PhD (2010) Community Health, University of Illinois at Urbana Champaign
Dissertation Title: Stimulating healthcare organizational improvement through
public reporting of smoking cessation advice rates
Co-Advisors: C. Barr Taylor, MD and Reginald Alston, PhD
Dissertation Synopsis: California hospitals were randomized and intervened on
by notifying treatment hospital CEOs and administrators of their JCAHO
smoking cessation advice performance rates. We also notified treatment
hospitals of plans to publish their performance data in local media in a year
while offering free training for implementation of smoking cessation program.
We demonstrated the secular trend of increasing compliance to JCAHO
smoking cessation by hospitals which overrode any intervention effect.
