's Health Protection Act. Anyone who needs an abortion in the United States, deserves quality, affordable medical care, and a relationship with their health care provider that is free from government intrusion. The Women's Health Protection Act protects these rights: Equal access to abortion, everywhere for everyone.

Lawmakers should not be attacking women, they should be supporting us by ensuring access to health care (including birth control), affordable childcare, equal pay, and the fair treatment of immigrant families. Lawmakers should be bolstering families by passing paid family/medical leave (like every other industrialized nation has done) and prioritizing an end to the mass incarceration that tears too many families apart. What they should NOT be doing is rolling back our rights. What's under attack is not just access to reproductive health care and abortion care, but also women's autonomy and freedom.

Twenty-five million women—that's one in three women and gender-nonconforming people of reproductive age—now live in states in which abortion under any circumstances could be outlawed if the Supreme Court were to overturn *Roe v. Wade*. This war on women, mothers, daughters, and all people who give birth particularly harms those in low-income families and communities of color, who face more barriers accessing reproductive health care.

Women, gender-nonconforming people and all who give birth are the foundations of families, communities, and the economy. We urge this committee to protect women and stand firm against the attack on a woman's right to choose by supporting the Women's Health Protection Act.

We thank this committee for holding a hearing on this important legislation.

Sincerely,

S. Nadia Hussain

Where moms and people who love them go to change our world

Dear Energy and Commerce Committee Members,

Across the country, women's reproductive rights are under attack — now more than ever. That's why we're asking members of Congress to STOP these plans to roll back our right to reproductive health and freedom once and for all with the Women's Health Protection Act (S.1645 / H.R. 2975).

12,527 supporters from around the country, including your constituents, signed our open letter to urge you to the Women's Health Protection Act (S.1645 / H.R. 2975). This piece of Federal legislation would protect access to abortion care from state-level bans and medically unnecessary restrictions that are currently reducing or eliminating access to care across the country.

The letter your constituents signed reads:

As one of over a million members of MomsRising, I am writing to ask that you support the Women's Health Protection Act (WHPA)! Since 2011, hundreds of laws have been passed across the country to regulate and restrict abortion access.

This must stop.

Anyone who needs an abortion in the United States, deserves quality, affordable medical care, and a relationship with their health care provider that is free from government intrusion. The WHPA protects these rights: Equal access to abortion, everywhere for everyone. Please support the WHPA!

Please feel free to reach out to me directly if you have any questions.

Sincerely,

S. Nadia Hussain
Maternal Justice Campaign Director
