

Biography

Dr Thomas Hwang is Director of the Cancer Innovation and Regulation Initiative and Assistant Professor at the Program On Regulation, Therapeutics, And Law (PORTAL) at Brigham and Women's Hospital.

Dr Hwang is a physician and health policy researcher. His research initiative focuses on international regulation, clinical development, and payment of new medicines, medical devices, and digital health interventions in cancer care. He has published over 100 peer-reviewed papers, including in the New England Journal of Medicine, JAMA, Science, Lancet, and Lancet Oncology. He serves on the European Society for Medical Oncology's Working Group on the Magnitude of Clinical Benefit Scale and is a Visiting Senior Fellow at the London School of Economics. In 2023, he was named one of STAT's "Wunderkinds" as one of the nation's leading experts on pharmaceutical regulation. He was previously a Visiting Expert at the European Medicines Agency and has work experience in venture capital. He received his undergraduate and medical degrees from Harvard, where he was the 21st recipient of *summa cum laude* in Harvard Medical School's history.
