UNIVERSITY AND PUBLIC SERVICE

SERVICE ACTIVITIES SUMMARY

Over the past five years, my university service has included chairing a stewardship review committee for a UCSF dean and participating as a member of the search committee for the Dean of the School of Medicine, the Chair of the Department of Medicine, and the Dean of the UC Berkeley School of Public Health. I have provided service to governmental organizations, including serving on numerous Institute of Medicine/National Academy of Medicine/National Academies of Science, Engineering, and Medicine committees. I recently completed service as chair a consensus committee for the National Academy of Science, Engineering, and Medicine on integrating social needs care into healthcare. I was a member of the US Preventive Services Task Force - an independent organization that sets national guidelines for clinical preventive services - from 2010-2017. I have served as the vice chair from 2014-16 and chair from 2016-2017. I have provided public service through my work with the Zuckerberg San Francisco General Hospital Foundation Board and the Lawrence Hall of Science Advisory Council. I have also delivered public presentations on the health effects of high levels of salt and sugar in the diet, and evidence based prevention practice.

CONTRIBUTIONS TO DIVERSITY**CONTRIBUTIONS TO DIVERSITY Contributions to Diversity, Equity & Inclusion Guidance**

Diversity is a cornerstone of all of my activities in teaching, mentoring, and university service, clinical care, improving access to educational opportunities, and research. In teaching, mentoring and university service, I have mentored many under-represented minority fellows and junior faculty and have sponsored 2 fellows for diversity supplements from the NIH. I am the MPI of a grant from the NIH - NHLBI providing training and mentoring to under-represented minority junior faculty from around the country. I have organized a course on health disparities and social determinants of health in the Department of Epidemiology and Biostatistics. My clinical care is in the general medicine clinic at Zuckerberg San Francisco General Hospital where I care for race/ethnically diverse and low income patients. I am the MPI of an NIH grant with San Francisco State University to increase opportunities for race/ethnically diverse undergraduates in science and have initiated and continue to help oversee a summer program

for under - represented minority undergraduates in the Clinical and Translational Sciences Institute. I co-founded the UCSF Center for Vulnerable Populations (CVP) - a research center focused on improving health and healthcare to vulnerable populations. At CVP we received an award from the NIH (that I help lead) to increase participation of sexual and gender minority populations in the All of Us National Cohort. My own research focuses in part on cardiovascular disease disparities among poor and minority populations.

TEACHING AND MENTORING

TEACHING SUMMARY

I am engaged in both formal and informal teaching directed at medical students, residents, fellows, and junior faculty. I direct the training programs of the Clinical and Translational Sciences Institute that provides didactic training in clinical and translational science methodologies for many levels of trainees. I helped develop the Prehealth Undergraduate Program, a summer program for undergraduates that provides an introduction to clinical and translational research.

I have helped develop and direct a new course on social determinants of health and health disparities that is now taught as a short course for general researchers and a more in-depth course for those interested in conducting disparities research. I have also developed a 12 hour seminar discussion course for first year medical students on the topic of the role of precision medicine in addressing disparities.

I have been a faculty member in the CTSI K Scholars Program, a career development program for junior faculty, and in a new quarterly career development program for the UCSF School of Medicine Watson Scholars (junior faculty under-represented in medicine). I have a K24 mid-career mentoring grant from the NIDDK and have mentored over 20 fellows and junior faculty engaged in research. I also teach residents and medical students in my capacity as an attending physician in the general medicine clinic. I am the MPI and faculty of a NHLBI-funded training program that includes a summer course in implementation science for under-represented minority faculty from around the country.

2007 - 2019 K Scholars program-6 hours monthly

MENTORING SUMMARY

I have devoted considerable attention to mentoring fellows and junior faculty in clinical research. I pride myself particularly in mentoring trainees from across a range of disciplines, including cardiology, nephrology, obstetrics and gynecology, health services research, epidemiology, and nursing. I was a faculty member, mentor, and leader of several training programs within the CTSI focused on mentorship and faculty development. I helped develop our K Scholars Program that provides career development, skill development, and mentorship to over 50 junior faculty with K awards each year. I currently have a K24 mid-career mentoring grant from the NIDDK and have mentored over 20 fellows and junior faculty from across multiple disciplines, medical sub-specialties, and departments. I am also the MPI of an NHLBI-funded program to provide mentorship and training to under-represented minority junior faculty from around the country conducting implementation science research in fields of interest to the NHLBI.

