

Coronavirus (COVID-19) Testing Plans by State and Jurisdiction

This page contains state testing plans that are part of the government response to the Coronavirus pandemic. These plans set specific targets for COVID-19 testing in each jurisdiction.

Developing State Testing Plans

In early April, governors in each state designated teams to develop testing plans, working with subject matter experts from HHS and FEMA. On May 30, these teams submitted their May-June plans. On July 10, the teams submitted their July-December plans. Both plans are available to view on this page.

Your State or Jurisdiction's Testing Plan

Select a Jurisdiction:

State

A group of experts from CDC and the HHS Office of the Assistant Secretary for Health (OASH) have reviewed the plans and provided feedback. [Learn more about the testing plan instructions. - PDF](#)

Supporting Testing Targets

To support these testing targets, the federal government will procure testing supplies that are in short supply, such as swabs and transport media, and distribute them to each jurisdiction. The federal government will also support the laboratory reagents needs of each state and advise commercial suppliers on their allocation. Finally, CDC staff will work with each state to provide technical assistance for plan implementation, including flexible testing strategies and contact tracing.

Disclaimer: The list of platforms or devices in Table 1.b has been removed as it is deemed confidential.