RESEARCH AND CREATIVE ACTIVITIES

RESEARCH AND CREATIVE ACTIVITIES SUMMARY

My research focuses on the prevention and treatment of cardiovascular disease, with a particular emphasis on racial disparities in disease incidence and outcomes. I use tools ranging from clinical epidemiology and health services research, to implementation sciences and computer simulation modeling. I have two areas of active study. The first includes identification of risk factors for the development of cardiovascular disease in young adults. Research in this area includes modeling the longitudinal effects of a) early and poorly treated hypertension, b) sub-clinical kidney disease, c) lifestyle factors such as obesity, and d) poor access to preventive health care services. I have focused particular attention to the development of hypertension in African Americans that occurs in young and middle age. The second area of interest is the development of strategies to improve the prevention, diagnosis, and management of cardiovascular disease and additionally address race, ethnic, and income disparities. Studies in this area involve a) evaluation of public health strategies to prevent early development of cardiovascular risk factors using computer simulation modeling and b) development and assessments of interventions to improve management of hypertension and heart failure, particularly in low income and race/ethnic minority populations.

ACADEMIC LEADERSHIP

UCSF Leadership

I am the founding co-Director of the UCSF Center for Vulnerable Populations (CVP) at Zuckerberg San Francisco General Hospital. CVP was founded in 2006 and is a research center focused on communities at risk for poor health and inadequate healthcare because of social circumstances. From 2012-2018, I served as the CVP director and under my leadership CVP grew to an annual budget of 8-10 million from grants and philanthropy; CVP has led and supported multiple large center grants from the NIH, the Agency for Healthcare Research and Quality (AHRQ), the Centers for Disease Control and Prevention (CDC), and the Human Resources and Services Administration (HRSA). As CVP director, I helped develop mid-level faculty who have expanded the reach of CVP and increased its national visibility; CVP has more than 20 core faculty and many more affiliate faculty from across all of the UCSF campuses. Under my leadership, CVP developed several programs led by CVP faculty, including programs in housing, homelessness, and health; food insecurity; health information technologies; and health communication. In addition to obtaining grant funding, I have help lead efforts to raise funds from philanthropy including 1.5 million for the renovation of our current facility.

I am the co-director of the UCSF Clinical and Translational Sciences Training Institute (CTSI) and directed the training programs in the CTSI from 2013-2018. I have directed or played a major leadership role in every training program within the CTSI, including leading the K scholars program during its expansion to serve those with career development awards from across campus. Our K Scholars program currently serves 50-60 junior faculty annually from across all 4 schools at UCSF and has been influential in establishing a cadre of junior and now

mid-level faculty trained in clinical and translational research and the conduct of collaborative, multi-disciplinary science. Under my leadership, CTSI has expanded the undergraduate training programs through additional NIH funding to include programs to enhance the pipeline of under-represented minority students. We have developed a new online certificate program in implementation sciences, and I have helped to expand interest in this program through my work within the NHLBI and the NINDS to increase training opportunities for junior faculty nationally. With others in the CTSI, I helped to craft the successful KL2 and TL1 application as a part of the CTSI renewal, and helped develop and launch a new postdoctoral fellowship program in the early translational sciences. I have been a member of the CTSI Board for the past 6 years, helping to shape the strategic direction of CTSI during leadership transition and the CTSI renewal.

In August 2017 I was named the inaugural Vice Dean for Population Health and Health Equity in the UCSF School of Medicine. In this role, I have been tasked with helping to develop the School of Medicine strategic direction in population health and health equity across the School of Medicine missions of research, education, clinical care, and service. Major accomplishments since being named to this position include.

- Obtaining strategic funding and launching the Population Health Data Initiative to enhance the data infrastructure for work in population health. We have geocoded health record data from UCSF Health and the Department of Public Health and linked to other data related to place-based determinants of health. We have worked closely with the Office of Population Health and Accountable Care to identify use cases for these place-based data to advance population health management. We are currently developing capacity to obtain access and make available via institutional license health service and population health data, including developing the appropriate computing environment for these sources with other initiatives on campus.
- Helping launch a Health Equity Council within UCSF Health in partnership with health system leaders to assure equity in patient quality and safety initiatives.
- Launched Scholars in Population Health and Health Equity with philanthropic funding. This program provides pilot funding to junior faculty engaged in research or programming that will advance population health and health equity at UCSF.
- Obtained a 2.3 million dollar gift for the Health Equity Innovations Hub at UCSF to support infrastructure to allow more faculty at UCSF to direct their research efforts to address health equity needs.
- Launched annual colloquia on major topics in population health and health equity. In 2021 the topics included a 10-hour virtual symposium entitled "Racism and Race: The Use of Race in Medicine and Implications for Health Equity" and a 3 part series on "Climate Change and Health"

In October 2017, I assumed the position of Chair of the Department of Epidemiology and Biostatistics (DEB). DEB has approximately 90 primary faculty across 6 divisions. Major accomplishments during my tenure include:

- Increasing annual NIH grant dollars within the DEB. This level of NIH funding places us within the top 10 in NIH funding for similar departments within Schools of Medicine nationally and is comparable to NIH funding among Schools of Public Health.
- Led 1 all-faculty retreat and several mini-retreats to develop departmental strategic priorities and evaluation of our division structure and development of faculty leaders. As a result of these efforts, developed plan for transition of division leadership that has resulted in increased diversity by gender among the department leaders.

- Launched an integration of our educational programs to allow for greater financial accountability and governance of our educational programs. The department currently houses a Masters and Certificate in Clinical Research, a Certificate in Implementation Sciences, a PhD in Epidemiology and Translational Sciences. A new Masters in Data Science was recently approved and a Masters in Clinical Informatics are planned. During my tenure all of the training programs of the CTSI were transferred to DEB, and new grants for residency training were also awarded.
- Launched "Good Ideas" and "Big Ideas" contests via an open proposals platforms to engage faculty in developing new lines of research within the department.
- Increased philanthropy including a new 22 million dollar gift to the department to advance projects related to the study of overuse and underuse of new medical interventions.

In April 2020 I was named chair of the UCSF COVID-19 Community Public Health Initiative. The Initiative has funded major testing efforts in communities in the San Francisco Bay Area at high risk for SARS-CoV-2 transmission.

In January 2021 I was named co-director of the University of California - California Department of Public Health COVID Modeling Consortium to bring UC and CDPH modelers and public health decision-makers together to develop models to inform public health decision-making.

National Leadership

From 2010-2017 I was a member of the US Preventive Services Task Force (USPSTF) - an independent body that helps set national guidelines related to clinical preventive services. I served as vice-chair of the USPSTF from 2014-2016 and as the chair from 2016-17. I have co-authored over 50 USPSTF recommendation statements (listed under "Other Publications"), including leading more than 20 statements as chair or vice-chair. Under my leadership the USPSTF worked to increase transparency, to advance its methods in the area of simulation modeling and addressing diverse populations, and to increase interaction and communication with stakeholders.

In 2016, I helped conceive, organize and lead a national summit convened by the White House Office of Science and Technology Policy and the Bill & Melinda Gates Foundation to explore the role of precision approaches in public and population health. The Precision Public Health Summit: the First 1000 Days of Life brought together over 100 national thought leaders in precision medicine, public health, child health, philanthropy, data sciences, and technology to explore the role of big data and new technologies to address public health challenges during the first 1000 days of life. I currently am leading efforts at UCSF to expand the local and national discussion of how advances in data and technology will have an impact on public and population health.

I have chaired or co-chaired several workshops for the National Institutes of Health. I chaired a consensus committee of the National Academies of Science, Engineering, and Medicine on integrating social care into the delivery of health care. The final report from this committee was released in September 2019 and a synopsis I authored was simultaneously published in JAMA. I am currently chairing a consensus panel on diversifying clinical trials and research. I am also the co-chair of the National Academies Roundtable on Population Health.
